Send him an email address in the form 7xxxxx.yyy@compuserv.com

Note that the comma in his Compuserve number is replaced by a period
when used as an email address.

There ain't no stupid questions!! You are correct, the UV kills ropes that is why generally for towers and masts folks use wire or cable. If the installation is not too big, like a vhf vertical or small beam you can get guy wire designed for TV antennas at Radio Shack (as well as other hardware needed for guying). Regarding ropes, if you go to your friendly building supply store and look on the packages (or they may have a chart) you will find data as to the characteristics of the rope, breaking force, stretch, etc. Included in the chart us UV resistance. Of course the cheap stuff has very low UV resistance (as I found out when I put up a dipole with it a few years ago). If putting up wire antennas it pays to get the better ropes. Good luck, Bill, WB2JMX

Source record: 146626

most direct route is 15 south to 52 east. 52 turns into city street. keep going east. stay in the left lane. Just before you go under hwy 67 there is a frontage road on the left. You should be able to see the Santee Drive In Theater ahead and to the left. take the frontage road to the left and follow to the drive in theater.

It is a somewhat typical weekly swap meet that on the 1st and 3rd saturdays has a large electronics and computer turnout. The swap meet does not have that commercial quality a lot of swap meets have. From memory of about 4 years ago, there were 30 or 40 different people set up selling ham type electronics and computer stuff. I liked it. I wish we could get something like it started in Denver. The swap is very much oriented towards the common man cleaning out his/her garage. Not like a Kobey's swap meet heavy on the repeating weekend business.

Near mint 160-10 Meter transceiver with digital display, CW filter,
operator and service manuals. Very low hours...it still has the original
final tubes. No problems, a few documented reversable mods added from
Kenwood and QST hints and kinks. Two BNC connectors added on back to allow
external reciever. Asking $350. Local pickup in the Detroit MI area
preferred. I am the second owner (non smoker) and have had it since early
eighties.

Thanks for reading this post. I am looking for a procedure for
calibrating HF SWR and watt meters. I have a good idea on
how to cal. the SWR portion, but the watt meter would require
a calibrated RF voltmeter to read the voltage across the load
resistor. There are RF voltage probes you can build in the
1995 ARRL handbook, but how do you cal. those? I need
a simple standard of some sort. Ideas?

Well Paul,

The good news is that it is supposed to do this. The R-1000 reads 1-2 KHz lower on lower LSB and 1-2 KHz higher on USB. The bad news is, of course, that you cannot 'fix' the LSB without making the USB worse. Just accept it and go on and live a happy life.

8^)

Let's not forget that Radio Progressive closed because of a provincial regulation that put a burden on a small business.

However, unless there's been a recent change, there is still someone selling amateur radio equipment in Montreal (besides Radio Shack, that is). Radio HF (110 Churchill Blvd in Greenfield Park) which has been around for a number of years selling shortwave listening equipment, apparently added some ham equipment to fill the void that Radio Progressive left when they closed.

Perhaps they'll be at the Montreal Amateur Radio Club fleamarket on April 17th.

There never were a lot of places to buy ham equipment in Montreal. Back when I was a kid, the only place I can think of was Payette Radio, and it didn't deal only in ham equipment, but was an electronic component store that had a section for hams. Etco had some ham-related equipment, though I can't remember if it sold new items. It was a great surplus place (you could still get Command Set transmitters there in 1972 for ten dollars), and you could buy plenty of parts and antenna-related items. Both stores were in the same general area, along with a few other electronic stores, and it was always fun to take the metro down there on a Saturday and visit them all. None of those stores exist today; in fact most of them closeda long time ago.

17. Re: GAP (vertical) Antennas?

Newsgroup: rec.radio.amateur.misc
Date: 1999-04-01 00:00:00 UTC
From: Gap Owner <spamsomeoneelse@youraddress.com>
Message-ID: <37045FCD.E9D85117@youraddress.com>
Source record: 146638
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.misc

BD,

I am the owner of a Gap titan. Right off the bat, I would never recommend this antenna to anyone (except someone I am going to be contesting against.)

I received my antenna almost two years ago. I had some difficulty putting it together because some of the parts came damaged. The manual that I received was poorly photocopied and barely stapled. The instructions were not clear, and difficult to follow. I found that some of the parts did not fit well. I have had somewhat mixed results with this antenna, but must admit that I am fully restricted to "off-hour" operating times due to the large amount of RFI my Gap Titan unleashes. I have tried RFI filters on the output of my rig, and on the television. After working with my neighbor on several occassions, I finally relented to promising to only operate while he was asleep or away.

I contacted gap right away to ask for help and found that their interest in helping me was at best "swayed by the weather." They were initially interested, but eventually said it was my location that was the trouble and nothing could be done.

How does it do? Well, I participated in the WPX contest. I had a good time, but dared contacting only the strongest of stations. This isn't the antenna you want to break a pile-up with. Someone mentioned that this is the antenna that barely get's out over itself. I laughed because I thought of myself calling out, hoping someone could use my call as a multiplier. HA! 20m performance is average, and 40m is okay. Forget about 80m unless you like wasting your time. Now as a shortwave antenna, this thing probably isn't too bad.

I hope this gets to you before you buy it. Save your money for a dipole, or something different than the Gap Titan DX.

Sincerely,
Gap Owner

Yes, precisely. Indicating that your 'preliminary design' is daft. You
need a noise generator with a sensible noise temperature. At 70 MHz, an
avalanche doide source may not be too good, but maybe OK for a fairly
narrow-band application. I've used avalanche diodes at 10 MHz but no
higher. Traditionally, tungsten-filament vacuum diodes were used, with
the advantage that the noise output could be calculated from first
principles.

No. Flares can't hit the ground. How they effect satellites,radio and power
systems is through electrical energy. Ions in particular. This is also what
causes the northern lights. The satellites get overloaded from the energy and
their electrical components sometimes get fried.

I have worked So Fla to New Orleans on 3 watts using IC 502 and the internal
whip antenna. Also worked 9 states using just 10 watts.

Takes more work with low power and higher frequencies.

The CB Band has proven that anyone can go out and buy a big radio and a big
amp. Then go the Radio Shack buy some RG-8 and a piece of wire and talk
across the Atlantic. The problem why they don't use the VHF bands is they
have to work at it.

Kevin,

Try the ARRL at:

www.arrl.org

It's a start. They can help you locate a club in your area that
may have a VE program. They also have plenty of
books and license manuals available for purcahse. If you have more
questions, just ask here.

Joe, W1GFH

28. Southside ARS has moved

Hi and thanks for reading this message.

We wish to advise that the Southside Amateur Radio Society Web Page has moved.

Our new address is http://www.qsl.net/vk4wss

Our new e-mail address is vk4wss@qslNOSPAM.net (PLEASE REMOVE NOSPAM)

Why not pay us a visit and read about Chris Bourke's (VK4YE) Kilowatt Linear project, subscribe to our on line newsletter, see what Australian contest are coming up, or check out some of our links to Amateur Radio Related software sites

You can also try out our online NAOCP and AOCP theory exam and get some useful tips on CW.

Hope to see you there.

Regards
Adam Jaroszuk (VK4LAJ)
Web Master/ News Editor.
Southside Amateur Radio Society Inc.

Kevin:

Sounds like you have a good start. You should, by now, have the very basic electronics (ohm's law, series and parallel circuits, power factor, ect), which is a lot more than most hams start with. You are almost there.

Radio wave propagation, things like volocity factor (the ratio of the speed of radio waves in free space [the speed of light] to their speed in a conductor], a few rules and regs, and you are there.

Keep up the good work.

>What does FM (voice) transmissions sound like when received on an AM radio?
>Is it used much on HF?
>
>

The only place I know of FM used on HF is on 10 meters.

Many years ago, I belonged to a club that had a 10 meter link on their 2m repeater. They had a 5 element yagi pointed down to a 10 meter repeater in the Virgin Islands.

From the keypad of my 2m Ht, I turned on the 10 meter link, and heard a G4 station calling CQ. This guy was in his car, taking a Sunday drive in the England country side, and we had a nice conversation for a short while, because I knew there were others that wanted to talk to him.

FM on HF is almost as much fun as CW.

Welcome to the Auxiliary Communications Service Newsletter, developed by the ACS Training Unit of the State of California Governor's Office of Emergency Services. Please visit our ACS Home Page at http://acs.oes.ca.gov

The purpose of this weekly newsletter is to bring those of us in emergency communications closer together by sharing common ideas, and by introducing new technology into the emergency services community. All individuals with an interest in emergency communications, disaster preparedness or helping the community at large are encouraged to participate here in an open forum.

You will find a virtual community here, with representatives from many different organizations with the same common goal: emergency response. We encourage everyone, from whatever organization you represent (or just yourself!) to bring us your ideas, suggestions, concerns, manuals, handbooks, or opinions so that we may share them with the group. To those of you who have just joined us, welcome aboard!
.....

Please Welcome:

This week's EMCOMM Bulletin:

EMC177 Video Damage Assessment
To: Emergency Communications Units - Information Bulletin
To: Emergency Management Agencies via Internet and Radio
By: Auxiliary Communications Service (ACS) of the
California Governor's Office of Emergency Services

EMC177 Video Damage Assessment Release 3/29/99

An article in the October 1998 Civil Air Patrol NEWS, vol 30, No 10, was the basis of this bulletin.

"During September Tropical Storm Francis stood off the coast of Lake Charles, La, then finally moved slowly towards east Texas. During the time it hovered it pumped heavy rains and vicious winds into southern Lousiana. The resulting floods, wind driven tides and tornadoes caused significant damage to the state's roads and levee system."

Being unable to assist with flying due to the weather, CAP wing members decided they would develop some capability for uploading damage-assessment video to the Internet. They figured it was just a matter of time before being asked to assist the Louisiana Office of Emergency Preparedness (LAOEP) and they were going to be ready.

They purchased a computer peripheral device to capture and transform a video-input signal to a digital computer file and figured out how to download aerial slow scan video.

The next day, a call came from a local office of emergency preparedness, tasking the unit with a number of missions of assess damage from flooding and tornadoes. Three teams and ground crews worked throughout the day taking pictures and uploaded 24 "shots" onto the CAP mission web site for all the responding agencies to use.

The day after the LAOEP asked CAP "to survey flooding south of New Orleans, where a canal levee was leaking and two towns were underwater. Levees were breached and severe flooding was occurring over a broad area. An air crew and a ground team were formed and armed with video and still cameras. After some setbacks they uploaded vital video images on the Internet. In addition, video film and 35mm photographs were placed in the hands of the LAOEP planning staff."

When the three-day period was over, the Louisiana Wing had "mastered a new and very valuable capability - filing near real-time video on the Internet and transmitting it via computer to big screen displays in the LAOEP command post for all the planning staff to use."

_____
Summary:
Use of working systems, like the Internet, is a vital tool in today's emergency community. Yes, it may fail, but until it does, use it to its fullest and be prepared for an alternative when it does fail.

To subscribe to bulletins, use the Subscription Services web page at <http://acs.oes.ca.gov/subscribe.html>. If you don't have web access, just send an e-mail message to <mailto:emcomm-bulletin-sub@harthaven.com>.

- For training assistance contact the ACS Training Officer at the web site or send an email to larton@garlic.com
- Submit suggestions, topics or comments on the bulletins to cary.mangum@macnexus.org or cary_mangum@oes.ca.gov

Bulletins are on the ACS Web page: http://acs.oes.ca.gov -and a Landline BBS: 916-262-0856 (graphical & standard interface); and a FTP Archive: ftp.ucsd.edu/hamradio/packet/tcpip/incoming for some bulletins. For earlier ones: ftp.ucsd.edu/hamradio/races
EOM
.....

Please let others in the emergency services field know of the newsletter, and encourage them to join... If you have opinions, suggestions or written material that you'd like to share with the group, let us know. We're always looking for new ideas and suggestions that will benefit everyone.

See you next week!

Kevin,

The ARRL puts out a series of books about studying for amateur radio licenses. These can be purchased from the ARRL directly or just about any ham related store - Ham Radio Outlet, Amateur Electronic Supply, etc. The book you want is titled "Now You're Talking".

For mobile operation you might try connecting a microphone across your car's alternator terminals, then reving the engine to the frequency of choice. With this technique, however, you may experience frequency instability while driving in traffic. A PLGP (Phase Locked Gas Pedal) will solve this problem. There are many PLGP implementations, the most common being an ordinary brick propped up against the pedal.

Hope this helps

the BEST thing is NOT to buy anymore amateur radio related equipments.
in any case, the business that conducts amateur radio in general, are
not in good shape. for example, we don't have anymore amateur radio
stores in Montreal area as far as i know... which used to be in
presence in scale of 10s. it is your fault in playing the games.
take care.

44. Food for thought

Newsgroup: rec.radio.amateur.misc
Date: 1999-04-01 00:00:00 UTC
From: "A. Guru" <w7el@teleport.com>
Message-ID: <37035888.BE65E31C@teleport.com>
Source record: 146746
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.homebrew,rec.radio.amateur.misc

It's tough, but once in a while I can tear myself away from the newsgroups and just think for a bit. And when I do, the wheels really turn! Here's what I came up with this time, some food for thought.

Years & years ago, I was getting set to put up an inverted vee antenna. I looked in one of the popular handbooks for advice, and it cautioned me to make sure the included angle was at least 90 degrees, otherwise "severe pattern cancellation" would result. Wow. Of course I made sure the angle was at least 90 degrees. Or at least almost 90 degrees. But you know, that's nagged at me all these years, so I did some more thinking about it. Sure enough, if you move the wires closer and closer together, the antenna looks more and more like a transmission line. In fact, you could say that the transmission line mode begins overwhelming the antenna mode when they get really close. And transmission lines don't radiate. Well, I whipped one of these up out of curiosity, with an angle way less than 90 degrees, to see what would happen. Sure enough, when I transmitted nobody came back, even though I made a really, really long CQ (I don't know, maybe 50 CQs, then signed my call a couple times). So if it was putting out, somebody must have heard me. I checked the power going into the antenna, and there was plenty of power going in. But nothing coming out. So where the heck was the power going?

Now, we all know that when the patterns reinforce, you get more power. Like, 6 dB gain means that you get 400 watts out for 100 watts in. (One of the big name writers said this in one of the magazines not long ago, so I know it's true.) So what if the patterns cancel? What am I getting out for my 100 watts in?

If you don't know the answer to this, you obviously never took thermodynamics. The second, or the first -- anyway, one of the laws -- says you can't win. So there's got to be less than 100 watts coming out, but it can't just disappear. Just think about it. If the patterns add, you get more power, and that's energy, right? So if they cancel, you have to be getting negative energy. Positive energy makes heat, so negative energy has to make cold. That 100 watts of positive energy is making cold, negative energy! Now, some pointy-head Ph.D. is going to leap up any second and yell a bunch of stupid objections. But shoot, even a Georgia farm kid knows that YOU'VE GOT TO PLUG THE DANG REFRIGERATOR IN. Anybody with just plain common sense can see that it takes positive energy to make things cold (negative energy). Bet you never stuck a six-pack in the refrigerator and had electricity come out of the 'fridge plug while it cools off! Duh! No, you've got to put the positive energy in to get that negative cold energy into the beer.

So there we have the no-moving parts refrigerator. It's a great Field Day accessory. And I'm the first to discover it. Nobody else even thought of disregarding the learned advice and making the inverted vee with a really skinny angle. If you don't have any wire handy, you can just hang the beer off the back of your beam. Or maybe the side would be better. Whatever.

After making that great discovery, I had to take a break to calm down, so I started fooling with one of those computer programs that tells how an antenna will work. I was just about falling asleep slogging through a boooring example, when something jumped right out at me! Here was what looked like a plain dipole in a back yard, but its gain was 6.82 dBi! Whoa! Well, that shows how dumb these programs are. But I have a friend that has 'em all -- ELNEC, MININEC, MN, NEC-2, EZNEC, MININEC Broadcast Professional -- even NEC-4. They all said the same thing! So in desperation he dug out ol' Sterba's favorite tools, a dull pencil and slide rule. AND GOT THE SAME ANSWER! Now anybody knows the gain of an ordinary dipole is 2.15 dBi. So this thing has a gain of 6.82 - 2.15 = almost 4.7 dB greater than a dipole! And it looks just like one. Of course it can't be an ordinary dipole because it's got gain. But I don't think I'm the first to discover this one. This must be how some of those big guns put out such a gynormous signal while running only 1.5 kW. They've figured out how to make beams out of these special dipoles, and are keeping it a secret from us. Boy, if they ever figure out how to make amplifiers, it's all over for the rest of us. Just the other day, I saw a posting on the homebrew newsgroup where a guy wanted to buy a 3 kV, 2A transformer (or was it 4kV, 1.5A -- I forget). Anyway, he obviously doesn't know how to make an amplifier with more than 25% efficiency. But boy do those guys know the antenna secrets!

Well, I thought up a couple more great ideas, like how to make a 3-element beam with 3 s-units gain over a dipole (both in free space), and how to make a super broadband antenna with good SWR over the whole HF band and beyond without a tuner or adjustment. But my fingers are getting tired and my throat's getting dry, so I'll have to leave those for another time.

So until next time, keep your wires in the air!

A. Guru

45. Amateur Radio Poll

From: stereodoc1@aol.com
Message-ID: <19990401070224.10291.00000810@ng-ch1.aol.com>
Source record: 146747

Please take my Amateur Radio Poll:

1. Are you a member of American Amatuer Radio Association (AARA)?

2. Are you a member of the Internation Amatuer Radio Network (IARN)?

3. Does either organization live up to your expectations? If so, which organization?

4. Do you listen to K1MAN's daily broadcasts? If so, do you think they are beneficial?

Thank you.

Hallo Leute!
Ich verkaufe ein FT-50 R mit ALLEN Features!!!
Es handelt sich um ein 2m/70cm Handfunkgerï¿½t...
Empfang (durch Umbau) von 50 MHz-999MHz
Senden (auch durch Umbau) ca. von 121MHz-230MHz und von 320-505MHz
Sendeleistung 5W bei 12V, 2,5W bei 6V
Voll Funktionsfï¿½hig, optisch und technisch voll in Ordnung
1 Jahr alt, selten benutzt
Zubehï¿½r: Akku 6V 600mAh, Schutztasche, Speakermike, 12V Autoladegerï¿½t
(Selfmade), 230V Steckerladegerï¿½t, Gï¿½rtelklip

Preis: 750,- (fest)

Bei Interesse mail an RobertHeinze@t-online.de

"BD" <bodu@pobox.com> wrote:
> What does FM (voice) transmissions sound like when received on an AM radio?
> Is it used much on HF?
>
> In order to receive a FM voice signal (F3) on a AM receiver (A3) you must use a technique called "slope detection". Open up your receiver to the widest selectivity possible. Preferably 6 khz. Tune in the signal for maximum S-meter reading, then tune slightly off the center. This will cause the FM signal to vary in amplitude, thus allowing the AM detector to recover some audio. The signal will sound slightly distorted but readable.

29.5 and above is a good place to find FM activity. 29.6 being the calling frequency for simplex and above that are repeater outputs.

Sorry to disappoint you, Jim. But the mike arrived in fine shape and works great! Your little e-mail "curse" didn't work....."Scumbag".....

I tend to view rants like yours with a grain of salt. After all, there are TWO sides to EVERY story. We've just heard yours.

I'm reminded of the former employee of a major ham radio mail order outlet (not AES) who told me of a customer who kept returning 2 meter amps and declaring them "broke". After amp number four was returned, a technician was dispatched to see what was going on. In the meantime, the customer was ranting and raving and demanding another amp. It seems the tech found some major alterations inside the amp. He then checked the other three, the same thing! After much discussion, the police were called because the customer was becoming obnoxious. The police were able to determine that the man was a CB'er, and was trying to modifiy the amps......for 11 meters!!!!!!!

I'm also reminded of another radio mail order company who was so tired of the vulgarity, racial slurs, death threats, etc., that some irrate customers would exhibit, that he's switched to a totally voice-mail automated ordering system. He just couldn't stand to deal with todays new brand of vulgar radio customer.

If I were a business owner and had to deal with these kinds of punks after the course of a year, I don't think you'd see me get up out of bed, all happy and perky, ready to meet a bright new day at AES.......

67. Noise Generator Question

Newsgroup: rec.radio.amateur.misc
Date: 1999-04-01 00:00:00 UTC
From: Artur Leung <aleung@ittc.ukans.edu>
Message-ID: <3703CC36.51EA75DE@ittc.ukans.edu>
Source record: 146769
Cross-posted to: sci.electronics.design,rec.radio.amateur.digital.misc,rec.radio.amateur.misc

Hi,

I am trying to design a noise generator to test a receiver design, and would like to get some suggestions from folks on the cyberspace. Basically the receiver is a digital design, and there is a ADC to convert the IF signal into digital bit stream. The IF is 70MHz and the student who told me about the design said that the input to the ADC is 0dBm and data rate is 200kHz. There really isn't a "channel" there and no LNA and AGC, and I guess that's why the input signal is at 0dBm (pretty high.....).
As a result, in order to measure the bit error rate from Eb/No at 0dB to 20dB, I need a lot of noise power. Since Eb = S * Tb = 0dBm - 10*log10(200kHz) = -53dBm/Hz. As a result, the noise spectral density has to be from -73dBm/Hz to -53dBm/Hz.
The preliminary design is to use a 50ohm termination as the noise source. As 25 degree C, thermal noise is at -174dBm/Hz. As a result, I need a 100dB to 120dB of gain on the amplifier. Although I could do that, I am afraid that the amplifier has too much gain that it will turn into oscillation very easily.
So folks, is there any reference material that you could point me to for similar design, or have you ever done something like that before? Any comment and suggestion is certainly welcome. If possible, please send me a reply via e-mail besides sending a reply to the newsgroup. Thank you very much. 8-)

Hi Ed :
I have one of these, and I'm very happy with it. One thing I wanted from the outset
was a simple radio. Complexity in a mobile radio for me means more chances of me

driving off the road while fiddling with some double-function button.
I also like the tune control (puts out a CW at 10w for a tuner). The blanker works
very well indeed.

The 'preliminary design' was the decision to use a resistor at room
temperature as the noise source. The need for a huge gain was a
consequence of that. The obvious thing to do is to use a 'hot' source of
some kind.

That's becuase 6 V diodes are more or less true zener diodes. What is
needed is an *avalanche* diode, which is why I specified a 12 V part,
and added the info. about using the *difference* between the noise
voltages of two such diodes, which is more accurately white noise than
either noise voltage alone.

Folks this is the sort of crap we have come to expect
of the US government and COMSIMPS who support it.
America is not my country and her people are not my
people because I am a Christian. No Christian can owe
allegiance to a country which engages in infanticide.

As for keeping an eye on me, this is the very same
sort of thing that FEDGOV did prior to the murder of
the Branch Davidians. As for federal employees who
owe allegiance to FEDGOV even when it is wrong,
consider that the Nurenberg defense has been rewarded
with hanging before. Hanging is really to good for
Clinton NAZIS.

BD, In my opinion, If the individual in question has a gripe or wants redress of an bad situation with a product by all means put it out so that others may avoid the same situation as many did with the R-7000 did in the past. But in the same vain at least the individuals that had the problems put the name and call (if one) on the line, and afforded the company the chance to rectify the issue. Enjoy the Antenna, and for $75 bucks you got a Deal, sure beats paying the full price BTW wat model is it?. My interest in small space antennas has been an ongoing project for me for years. As you will see many OM have the space to put up traditional wire antennas as a last resort and many have the proverbial antenna farm ,in my opinion the urban and space and or deed limited operator has been neglected by the main stream providers. (exept for the smoke merchants at astronomical costs) The Gap's worked well for me in the past and I hope that they will provide you better service in the future.

Good Luck with the Plus part of the ticket, it is well worth the effort.

This is a classic example of liberals who have no
knowledge of the issues, but this never seems to
prevent them from embarrassing themselves by showing
how little that they know. The survivors of government
instigated genocide of April 19, 1993 were indeed
tried and found INNOCENT a year later, then illegally
put in jail for using firearms in the commission of
a crime, without specifying what the crime was. To this
date the judge refuses to cite what the crime is.

Returning to the original point of this thread at:
http://www.atlcom.net/~geozim/index.htm

FCC JAMS HAMS,
the FCC is a criminal faction of a criminal executive branch,
engaged in a criminal coverup which is further protected by
a criminal Justice Department, also a party to the crime.

The FCC knowingly, intentional, deliberately, willfully and
purposefully supplied radio jamming equipment to the FBI and,
with reasonable assumption, to the US Air Force for the
purpose of jamming AM and FM radio broadcasters, TV
broadcasters and the Amateur Radio Service. The amateur
station jammed was defined as a Title 47, Code of Federal
Regulations, Part 97.405 Station in Distress, relaying
emergency communications critical to safety of human life.
As a result, appoximately 100 people died.

FCC is also a deliberate violator of the Freedom of
Information Act, using an exemption of documents not
allowed under the list of exempted documents types.
Whereas, I have not posted details on this to the
website yet, you can read the 36 descriptions of
FOIA requested documents in the FOIA Administrative

Appeal letter. All of these are denied on the basis
that I have figured out what the nature and content
of the documents are, and the FCC does not want to
verify my logical, analytical and deductive work
that has narrowed down the documents almost to the
point of writting them myself. Actually, I already
have two of the documents, and stand ready to
publish them, as soon as I can arrange to leave the□
country, and post them from a safe place.

Neither last nor least, but in closing on FCC criminality,
FCC is a criminal co-conspirator with FBI to classify
documents pertaining to the criminal operations of the
FCC and FBI. Such classification of documents for the
purpose of avoiding criminal prosecution is specifically
described as a criminal violation in any Executive Order
pertaining to such classification at the time of
classification.

Get the FCC out of the control business, contact your□
Congressman, ask that he support Henry Hyde of the House
Judiciary Committee to convene a hearing into the
criminal coverup by FCC Chairman Kennard of the
criminal operations of the FCC and FBI and US Air
Force engaged in Communications Act violations.

Get the American Radio Relay League out of its
tyrannical misrepresentation of the amateur community.
Publish the fact that the ARRL board voted not to
reveal the criminal operations of the FCC and FBI.
What decent person would be a member of such
a criminal organization. If you are in the ARRL,
moral integrity demands you quit.

and before you start, check that FSD appears with same power level
with SWR meter connected one way and the opposite
Have built some VSWR and power meters for 35 years, and have bought
some commercial power meters, OSKERBLOCK and Bird Model 43, none of
them are very accurate, including Bird model 43, but it is usually of
very little importance whether the power is 90 or 100W. Read the
instruction book for Bird Model 43 thoroghly to get a better
understanding of which levels the meter shows. Believe Marconi
Instruments 2955 is quite accurate for VHF/UHF, but it costs at least
ten times as much as Bird model 43

UPDATE on this...

AES has credited my charge card for the amount charged plus shipping.

Apparently, they understood me to be ordering a Titanic straight key which in fact was not even in their catalog and I didn't even know existed. Anyway, the cost of that key was indeed the same as the Kent paddles I thought I was ordering. Why anyone would want a replica of the Titanic morse code key used on the ship is beyond me - I sure didn't. The model number of the key didn't sound like the model nubmer I was ordering or anything. Only similarity was the price. Anyway, I think the whole thing can be chalked up to a mistake nobody wishes was made.

So, I just want to acknowledge the wrong has been corrected. I'm out the seven or so bucks return postage; but I'll take that as a lesson. AES did make good on crediting of the item, so mostly all is well. And I've got the paddles I want coming from someplace else. Wish it hadn't been so difficult to acknowledge a mistake. I would have gladly exchanged the Titanic key for what I wanted without a fuss, had I been treated differently.

So, the problem is closed, and I just wanted to complete the story so things are fair.

Hi,
I recently got a Tech license and an Icom T2H in order to have a radio while climbing/backpacking
in the wilderness. I'm pretty experienced with that so I'm not so concerned, however, being new to
ham radio I was wondering what experiences people might have with accessing repeaters using HTs
while hiking etc on the eastern side of the Sierra Nevada mountains. I'd appreciate any info on which
repeaters youmight have hit and where you were (even vaguely). Is it reasonable to expect that one
might pick up a mobile unit on highway 395 on any given day? thanks for any help!

Matthew

Then you approve of a government which violates the
Constitution, and has no regard for the sovereignty
of the individual.

Returning to the original point of this thread at:
http://www.atlcom.net/~geozim/index.htm

FCC JAMS HAMS,
the FCC is a criminal faction of a criminal executive branch,
engaged in a criminal coverup which is further protected by
a criminal Justice Department, also a party to the crime.

The FCC knowingly, intentional, deliberately, willfully and
purposefully supplied radio jamming equipment to the FBI and,
with reasonable assumption, to the US Air Force for the
purpose of jamming AM and FM radio broadcasters, TV
broadcasters and the Amateur Radio Service. The amateur
station jammed was defined as a Title 47, Code of Federal
Regulations, Part 97.405 Station in Distress, relaying
emergency communications critical to safety of human life.
As a result, appoximately 100 people died.

FCC is also a deliberate violator of the Freedom of
Information Act, using an exemption of documents not
allowed under the list of exempted documents types.
Whereas, I have not posted details on this to the
website yet, you can read the 36 descriptions of
FOIA requested documents in the FOIA Administrative
Appeal letter. All of these are denied on the basis
that I have figured out what the nature and content
of the documents are, and the FCC does not want to
verify my logical, analytical and deductive work
that has narrowed down the documents almost to the
point of writting them myself. Actually, I already
have two of the documents, and stand ready to
publish them, as soon as I can arrange to leave the□
country, and post them from a safe place.

Neither last nor least, but in closing on FCC criminality,
FCC is a criminal co-conspirator with FBI to classify

documents pertaining to the criminal operations of the
FCC and FBI. Such classification of documents for the
purpose of avoiding criminal prosecution is specifically
described as a criminal violation in any Executive Order
pertaining to such classification at the time of
classification.

Get the FCC out of the control business, contact your□
Congressman, ask that he support Henry Hyde of the House
Judiciary Committee to convene a hearing into the
criminal coverup by FCC Chairman Kennard of the
criminal operations of the FCC and FBI and US Air
Force engaged in Communications Act violations.

Get the American Radio Relay League out of its
tyrannical misrepresentation of the amateur community.
Publish the fact that the ARRL board voted not to
reveal the criminal operations of the FCC and FBI.
What decent person would be a member of such
a criminal organization. If you are in the ARRL,
moral integrity demands you quit.

I have a *new* Bird 43 that I bought about a month ago. It has the 250 W and 1000 W elements for 2 to 30 MHz. I have
compared it with recently calibrated reference equipment and it has been found to be accurate as closely as I could read
the meter. The guaranteed accuracy is 2.0 percent of full scale, which is about 0.1 dB. At below full scale the scale
spreads out (easier to read), and my measurements were accurate as closely as I could read the meter over a wide range of
meter readings. The accuracy was the same in both directions.

As others have said, borrow a meter and check yours against it.

However there was an article in one of the magazines some years ago
on using a dummy load in water and measuring the temperature rise.

I would suggest that you take a dummy load and wrap insulation around
it. Then put DC into the load and measure the temperature rise and the
time it takes. Compare that to the temperature rise and the time with
RF into the load.

I leave it as a learning exercise for you to do the math.
(when you figure it out let me know too)

Perhaps instead of jamming broadcasters the government should just file criminal charges against them for interfering with an investigation and aiding the criminals by supplying them with intelligence.

Take your sorry ass to North Korea, China, Irag,
Libya, Iran or perhaps 30 or so other countries, and
spew your nonsense about their governments. THEN
you may come back and cry some more about the
"sovereignty of the individual" in the USA; and how
MY constititutional rights are being violated. Providing
your not rotting in jail....

Again, if you aren't a citizen of the USA, what is YOUR problem
with our rights??? Answer the question, Georgie. There people
would give both legs and arms to enjoy a fraction of the liberties
and rights we have as Americans.

Kiss my American Butt, Georgie.

Subject: [olyzone] aerial spraying

This morning, as I studied the skies as I have been doing lately, I saw horizon to horizon spraying that was laid down in the night time. I am in the Yelm area of Washington State, with Olympia to the immediate west. This must have been done by a multitude of very large aircraft as it almost completely covers the sky. Jen, up there in Vancouver, I bet you can also see it. It is slowly dissipating and falling. We haven't had but a handful of spray trails each day, probably because of unusually heavy rain and winds. Today would normally have been a beautiful day, but it is becoming hazy. I feel sorry for what is going on. People, birds and animals are going to get sick from this.

Aufmerksamkeit

Ich werde am meisten durch die aktuelle Serie von Kosovars mein Land verlassend gestart. Unter dem irrtemlichen Eindruck, den die Deutschen sagten, benetigten sie Kraftstoff fur den Winter, ich lie&#65533;en alles Kosovars auf einer Serie laden. Anscheinend war unsere Intelligenz falsch und tatsechlich wermen sich die armen Leute nicht bei bei Dachau und bei Auschwitz (die anscheinend Museen heute sind, wieder mein Fehler), aber im Holz uber dem Rand. Ich kann nicht mit diesem Resultat leben und hace entschied, da&#65533; die einzige honoravlesache zum Tun ist, da&#65533; mein Frauschwalbe Cyanid und ich eine Schusswaffenwunde zu meinem Kopf zufagen. Ich habe meine Vorgesetzten angewiesen, uns in einer Wolldecke aufzuwickeln und uns von unserem Bunker unter die Hauptstadt zu luschen, dort gebrannt zu werden.

Attention

I am most disturbed by the current train of Kosovars leaving my country. Under the mistaken impression that the Germans said they needed fuel for the winter, I had all Kosovars loaded on a train. Apparently, our intelligence was wrong and in fact the poor people are not warming themselves at Dachau and Auschwitz (which apparently are museums today, again, my mistake), but in the woods over the border. I cannot live with this outcome and have decided the only honorable thing to do is that my wife swallow cyanide and I will inflict a gunshot wound to my head. I have instructed my senior officers to wrap us in a rug and remove us from our bunker under the capital city, there to be burned.

Morse is useless and should be used anyway to hinder people to access
HF. Oh yah.

You will shortly lean that morse no longer will be used as test for
access to HF. Not in my part of the world anyway.
USA will be behind all others if they use morse test after year 2000.

The DC voltage generated across a low-power 6-volt zener
diode is much more noisy than across a resistor. But the
spectrum is uncertain from one sample to the next.

Trying to amplify the noise from a resistor is difficult when you
consider the noise figure of the amplifier itself. With a noise
figure of 3dB, as much noise comes from the amplifier as from the
resistor. As the noise figure and gain of the amplifier won't be well
controlled (compared to the noise from the resistor, which is a simple
function of temperature) you will need some way of calibrating it.

John, I disagree about that amount of gain being "daft", although
you'd need to be very careful about the way it was constructed. A few
cascaded modamps should be able to do it at 70MHz, and still give
fairly flat noise.
To keep the noise level constant enough for measurements you might
need either frequent recalibrations or you might need to regulate the
temperature and supply voltage, as both these with affect the gain
slightly.
Interstage bandpass filters will be needed to avoid saturating the
modamps. -53dBm/Hz may not sound like a lot, but over a wide enough
bandwidth...

I have successfully used modamps in this way to inject noise into the
IF stages of modems for performing BER vs Eb/No measurements.
[The modamps came from Avantec, who have since been swallowed up by
HP.]

For performing the sames tests at RF (10GHz in this case), I just used
a large attenuator pad between the Tx and the Rx. Gettting >100dB
attenuation isn't too hard with the right equipment (and lots of
semi-rigid cable, and ferrite absorber, and...)

Of course the best way to solve this problem is to buy a module from
Noisecom, who specialise in this sort of thing.
http://www.noisecom.com/
They have both narrow and broadband models, some to several GHz, and
with outputs up to about +10dBm or so.
Most modules need a 28V supply. I think they use an avalanche source.

Regards,
Allan.

For an exact analysis of coax and balanced lines for given
conductor dimensions, to compare one line with another,
with any terminating impedance or VSWR, download progams
COAXPAIR, RJELINE2, RJELINE3 from my website. RJELINE3
will do better than replace a Smith Chart, at any frequency
from 50Hz upwards, for many transmission line applications.

Download in a few seconds each. Not zipped-up. One small
self-contained file each. Can be run immediately. Input
data on a "what-if?" basis. Professional grade software
but designed to be easily usable by radio amateurs
accustomed to thinking quantitatively. (Instead of just
"it works").

Roger that. Phillystran (?) is the only non-conductive material I would even start to consider for guying any tower or support structure which is twenty five feet or above. You can very quickly get into liability problems when you get stupid about guying structures.

> Commercial Choice: Black Dacron braided,
> two concentric layers(inside white).

Agreed. The stuff is the next best non-conductive guying line around vs, Phillystran. But ya gotta watch the details of the core material. The best is a Kevlar core which does not stretch and is very strong. Next best is one of the polyesters (Dacron) which stretch very little under load. The least desirable is stretchy 'ole Nylon. The rope I've bought from The Wireman works for me, although I don't and won't use it for guying any kind of tower unless it's just for field day or some such. Galvanized plow steel cable is the right way to guy any tower.http://thewireman.com

> Amateur choice: The best boat rope
> you can afford.

No such thing as "boat rope". Any marine supply house has lines made from several different materials with very different mechanical and UV resistance characteristics, ya better know what you're doing when you choose one. If you're absolutely committed to using hardware and marine supply store line use one of the braided Dacron types. Far less stretch than Nylon or one of the cheap lines and it holds up fairly well in the sun. Avoid polypropylene lines at all cost, six months in the sun and it's trashed.

How to calibrate a homebrew power meter?

How accurate do you want to be? For starters, bypass any coupling capacitors at the input to your power meter and apply a DC voltage. Measure the DC voltage with as good a voltmeter as you have and that should be pretty close for relatively low frequencies, relatively meaning compared to frequencies where the parasitic reactances in your power meter begin to be important. Or, borrow a Bird wattmeter and compare readings to it. I did that with a couple of SWR meters I had and was pleasantly suprised to discover that they were pretty close. The principle source of low frequency inaccuracy in RF measurements is the voltage drop across the rectifier diode. You can calibrate it out if you know what kind of diode you have, Germanium or Silicon. The ARRL Handbook has some information on building RF measurement gear.

Good luck, have fun!

The best approach of all is to locate someone who has a Bird Model 43 wattmeter that you can borrow for a day or two.
Just be sure the Elements are correct for the frequency range that you are interested in.

Re the error due to forward voltage drop and non linearity under and around the point of conduction for Germanium and Silicon diodes, anyone know if its workable to set a steady DC current through the diode so that it is well in to conduction. Would this enable one to measure very low RF voltages below the forward Voltage level of the diode and improve linearity ??

I know this is heresy, but why not just use a PN source driving a
simple D/A directly at the levels you want? With a sufficiently
long and well chosen sequence, the noise spectrum should be
acceptably "white" for your purposes.

I don't think it's heresy, maybe just too expensive. To produce white
noise at 70MHz requires a very fast D/A.

Source record: 146664

Could anyone tell me how to convert minutes to minutes and seconds ?
For example 39.575 north by 77.892 west.
Thanks
jim

126. Sound of B92 Banned

Newsgroup: rec.radio.amateur.misc

Press Release

Radio B92

Amsterdam, April 2, 1999

Sound of B92 Banned

Government officials have shut down radio B92 - silencing the last independent voice in Serbia. In the early hours of Friday morning, April 2, police officers arrived to seal the station's offices, and ordered all staff to cease work and leave the premises immediately.

A court official accompanied the police. He delivered a decision from the government-controlled Council of Youth to the station's manager of 6 years - Sasa Mirkovic - that he had been dismissed. The council of youth replaced Sasa Mirkovic with Aleksandar Nikacevic, a member of Milosevic's ruling Socialist Party of Serbia, thus bringing B92 under government control.

B92 has been the only source of alternative information in and from Serbia since the start of NATO airstrikes against Yugoslavia 10 days ago. Although a ban on the station's transmitter in the morning of the first day of airstrikes - Wednesday March 24 - took the station off the air, B92 has continued to broadcast news and information via the Internet and satellite. On the same day as Federal Telecommunications' officials seized the station's transmitter police officers also detained the station's chief editor - Veran Matic. He was released unharmed and without explanation eight hours later. Since the transmission ban on B92 the station has been heavily policed and has been operating under severe restrictions.

The ban on B92 is the latest in a series of crackdowns on free media in the past week. The wave of media repression has resulted in the closure of a large number of members of the B92-led independent broadcasting network - ANEM, and all independent press. The prominent independent Albanian-language newspaper and radio station Koha ditore was also closed down last week, as have been all other independent media in Kosovo, including Radio 21 since March 24.

Since the launch of B92 news broadcasts on the web last Wednesday its site has had some 15 million visitors. Support sites such as http://helpb92.xs4all.nl report 16,000 visitors per day. Local radio stations across Europe have been re-broadcasting b92 audio signal from the Internet.

B92 is the leading independent broadcaster in Yugoslavia, and established the national re-broadcasting network of 35 radio and 18 television stations - ANEM - in 1996. The station was due to celebrate its 10th anniversary this May.

> For example 39.575 north by 77.892 west.
> Thanks
> jim

Jim I assume your example is decimal degrees. There are 60 minutes per degree and 60 seconds per minute. So 39.575 degrees is 39 degrees and 0.575 deg x 60 minutes/deg = 35.5 minutes. Then, 0.5 minutes x 60 seconds/minute = 30 seconds. So you have 39 deg 35 min 30 sec.

Another example 77.892 west : 0.892 deg x 60 min/deg = 53.52 minutes, and 0.52 minutes x 60 seconds/minute = 31.2 seconds. So 77.892 deg is 77:53:31.

I'd rather have the Titanic key than any paddles, Jim. Don't be so
quick to condemn those with likes different from yours.

My guess is that the trouble stemmed from either a typo on your part
or someone at AES not being able to read your writing: The three
Kent keys have model numbers SK-1, SP-1, and TP-1. The SK-1 is an
antique-looking wooden-base hand-key; the other two are paddles.

....didn't mean to condemn anyone Jeffrey. I was merely stating my opinion about the key, just as you've expressed yours. I have no interest at all in a replica of the Titanic's key.

I placed the order with AES on the phone, so there were no typos from me; and the word "Titanic" wasn't ever used, nor the word "key". "Twin Paddles", model #TP-1 from catalog, and price were mentioned by me. It should've been pretty clear. I've been speaking English for 57 years and have been doing business for at least 45 of those. I know how to place an order and also how to treat customers with respect.

Why don't you give up trying to defend AES's rather poor customer treatment? You sound like you work for them or something. Too bad if you don't - they'd love your customer perspective.

They made a mistake. People do that sometimes. They should have dealt with it better than they did. Bottom line, its been mostly corrected; but they lost a customer.

Hi all and thanks for reading this,

I have an Alinco ELH230g 2m SSB/ FM Linear that I picked up locally at a ham fest with the view of sticking it on the back of my FT290R Yaesu.

I was told that the final was blown when I bought it, simple I thought just replace the final. Problem is I cant tell what the final is, as the letters and numbers have been worn off and I have not got a schematic.

Can anyone help with identifying the offending part?

Please e-mail me direct as I don't visit the news groups often.

Thanks in advance

Joseph,

Check out the TxDACs from Analog Devices ... like the AD9761 and its
cousins ... or similatr products from Harris or TI .... you could
generate the noise with the DAC at a lower frequency and mix it up ...
if your data rate is only 200 kHz or so the bandwidth of your IF
probably isn't all that wide ... you should be able to filter out
mixer spurious and still have a pretty flat noise spectrum over the
band of interest.

K6JMB@arrl.net (Jim)
shared these priceless pearls of wisdom:

->UPDATE on this...
->
->AES has credited my charge card for the amount charged plus shipping.

Probably bought $10K worth of stuff from them over the last 20 years or so.
Last thing I bought was typical of their business practices.

Bought a Kenwood handheld for my wife for Christmas. The extra battery
case was backordered. Wife's mom dies the day after Christmas. Hops a
plane to Oklahoma City from Reno that makes an hour's stop in Las Vegas.

Squeak meets wife at plane, gives her the battery pack, and wishes her
well.

I'm sorry you had a bad experience. In my book, there are no finer people
in this business.

Why don't all of us call the Vegas AES store and tell them we refuse to buy from them when they treat their customers like shit and it would put an end to this. Just a thought.

I am looking for the Fall 98 issue of "Communications Quarterly" magazine.
I would like to acquire the magazine or a copy of the article in this
issue on screwdriver antennas by VE2CV. I have been unable to locate this
magazine locally and any help would be greatly appreciated.

148. 10, 11 meter help?

Newsgroup: rec.radio.amateur.misc
Date: 1999-04-03 00:00:00 UTC
From: Ray P <raymare@bellatlantic.net>
Message-ID: <7e5ld5$bsb@world6.bellatlantic.net>
Source record: 146567

I was hoping to find out if the Uniden Lincold radio is still sold.
If not, what is another good radio that can cover the 10 & 11 meter bands??
Perhaps an 11 meter radio that can be modified to cover 10 meters?
Ray

150. Breathing some new life into a club

Newsgroup: rec.radio.amateur.misc
Date: 1999-04-03 00:00:00 UTC
From: danr@izzy.net
Message-ID: <7e5t5a$423$1@nnrp1.dejanews.com>
Source record: 146569

I've read through many of the posts on here about amateur radio dying out, and while I'm not quite so pessimistic as some, amateur radio is certainly not what it was even 10 or 15 years ago. I don't want to bemoan that fact, but try to figure out what to do about it.

Specifically, I want to breathe some new life into our club. It would be a shame to see this club go under, as it operates several local repeaters and provides communications for several local events, as well as works with the Red Cross in emergency situations.

So, if any of you have ideas which can help us increase our membership and encourage the membership to be more active, I'd love to hear them.

Thanks and 73,

Dan KB6NU

>Also, how good of equipment does MFJ build? I know years ago that MFJ stood
>>> for *Mighty Fine Junk*.

Just like Honda cars in the '60s, they too were junk mobiles. But as they sold the cheap affordable cars, they made substancial profit and put a lot into product research and development. Now look where Honda is. MFJ apparently has committed a similar act of business savy. They were pretty much a novalty junk company when they first came on the scene producing wanted accessories that were not quite up to the standard of the day quality wise, but they were inexpensive and sold a lot of their junk. They, as did Honda motor cars, put a lot of profit back into the company. While they still sell a lot of what some would call junk, (trinkets, etc) also while selling other stuff from other companies under their name, most of their higher-end top shelf items are up to if not beyond industry standards. Their quality to price ratio is seemingly very good. While their equipment may not be as good as the absolute best of the best available on the market anywhere for any price, stuff you can see for many many hundreds of dollars, their equipment lives up to and surpasses the expectations of most hams and SWLers. I've had a lot of their equipment, and still have some. I've had their 986 Differential T 3kw roller-inductor tuner for nearly 10 years (or so) and love it....didn't pay a kings ransom and got a great, solid, reliable tuner. I even use an MFJ tuner in my Honda! Good Luck.

AES has usually treated me OK on the phone, but when I'm in the Cleveland area I usually visit their Cleveland, OH store. One thing I hate about their Cleveland store is that the salespeople are more interested in taking phone sales than taking care of customers in their store. If you don't get in their face, they will ignore you. A simple "may I help you?" from their salespeople would be nice for a change!

Sounds like a good idea, but shouldn't a bit-error rate measurement
include both in-band and out-of-band noise?

Crate Stealth 60 Tube Guitar amp, In great condition. Manual $200.00

Yamaha 12 string acoustic, beautiful guitar with case!! $500.00

Yamaha RX11 Drum Machine $100.00

Rack mount Lab power supply, Power Ten Inc. Model 3300D-10010, 0-100 VDC, 0-10 Amps,
Voltage and current LCD read outs, Clean $200.00

Bird 4391 Analyst, Microprocessor controlled CW power / Pep Power / Modulation /
and more, uses bird 43 slugs. Carrying case, manual, $400.00

Bird slug 50-125 Mhz, 5,000 W Peak mode / 1000W Max average Power $60.00
Like new, low use

Bird slug 50-125 Mhz, 10,000 W Peak mode / 1000W Max average Power $60.00
Like new, low use

Siltronics model 90 VFO -6 $85.00 Clean

Alan CTE HQ135 25-29 Mhz Wattmeter 10/100/1000 watt scales, illuminated, Low use like new in box $40.00

Alan CTE 36" apartment dwellers antenna, adjustable swr, Low use Like New $25.00

Alinco DJ-S11 Mini 2 meter hand held, in box, low use, slight scratch on front $65.00

Cushcraft R5 five band Vertical, uses short counterpoise radials $150.00

Radio Shack Digital SWR/Power meter RMS and PEP 0-30 Mhz $30.00

Watts 0-160 PSI precision Regulator & Sub-regulator filter block assemblies NEW $100.00 Ea.

Recoton CBM430 Amplified Desk Mic $20.00

Mirage B3016 2 meter FM/SSB amplifier, with preamp, 30 in 160 Watts out. $200.00 Sold

SBE Trinidad AM Base, Excellent condition with Manual and D104 Mic $120.00

Realistic TRC459, AM/SSB 40Channel CB ,unique flat console design, dial a watt, Stock Mic. $130.00

Sears Road talker 40 AM/SSB 40 channel Mobile, In box, Low usage, No Manual, Clean No Mods $100 POSSIBLY SOLD

Sears Road talker Base/Mobile 40 channel AM/SSB, In box, Low usage, No Manual , clean, No Mods $100 SOLD

Uniden HR2600 with chipswitch modification, 575-M6 mic, Manual and chipswitch manual $260.00

Yaesu FRG 7 SW receiver, good condition $160.00

Ameritron AL 811 HF Amplifier uses 3 811 tubes, minor flaw on face plate, 7.5 to 8 on condition, works perfect, full output with manual $400

Complete ammunition reloading set up, 2 Presses, scale, several dies, tumbler, Case trimmer, books, Brass, 2 powder drops, trickler, A whole lot of stuff ...dies for 223, 45 long colt, 7mm Rem mag, 30-30, 308, 22 hornet, 30 carbine and others $320.00

Craftsman compressor 4 HP 30 Gal, In good condition, with hose and regulator/seperator setup $200 Local pick up only in the Simi Valley Ca. area

Roland 4 track multi-tracker recording system, Higher end model, Nice mixer/EQ section. Not sure of the model #, must check in storage. $300.00 Clean condition, with manual

* I buy, sell and trade vacuum tubes

Soon to be repaired and for sale:
Phantom 500 HF 10 meter amplifier, good tubes, good condition $380.00

All items open to trade
I'm looking for:
Drake equipment and accessories
Bird 43
Bird HF slugs
Digital camera
Yaesu Y0 100 scope
Yaesu FV101 VFO
Electro Voice Mics
Johnson Viking II with Johnson VFO
Collins 30L1 in good condition
Collins R390A
MFJ antenna analyzer. The one with resistance read out
Drake RV-7 VFO
Power supply for the Drake TR 7
Yaesu FT-7 in very good condition
or ??? what do you have?
Astatic 10DA SSB mic head
Astatic Night Eagle
Yaesu FL2100B

JPG Pictures available on some items *

--The stuff that will never make it to the bench for repair--
Below sold as is:

Siltronics Albatrose 23 channel AM/SSB mobile with big ol venier slider knob $25.00 Works, Occasional Intermittent TX

Pierce Simpson Bengal AM/SSB 23 channel base SSB works AM doesn't $30.00

Zachery T AM Base No TX week RX $30.00

President Washington w/ freqs and slider (Worked perfect before UPS got ahold of it) Came back from
Hawaii , No TX or RX, Possible damaged loop mixer crystal $60.00

Robyn tiger 23C Needs Audio transistor $10.00

Messenger 250 23 channel base CB, beautiful gold and brown, good cosmetic condition, Possible power supply problem $40.00

Icom IC230 2 meter parts radio, No Knobs $20.00 TX works.

*All items do not include shipping.
*Shipping Via UPS ground unless otherwise stated
*All items guaranteed to work unless otherwise stated.
* Most larger items are professionally packaged and double boxed.
* Buyer splits packing charges.
* Most prices negotiable.
* Use of 10 meter amps on 11 meters is illegal.
* References available upon request.

Minor point, but the quote sounds fake. I believe that muskets were the
cutting edge of military technology in Jefferson's time. I think paper
cartridges didn't come until about 1850.

Ah, the notorious "freeband."
As an outgrowth of CB, operation here is illegal. Most of the operators you hear here are using modified equipment, much of it intended for the amateur bands.

Once these guys get a ham license, they display their freeband, illegal past by constantly asking for "the mods" to every 2 meter rig you can imagine! Sometimes they even refer to "the freeband mods" on a 2 meter rig, but mostly they SAY they "need" these modifications to use their 2 meter ht to: a)use for airband radio backup b)to use as a volunteer with some local fire department c)"just in case" they need to make an emergency call on a police frequency d)have a higher power rig for the Family Radio Service, etc. They also commonly claim to be hams, but somewhere in theri studies for the ham license they failed to learn about type-acceptance.

As for the operators in the freeband kinda sounding like hams, listen a bit more and you will pick up the differences. Like they don't like to give their actual QTH, or if they are asking for a QSL, they have a PO Box. Finally, they seldom say anything beyond "You're loud here, am I loud there?" I realise that telling these two styles apart is difficult, since so many of the former outlaws who are now hams on 10m and carry on the same style of QSO. They like to break in to a QSO in progress to say, "I just wanted to tell you how strong you are here, how are you hearing me?" They seldom add anything to a QSO by way of discussion on the topic at hand, and leave quickly. But, boy, do they get irrate if you ignore them, or imply that your conversation is not a freefor all! Then they revert to their down home, everybody's a good ol' boy redneck, and why are you being so uppity? Because for them, radio is one big party line. Beginning with 23, then 40, and finally 800 channels, they got used to every conversation being a public display.

Lets see now, can I be any more offensive? Yeah, but I'll save it for next time!

Joseph ... I'm aSSuming :-) that your IF (at 70 MHz, if I
recall correctly) is bandlimited such that the dominant
signal (and noise) seen by the demodulator *is* in-band.

From: n2vtw@delphi.com
Message-ID: <ZBW7Iyw.n2vtw@delphi.com>
Source record: 146692

Does anyone have any advice or knowledge on how to replace the DJ-580's DTMF keypad and/or the plastic window over the display? Is the plastic window held in place with screws, or is it fastened in some other way? Also, has anyone else had the soft case made by Alinco rub parts of the characters off of the DTMF keys? Thanks.

:>
:> This will keep CBers and other stupid people out of the ham bands and
require
:> more studying for a license. If we had had the 90% passing rule a long
time
:> ago then we wouldn't have any stupid people on the ARRL board of
directors
:> today.
:> SEE BELOW..
:> The two year non-renewable no-code license sounds like a great idea too!
:I'll buy that.
:> Save CW, Tell the ARRL to KISS OFF!
:
:As a mugwump on the subject I say - You can save CW for TRADITION or kiss
it
:off but you should make more comprehensive theory exams for TECHNOLOGY. I
am
:an ARRL member. I do not blindly follow all of the ARRL leaders
:concepts...but I do know that Hams need the ARRL just as the ARRL needs
hams.
:
:I must say that I agree that the above concept of 100% pass would be a step
:in the right direction and as such it is not IMHO a bad idea. HOWEVER I do
:not believe that it is enough to make future Hams much better qualified
than
:at present. If we continue to use fixed Q & A exams we will still have
:applicants who can score 100% and not have the slightest idea of the
meanings
:of any of the questions or their answers. We will still have many who
:believe that an answer is the correct choice only because it was the
correct
:answer in the Q & A pool book. Another important point IMHO is that we need
:more classes.... that is Ham license classes... so that sequential exams
can
:be given with time between them for serious progressive study.
Communication
:technology can not be learned with only four exams or less...I suggest at

:least eight. A final point that I must make here is that the content of the
:exams and the level of the technology must be brought up to modern
standards.
: We can not just test for the current ham modes and technologies but should

:test for the knowledge that you can expect of a Ham who is prepared to be a
:modern day experimenter especially for the highest class Ham tickets. This
:means that many of the people who now get involved in generating the Ham
:exams may not be qualified themselves and we need to get more up dated
people
:involved. We need people who are at the level of understand Shannon and
:information theory, for example, to write the questions or at least to
decide
:what types of questions are now important in the real world of electronic
:communication. PLEASE keep thinking, I never met a Ham I didn't like, Hams
:need more license classes, Bob Wex w2ilp (Idiots Logically Pass?) -- .-

Source record: 146576

There are scientists who now say that solar flares occasionally occur that
are so large that they can kill almost all life on the planet.
Such a flare (i.e. a flare that ejects so much plasma that it will actually
hit the ground) has been predicted for earth in July.
What makes this interesting is that several 'clairvoyants'
with verifiably good track records have independently predicted
planet-wide catastrophes occuring within 3 days of each other this summer.
See Art Bell's website (http://www.artbell.com) for more details.

I have for Sale a Motorola Micor VHF 4 channel radio. It does 110 watts and includes:
Control Head, Microphone, and Instruction Manual. The Manual has all the Alignment procedures, schematics, diagrams, and circuit descriptions. I am selling this unit because of a lack of interest by my Radio Club to pursue putting up a repeater.
I am asking $150 for the whole thing including shipping to the lower 48 states.

Model # T73RTN3190A Serial # OG670J

Radio Shack Hand Held Scanner - includes, supplied antenna, rechargable nicads (that hold a good charge), and a wall charger.

Unit is in excellent condition with the exception of a few tiny surface scratches in the display that you can only see if you hold the radio on an angle, it does not affect seeing the display at all.

Receives:
30-54
118-136.975
137-174
380-512
806-823.9875
849.0125-868.9875
894.0125-960

I will sell this for $125 + shipping to anywhere in the continental US.

This radio is guranteed to work 100% on arrival and be in the exact condition as stated.

The problem is that YOU have no respect for your rights,
and I do. As for going to North Korea, they will not let
me in because they know that I would be looking for my
father's crash site, and forcing accountability for MIA's
and return of remains.

Even though I am not an American citizen, I am a Christian
and I was born here and I am extended the same rights as
those who are American citizens, here defined as those
disloyal to the country and her people, while supporting
every criminal action the the FASCIST bastards carry out
against Christians. If the crap fits, wear it.

Had God wanted me to carry out His work elsewhere, I would
have been born elsewhere. Either live with it, or take your
bellyaching to God and see what respect you get from Him.

You must specify the document. If not, we will all know that your tantrum is that and nothing else. Either specify the document or expose yourself as a deliberately ignorant whiner.

Returning to the original point of this thread at:
http://www.atlcom.net/~geozim/index.htm

FCC JAMS HAMS,
the FCC is a criminal faction of a criminal executive branch, engaged in a criminal coverup which is further protected by a criminal Justice Department, also a party to the crime.

The FCC knowingly, intentional, deliberately, willfully and purposefully supplied radio jamming equipment to the FBI and, with reasonable assumption, to the US Air Force for the purpose of jamming AM and FM radio broadcasters, TV broadcasters and the Amateur Radio Service. The amateur station jammed was defined as a Title 47, Code of Federal Regulations, Part 97.405 Station in Distress, relaying emergency communications critical to safety of human life. As a result, appoximately 100 people died.

FCC is also a deliberate violator of the Freedom of Information Act, using an exemption of documents not allowed under the list of exempted documents types. Whereas, I have not posted details on this to the website yet, you can read the 36 descriptions of FOIA requested documents in the FOIA Administrative Appeal letter. All of these are denied on the basis that I have figured out what the nature and content of the documents are, and the FCC does not want to verify my logical, analytical and deductive work that has narrowed down the documents almost to the point of writting them myself. Actually, I already

have two of the documents, and stand ready to
publish them, as soon as I can arrange to leave the
country, and post them from a safe place.

Neither last nor least, but in closing on FCC criminality,
FCC is a criminal co-conspirator with FBI to classify
documents pertaining to the criminal operations of the
FCC and FBI. Such classification of documents for the
purpose of avoiding criminal prosecution is specifically
described as a criminal violation in any Executive Order
pertaining to such classification at the time of
classification.

Get the FCC out of the control business, contact your
Congressman, ask that he support Henry Hyde of the House
Judiciary Committee to convene a hearing into the
criminal coverup by FCC Chairman Kennard of the
criminal operations of the FCC and FBI and US Air
Force engaged in Communications Act violations.

Get the American Radio Relay League out of its
tyrannical misrepresentation of the amateur community.
Publish the fact that the ARRL board voted not to
reveal the criminal operations of the FCC and FBI.
What decent person would be a member of such
a criminal organization. If you are in the ARRL,
moral integrity demands you quit.

Well, my travel agent has repeated informed me that there
are nations, principalities, protectorates, territories
and some countries, but there are no COUNRTIES. Go back to
school and learn to spell, you illiterate DIPWAD.

I am here because I have work to do here. That work is to
restore liberty to a bunch of ignorant, backward, willfully
stupid, God-hating vermin who wouldn't know freedom if it
bit them on the ass.

I have read the Book of the Revelations, I know how this
episode of life ends, and your side loses. Really, how
could your side win? You can't even spell.

I know that I will be accused of casting pearls before
swine...but I leave you with some wisdom. If you use
it, you could rise above verminhood to become a man.

To transform the world, we must
begin with ourselves; and what is
important in beginning with our-
selves is the intention. The intention
must be to understand ourselves and
not to leave it to others to transform
themselves... This is our responsibility,
yours and mine; because, however
small may be the world we live in, if
we can bring about a radically different
point of view in our daily existence,
then perhaps we shall affect the world
at large."

First, I am not a hater. But there is crime which I can
not condone: infanticide. Most Americans have no problem
with it, or the genocide that was carried out at Waco,
and funded with your tax dollars. This is why I am not
an American and I do not pay taxes which I do not owe.

You are wrong about my true colors, I have only one:
the shed blood of Jesus Christ. To Him alone I owe
my allegiance and my life. I am here at His pleasure
to do His work. If you have a problem with it, take
it up with Him. I am here until God's work is done.
If you desire me to leave quickly then you will have
to overcome your redneck Jingoism and help me do God's
work.

Since I am not your enemy, but you are...I leave you
with this help: an encouragement to become a part of
the solution rather than a part of the problem:

To transform the world, we must
begin with ourselves; and what is
important in beginning with our-
selves is the intention. The intention
must be to understand ourselves and
not to leave it to others to transform
themselves... This is our responsibility,
yours and mine; because, however
small may be the world we live in, if
we can bring about a radically different
point of view in our daily existence,
then perhaps we shall affect the world
at large."

You might be surprised. Things like WD40 and TriFlow aren't conductors themselves, but they unquestiionably do aid in making good electrical contact. I had to convince myself of this -- I sprayed a deep puddle of TriFlow (which is basically WD40 with Teflon) on a piece of copper-clad board, then lightly brushed a single strand of #40 AWG (or something very close to it) through the puddle. An audible continuity tester showed the connection quality to be excellent -- the wire made much better, and more consistent, contact with the board surface underneath the pool of TriFlow than in a similar test where the wire and board were both left dry. I guessed the Teflon residue would interfere with conduction once the hydrocarbon carrier dried up, but that turned out not to be the case either.

That's not to say there isn't better stuff out there, but both experiment and experience suggest that WD40 is unjustly maligned. For pots, yes, you usually have to replace them in the end. But for dirty wafer switches and such, there doesn't seem to be any real advantage to the more expensive stuff, as long as you're sure the WD40 won't attack any nearby components.

The distinction between a cleaner and a lubricant is not an important one in this case. Something that reduces the friction between two surfaces will also tend to get rid of unwanted particulates between them.

* A Brief Historical Overview
* What is an Elmer?
* What is an Elmer Today?
* How do I become an Internet Elmer?
* How may I obtain the latest copy of the Elmers List?
* Acknowledgements

A Brief Historical Overview

If there is any one constant in the changing state of the communications art, it is that "Hams" (Amateur Radio Operators) have always been on the forefront of it. Rumors abound where the term "Ham" came from. Some of the more amusing are described in the list of Frequently Asked Questions for this newsgroup.

Regardless of origin of the name, a "Ham" is universally recognizable as one who experiments in radio and communications.

Whether it be constructing a low-power CW radio with vacuum tubes, or designing TCP/IP packet networks, such experimentation has historically spilled over into the mainstream such as was the case with Howard Armstrong, who developed the regenerative oscillator and FM radio, or General Curtis E. LeMay (K0GRL, W6EZV) who was instrumental in making Single-Sideband the communications standard for the Strategic Air Command (1946-1992, now reorganized into a joint command called USSTRATCOM) and eventually the U.S. Air Force. Although packet-switching techniques originated from DARPA (Defense Advanced Research Projects Agency) and the ARPANet, no one can deny the

tremendous influence that amateurs, including those within TAPR (Tucson Amateur Packet Radio), have had in demonstrating the viability of TCP/IP and AX.25 communications via radio links. The efforts of AMSAT (the Amateur Satellite Corporation), including the development of many ham satellites and the low-orbiting Microsats (communications satellites no bigger than a breadbox that use store-and-forward packet techniques), have certainly advanced the state-of-the-art in communications, one of the defined purposes of the Amateur Radio Service, as recognized by international treaty.

What is an Elmer?

Since in many cases hams are writing "the book", there is often no "book" or other established reference for a beginner to refer to. Traditionally, information has been passed on from ham to ham via word-of-mouth. Like many of the traditional crafts, a variation of the Master-Apprentice system has emerged, the Elmer-Novice relationship.

The term Elmer has probably been in use since at least the 1950's (I'm told, but haven't yet confirmed, that it appears in British amateur radio publications from that period). The name Elmer was likely chosen because Elmers are usually older and wiser, having the benefit of many years in the hobby, including several failed projects, and an electric shock or two. The first U.S. reference to Elmer in print was from Rod Newkirk, W9BRD, in his "How's DX" column in QST from the early-to-mid-1970's.

Such Elmers have traditionally been the mainstay of amateur radio, and the source of many new hams, particularly those interested in working on emerging technologies. Even more importantly, Elmers provided an outlet for the impatient newcomer who wanted "to know everything, and right away." Faced with such a request, a good Elmer will smile and proceed to lead the novice through some project or operating experience. Several hours, days, or weeks later, the novice would have his answers, but would have earned them. Even better, the sense of accomplishment would boost the novice's confidence and nudge him or her down the road to being a model, experienced ham operator.

Many present hams feel that such an experience is missing today. In today's hustle-bustle world, the response to such natural curiosity and desire to learn is, more often than not, "I'm too busy" or "RTFM." As a result, the quality of new hams declines and the knowledge and operating habits they develop in their first formative months and years leave much to be desired. And the very same hams who claim that they "can't understand the new generation" also, in almost the same breath, lament about the "decline of amateur radio."

What is an Elmer Today?

An Elmer today is of any age, male or female, who has some expertise and is willing to share it with beginners. Elmers don't even need to be licensed amateurs, just people with knowledge in some area of electronics or communications technology.

How do I become an Internet Elmer?

With the ever-widening scope of the Internet, the amateur radio newsgroups on Usenet, and now the World-Wide Web, the potential for Elmers to share their knowledge to a wide audience has never been greater. To that end, I maintain a list of such Elmers. Volunteers may register via my formatted, on-line, World-Wide Web Registration Form:

http://www.novia.net/~pschleck/elmers/register.html

I would prefer that you register using the above form (which not only ensures that nothing is omitted, but also makes adding your entry much easier by automatically converting it to HTML). However, volunteers who are not yet on the Web are also quite welcome, and may register by writing me at elmers-request@novia.net with their name, amateur radio callsign(s) (if any), E-mail address, and area(s) of expertise. URL-format pointers to resources they maintain, such as WWW home pages, FTP archives, mail servers, or mailing lists, would also be quite welcome. The list has gotten large enough that there should be plenty of suitable examples to model your entry after. If you need some further assistance formatting your entry, drop me a line and tell me a bit about yourself. Ironically, sometimes the best Elmers write to me saying, "I'm not an expert, but..."

I have set up an administrivia mailbox for correspondence related to this list (elmers-request@novia.net, the default Reply-To: of this message when posted to Usenet News). I would prefer that all such correspondence be directed to that address. In addition to saving it into a special folder, my incoming E-mail filter will also send you an automated return-receipt.

Also, an unfortunate increase in the amount of unsolicited junk-mail that I receive (often dozens of messages _every day_) has forced me to become much more ruthless about filtering incoming E-mail. While I can guarantee that I will read all mail sent to elmers-request before the next month's posting of the list, mail sent to pschleck may not only not get reviewed for some time, my incoming mail filter (procmail) may even bounce it back to the sender if it can't be automatically categorized as originating from known, friendly senders or have known, welcome keywords in the headers (Elmer is obviously one of those keywords).

Those desiring a more extensive list, or who need more specific assistance, are encouraged to contact Rosalie White, WA1STO, Educational Services Manager at the American Radio Relay League, 225 Main St., Newington, CT 06111 or via electronic mail addressed to rwhite@arrl.org.

How may I obtain the latest copy of the Elmers List?

There are currently 6 ways of obtaining the Elmers List. Any site at least reachable by Internet E-mail can use the Mailing-List or Mail-Server options:

World-Wide Web (WWW):

This is the recommended method for accessing the Elmers list, as it allows this resource to be viewed as hypertext. The home site at www.novia.net features immediate updates each month, hypertext-linked subject and geographic indexes, keyword searching, and registration and feedback forms. The other two sites use automatically-converted versions of the Usenet news articles, but are still usable, particularly if you are outside North America. The site marked with an asterisk also offers Wide-Area Information Service (WAIS) index searching by keyword for all Usenet News FAQ's:

* http://www.novia.net/~pschleck/elmers/
* http://www.lib.ox.ac.uk/internet/news/faq/rec.radio.amateur.misc.html
* http://www.cs.ruu.nl/cgi-bin/faqwais *

(_Note:_ Because of maintenance problems - FAQ documents not being promptly updated in particular - the sites at Ohio State and Smart Pages are no longer recommended for accessing a current copy of the Elmers List and have been removed from the above list.)

see also the newsgroups under comp.infosystems.www.* (I haven't listed URL's for all of the newsgroups under this hierarchy as there are now about a dozen of them (!!!).)

Usenet News:

This was the original distribution medium for the Elmers list. It continues to be supported for users who cannot access the World-Wide Web. Since the document uses URL's throughout, the news article version may also be viewed as hypertext via some mail and news readers. The latest copy of the list can be found in the news articles with Subjects like _"Amateur Radio: Elmers Resource Directory Part */*[*-*]"_ (The * represents a wildcard character, as the need to split the list evenly, as well as keep all parts under the 64K message limit for Usenet, requires that I adjust the split occasionally). Since the list is cross-posted to the following newsgroups:

* news:rec.radio.amateur.misc
* news:rec.radio.info
* news:rec.answers
* news:news.answers

on the first Monday of each month, with an expiration date 6 weeks into the future, there should always be a copy available at most news

sites. Check your newsreader documentation for information about reading previously-read articles or articles that are "threaded" to this one. Also complain to your local news administrator (E-mail to "news@localhost" or "usenet@localhost") if your local news server is configured to ignore Expires headers (and thus prematurely delete the articles) in worthwhile, mostly moderated, information newsgroups like those listed above.

Anonymous FTP:

If your site is directly connected to the Internet, you may retrieve the latest copy via File Transfer Protocol (FTP) from the following sites:

* ftp://ftp.novia.net/customers/pschleck/elmers/
* ftp://rtfm.mit.edu/pub/usenet/news.answers/radio/ham-radio/elmers/
* ftp://ftp.uu.net/usenet/news.answers/radio/ham-radio/elmers/

Internet Gopher:

The latest copy of the list should be available from the following Gopher sites:

* gopher://gopher.univ-lyon1.fr/
* gopher://ftp.win.tue.nl/
* gopher://gopher.win.tue.nl/

see also news:comp.infosystems.gopher

Mailing-List:

Since the list is cross-posted to rec.radio.info, the latest copy may be obtained from the mailing-list gateway for that newsgroup (along with many other informational articles about radio) when it is published each month. To subscribe, send E-mail to:

listserv@ucsd.edu

and in the BODY (not the Subject) of the message, write:

subscribe radio-info

The server may not be able to determine your return address. In that case write:

subscribe radio-info (your E-mail address)

You should get an acknowledgement very shortly.

Mail-Server:

If you don't want to read through the entire gateway of rec.radio.info, or want a copy of the list right away, send E-mail to:

mail-server@rtfm.mit.edu

and in the BODY (not the Subject) of the message, write:

send usenet/news.answers/radio/ham-radio/elmers/README
send usenet/news.answers/radio/ham-radio/elmers/index/subject/part1
send usenet/news.answers/radio/ham-radio/elmers/index/subject/part2
send usenet/news.answers/radio/ham-radio/elmers/index/geographic
send usenet/news.answers/radio/ham-radio/elmers/list/part1
send usenet/news.answers/radio/ham-radio/elmers/list/part2
send usenet/news.answers/radio/ham-radio/elmers/list/part3
send usenet/news.answers/radio/ham-radio/elmers/list/part4
send usenet/news.answers/radio/ham-radio/elmers/list/part5
send usenet/news.answers/radio/ham-radio/elmers/list/part6
send usenet/news.answers/radio/ham-radio/elmers/diff

and the latest copy of the list should be sent to you E-mail within 24 hours (the mail-server uses batch priority to reduce system demand).

Acknowledgements

By using this resource, you are benefitting the net by obtaining assistance in the fastest and most efficient way possible. By volunteering to appear on this list, you are contributing to the good reputation of the radio-related newsgroups.

Thanks to all the volunteer Elmers, as well as courteous list users, for making this service a success.

John Ackermann N8UR

jra@febo.com

http://www.febo.com/

My primary interests are in packet radio network building
(particularly higher speed stuff) and TCP/IP. I've got quite a lot of
info on using the Kantronics D4-10 19.2kB radios, as that's the
hardware we've been struggling with here.

I'm now working heavily with Linux, and help run a TNOS/Linux BBS, and
a Linux native-AX.25 switch. Although I'm not "the world's greatest
authority" on either, I'd be happy to help folks with questions to the
extent I can.

I've developed some experience with full-duplex packet repeaters. I've
built 2 19.2 repeaters, and am working on a 9600 Baud one now.

My World-Wide Web Page above has a reasonable set of resources for
digital networking, including HTML versions of some of my work, sample
configuration files for Linux AX.25, and some Linux software tools, as
well as the Ohio IP address coordination info.

I've just finished writing a book on TCP/IP that TAPR will publish
(hopefully) by the end of the year. It'll be called _Networking
Without Wires_ and is a completely rewritten, and greatly expanded,
version of the old _IntroNOS_ document I wrote several years ago. In
the meantime, I've made the old _IntroNOS_ available in HTML format on

my World-Wide Web Page above.

TAPR (Tucson Amateur Packet Radio) has formed a special interest group to discuss issues of regional packet networking (Net-SIG). As a result, the TAPR net-sig mailing list was born, and is now ready for operation.

This list is <not> intended to replace any of the existing packet-related mailing lists. Its purpose is provide a medium for communications among those interested in packet radio networking, both dealing with technical issues and political/regulatory ones. We'll discuss things like how the potential 219MHz band will fit into the networking picture, how to link areas using different networking schemes, how to set network parameters, etc. The list's charter will be posted there regularly.

The address of the list is net-sig@tapr.org and you can subscribe by sending mail to listserv@tapr.org with the text "join netsig".

Apart from subscribing to the list, you can contact me for further details about the Net-SIG (including upcoming conferences).

TAPR Vice President and Board Member

Joint ampr.org IP Coordinator for Ohio subnet (44.71.xxx.xxx)

Please direct all correspondence regarding the assignment of ampr.org IP numbers in Ohio to:

ipaddr@febo.com

which is a mailing list read by a team of coordinators.

[_Editor's Note:_ All ampr.org coordinators are listed in the document at:

David Andrews ZL2SX

andrews@clear.net.nz

I have been involved with the Amateur Radio International Travel Host scheme. I also chair the NZART Frequency Management and Technical Advisory Group, which is responsible for all repeater coordination and band-planning (LF, MF, HF, VHF, UHF, and above) in New Zealand. I would be pleased to answer any queries with regard to reciprocal licensing or frequency coordination that may arise.

Webmaster, Franklin County (Alabama) Amateur Radio Club:

http://www.qsl.net/fcarc/

I work small contests and do a little bit of DXing on 17 and 10
meters. I set up our club's Field Day activities last year. I do a lot
of computer work on IBM/compatibles and a lot of Internet work. I used
to do a lot of digital work, including running a BBS and node, but am
no longer involved in packet. I am in the process of building a 440
MHz repeater and am the programmer of the KE4ZIM repeater controller.
I really enjoy working with youth in general.

DX CALENDAR, WABA AWARD (rules & scores) now available

in English Version and Italian Version

Same server of the IK4LZH site for QSL MANAGERS.

I am an IOTA chaser, I work DX and I join contests. Actually I'm in
love with RS sats and DOVE telemetry. I'm the Shortwave Listening
(SWL) coordinator of the Italian Amateur Radio Association and I have
a regular SWL page in their official magazine Radio Rivista. Recently
I joined the 425 gang that produces the 425 DX News bulletin. I
translate it into English and send it to many DXers via E-mail. I also
maintain a WWW page to provide the bulletins graphically with previous
numbers and more to come. I've been an SWL since 1974 when I received
a receiver as gift from my parents. Now I'm 36 and I'm running also a
free BBS devoted to HAM/SWL.

Newington, CT 06111 USA | my doing so. -- Samuel Johnson

American Radio Relay League (ARRL) Webmaster

The American Radio Relay League is pleased to announce the startup of ARRLWeb, your League's new HQ-based World-Wide Web site, at the URL

http://www.arrl.org/

ARRLWeb will serve as an essential Internet resource for active hams, carrying ARRL news, details on upcoming hamfests, conventions and Amateur Radio examinations, the ARRL Publications catalog, information of ARRL membership benefits and services, and more.

In inaugurating this new service, the League thanks Scott Ehrlich, WY1Z, and the other Boston Amateur Radio Club volunteers who've worked since December 1994 to keep ARRL up and coming on the Web via the ARRL home page they installed and maintained at oak.oakland.edu. Their volunteerism helped show us that upgrading our Internet connection to a level that allowed on-campus Web service would be essential to ARRL's mission of serving Amateur Radio.

Your comments, criticism and suggestions on how to make ARRLWeb bigger
and better are _essential_ to its ongoing success, so please drop by
and say hello!

I have been with Linux since it was first available. I have been a keen homebrewer for over 30 years, but I don't do much now due to lack of time. I have built lots of HF gear, including synthesized gear, and also a lot of test gear. I have also homebrewed magnetic loops, which is great fun. I have put together PC's and help other people with Linux issues. On packet, I run TCP/IP using LNET which is WAMPES-adapted for the UK by Darryl, G7LED.

* Callsign Data
* Mobile/Portable/Field Day (FM, HT's, 10m SSB)

I'm willing to act as a reference for anyone wanting info on getting
tapes (especially Callsign tapes) from the Department of Commerce
National Technical Information Service (NTIS) or wanting other info on
callsign-project related stuff.

One of these days I'll actually be around for the un-net! I promise,
really! (Well, maybe not. Is anyone even doing the un-net any more? If
so, E-mail me and maybe we'll actually do it!)

My job is currently System Administrator for a large UNIX site so I
know a little bit about day-to-day UNIX operations and UNIX
installation :-) My laptop currently runs Linux most of the time (over
99% of the time). I also have much experience with constructing E-mail
paths that will work rather than bounce. Currently I do software full
time (yay!), and am fiddling with some laser experiments - if I could
get some 'spare' time.

I also have a fair amount of experience in hardware/software
interfacing and machine control.

GRAPES 56 kBaud Packet Radio Modems

I'm not an official representative of the Georgia Radio Amateur Packet Enthusiasts Society (GRAPES), but I am in contact with them, and have experience using their 56 kBaud radio modems. At the very least, I can forward requests I can't handle to the proper people.

The Proceedings of the 6th Computer Networking Conference has a paper by WA4DSY explaining the theory and practice of the 56 kBaud radio modem. (I think it's the 6th, I don't have my copy handy.)

GRAPES furnishes instructions for modifying a TNC2 to drive the modem, but there are better solutions. The Ottawa PI card and the Gracilis PacketTwin card are two good solutions. Of course they are PC bus cards. If you need standalone capability, the Kantronics Data Engine can handle it, as can the incredible Gracilis PacketTen. PacComm claims their new Sprint TNC can, too (PacComm now also manufactures the Gracilis cards under license and you can get them either from them or from Gracilis direct).

WA4DSY has interfaced raw telco codecs to the modems and done "digital voice" while mobile. It works quite well.

If you want information on the RF modem (full document sets are $20 US, creditable towards a later order) write to GRAPES at

GRAPES, Inc

GRAPES is a volunteer networking organization. There's no phone number, and turnaround on info requests may be slower than when dealing with commercial outfits. Please cut the volunteers a little slack.

Derrick C. Cole KC4WEJ

dcc@ssds.com

I'm a Network/Systems Analyst with a national systems integration firm. My professional fortes are UNIX-based system administration, sendmail, TCP/IP-based ethernet network engineering, network systems security (including firewalls), and programming (primarily Perl and C).

I've had notable success dealing with issues surrounding PC's, DOS, Windows and various applications/protocol stacks, including PC-NFS and LAN Workplace.

I'm still clueless in the electrical/circuit department.

* Batteries
* VHF
* Volunteer Examiner (ARRL and W5YI VEC)

ARRL Technical Specialist

Customer Support Manager for ADI/Premier Communications

Maintainer, ADI/Premier Communications World-Wide Web Page:

http://www.adi-radio.com/

My expertise is mostly in VHF/UHF FM operation and the amateur radio industry. I have been interviewed for Newsline, and the RAIN Report, and I have written articles for QST, CQ VHF, Popular Communications, Field Forum, and several other ham-radio-related publications. I am also a member of REACT International and an active user of the General Mobile Radio Service (GMRS).

PGH SATERN - Primary repeater system for Salvation Army

Maintainer of Link Communication List Server (Repeater Controllers):

http://www.engrng.pitt.edu/~rrc2/link.html

Only present users of Link Communication Products are welcome to join the list server. If you need information on Link Communications Products, contact them directly. Presently there are aprox 325 Members on the list server.

Maintainer of ACC List Server (Repeater Controllers):

http://www.engrng.pitt.edu/~rrc2/acc.html

The ACC list has approximately 300 members at this time. I am trying to restrict the list to only ACC users (control people) and owners. The list is also supported by the new owner of all the rights to ACC, Link Communications. I am also running the Link repeater controller list server. It has approximately 90 members at this time. The way to join the list server is to send me a short E-mail and tell me what equipment you are using. (Note: I have no ties to Link Communications or ACC. I started the Link list first and found how useful it is. I had a lot of requests to start the ACC list and did it.)

Please direct any feedback, submissions, or administrivia regarding these resources to my E-mail address above.

I've been an active Linux advocate since it first appeared on the Internet. I was looking for an operating system that would better meet the needs of my interest in Amateur Radio and provide me with an environment in which I could actively experiment and develop. Linux provides that and I've been promoting its use within Amateur Radio ever since.

I'm an early contributing member of the Linux Documentation Project, and you'll find the amassed works for it at:

http://metalab.unc.edu/mdw/

ampr.org IP Coordinator for Sydney, Australia Metropolitan Area subnet (44.136.xxx.xxx)

(I'm also the co-administrator of the Sydney (Australia) University of Technology Internet/ampr.org gateway.)

I'm happy to assist with information relating to:

* Linux, especially when related to Amateur Radio.
* Amateur Radio Internet Gateways

I am a practicing electronics engineer (for over 35 years) with expertise in solving problems in the design of linear circuits, audio signal processors, low frequency (DC to 10 MHz), low noise, field effect devices, power supplies, batteries, and similar analog situations. I'd be glad to assist others in the solution of their electronic problems in these and tangential areas. I started in ham radio as a kid in the 50's, vacuum tubes, motor generators, and most everything related to WWII surplus equipment. Was a design engineer at Texas Instruments for several years in the heyday of discrete devices and linear integrated circuits, mostly for military and surveillance use. My present concentration is toward digital telephonic communications. Have now gotten pretty familiar with use of the Internet. I guess it goes without emphasis that my capability goes

beyond the areas I listed as being most competent, but I could be a
resource you may apply as you feel my experiences would be helpful.

The W5YI Group, Inc.
P.O. Box 565101
Dallas, Texas 75356
USA
Tel. +1 (817) 461-6443

This firm consists of two separate divisions:

EDUCATION DIVISION:

Develops and distributes amateur radio self-training materials, including the Gordon West/WB6NOA line of audio, video, computer software and printed study materials. Credit card orders and information from (toll free): +1 800 669-W5YI (9594). All materials are guaranteed current and shipped within 24 hours with 2-day priority delivery. They offer a special discount for instructors conducting training classes.

W5YI Amateur Radio written license exam and Morse Code training products are also available from every Radio Shack nationwide. Color photographs of the major training products are available at their Express Order or Radio Shack Unlimited desk.

THE W5YI-VEC:

Coordinates the activities of more than one thousand volunteer examining teams world-wide. The locations of test sites near you can

be determined by calling +1 (817) 461-4663 anytime, including evenings and weekends. Any General, Advanced or Extra Class amateur may form their own VE team by calling +1 (817) 860-3800 during normal business hours.

All examination results are electronically filed with the FCC. Amateur radio licenses and call signs are normally issued within 48 hours of VEC receipt of the examination paperwork. New amateurs may determine their call signs by calling the FCC's toll free consumer assistance line: +1 (800) 322-1117.

[_Editor's Note:_ Steve is a graduate of the Massachusetts Institute of Technology (MIT) and is currently a faculty member at the University of Toronto. He has done a considerable amount of research into, and implementation of, wearable, wireless networked computer systems using amateur radio (via a 56kBaud GRAPES radio modem) as the physical layer. He is arguably a pioneer in "Wearable Computing." you may have also read about his invention in Scientific American, seen it on one of the science-oriented TV shows (such as the October 1996 episode of Scientific American Frontiers on PBS), or read some of his

articles, such as the lead article for Proceedings of the IEEE, Vol. 86, No. 11 or his lead article in CQ-VHF. He also wrote an article in the February 1997 issue of IEEE Computer. He is interested in connecting with other serious amateur hobbyists pursuing like or similar technologies. See his World-Wide Web Pages above for more information.]

Hospital Disaster Support Communications System (HDSCS) Coordinator

HDSCS World-Wide Web Page:

http://members.aol.com/emcom4hosp/

For over 15 years, the 90-plus members of the ARES/RACES-affiliated Hospital Disaster Support Communications System (HDSCS) of Orange County, California have served over 35 hospitals in nearly 50 emergency situations. At the new HDSCS site on the Web, you can find out how volunteer Amateur Radio operators can be an important backup communications resource for hospitals, if the hams are well organized and trained.

There you will find:

* How HDSCS organizes to support hospitals
* What "dedicated communicators" are and why they are important
* Frequently-Asked Questions about hams helping hospitals
* The surprising answer to "How often do hospitals need hams, anyway?"
* Response from hospitals served by HDSCS
* Info given to new HDSCS members
* Recruiting hams for hospital communications
* And lots more...

Joe Moell K0OV

homingin@aol.com

Homing In Column World-Wide Web Page:

http://members.aol.com/homingin/

(Homing In is a column in 73 Magazine featuring information about radio direction finding, hidden transmitter hunting, and jammer tracking.)

This site features:

* Southern California T-hunting, what equipment the winners use
* International-style foxhunts have come to California
* Complete design fixes for the Dick Smith doppler set
* Updates to the Moell/Curlee book (TRANSMITTER HUNTING---Radio Direction Finding Simplified), including board/kit/parts sources and building tips
* Frequently-Asked Questions (FAQ) and answers from the Homing In mailbox
* Index and subject list of all Homing In columns in 73 Magazine through September 1996 (over 90 articles)
* And lots more...

The Homing In site is written and maintained by Joe Moell K0OV. It is not affiliated with 73 Magazine, Wayne Green Enterprises, or any other commercial entity.

I have scratch-built all my antennas for all bands, written antenna programs, and experimented with many types of antennas over the past 38 years. I have been a ARRL VE for 5 years now, as well as team leader. I started in computers by building the Altair in about 1968, later switched to Radio Shack. In 1982, I started assembling Clones, and still do to this day (for a living). I have written code in Basic, Quick Basic and C.

I have built power supplies, both low-voltage-high-amperage and hi-voltage-low-amperage. I have wound my own transformers, one of which still runs my VHF station after 20 years of use.

It is very hard to pin-point what one knows, as we are constantly learning. Also, we must remember the old adage, "USE IT OR LOSE IT."

Jes, mi parolas la Internacian Lingvon, Esperanto.
Yes, I speak the International Language, Esperanto.

Esperanto, the International Language, is spoken by 600,000 to 2,000,000 people in over 110 countries.

Over 75 countries have national Esperanto organizations, including third-world countries like the USA.

In Europe there is a very active Esperanto Ham Radio association known as ILERA - Internacia Ligo por Esperanto-Radioamatoroj (International League for Esperanto Radio Amateurs).

For more information concerning Esperanto, contact ELNA (Esperanto League for North America) at +1 (800) ESPERANTO (377-3726) or send E-mail to elna@netcom.com. (The ELNA membership list also lists member ham calls and E-mail addresses.)

If you wish a ham Esperantist for a penpal, contact me at one of my addresses above.

I am involved in training for new and upgrading Hams, paying back for Elmering received over the years as I came into Ham Radio. I am a VE for VEC's active in local area. I am most interested in assisting young, old, and handicapped persons to discover Ham Radio. However, I want to help anyone that is committed to getting a Ham license or upgrading. I am most active on Ham satellites, mobile and fixed HF, Digital modes and construction. I am an avid electronics constructor, repairer and experimenter. I am trying to sample all modes, bands, and interest areas. I am also skilled in Public Relations, demonstrations, and "de-mystifying."

Dakota County, Nebraska ARES Emergency Coordinator (EC)

ARRL Official Bulletin Station (OBS)

I have been involved in Packet since 1984. I currently run a Packet BBS with the F6FBB software, as well as a number of Packet Nodes using TheNet Software. I have coordinated the Volunteer Exam Session in this area for a number of years. I operate 2 meters and HF, both CW and SSB. DX'ing and Contesting are some of my activities, along with collecting prefixes.

I have had NWS spotter training and am part of organizing the spotter network in the Siouxland area. AS the EC of Dakota county, I work with the Woodbury County, Iowa EC in the spotter effort.

During my business activity as a Systems Engineer with IBM, I have developed some expertise in PC's and have worked with the DOS, Windows and Windows 95 Operating Systems along with many Ham-related applications.

I have organized a number of Ham events such as Packet Symposiums and am the current Chairman of a Regional Ham Radio Convention.

I have a large collection technical manuals. Copies are available for the cost of duplication and postage. THIS NOT A BUSINESS. It is done as a courtesy to those needing assistance.

I lecture and conduct workshops on the subject of ElectroMagnetic
Interference, primarily related to problems encountered in the
Clinical (Hospital) environment. This is a program based on papers of
which I am the principal author published in journals related to
Biomedical Engineering. Related to this activity, I have and use
signature analysis equipment and, depending on area and time, am
available to assist in location and identification of sources of
severe interference to radio amateur activities.

Proudly hosting the following World-Wide Web Pages:

* Novice Notes Online
* Amateur Radio Ideas Page
* ACT Sustainable Transport Working Group Home Page
* Australian QRP Home Page
* Peter Parker's Projects Page

Following feedback from readers, I'm pleased to announce further
improvements to my World-Wide Web Page.

The main change is the use of .gif images for the schematics and other
diagrams instead of .bmp files. This dramatically reduces the size of
the files (10k vs 141k). Also, it is now possible to view the
schematics online.

Recently added is information on a simple 2m antenna for portable use.
Information on other projects will be added as time permits.

You can get to these pages via the URL above.

Dayton, Ohio E-mail Elmers

Sponsored by the Miami Valley (Ohio) FM Association (MVFMA):

http://www.febo.com/

The Dayton E-mail Elmers service allows new or prospective hams in Dayton and Southwestern Ohio, or even experienced amateurs who are venturing into a new aspect of the hobby, to send an E-mail request for assistance. Volunteer on-line Elmers then can provide a response in the "Elmer" tradition of mentoring new or less-experienced hams.

Today, many hams prepare for their license exams through classroom programs, and the individual Elmer's touch isn't as common as it once was. The E-mail Elmer service is an attempt to restore this long tradition. The MVFMA hopes that the initial E-mail exchange will be the start of an ongoing Elmer relationship in the best tradition of Amateur Radio."

Hams may use the E-mail Elmer service simply by sending an E-mail message to:

elmer@febo.com

and posing the ham radio question they'd like to have answered. Users will get a machine-generated confirmation, and within a few days, they will get a response from one or more of the volunteer Elmers.

For more information, or to volunteer as an E-mail Elmer, contact me
at my phone number or E-mail address above.

Keith Petersen W8SDZ

w8sdz@simtel.net

I have considerable experience in computers, some in packet, with an informal training in electronics. My background includes electronic surveillance countermeasures such as looking for interesting signals or wire connections with spectrum analyzers/receivers and TDR's, etc.

I'm not very active in operating, but have had a fair amount of experience when young.

I would prefer dealing with people in my local area, since many well-informed experts are available via the Internet.

Ken Pulfer VE3PU

jkpulfer@rac.ca
jkpulfer@igs.net

Radio Amateurs of Canada (RAC) Treasurer and Webmaster

(RAC is Canada's national amateur radio society.)

RAC World-Wide Web Page:

http://www.rac.ca/

Callsign E-mail Addresses for All Interested Canadian Amateurs

Any licensed Canadian amateur radio operator can now have an E-mail address of the form:

callsign@rac.ca

This means that you will no longer have to advise all your contacts of any new E-mail address if you change your Internet service provider. Canadian amateurs will not have to keep track of dozens or hundreds of E-mail addresses. Just remembering the callsign is all they will need.

RAC is able to offer this free service thanks to the volunteer help and support of Information Gateway Services (IGS) of Kanata, Ontario, Canada, and in particular the work of Rene Kahle, VA3RDK. Rene developed the E-mail aliasing software, and set up the server hardware (IGS also donates server space for the RAC and ARAS World-Wide Web Pages that contain much useful information for Canadian amateurs).

If you wish to obtain a callsign E-mail address, simply send a message to:

alias@rac.ca

with:

callsign = realaddress

in the BODY of the message.

For example, if my callsign was VA4KP and my real (current) E-mail address was:

ham@qsy.ca

I would put the following in the BODY of the message:

VA4KP = ham@qsy.ca

Any subsequent mail addressed to:

VA4KP@rac.ca

would be redirected by the IGS server to:

ham@qsy.ca

Of course, such mail would NOT go anywhere near RAC headquarters, nor be seen by RAC officials, nor placed in a public database that could be exploited for "junk-mail" distribution. Any E-mail addressed directly to:

ham@qsy.ca

will also be delivered as in the past without passing through the IGS server.

The E-mail aliasing service is currently set up on a trial basis. If it works well and amateurs find it useful, it will remain available for all who wish to use it.

Courage Center
HANDI-HAM System
3915 Golden Valley Rd.
Golden Valley, MN 55422
USA

Manager, Courage HANDI-HAM System

I have information pertaining to Amateur Radio and physical
disabilities or sensory impairments, such as blindness.

Visit us on the World-Wide Web:

http://www.mtn.org/handiham/

HELP WANTED: READERS NEEDED BY HANDI-HAMS

The Courage HANDI-HAM Center needs volunteer readers to record ham
radio books and publications on audio tape. Volunteer readers provide
a valuable service to persons with severe physical disabilities and
sensory impairments who cannot use regular printed books.

Volunteers should hold an Amateur Radio license and be familiar with
hobby terms and expressions. A clear speaking voice and the ability to
read the written text of Amateur Radio books and describe the diagrams
and pictures are essential.

HANDI-HAMS will provide a tech sheet and a sample tape to new
volunteers, as well as a copy of the book to be read and cassette
master tapes. Readers will need a good-quality cassette tape recorder
and a quiet place to record. Some of the books we would ask readers to
tape would be ARRL license manuals, special interest Amateur Radio
books, and instruction manuals for radios.

This volunteer work can be done in one's own home, at one's own pace,
as long as there is a quiet place to read. It is a wonderful way to
share Amateur Radio with others!

AA9PW Amateur Radio Exam Practice World-Wide Web Page:

http://www.biochem.mcw.edu/Postdocs/Simon/radio/exam.html

This WWW site allows users to practice for the US Amateur Radio
examinations on-line. The written examinations for all five classes,
novice through extra, can be generated complete with figures, filled
in on-line, and then graded. The results are presented
question-by-question, and also graphically by subelement, so that
users can identify areas which require further study.

More advanced options include saving the results of each examination a
user takes on-line. These results can be used to monitor progress and
also as a basis for generating exams tailored to a user's needs,
ensuring that all questions are practiced.

Exams can also be generated and E-mailed to users without WWW access:

Send E-mail to exams@eeyore.biochem.mcw.edu with a line in the BODY of
the message like:

generate novice

This will result in a novice exam being generated and E-mailed back to
you with the answers included at the end of the E-mail. These exams

lack the figures, so reference to a printed copy is advised! Simply replace "novice" with any of the other exam names (technician, general, advanced or extra) to get the other exams. To request multiple exams in one E-mail, write multiple "generate" lines.

Other exam resources such as the question pools, copies of the exam figures, and FCC Part 97 are also available. A comprehensive help page exists to guide users through the facilities of the site. All questions and queries are welcome!

==========
This message does not constitute any official or unofficial statement or policy of American Turnkey or any other organization, corporation or

institution.

I just upgraded to Advanced, and am now working on Extra. Was first licensed about ten months ago.

What I've learned:

1. How to operate HF from your apartment without being evicted
2. How to pass tests, both written and code
3. How to make a virtue out of the necessity of your limited equipment, and enjoy the process while doing it

I operate CW HF exclusively. The only time I get to operate is when the baby is asleep, so the XYL demands silent running. Besides, with my wimpy wire, there is little point in trying to run voice.

I am currently a mature student at King's College, University of Aberdeen, studying for the B.Sc. (Hons.) Computing Science. I enter the third year of this course on 25th September 1997.

I also have my own IBM compatible computer, which has a P166 processor, 32M of RAM and a total of 4.6G of hard drive space, spread between three EIDE hard drives. This computer normally runs under the Linux operating system, and I am gradually moving the above Fidonet BBS system across from MSDOS to Linux. Because of the lack of suitable software under Linux, I am writing one myself, having had 15 years experience as a professional programmer.

I am a regular participant in AuroraMUSH, a MultiUser system, and have authored several patches to the suftware controlling it. It may be visited at:

telnet://amush.cx:4190/

Status Servers:

telnet://status1.amush.cx:4191/
telnet://status2.amush.cx:4191/

I have been involved with Packet radio for over a decade now. Indeed, it was packet radio that got me interested in Amateur Radio in the first place.

I started up a mailing list connected with the Amateur Satellite world, currently using manual subscriptions. The list is:

Space.Repeater@cus.umist.ac.uk

and is for the discussion of the possibility of placing an amateur band repeater or transponder in orbit around a planet other than Earth, or on the surface of one of the other planets.

I will add that, although I can claim to be something of an expert on both Linux and Packet Radio, I am definitely NOT an expert on the two together.

* SAREX

Educational Advisor to the American Radio Relay League

I specialize in developing growth in volunteer organizations and have published and made public presentations on this subject.

I have written and published training/educational curriculums for Novice, and Tech Plus amateur radio licenses. Of interest is the fact that amateurs licensed through my courses are very likely to upgrade as evidenced by the high number of hams in the Lawton, Oklahoma area that hold Extra Class licenses.

I organized and conducted a SAREX in southwest Oklahoma that involved over 3,000 students in 21 schools in seven cities of southwest Oklahoma. The SAREX consisted of an essay contest with the winners being able to ask questions of the astronauts while they orbited the earth. The live SAREX was broadcasts over the Lawton, Oklahoma Public School systems cable television to the public in southwest Oklahoma.

More recently I have been involved in securing building permits in Florida to put up amateur radio towers in this highly restrictive State.

I am a consulting engineer, which takes me to various locations. My home address is shown above and in the call book. I can answer E-mail (as everyone knows) from anywhere that I may be.

Don't know where you are going to use a old horse like myself. I am part of the old and part of the new displine. I have fabricated all my wire antennas which includes the matching device (transformer) and been building equipment for more than a quarter of a century. I also manage to repair all my equipment - when parts are available. I restore early age broadcast receivers and HF transceivers. I know the old Heathkit HW100 and HW101 very well and built a Heathkit 5400 transceiver with matching Power Supply. I have constructed many amplifiers and own a Swan, Collins (S-Line), Kenwood, Heathkit, and Johnson. I am very active in the two meter band.

In addition, I have restored many an old Coleman Lanterns (which is very enjoyable) and also have some American Gas Machine Lanterns (1930's).

THE NETHERLANDS CompuServe: pdreynolds@compuserve.com

http://www.xs4all.nl/~pdr123/pdr-home.htm

I am very lucky in that I earn my living in radio communications, so
my expertise is fairly broad (but not focused on amateur techniques
only):

* Modulation types - FSK, PSK, MSK
* Error control - various types of ARQ and FEC systems
* RF - Antennas, HF propagation
* Networking - TCP/IP over HF
* Frequency bands: VLF, LF, HF, VHF, UHF, SHF

This is a very brief synopsis of the areas that I have dealt with over
the years. I always enjoy discussing and researching a communications
problem so if you don't see it listed above drop me a line anyway,
especially if you happen to be in Europe.

I build the only coaxial antenna I have seen for amateur radio. I experiment with antennas from 80m to 440MHz. I am a retired 2-way radio senior technician with 25 years of service with Motorola C&E repairing, installing, and testing, of commercial 2-way radio equipment including pagers, portables, mobiles, base and control stations, repeaters, CCTV, communications consoles, remote control equipment, microwave and multiplex. I am familiar with the test equipment required to perform these duties. I write technical articles for our club newsletter. I am competent with both tube and transistor circuitry. I hold or have held an Extra Class Amateur Radio License, a First Class Commercial Radiotelephone License, a General Class Commercial Radiotelephone License, a California State Contractors License Class C63 (Communications), and two CET Certificates.

http://www.sbarc.org/

The Santa Barbara Amateur Radio Club is an educational non-profit
501c-3 corporation. It represents a membership of over 400 members,
operates several VHF/UHF repeaters and a club station, provides the
financial support to local ARES, and presents amateur radio classes
and a follow on Elmers Program.

I am the Assistant Principal at Estill County High School in Irvine, KY and have been in the education business for the past 23 years. I enjoy helping people earn their ham radio license privileges. I have a

test team with the WCARS group and have been testing for a good number of years. We have tested over 300 hams during the last three years.

I also have been in the repeater business since 1973 (146.820) and have held a ham license longer that any other resident of Estill County Kentucky. I am the fourth ham to be licensed in our community, the other three have either become Silent Keys or moved from our county. I am very proud to have held a ticket for almost thirty years. I hope through my experience with the local emergency team, I can also provide advice on EMS. I founded the local Rescue Squad in 1978 and am still President of the corporation. I was also the local DES Coordinator from 1977-1993.

Chuck Rippel WA4HHG

crippel@exis.net

Secretary, Collins Collectors Association

The Collins Collectors Association would like to invite those of you who have an interest in Collins Radio to subscribe to the now fully automated Collins Reflector. This service is sponsored by the CCA and is provided at no charge to Collins enthusiasts.

There is an FAQ which will hopefully be sent to each new subscriber when they "sign on." If you would like one and don't get it, drop me an E-mail at my address above.

There may be a few initial bumps and glitches at first but we hope those of you who choose to participate will enjoy it.

As of 1/6/97, the Collins Reflector will be fully automated and I will discontinue forwarding the mail manually as in the past.

The new automated list processor will be a real upgrade. It will enable you to get the material in nearly real time and does not require me to forward each message manually. You will get the material

much quicker than before. The Collins Listserver behaves much like the Boatanchors list. Simply, you subscribe to the list, send it messages which it then "reflects" back out to all those who subscribe. This is done once every ten minutes.

You must resubscribe to the new listserver in order to continue to participate. The automated list server follows the same guidelines contained in the CCA FAQ. Please continue to follow those guidelines for posting and contributing.

Here is how to subscribe:

Send an E-mail message to:

listserv@listserv.tempe.gov

Leave the subject header of the message blank and in the BODY, simply type:

subscribe collins

The listprocessor will output an E-mail message back to you with easy to follow instructions asking for your confirmation. At that time, you will be asked to send a second E-mail message to the listserver. Follow those instructions exactly and send the second, confirmation, message to the listserver.

If all is successful, you will be signed up to the list and a complete set of instructions will be sent back to you in the form of an E-mail by the automated list server.

Finally, a very big thanks to Dave Kelly, AI7R and the City of Tempe, AZ who have graciously provided and set up the server. Dave and the Collins Collectors Association sponsor the Collins Reflector as a no charge benefit for Collins afficionados everywhere. Enjoy!

"Buck" Rogers K4ABT

k4abt@packetradio.com
buck4abt@inmind.com

Packet Radio Networking World-Wide Web Page:

http://www.packetradio.com/
http://www.packetradio.org/
http://www.sedan.org/

To open the pages, a Packet Radio Glossary that I began writing in 1988, and updated as new mnemonics and acronyms were added to the Packet jargon, is at:

http://www.packetradio.com/glossary.htm

Next there is the "original" Packet Radio Primer for the Novice or beginning Packet Radio operator at:

http://www.packetradio.com/primer.htm

Since 1996, the TNC to Transceiver diagrams from these pages are the most used and imitated on the WWW. I maintain these drawings directly from the Original Equipment Manufacturers (OEM's) and insure they are of the latest makes and models. These interface diagrams are at:

http://www.packetradio.com/tnc2rad.htm

These interface drawings are taken from over 14 years of the PACKET USERS NOTEBOOK column in CQ Magazine. In addition, I've included many TNC and transceiver 9600 baud modifications at:

http://www.packetradio.com/9600mods.htm

I've included several zip files of the latest X-1J4 Rev C code and Packet Radio terminal programs. This site contains information and instructions that enable the reader and user to build and configure a Packet Radio network. Complete with the TNC changes and MODS plus both user level and backbone node parameter suggestions, at:

http://www.packetradio.com/network.htm

The parameters and mode guidelines are at:

http://www.packetradio.com/x1j4pram.htm

To round out these pages to be the most helpful to all Amateurs, there are pages that describe "How to...":

* Design and build antennas, complete with drawings and formulas
* Build a superb ground system for your QTH, node/repeater, or comm site
* Build a solar powered site where no utility mains are present
* A coaxial cable table for the most used Coax by Amateurs
* WX Watch and SKYWARN links
* A Packet Radio bandplan
* An online callbook lookup link
* Hamfest Calendar
* Network maps of the 11 State SEDAN emergency comm network

and much, much more.

I have been a ham since 15. I have been an Extra class operator since age 17, and a VE since age 18. [_Editor's Note:_ Possibly the youngest Contact VE ever.]

I am an avid HF QRP (low power) and mobile operator. I have spent literally hundreds of hours installing my mobile station (IC-706 and Screwdriver antenna, plus more grounding straps than I can remember) in my 1995 Neon.

Most of the time I operate QRP CW mobile.

Why? It challenges my operating skills as much as possible, plus QRP is safer (RF-wise) than is 100 or 1500 watts. With the effects of RF exposure still unknown, I don't feel like exposing myself to high-power RF fields any more than necessary, and if 3 watts will do the job, so be it, I'll emit it.

In addition, people are generally amazed when you mention that not only are you running just 3 measly watts output power, and on top of that you're doing it from your car as it's zipping down the Interstate at 65 mph. They just can't believe it's possible that less power than a nightlight is bouncing off the ionosphere and ground three times, and is still able to be detected 10,000 miles away.

I'm here to tell them it is.

I enjoy building kits, and consider myself to be a good builder.

I am a fair contest operator, and enjoy 35 WPM CW ragchews as well as hunting for DX.

I moved from Laurel, MD to Eugene, OR in November, 1998. It has been strange to not hear European stations 24 hours a day, although I am getting used to hearing Japanese stations 24 hours a day. I am a member of the Valley Radio Club of Eugene, and give VE exams with the local group. In the past I have been very active with both the Laurel (Maryland) and University of Maryland Amateur Radio Clubs, and

operated with both during public service events, contests, special events, and emergency operations (earthquakes, hurricanes, etc.). I have been the chief HF operator at University of Maryland HF-related events (Field Day and Sweepstakes) for the past three years.

As a Volunteer Examiner, I have conducted roughly 150 test sessions, testing at minimum a thousand applicants.

I have given Novice/Technician/General license class instruction, as well as taught a 5 WPM code class. I have been told that I have a knack for describing complex subjects in ways that make them far easier for laypeople to understand. I developed a presentation touting the best points of QRP, and made presentations at four radio clubs in Maryland, and at the QRP forum at the 1998 Dayton Hamvention. I organized the Dayton QRP banquet in 1998, and am doing the same in 1999.

Most of all, I love a good challenge, and proving I can do something I've been told is practically impossible.

For instance, would anyone believe that communicating on 20 meters over a distance of 14,000 miles from your car at 2.5 watts was possible?

My favorite aspect of amateur radio is contesting. It drives my station improvements and operating proficiency. I have played around with antennas and made various station modifications to improve my

contact efficiency. Along the way I have solved some RFI problems, built many of my station accessories, installed and built some HF antennas, put up a small (40') tower, etc.

I volunteer as a RACES operator in no particular capacity. I help with a few VE test sessions a year mostly representing the ARRL VEC with the Burlington ARC team.

I work as a SRAM design/product engineer at IBM Microelectronics in Essex Junction, Vermont. I have been interested in electronics and computers since a young age, but only got my amateur radio license in 1993 as a Technician at the age of 31. I got to know the code and upgraded to Extra in February of 1994.

I have nearly 30 years experience in electronic/computer service work. I enjoy designing, building, and operating vacuum tube and solid state equipment. I restore, test, repair, and operate antique radio equipment. The maximum power I use for daily operations is always below 100w, and most of the time, I operate at QRP (5w) or less! (More with less.) I have a real enthusiasm for building just about anything from nothing, as part of the homebrew aspect of the hobby. When not working DX, enjoying a good contest, or have a great time on Field Day, I watch over my 6m repeater, or work VHF packet. I am glad to be of help to those in need! I fully support the Elmer program as a means to bring new people into Amateur Radio. I teach Novice and Tech classes for aspiring Amateurs. I am also a merit badge instructor for the scouting program, and the advisor for the Bloomsburg University Amateur Radio Club.

I can help people with HF stuff, cheap antennas, and am willing to help troubleshoot problems with rigs.

I believe that one of the pillars of ham radio - construction/ understanding at the burn-your-hand-with-a-soldering-iron level - is drifting out of ham radio. With Japanese radios which cost so much, fewer and fewer hams are willing to risk their warranty to service their own equipment. I would like to see a turn-around here...

Club Activities, Examinations, and other events in the Omaha/Lincoln/Council Bluffs (Eastern Nebraska/Western Iowa) area.

Also willing to provide newsreader kill/select file help to anyone interested in customizing their presentation of the rec.radio.* newsgroups

I would be particularly interested in mentoring/training new FAQ/Info maintainers for the rec.radio.* newsgroups (see also John Seney for FAQ maintenance opportunities). To paraphrase Zack Lau, I can't post it all myself!

I have taken over maintenance of the Perl-based auto-faq FAQ management and posting package from Ian Kluft and would be happy to guide new FAQ authors in its use. The latest version, 3.3, is available via anonymous FTP from:

ftp://ftp.novia.net/customers/pschleck/auto-faq/

The auto-faq-users mailing list has also been re-sited at Novia. To subscribe, send E-mail to auto-faq-users-request@novia.net

with:

subscribe auto-faq-users

in the message BODY. An acknowledgment message will follow shortly. To unsubscribe, replace the above command with:

unsubscribe auto-faq-users

Recently I undertook some academic research into packet radio using KA9Q's Multiple-Access/Collision Avoidance (MACA) link-layer protocol. I attempted a literature survey as well as some software simulations of the protocol (with varying degrees of success). I would welcome any opportunities to improve on my work, find out about any actual MACA implementations, share information, and build on my bibliography (available on request). More information about MACA may be obtained from:

http://www.novia.net/~pschleck/wireless.html

ARRL Technical Specialist

I am a pilot (N6141F) with more than 10 years as air and ground search and rescue. Active in ARES, RACES, and Civil Air Patrol (CAP West 41).

I also have a home in Alpine, Texas, USA.

I have started doing a weekend or four-night amateur radio licensing class that works great. I use the ARRL video course and it works super. We watch the tapes, answer questions and then spend a three-hour session giving them practice Novice and Technician tests, then reviewing each question they missed. We have even had students that had studied at home and just did the last session for review.

I now do four or six classes a year, some in Texas and some in New Mexico.

My vocation and avocation both deal with Radio Frequency transmission and propagation. I have spent considerable time working with RF safety issues as they pertain to broadcast radio, television, and now amateur stations.

Presently I serve as Region 3 Administrative Assistant for Air Force MARS.

Additionally, I serve as Activities Director and Chairman of the Field Day Committee for the Viking Amateur Radio Society (VARS).

- - My survey of automotive EMI problems is mostly complete. The results
- - are in September 1994 QST, including warranty and customer service
- - information for most automobile manufacturers (many of whom have
- - published installation guidelines).
- -
- - I am also continuing to pursue more formal contacts and
- - standards-making through the EMR and EMI Standards Committee of the
- - Society of Automotive Engineers (SAE), of which I am a member.
- -
- - Copies of General Motors installation guidelines are available. Saturn
- - allegedly has a video on mobile installation, but none of the dealers
- - seem to know about it. I have a call into one of my low friends in
- - high places. :-)
- -
- - If anyone would like a copy of the GM installation guidelines, send a
- - 9X12" SASE with two units of postage *and* a specific request for the
- - "GM Installation Guidelines" to the ARRL Technical Department
- - Secretary, 225 Main St, Newington, CT 06111, USA. A copy has been
- - reprinted in the ARRL book -- Radio Frequency Interference -- How to
- - Find It and Fix It.
- -
- - EMI/RFI Resource List and RFI Tips package available. A business SASE
- - with 98 cents postage is appreciated. Please specify the desired
- - documents in your correspondence.
- -
- - The FCC has released the results of a telephone interference survey
- - just completed.
- -
- - If you would like a copy of the survey, which includes a list of
- - telephone models checked, send an SASE with two units of first class
- - postage to the Technical Information Service at ARRL HQ.
- - Alternatively, you may obtain an electronic copy from the ARRL Info
- - Server below.
- -
- - If leakage from your local Cable TV operator is interfering with the
- - Amateur Radio Service, it is in violation of the provisions of Part 76
- - of the FCC regulations.
+ I have been at ARRL HQ for over 13 years. During that time, I have
+ become ARRL's RFI and RF-exposure guru. If you have questions about
+ RFI or RFI exposure, first go to the ARRL's Technical Information
```

+ Service World-Wide Web Page:

- - I would first direct the problem toward the cable company system
- - engineer or service manager. Chances are the "front-line" people who
- - answer the phone don't know what you are talking about.
+ http://www.arrl.org/tis/

- - If this is not effective, contact me here at ARRL HQ. I can put you in
- - contact with our liaison to the National Cable Telecasters
- - Association. This liaison will help your cable operator understand
- - their responsibilities.
+ and download the applicable information packages. From there, you can
+ direct questions about RFI or RF exposure directly to me. I will
+ either answer your question directly, or refer you to some of my
+ contacts in industry, in the cable industry, etc. ARRL also publishes
+ the _ARRL RFI Book_ and _RF Exposure and You_.

- - For CATV interference problems in general, I recommend you obtain our
- - Radio Frequency Interference Book. If you are a League Member, you can
- - also get a copy of the ARRL Technical Information Service info package
- - on CATVI -- "EMI/RFI - CATV" by sending a LARGE SASE with 3 stamps on
- - it to the ARRL Technical Department Secretary, 225 Main St, Newington
- - CT 06111, USA. This package is a reprint of an article I wrote for
- - Communications Technology -- the Journal of the Society of Cable
- - Television Engineers. We submitted it to "their" journal because we
- - felt that it would carry more weight with the cable companies.
+ I have also had experience with testing of transmitters and receivers,
+ mainly in conjunction with ARRL's Product Review testing. A copy of
+ ARRL's Test Procedures Manual can be downloaded from:

- - If you have any questions after you have read the material, contact me
- - here at HQ. I can usually get back to you within a few days to offer
- - some additional help.
+ http://www.arrl.org/members-only/prodrev/testproc.pdf

- - Many EMI/RFI files are also available from the ARRL Info Server. See
- - Mary Robertson's entry for more information.
+ Before I came to ARRL, I spent a number of years as a TV and audio
+ service technician, so can often help with troubleshooting questions.
+ I wrote the troubleshooting chapter of the ARRL Handbook.

- - ARRL Technical Information Service Coordinator (tis@arrl.org)
+ The ARRL Technical Information Service (TIS) Coordinator is now
+ another member of the ARRL HQ staff. Please direct all TIS queries to
+ tis@arrl.org, _NOT_ my E-mail address above.

- - The ARRL Technical Information Service (TIS) is a valuable membership
- - benefit that helps hams find answers to difficult technical questions.
+ See Mary Robertson's entry for more information about the ARRL Info
+ Server.

- - The answer to a ham's most common technical questions can be found in
- - one of the many books about Amateur Radio. Folks who call or write to

- - ARRL TIS staff are often referred to one of these books or to a past
- - magazine article.
+ See Jon Bloom's entry for information about the ARRL World-Wide Web
+ Home Page.
+ --

- - However, most hams find that the fastest way to get the answer is to
- - do their own research. Publication catalogs often talk about what
- - kinds of information are available in different books. A few good
- - books will answer the vast majority of questions as well as enhance a
- - ham's knowledge and enjoyment of this fascinating hobby.
+Gene Harlan WB9MMM

- - Magazines are also a superb technical reference. An annual index of
- - articles appears in the December issue of QST and other magazines.
- - These indexes will usually have an article or two (or six) about a
- - particular topic. If an older QST or QEX article is not available
- - locally, the ARRL Technical Department Secretary can provide a copy
- - for a small fee. Back issues are also available from the QST
- - Circulation Department.
+ atvq@aol.com

- - The ARRL Technical Information Service is a valuable source of
- - information and research for questions that cannot be answered by
- - other means. ARRL TIS has information packages and bibliographies that
- - are available on request to answer most technical questions.
+ Amateur Television Quarterly (ATVQ) Magazine

- - For those who want to know if something has been previously published
- - on a particular subject, TIS can also assist with research to locate
- - this information. TIS also helps locate companies that sell hard to
- - find parts or supplies used in our hobby.
+ The magazine's E-mail address and mine are the same: ATVQ. There is
+ also a ham radio section for "manufacturers and dealers" on America
+ On-Line in which we list Amateur Television Quarterly, as expert and
+ manufacturer. That is where most of the Frequently-Asked Questions
+ (FAQ's) come from.

- - Many TIS files are also available via the ARRL Info Server. See Mary
- - Robertson's entry for more information.
+ Most FAQ's are answered in one of two books we published. ATV Secrets
+ for Aspiring ATV'ers is a non technical book, and Volume II is a
+ 300-page technical manual with theory and projects for all equipment
+ necessary to operate an ATV station. Prices in US funds are $9.95 and
+ $24.95 plus postage ($3.10). Most of your inquires can be answered by
+ either of these two books.

- - See Jon Bloom's entry for information about the ARRL World-Wide Web
- - Home Page.
+ I am also compiling a set of W6ORG Notes, a regular column in ATVQ,
+ which answers many of the technical FAQ's on various equipment and
+ operations. This will be available for $9.95 also.

```

@@ -6649,32 +6660,49 @@
I am a fair contest operator, and enjoy 35 WPM CW ragchews as well as
hunting for DX.

- - I am active with both the Laurel (Maryland) and University of Maryland
- - Amateur Radio Clubs, and operate with both during public service
- - events. I have been the chief HF operator at University of Maryland
- - HF-related events (Field Day and Sweepstakes) for the past three
- - years.
+ I moved from Laurel, MD to Eugene, OR in November, 1998. It has been
+ strange to not hear European stations 24 hours a day, although I am
+ getting used to hearing Japanese stations 24 hours a day. I am a
+ member of the Valley Radio Club of Eugene, and give VE exams with the
+ local group. In the past I have been very active with both the Laurel
+ (Maryland) and University of Maryland Amateur Radio Clubs, and
+ operated with both during public service events, contests, special
+ events, and emergency operations (earthquakes, hurricanes, etc.). I
+ have been the chief HF operator at University of Maryland HF-related
+ events (Field Day and Sweepstakes) for the past three years.

As a Volunteer Examiner, I have conducted roughly 150 test sessions,
testing at minimum a thousand applicants.

- - I have recently given Novice/Technician license instruction, as well
- - as taught a 5 WPM code class. I have been told that I have a knack for
- - describing complex subjects in ways that make them far easier for
- - laypeople to understand.
+ I have given Novice/Technician/General license class instruction, as
+ well as taught a 5 WPM code class. I have been told that I have a
+ knack for describing complex subjects in ways that make them far
+ easier for laypeople to understand. I developed a presentation touting
+ the best points of QRP, and made presentations at four radio clubs in
+ Maryland, and at the QRP forum at the 1998 Dayton Hamvention. I
+ organized the Dayton QRP banquet in 1998, and am doing the same in
+ 1999.
+
+ Most of all, I love a good challenge, and proving I can do something
+ I've been told is practically impossible.
```

```
+
+ For instance, would anyone believe that communicating on 20 meters
+ over a distance of 14,000 miles from your car at 2.5 watts was
+ possible?
```

kb5mu@amsat.org
```

```
- - I'm not the author of InstantTrack itself, but I was extensively
- - involved in its testing. I'm the author of OrbitDRV (the tracking TSR
- - that comes with InstantTrack) and a number of other InstantTrack
- - auxiliary programs.
- -
- - AMSAT-NA (The Radio Amateur Satellite Corporation in North America)
- - operates the Internet host AMSAT.ORG to provide for efficient
- - communications between people interested in the amateur satellite
- - program. At this time two services are provided: a message remailing
- - service and a mailing list service.
- -
- - In addition, the AMSAT World-Wide Web home page provides interactive
- - access to a variety of information related to the amateur radio
- - satellite program. Use your Web browser program (e.g., Mosaic) to
- - access the URL:
- -
- - http://www.amsat.org/
- -
- - Anonymous FTP is available from:
- -
- - ftp://ftp.amsat.org/amsat/
- -
- - This archive contains much of the same information as the WWW server.
- - In addition, various files and programs are available for anonymous
- - FTP. This is a relatively new archive, so the older FTP site:
- -
- - ftp://ftp.ucsd.edu/hamradio/
+ http://www.amsat.org/amsat/kb5mu.html

- - still has lots of files not available there.
+ FAX: +1 (619) 571-2881

- - The message remailing service permits users to send each other mail on
- - the Internet without keeping track of each other's Internet address.
- - The remailing service allows each user to receive mail sent to the
- - address callsign@amsat.org, where callsign is that user's amateur
- - radio callsign, or other unique identifier. Mail sent to that address
- - will be routed first to the AMSAT.ORG host at UCSD in San Diego, then
- - remailed from AMSAT.ORG to the network address specified by the user.
- - In most cases, this process delays the message by only a very few
- - minutes. The mailing list service groups subscribers into mailing
- - lists to receive certain types of messages. There are public mailing
- - lists available to anyone, and private mailing lists available only to
- - certain people (for example, AMSAT Board of Directors members or
- - PACSAT command stations). Currently the following public mailing lists
- - exist:
+ San Diego, California
+ USA

- - ANS - AMSAT News Service
+ * AMSAT
+ * Internet Services
```

+ * OSCAR

- - This mailing list carries official news releases from the AMSAT News
- - Service. These messages are posted in a form suitable for direct
- - posting to a packet radio BBS system. Each message contains a Bulletin
- - Identifier (BID), which permits the message to be introduced into the
- - packet network at many places without resulting in duplicate bulletins
- - at any BBS. The primary purpose of this mailing list is to distribute
- - ANS bulletins for redistribution (via the packet net or on AMSAT voice
- - nets), but individuals may also subscribe for their own use. If your
- - local packet BBS doesn't seem to get the ANS bulletins reliably, you
- - are encouraged to post the ANS bulletins yourself.
+ AMSAT (Radio Amateur Satellite Corporation) Vice President for Electronic
+ Publishing

- - Only authorized AMSAT News Service personnel should send messages to
- - the ANS mailing list.
+ AMSAT North America World-Wide Web Page:

- - AMSAT-BB - AMSAT bulletin board
+ (All kinds of information on amateur satellites)

- - This mailing list carries general AMSAT information. This information
- - may NOT be suitable in content for transmission via amateur radio, so
- - automatic reposting of AMSAT-BB messages to packet radio BBS's is
- - discouraged. The purpose of this mailing list is to provide a forum
- - for general discussion of any satellite-related topic.
+ http://www.amsat.org/

- - Anyone may send messages to the AMSAT-BB mailing list. Simply address
- - your message to amsat-bb@amsat.org, and it will be automatically
- - forwarded to all subscribers to the AMSAT-BB mailing list.
+ AMSAT North America Anonymous FTP Archive:

- - Editors of publications should ask permission of the sender before
- - publishing anything seen in AMSAT-BB elsewhere, unless the posting was
- - obviously a public press release. However, posters should realize that
- - anything posted to AMSAT-BB is essentially public.
+ (Software and other files for amateur satellite enthusiasts)

- - KEPS - Keplerian Elements mailing list
+ ftp://ftp.amsat.org/

- - This mailing list carries official postings of Keplerian element sets
- - for satellites of interest to radio amateurs. Like the ANS bulletins,
- - these messages are posted in a form suitable for direct posting to a
- - packet radio BBS.
+ For email access to FTP archives, send a message with just:

- - Only authorized AMSAT News Service personnel should send messages to
- - the KEPS mailing list.

```
- - NASAINFO - NASA related information mailing list
+ help

- - This mailing list contains information about current and planned NASA
- - space missions. Be forewarned: at times this mailing list delivers
- - many large messages.
+ in the body to:

- - SAREX - Shuttle Amateur Radio Experiment mailing list
+ ftpmail@amsat.org

- - This mailing list contains information and press releases pertaining
- - to SAREX missions.
+ AMSAT-NA E-mail Aliases (_<callsign>_@amsat.org) Information:

- - To obtain any of these services, just send a message to the address
+ http://www.amsat.org/amsat/listserv/remailer.html

- - listserv@amsat.org
+ AMSAT-NA Public Mailing Lists:

- - This address may be reached from CompuServe MAIL as:
+ ANS (AMSAT News Service)
+ KEPS (Keplerian elements weekly bulletins)
+ AMSAT-BB (discussion about amateur satellites)
+ SAREX (discussion about manned space missions with amateur radio)
+ AMSAT-DC (regional discussion for District of Columbia)
+ AMSAT-NE (regional discussion for New England)

- - >INTERNET:listserv@amsat.org
+ Send a message with just:

- - For the moment, the maintenance of the AMSAT.ORG mailing lists and
- - remailing aliases is done manually. Later, this service will probably
- - be automated and you will have to follow a strict message format. For
- - now, you may send requests in free format. They will usually be
- - processed within a few days. In general, you will not receive an
- - explicit reply to your request. Be sure you specify:

- - 1. Which mailing list(s) you want to receive
- - 2. Your callsign, if any
- - 3. The Internet address to be used, if different from the one in your
- - From: header.
+ help

- - You should not send messages about your subscriptions to any of the
- - mailing lists. Send them to listserv@amsat.org instead. This includes
- - questions, requests for changes, requests for information about
- - mailing services, and complaints.
+ in the body to:

- - The list of amateurs who may be reached via the message remailing
- - service may be obtained by requesting the "address book". Note that
- - the address book as distributed contains only the callsigns of the
- - available addressees, not their actual Internet addresses. The address
```

- - book is updated occasionally, and does not necessarily contain the
- - very latest information.
+ majordomo@amsat.org

- - You may request to be added to the list, to be deleted from the list,
- - or to have your Internet address changed on the list. Please include
- - your callsign if you have one. If you don't have a callsign, that's
- - OK, but please say so. If you have more than one Internet address you
- - want to have available on the AMSAT.ORG remailer, you may so specify.
- - For instance, if you have a regular Internet address and a CompuServe
- - account, you may appear in the address book as both w#xxx and
- - w#xxx-cis. Mail sent to w#xxx would go to your Internet address, and
- - mail sent to w#xxx-cis would go to CompuServe. MCImail accounts have
- - the form w#xxx-mci, and so on.
+ for instructions, or see:

- - You may also subscribe or unsubscribe to any of the public mailing
- - lists described above. Send a message to listserv@amsat.org,
- - specifying clearly which mailing list(s) you want to add or drop, and
- - giving your callsign if you have one. When you subscribe to a mailing
- - list, you will automatically be added to the remailing service as
- - well, because the mailing lists are maintained by callsign. If you
- - have more than one address listed in the remailing service, please
- - indicate which one(s) you want the mailing list messages sent to.
+ http://www.amsat.org/amsat/listserv/menu.html

- - Additional mailing lists, public or private, can be set up as needed.
- - Send mail to listserv@amsat.org for details.
+ Maintainer of the DOS satellite tracking program InstantTrack by Franklin
+ Antonio, N6NKF.

- - Questions about any service offered by AMSAT.ORG may be directed to
- - listserv@amsat.org as well.
+ InstantTrack Frequently Asked Questions (FAQ) List:

- - Please note that the AMSAT business office is separate from mailing
- - list maintenance. You may address membership requests to
- - martha@amsat.org, or send them by mail, phone, or fax to AMSAT
- - headquarters:
+ http://www.amsat.org/amsat/intro/itfaq.html

- - AMSAT-NA

I am especially interested in VHF/UHF and microwave amateur bands as
well as Amateur television. I am treasurer and a founding member of
the newly-formed Triangle Amateur Television Association in
Raleigh-Durham-Chapel Hill, NC. I am willing to share my expertise in
the following areas:

* ATV - Getting started, starting local activity, repeaters.
* VHF/UHF - Propagation, what you need to get started, operating
portable, contesting, weak signals, and DX.
* Sealed Lead Acid Batteries - How to take care of them.

ARRL Laboratory Engineer

* Radio Frequency Interference (RFI) matters
* RF Exposure Safety/Regulations
* Equipment Testing

I have been at ARRL HQ for over 13 years. During that time, I have become ARRL's RFI and RF-exposure guru. If you have questions about RFI or RFI exposure, first go to the ARRL's Technical Information Service World-Wide Web Page:

http://www.arrl.org/tis/

and download the applicable information packages. From there, you can direct questions about RFI or RF exposure directly to me. I will either answer your question directly, or refer you to some of my contacts in industry, in the cable industry, etc. ARRL also publishes the _ARRL RFI Book_ and _RF Exposure and You_.

I have also had experience with testing of transmitters and receivers, mainly in conjunction with ARRL's Product Review testing. A copy of ARRL's Test Procedures Manual can be downloaded from:

http://www.arrl.org/members-only/prodrev/testproc.pdf

Before I came to ARRL, I spent a number of years as a TV and audio service technician, so can often help with troubleshooting questions. I wrote the troubleshooting chapter of the ARRL Handbook.

The ARRL Technical Information Service (TIS) Coordinator is now another member of the ARRL HQ staff. Please direct all TIS queries to tis@arrl.org, _NOT_ my E-mail address above.

See Mary Robertson's entry for more information about the ARRL Info Server.

See Jon Bloom's entry for information about the ARRL World-Wide Web Home Page.

Gene Harlan WB9MMM

atvq@aol.com

Amateur Television Quarterly (ATVQ) Magazine

The magazine's E-mail address and mine are the same: ATVQ. There is also a ham radio section for "manufacturers and dealers" on America On-Line in which we list Amateur Television Quarterly, as expert and manufacturer. That is where most of the Frequently-Asked Questions (FAQ's) come from.

Most FAQ's are answered in one of two books we published. ATV Secrets for Aspiring ATV'ers is a non technical book, and Volume II is a 300-page technical manual with theory and projects for all equipment necessary to operate an ATV station. Prices in US funds are $9.95 and $24.95 plus postage ($3.10). Most of your inquires can be answered by either of these two books.

I am also compiling a set of W6ORG Notes, a regular column in ATVQ, which answers many of the technical FAQ's on various equipment and operations. This will be available for $9.95 also.

* Volunteer Examiner (Other)

I am a Civil Engineer by training and a DX'er by choice. My Elmer taught me how to work pile-ups and how to build antennas, having put up 12 towers all over 100 feet. I know what it takes to get a tower up. I don't climb anymore, but have a lot of info. I like working on antennas and have several big Moseleys up in the air. It would be great to pass on what I have learned, as we are not all born knowing how to do everything, and the older I get, the smarter my father gets.

Assistant EC for Josephine County (Oregon) ARES/RACES

I am involved in commercial RF and wireless design, and willing to share experience with other amateurs. I have a complete test equipment facility for checking radios, antennas, etc.

Local NEWSLINE outlet: Program airs on the 147.30 repeater right after the Monday night net.

I am active on HF, VHF and UHF, including voice and digital modes, and will help in whatever areas I can for most of Southern Oregon.

ARRL Contest Branch Manager

I have been active in the Hobby for over 28 years, in a wide range of activities from local clubs, special events, public service communications, emergency communications, contesting, DXing, packet, repeaters, traffic handling, and more. I have served as an officer of local radio clubs, newsletter editor, Events Coordinator, Field Day Chairman, Local County Emergency Coordinator and Area District EC, member of several emergency preparedness planning groups, SKYWARN coordinator, and liaison to numerous served agencies in North Carolina. I have taught amateur radio licensing classes (theory and code) and have been active in developing small group "seminars" for training (everthing from "how to build a dipole" or "handle traffic" to "how to work with/at various agencies when dispatched during and emergency." I hold WAS (both novice CW and the "Geratol" award, DXCC, WAC and a wide range of on-the-air operating experiences. I was selected for membership in the A-1 Operating Club, have been award "Ham of the Year" awards for local clubs, and am willing to work with new-comers on most any project.

* Keeping it Simple (avoiding task overload)

I have agreed to provide a new home for the "Boat Anchor" mail list,
with the blessings of Paul Prescott, N1AAC, who took over from Our
Esteemed Founder Jim Lockwood, KM6NK. I have also agreed to take over
the rec.radio.amateur.* Working Group mail list, formerly maintained
by Ian Kluft, KO6YQ. In addition, a new mailing list devoted to
homebrewing tube transmitters and receivers ("Glowbugs," a sort of
intersection between Boatanchors and QRP) has been created.

The mailing list addresses are:

* boatanchors@theporch.com (*)
* glowbugs@theporch.com

Use these addresses for messages of general interest to the entire group. Please don't use them to subscribe, change address, etc.

(*) Effective 15 March 1996, the BoatAnchors list went to a subscription-only list, with $12 US per year as "dues" to support the list.

With monthly costs for Net access at $350 US/month and telephone line charges of $50 US plus, we are not getting rich. The fee was set after much consultation and wrangling, and was designed to cover the costs of running the list... and hopefully provide a surplus to upgrade the services we can provide, like better mail delivery, larger archives, etc.

The new automated list manager address is

listproc@theporch.com

Use this for subscribing, unsubscribing, getting archived info, getting the FAQ message, changing your address, etc.

To subscribe, send a message to this address with "subscribe boatanchors <your name>" or "subscribe rra-wg <your name>" Similarly, to unsubscribe, replace "subscribe" with "unsubscribe"

The new list owner address is

listown@jackatak.theporch.com

Use this address only when there is a problem which really truly can't be resolved otherwise.

I am 36 years old, have been a ham for 22 years, and currently hold an Extra class amateur license. I got my first ticket when I was 14 years old, thanks to my Elmer who is now a silent key.

I am an instructor for amateur radio classes, Novice through General, and teach CW at least once per year. I am also the VE team liaison for the TEARA VE team, and test monthly in Smithfield, NC.

I maintain a number of repeaters from 10 meters through 900 MHz including ATV. I build a lot, and enjoy restoration/construction of vacuum tube amateur gear.

I enjoy ragchewing and DXing, with about 75% of my operating time on HF spent on CW. I also enjoy weak signal and FM operation on 6, 2, 1.25m, 70cm, and 33cm. I am experimenting on 23cm and 10 GHz.

I maintain a number of sites, some of which are related to amateur radio. The URLs are:

Civil Air Patrol (CAP)

I was Communications Officer and former unit Landstation Bluebird 284, 1980-87. Statistically, Landstations are relatively rare. A land station in CAP is an HF-capable station operating from both mobile and permanent locations as needed. As a land station, I checked into several regional nets for the Missouri Wing of the CAP. I am familiar with the CAP emergency protocol as well as MARS and ARRL. Also, I have extensive teaching experience for Novice to General levels and currently am a teacher.

I would like to help any new or prospecting hams in any way that I
can. My personal experience is limited, but I am net control of a
local Elmer Net here in Pittsburgh. This net meets every Saturday
evening at 9:00 PM local time on one of the repeaters of the North
Hills Amateur Radio Club (146.88- MHz). This net is intended to help
all new hams. Many experienced hams also check in and can answer
questions and share their wisdom with beginners.

I am an Extra class operator. I work professionally as a manager of a computer services department in a large hospital system with more than 12 years experience in PC and Host Systems networking, I hold a degree in Electronics Engineering, as well as many hours in Computer Science Engineering. I operated a land-line BBS for 8 years, and now maintain a packet mail drop on 145.01 MHz. I maintain the TriCounty Amateur Radio Club (TCARC) of North Texas home page on the web:

http://www.qsl.net/tcarc-ntx/

and am the President of the TCARC. I am also the appointed Emergency Coordinator for the City of Azle for Tarrant County RACES.

I like to give talks to Amateur Radio Clubs, school groups, Scouts, and similar groups, mainly about Amateur Radio topics. Recent presentations I have done include Field Day preparation for clubs, Computers and Ham Radio, Building Your First Dipole. I'm open to presenting other topics as well. I also help local amateurs to prepare their own presentations and talks.

I am a Baptist minister, and would be delighted to administer a Ham Radio theme wedding! <grin> I would also provide ministerial services for Ham related special events.

I will also provide free Novice/Tech licensing instruction for groups of 5 or more in the Tarrant/Parker/Wise County region of North Texas. Typically this involves about 18 hours of lecture, and some self study on the parts of the students. I'll do this free for nonprofit endeavors.

P.S. I monitor 146.98 Boyd repeater while commuting, and you might find me working HF CW just about any time.

access the library at:

ftp://ftp.tapr.org/

Log in as:

anonymous

with your E-mail address as password.

Via TAPR's Listserv (http://www.tapr.org/tapr/html/internet.html)

TAPR maintains several SIGs in various interest areas. To get the
latest list of SIG groups, send an E-mail message to:

listserv@tapr.org

with the subject line:

Request

and one or more of the following in the BODY of the message:

list

for list of mail groups on TAPR.ORG

information listname

(where listname is the name of the mail group)

to request the information on any mail group

subscribe list your_first_name your_last_name

(where list is the name of the mail list you want to join and
your_first_name and your_last_name are your first and last names,
respectively)

to subscribe

Some of the current SIGs include:

NETSIG Regional Networking SIG
BBSSIG BBS SIG
HFSIG SIG on HF Digital Topics
DSP-93 SIG for those that are building TAPR/AMSAT DSP-93 kits
APRSSIG SIG on APRS
TAPR-TNC SIG on TNC Issues
DSP SIG on general DSP topics
MIC-E SIG on supporting the TAPR APRS MicEncoder kit

TAPR-BB Announcement channel for TAPR bulletins and information

General Information about TAPR:

* Ever heard of a TNC?
* Interested in general packet radio information?
* Interested in Spread Spectrum Communications?
* Interested in high-speed packet operations?
* Interested in other types of digital communications?
* Interested in experimenting or building kits?
* Interested in keeping up-to-date on national digital and packet
issues?

Then you might be interested in TAPR!

Goals:

* Support Research and Development efforts in the area of amateur
digital communications
* Disseminate information on packet and digital communications

* Provide affordable and useful kits for experimenters and hobbyists
* Pursue and help advance the amateur art of communications through publications, meetings, and standards

History:

If you have used a packet radio TNC, then you are already a part of TAPR history.

The TNC (Terminal Node Controller) project was the first big project that TAPR tackled and completed. Now TAPR covers a wide range of interests including: APRS, Spread Spectrum, networking, Timing, DSP, HF, and much more.

TAPR was founded in 1982 as a national organization with interests in the areas of packet and digital communications. Today, TAPR continues as a membership supported non-profit amateur educational research and development organization. TAPR currently has more than 2500 members, worldwide. TAPR continues to develop kits for the amateur community and is working actively on publications and communications standards.

Membership:

Membership in TAPR includes a subscription to the quarterly published Packet Status Register newsletter. PSR has been published since 1982 and is recognized as an authoritative source for up-to-date user and technical information on packet radio. Much of the material in PSR is timeless. Back issues may be obtained from the TAPR office. Membership in TAPR is $20 US for one year in USA, Canada, and Mexico. Outside North America is $25 US.

Join the amateur digital-revolution -- Join TAPR!

Phil Karn KA9Q

karn@unix.ka9q.ampr.org

http://people.qualcomm.com/karn/

High-Performance Software Modem Project

Recently I've been working on a prototype SQPSK (staggered quadrature phase shift keyed) modem for the amateur satellite channel. This modem is implemented totally in software running on a PC with an ordinary (non-DSP) Soundblaster card. It runs at 1200 bps and fits into a SSB transceiver bandwidth.

I've made good progress and have put some info up on my web page about it, including an audio file to show what it sounds like in noise when the signal is still copyable, available from:

http://people.qualcomm.com/karn/ham.html

Watch that page for an announcement of when I actually release the code, which I plan to integrate into KA9Q NOS.

Spread Spectrum

I've been trying to answer the question of consequences of promoting relatively wide-band digital modes on band occupancy and throughput (i.e., What gets optimized? Are there tradeoffs in quality vs. quantity?) in the context of the spread spectrum rules debate, but I think it needs to be a much wider discussion. See my reply comments to the FCC on this issue:

http://people.qualcomm.com/karn/papers/index.html

(See also Steve Bible for more information on Spread Spectrum)

[_Editor's Note:_ I'm honored by the presence of many advanced-level Elmers in this directory, including Jeffrey Angus, Gary Coffman, and now Phil Karn. Phil has graciously agreed to appear in this directory for the purpose of elmering and technical exchange for the advanced topics listed above. As with all of my Elmers, please respect their time by only seeking assistance from them for the topics under which they are listed. There are many Elmers willing to answer more beginning-level packet radio questions, including basic questions about IBM PC hardware, TCP/IP and NOS. Consult the "IBM PERSONAL COMPUTER (PC) AND CLONES" and "PACKET AND DIGITAL NETWORKING" categories in the Subject Quick-Search Index for a complete list.]

Author of the QRZ! Ham Radio CDROM

I am interested in receiving amateur-radio-related public-domain
and/or shareware programs, data bfiles, frequency lists, etc., that
would make a useful edition to the QRZ! CDROM. Can help arrange volume
discounts for clubs and groups, and will donate copies of QRZ! to
qualifying non-profit organizations. Send E-mail or call +1 (602)
483-2036.

We now have the QRZ! FTP archive and QRZ! WWW server online, 24 hours
a day. Our connection is via a T1 line so you should get pretty decent
file transfer times.

We've got about 7,000 files online, including radio mods, software, most everything imaginable. We are also accepting uploads of all ham radio related material.

Feel free to stop by and have a look:

* ftp://ftp.qrz.com/
* http://www.qrz.com/ (WWW interface to the FTP archive as well as a Callsign database server)

Authors of ham radio shareware programs, data files, mods, etc., are invited to contribute their materials to the QRZ! anonymous FTP server above.

I would also like to thank those who have volunteered in helping port the QRZ! source code to a wide variety of platforms. In the next edition, we'll have support for DOS, Windows, OS/2, Windows NT, Sun, NeXT, SGI, Linux, AIX, and HP/UX executables, directly on the disk.

Notably not mentioned is Macintosh, which so far has been a bit troublesome to put together. If anyone who can program in 'C' on a Macintosh would care to volunteer, please let me know. Although there is an experimental Mac interface at this time, I'd like to make it an officially-supported platform.

The QRZ! Callsign/E-mail Registry now contains over 4100 callsign-to-E-mail-address listings and is growing daily.

We have a WWW page where you can input your E-mail address directly into the QRZ! Callsign Database, where it will be published on both CDROM and on the Internet. When you use this page, your E-mail address is made instantly available to the online database.

Everyone is encouraged to check in and add their E-mail address to the server. There are no charges or listing fees, and it's free to all radio amateurs. The procedure takes only a second, and you are only asked to supply your callsign and E-mail address.

Register your E-mail address today!

We're pleased to announce that the online FCC database at qrz.com is now updated nightly from the FCC with fresh information.

According to FCC rules, if you've just passed your first test, you can begin operating as soon as your callsign shows up in the online database.

Please pass on any ideas, suggestions, comments, etc., to my E-mail address above.

210. Swatch proposes to begin advertising on 2m via satellite

Newsgroup: rec.radio.amateur.misc
Date: 1999-04-04 00:00:00 UTC
From: jeffreyh@Hawaii.Edu
Message-ID: <7e6egl$f67@news.Hawaii.Edu>
Source record: 146697
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.amateur.space

Distributed to .misc, .policy, and .space. Follow-ups set to just .policy.

Jeff WH6U
---

http://wmbc.umbc.edu/rob/swatch-protest/

From Rob Carlson:
Dear editors, Loop readers, list readers, and assorted
amateur friends,

Over the past week I have received an incredible response
to my query in the Hudson Division's Hudson Loop newsletter
about a curious advertisement on the Swatch web-site. To
help advertise their new brand of "Swatch time"
watches, they appeared to be launching a satellite which
would broadcast the voice messages of web readers into space
and back to earth over radio on the frequencies from 145.800
to 146.000 MHz.

Thanks to the excellent researching skills of Stephan
Anderman, K2SMA, and Rick Lindquist, N1RL, I've discovered
that Swatch in cooperation with the Russian space authorities
have decided to use the two meter Amateur band
for direct advertising via the "Beatnik" satellite (a
mini-Sputnik and AMSAT-FR project formerly to be known as
RS-19) across the entire world.

According to AMSAT-France, during the construction of the
satellite, the Russian space center had made a separate
commercial contract with the Swatch watch company to put
its messages on the satellite. This was done in spite of
AMSAT objections and contractual agreements with them not to
put commercial advertising content in the digital messages.
AMSAT-FR couldn't back out of their own contract and had
to forward the parts on to the space center.

Riley Hollingsworth, K4ZDH, is doing his best to crack down
on unlicensed and unbecoming operations within the jurisdiction
of the FCC, but soon an egregious violation of the
non-commercial status of amateur radio will begin taking
place just a few miles above our heads when our two meter
band is filled with advertisements for the latest Swatch
watches.

[snip]

From the SWATCH website:
http://www.swatch.com
We are collecting your written and voice messages (.wav)
format to put them on our Beatnik satellite.

Once in orbit, the satellite will transmit a selection of
them to a worldwide audience (and beyond...) Voice messages
have to be maximum 7" long or 0.08 of a Swatch.
(sorry guys, there's not a lot of room in space...) while
text messages can be up to 130 characters long. You can talk
about anything you want; your mum, your boy/girlfriend, your
latest project, how much you would like to go into space to
discover new, sexy, friendly life forms, as long as the message
contains the word "BEAT" it could be selected. Don't forget,
we don't really know who is going to be listening out there,
so help us give a good impression of the people living on
our blue planet...
Before sending us your messages, take time to check out our
rules and regulations, to make sure that you are on the right
side of interstellar laws.

In the month of April, on a date to be defined that we will
communicate on these pages, a fearless crew of Cosmonauts
will be launching the Swatch .Beatnik loaded with a selection
of your intergalactic messages into orbit from the MIR space
station. The Beatnik will orbit earth and you will be able
to track it around thanks to the pioneering technology of our
website.

Check out this space (no pun intended) for further information
and more space-connected goodies.

The Beatnik will transmit the selected messages in the
following bands:

145.800 to 146.000 MHz

Thus allowing radio-rads worldwide to listen to your voice.
You will be able to catch both voice and text messages (in
the form of HTML pages) ; but hey, if you are not a radio-freak,
you do not have to worry. You will be able to follow the Beatnik
and its messages live right here on the tracking section of
the website.

G'Day All..
I have just finished a mate installing 10m rptr in
Adelaide Sth OZ.
It contained also a 2m gateway with pl tones to access it. A link of 70cm
between sites was used and works quite well..!!

That is a great system and give the opportunity to
those without 10mfm to access rptrs themselves..!

Take care..
Cheers & 73...

My question stems from pure ignorance. Nevertheless, it seems to me that, within practical limits, considering the fact that no filter is perfect, one would want to use a broadband noise source for such a measurement, which afterall, is intended to assess agreement between theory and practice.

Message-ID: <19990403225401.29253.00002071@ng-fz1.aol.com>
Source record: 146704

There have been several posts here about the GAP vertical antenna, and I have decided not to get one, based mostly on the negative feedback I have seen here. I have seen where people have said that it is a good antenna on some bands, but terrible on others

Years ago, I did have very good success on all bands with the Butternut vertical mounted on the roof of my house (2 story) on a 10 foot tripod with a 10 foot mast. I had 4 radials for each band except 15m (which used the radials for 40m). All of the radials fit on the roof, except for 80m.

So, my question is, is the GAP not a good antenna just because of its design, or because it is ground mounted? Has anyone ever tried roof mounting a GAP?

In my minds eye, a ground mounted antenna for 80m is one thing, a ground mounted antenna for 10m is quite another.

I have a Gap Titan DX roof mounted and it works great. I have read the comlpaints about it posted here by some and have not found mine to have any problems with the exception of the 80 meter band where performance do lack a little compared to my inverted V. I have used the Titan DX on all bands except 160 and have always made my contact with good signal reports. The take off angle is such that local - out to say 300-400 miles- is difficult. but beyond that with legal limit it - TALKS! KK7HO

Joseph ... the noise source can be wider than the IF bandwidth of your
system ... using a 100msps TxDAC, for example to generate noise at,
say 25 MHz, then mixing with a 45 MHz Xtal Osc to create a product
at 70 MHz, you could use a 70 MHZ filter much wider than your IF
bandlimiting filter(s) to eliminate the 45 MHz LO leak, the 25 MHz
noise source leak, and the 20 MHz unwanted mixing product.

This would leave a "clean" (if you can call noise "clean" :-), but
still rather wide band noise spectrum centered at 70 MHz ... this
would be summed with your pure desired signal at a controlled level
to "dial up" whatever C/N ratio you want.

Give the guy a break! He's trying to learn the code. Your certainly not helping are you Mr. "noname"?

I have the 418, great unit. I'm up to 11wpm now and trying to get my speed up as well. Just keep at it for at least 15 minutes a day, maybe 2-3 15 minute sessions per day if you can. When you start getting frustrated STOP. It's not conductive to learning at that point so take a break.

Good luck!
73,
Tom

Obviously Dufus thinks the Newsgroup was designed with only him in mind. There are plenty who are interested in your learning.
Personally I'm not so keen on the Farnsworth meathod although there are many who learned code that way successfully.
I think your right in learning to copy solid, 100%, at a slower speed, the speed will increase naturally and if you can copy solid at 5-8 wpm you'll have a much easier go of it as your speed increases and you start having QSO's at faster rates.

I'll buy that.
> Save CW, Tell the ARRL to KISS OFF!

As a mugwump on the subject I say - You can save CW for TRADITION or kiss it
off but you should make more comprehensive theory exams for TECHNOLOGY. I am
an ARRL member. I do not blindly follow all of the ARRL leaders
concepts...but I do know that Hams need the ARRL just as the ARRL needs hams.

I must say that I agree that the above concept of 100% pass would be a step
in the right direction and as such it is not IMHO a bad idea. HOWEVER I do
not believe that it is enough to make future Hams much better qualified than
at present. If we continue to use fixed Q & A exams we will still have
applicants who can score 100% and not have the slightest idea of the meanings
of any of the questions or their answers. We will still have many who
believe that an answer is the correct choice only because it was the correct
answer in the Q & A pool book. Another important point IMHO is that we need
more classes.... that is Ham license classes... so that sequential exams can
be given with time between them for serious progressive study. Communication
technology can not be learned with only four exams or less...I suggest at
least eight. A final point that I must make here is that the content of the
exams and the level of the technology must be brought up to modern standards.
We can not just test for the current ham modes and technologies but should
test for the knowledge that you can expect of a Ham who is prepared to be a
modern day experimenter especially for the highest class Ham tickets. This
means that many of the people who now get involved in generating the Ham
exams may not be qualified themselves and we need to get more up dated people
involved. We need people who are at the level of understand Shannon and
information theory, for example, to write the questions or at least to decide
what types of questions are now important in the real world of electronic
communication. PLEASE keep thinking, I never met a Ham I didn't like, Hams
need more license classes, Bob Wex w2ilp (Idiots Logically Pass?) -- .-

Hi Ben -- good luck with learning the Morse Code. You will find lots of
programs for MAC CW practice at URL:
http://www.ac6v.com/pageap.html#MAC

Click on each clickable -- then search each for the type of program you
want.

Message-ID: <7e8f0n$gc1$1@news-1.news.gte.net>
Source record: 146718

Swatch is preparing 10 digitally recorded 'advertisements' to "Broadcast" on the 2 meter band from the Russian "Beatnik" satellite.

You can leave a message at their website that will float aloft for 30 days.

http://www.swatch.com/beatnik/send.php3

Judging from the comments on this page from the "Amateur Community," it would be better suited at the "Rated X" satellite.

BColenso wrote in message <19990403225401.29253.00002071@ng-fz1.aol.com>...
>So, my question is, is the GAP not a good antenna just because of its
design,
>or because it is ground mounted? Has anyone ever tried roof mounting a
GAP?
I had one of the original GAP Challenger verticals up on my roof for about
9 years, until an ice storm destroyed it. I used it on all bands (including
30m
and 17m) and used an antenna tuner to keep the SWR down. I was pleased
with the results, particularly on 40m.

The major problem with roof mounting is installation, as the 31' length is
difficult to raise and keep in place. I used a roof tripod, with lag bolts
screwed into the rafters. I also used guys half-way up. After years of
abuse by wind, it still worked fine, although some of the vertical rods on
the sides became twisted. After 8-9 years, it started getting too wobbly
to maintain in a true vertical position and it needed some maintenance.
However, before I could take it down (not an easy endeavor), we had a
severe ice storm and it bent over double at the base and died.

I used the roof mounting method because I didn't have a good open area
in my yard for the antenna. As far as 40m is concerned, it kicked butt
in contests. On 80m, my dipole worked better than the GAP, but on
the other bands the GAP was fine, although not nearly as good as my
A3S beam or a homebrew quad which I once had for 15/12/10.

I didn't know whether I'm going to get another GAP, as
I'm considering a Gladiator monobander for 40m andI don't need the
other bands. I'm also concerned about maintaining the short vertical
rods in a fixed position, as they kept moving around on my old Challenger
and looked pretty ugly after a while.

April 5, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, K1VV, K1XN & The Golist, K2WE, WB2RAJ/WB2YQH & The 59(9) DXReport, W3JJ, AL7KC, N6RT, K7ZD, K8YSE, BA1DU, DJ5AV & DX News Letter, DL2FAG, F6HKS, G4BUE & DX News Sheet, GM4FDM, JI3DST, JM1LJS, OH1KAG, PR7AR, PY1LVF, RA3SL, UT7ND, ZS6P and 4X1VF for the following DX information.

3B9R DXPEDITION TO RODRIGUES ISLAND IS NOW ACTIVE. A team of nine operators representing the countries of Finland, Japan, Mauritius, Mexico and the United States is now active from Rodrigues Island (AF-017) of the Mascarene Islands group in the Indian Ocean unti April 11th. This will be an all mode operation, 160-6 meters with special emphasis on 160, 80, WARC and RTTY. Team members include Bruce/W6OSP, Kimo/KH7U, Jari/OH2BU/OH7RF, Victor/XE1VIC, Jacky/3B8CF, Garry/NI6T, Frank/AH0W/OH2LVG, Ned/AA7A and Yuuji/JA3IG/K1NT. QSL via: Joyce Johnson N7LVD, 5627 West Hearn Road, Glendale, Arizona 85306, USA. Pilot stations are: Andy/UA3AB (ua3ab@dateline.ru), Gary/K7ZD (k7zd@inficad.com) and Tom/N4XP (n4xp@juno.com). Interested DXers may submit inquiries during the DXpedition via any of these pilot station e-mail addresses. Thanks to Mr. Anton Vinokurov, an informational Web site is now on-line including information about the DXpedition, maps and photos of Rodrigues Island, frequency table, recognition of sponsors, interesting links, operating plans, and more. (On-line logs will NOT be available.) DXers are invited to sign the guest-book and submit comments at: http://www.dateline.ru/3b9/

3W, VIETNAM (Also VR, Hong Kong). Steve, K2WE, is returning to Vietnam with a stay in Hong Kong first. He plans to be in Hong Kong from April 16th through the 23rd. Steve has applied for a temporary license in VR-land. He will then continue on to Saigon from April 23rd through 27th. Steve will be operating from the XV300S station at the Kimdo Hotel in downtown Saigon. He has asked for a renewal of his 3W6WE callsign. Steve is again going to try 40 and 80 meters and hopes the noise won't be too bad. He will bring back all the logs for 3W6LI, 3W6KA and XV300S, so he

can answer the hundreds of cards waiting at his QTH. QSL again via his home callsign K2WE.

3W, VIETNAM. Look for Sugi, JA2BWH, to be active again from April 8-12th as 3W6BWH. His operations will include SSTV on 14240, 21346 and 28680 kHz. QSL via home callsign.

4F7, PHILIPPINES. The "DX News Sheet" reports to look for Gus, SM3SGP, to be active until May 6th as 4F7/SM3SGP from Cebu Island. Activity will be CW/SSB. QSL via SM3EVR.

4Z0, AKHZIV ISLAND (New Prefix, Rare Island). Jan, 4X1VF, informs OPDX that he will be leading a group of hams from Israel next Saturday, April 10th, to operate from this rare Israeli island (AS-100) bewteen 0530-1400z. Akhziv Island has not been on for many years. The callsign that they will be using is 4Z0A. (also a new prefix). They plan to operate 3 stations on 20/15/10 meters both CW/SSB using the IOTA frequencies. Jan states that they have to leave the island before dark.

BI5, DONGTOU ISLAND (NEW IOTA). The BI5D IOTA DXpedition to Dongtou Island in the Zhejiang Province Group (AS-???) will take place between April 29th and May 3rd. The team consists of BA1AA, BA1AJ, BA1DU, BA1FB, BA1HAM, BA1KA, BA4AA, BA4RD, BA4RF, BA4RX, BA4TA, BA4TB, BG4AGM, BG4RUC, BD5HAG, BD5RV, BG5BAC, BD6AA, BD6CQ, BA7IA, BA7JG, BA7JK, BD7IX, BD7JA, BD7NI and BD7NQ. They will operate on all bands 70cm - 160m. On HF bands, they plan to have six transceivers, three yagis and three amplifiers. Suggested frequencies for CW/SSB are: 1826, 3530, 3755, 7025, 7055, 10115, 14038, 14260, 18098, 18128, 21038, 21260, 24918, 24945, 28038, 28465 and 29280 kHz (FM only). Look for them on RTTY on or around 7040, 10140, 14080, 21080 and 28080 kHz. They will pay special attention to NA on the following bands, modes and time: 0000-0400z 15m, 17m and 20m on CW; 1100-1500z 40m on SSB/CW; 1100-1300z 75m on CW; 2200-0000z 15m, 20m and 40m on SSB/CW; and will especially work EU during 0700-1800z on several usable bands and modes. On VHF and UHF, they will used 4ELE HB9CV antenna on 6 meters, 13ELE yagi on 2 meters and 70 centimeters bands. The frequency will be 50.115 MHz (SSB/CW), 144.10 MHz (SSB/CW) and 432.20 MHz (SSB/CW). They will especially look for JA, HL and BV stations on 2 meters and 70 centimeters. QSL via P.O.Box 1713, Guangzhou city 510600, CHINA (direct only). Any suggestions, comments and questions should be sent to:
Alan BA1DU (ba1du@arrl.net) or Yang BD7JA (bd7ja@amsat.org).

CE9, SOUTH SHETLANDS. Ric, CE3HDI, will be active until April 23rd as CE9R from the Teniente Rodolfo Marsh base (and possibly President Frei Montalva base) on King George Island. Activity will be CW/SSB/RTTY/SSTV on 80-10 meters. QSL via home call.

CU, AZORES. Look for CU2ARA to be on the air April 10TH and 11TH. Activity will be on 15, 20, 40 and 80 meters on CW, SSB, SSTV and Packet.

IOTA NEWS.....
AS-042. Mike, UA3SDK, is active as UA3SDK/0 from Sredniy Island until

the end of April. QSL via RU3SD, P.O.Box 1, Ryazan 390000,
RUSSIA.

AS-049. Takeshi, JI3DST, reports that he will be active from Tokara
Archipelago (Kuchinoshima, Kogashima-Ken) from April 28th
through May 4th. Look for him to be active as JI3DST/6 (or
7N3UXO/6) on 17/15/12/10 meters SSB. QSL via JI3DST; Takeshi
Funaki, 2-18-26 Hannan-Cho Abeno-Ku, Osaka-City Osaka 545-0021,
JAPAN. His E-mail addresses are:
MXK00027@nifty.ne.jp or ji3dst@jarl.com

EU-094. Look for TM2WLH to be active on Penfret Island from May 6-9th.
Activity will be from a lighthouse (Lighthouse LH 0321 for
the Lighthouse Award) on all bands CW/SSB. QSL Manager is
F6HKS.

SA-029. A group of Brazilian operators will activate the following
islands during April 9-12th (Same IOTA number for all islands):
Itacuruca Island, Martins Island and Jaguanum Island. Activity
will be SSB and CW on all bands (160-6 meters). Suggested
frequencies:
SSB - 1850, 3755, 7055, 14260, 18128, 21260, 24950, 28360
and 28460 kHz
CW - 1835, 3530, 7030, 10115, 14040, 18098, 21040, 24920
and 28040 kHz
Also, please listen to the Brazil DX Net, Saturday and Sunday
from 1800 to 2100z on 14222 kHz. Look for the following
callsigns: PY1NEZ/p or PT1Z (Lima), PY1NEW/p (Pete) and
PY1LVF/p or ZX1Z (Vieira). QSL via home callsign or the PY1
QSL bureau.

J2, DJIBOUTI. "The 59(9) DXReport" reports that Phil, F5PHW, will be
active as J28BS until the end of April from the French Radio Club. He will
use a TS-440S plus available antennas on CW and maybe RTTY. QSL via F6KPQ.

JD, OGASAWARA. Yasu, JA9XBW, will be active as JA9XBW/JD1 from April
9-18th. Operations will be on CW/SSB/FM on 160-6 meters. QSL via home
callsign.

LV2, ARGENTINA. Look for the special callsign, LV2V, to be used by the
Radio Club General Roca for the next 5 years. QSL via LU3VAL.

NEW CANADIAN PREFIX. VY0 is the prefix for Canada's new Nunavut province.
The call would have been VE8XN prior to April 1st.

NEW SCOTTISH PREFIXES. To commemorate the new Scottish parliament, look
for the following special prefixes to be used by Scottish operators during
May 6th through July 31st: GMs can use 2S (ex. GM4FDM can sign 2S4FDM),
MMs can use 2A and 2Ms (Novice) can use 2T.

NEW WELSH PREFIXES. To commemorate the new Welsh Assembly, look for the
following special prefixes to be used by Welsh operators during May 6th
through July 31st: GWs can use 2C (ex. GW4FDM can sign 2C4FDM), MWs can

use 2X and Welsh Novices can use 2Y.

OH0, ALAND ISLANDS. OH0M operation will probably be QTH by the time you read this. Activity was to be done by the Finnish Radio Amateur League (SRAL) and was to active until April 5th. The operators are: Juha/OH1KAG, Mikko/OH3FM, Pertti/OHLQK and Jukka/OH3NLP. QSL via BUREAU to OH3LQK.

QSL INFO AND NEWS......
KL7FBI was operated by Mike, AL7KC, during March 30th through April 2nd, from Shemya Island (IOTA NA-037(, Semichi Group, Aleutians. QSL to KL7FBI via bureau or direct.

Serge, EK4JJ, reports that there is no QSL Bureau in Armenia, and it is too expensive to reply direct unless return postage is enclosed with a QSL card. It has been reported that Serge is a reliable and fast QSLer if you send return postage.

YC9WZJ QSL go to Joni Salim, PO Box 127, Sorong-98401, Irian Jaya, Indonesia.

Roger/G3SXW reports QSL requests already received for contacts with C21SX have now all been answered. Cards arriving daily are being handled within 48 hours. Over 1,000 contacts have already been confirmed direct. The address for direct QSLs is: Roger Western, G3SXW, 7 Field Close, Chessington, Surrey KT9 2QD, England. Nearly 200 contacts have so far been requested by E-mail. These cards will go to the bureau this week. If you wish to receive a card via bureau merely send QSO details and your call-sign to: G3SXW@compuserve.com PLEASE do not send your card by other routes as this defeats the purpose of saving time (your's, Roger's and the bureaux's) and money (your's and the bureaux's).

The following Web site http://dx.qsl.net/logs
has placed the following logs on-line this week:
PW1S (1999 CQ WPX SSB Contest)
PT1A (1999 ARRL DX SSB Contest)
PX1I (1998 ARRL 10m Contest)
FO0CI (1992 Clipperton Island DXpedition)
YC0LOW (thru 20-Mar-99)

ER0N QSLS. GENE, UT7ND, was active in the CQWW WPX SSB Contest as SOSB 28 MHZ from the village of Otaci, Moldova, as ER0N. He is also planning to be active from here in other upcoming contests using the same call. ALL ER0N QSLS are via the Ukrainian QSL Bureau or direct to UT7ND, Gene Chumakov, P.O. Box 5235, Vinnitsa, 286018, Ukraine. PLEASE DON'T SEND YOUR QSLS TO MOLDOVA.

Bob, K3BYV, reports that he is no longer the QSL manager for TG5ITS and KB0QMY/TI5 (both calls are the same person, op Tim). Bob will still be QSL Manager for these stations ONLY: PZ5JR, PZ5DX and P29ND.

ZZ7Z special callsign used in the CQ WPX SSB Contest can be QSLed via PR7AR, Irapuan de Sousa, P.O. Box 60, CEP.58200-970,

Guarabira-Paraiba-Brazil.

QSLs for both CE3/NE4Z and XR3Z now go to AJ4Y, Paul Womble, P.O. Box 1207, Highland City, FL 33846-1207. The old route to CE3SMN will no longer be any good.

R.O.A.R.S. SPECIAL EVENT. On April 10-11th, the "Radio Officers' Amateur Radio Society" will commemorate the "END of MARITIME CW" operations with a special event tribute to "Maritime Coastal Stations". Over 90 special event amateur stations representing historic maritime coastal stations will take part. For details and certificate information, please visit the Web page: http://homepages.enterprise.net/dbarlow/
The Marconi Radio Club W1AA/WCC will represent the WCC Cape Cod, MA coastal maritime station for the event.

S07, WESTERN SAHARA. Ross, CN2UN, was been active as S07UN this week on the 14247 DX net. He was there on a UN mission. He has recently left for Hong Kong and will return to Africa in three weeks. QSL via ZP6CU.
Meanwhile, the "DX News Letter" reports that Arseli, EA2JG, plans to operate as S09A on all bands for two weeks as of March 31. OPDX has spotted Arseli this past weekend on 40/20/15/10 meters SSB. Check around on the usual DX windows. QSL direct only via EA2JG, Arseli Etxeguren, Barrena 6, E-01480 Luyando Alava, Spain.

S7, SEYCHELLES. Babs/DL7AFS, Lot/DJ7ZG and Karl/DL2FAG will be active from April 11th to May 2nd from Mahe, as S79YL, S79ZG and S79FAG. They will be active on all bands, except 80 meters (which is not allowed in S7). If there are any possibilities, they will also try to activate one or two other IOTA islands. Their equipment will be the following: Kenwood TS850S, ICOM IC-706MK and FL2100Z-amplifier. Antennas will be a 3 element Yagi for 20/15/10 and Multiband-dipoles/triple legs for the other bands. They will be active on SSB, CW, RTTY and also possibly in PSK31, Amtor, Pactor. For the YL-award, Babs/DL7AFS will be again active (recently was C50YL) using the special callsign S79YL. QSL for all callsigns are via DL7AFS.

T8, PALAU. Look for Misao/JJ1DWB, Hide/JM1LJS and Hiro/7N1KAE to be active as T88MT, T88LJ and T88?? (Hiro applying now), respectively, from April 27th - May 7th (possibility that schedule may change little). Their activity will be on 80-6 meters SSB/CW/(29M-FM) and T88LJ will try to be on SSTV. QSL to the following addresses:
T88MT - JJ1DWB, Misao Tanzawa, 3-15 Yakata, Kofu, Yamanashi 400-0017, JAPAN
T88LJ - JM1LJS, Hideyuki Kai, 4-22-15, Takata-higashi, Kohoku-Ku Yokohama-City 223-0065, JAPAN
T88?? - 7N1KAE, Hiroyuki Yamada, 2-9-209, Chigusadai, Inage-Ku, Chiba-City 263-0013, JAPAN

TL, CENTRAL AFRICA. Gianni, IZ1CQD, will be active until April 20th as TL8CG from Markounda. His activity will be limited to his free time while working. Look for him on 40, 20, 15 and 10 meters SSB using only a 100 watts to a dipole with solar power. QSL via home callsign, bureau or

direct.

V4, ST. KITTS & NEVIS. The "DX News Sheet" reports that Jim, G0IXC, will be active again as V47XC, April 10-30th, from Nevis Island. Activity will be 40, 20, 15 and 10 meters SSB with a dipole and tri-band Yagi. QSL via home callsign.

VU3, INDIA. After waiting for many months Tom, KR4ZY, has received his VU callsign. He is now signing VU3TOM. QSL via KR4ZY.

ZS8D, MARION ISLAND. Excerpts from a press release: On Thursday, April 1st, the SAS Agulhas left Cape Town to take the 56th weather and biological research crew to Marion Island. This annual supply run includes a radio amateur! Deryck Yelverton, ZS6DE, has been licenced as ZS8D. While Deryck is not an experienced HF operator, he has spent much of the last few weeks in intense training. Deryck will not be active before mid-April at the earliest, as the ship sails in April, and the base handover will occupy his full attention. However, once he has all the hardware ready, he expects to be on regularly and to make lots of contacts. QSL to ZS6EZ, Chris R. Burger, Box 4485, Pretoria, 0001 South Africa. Requests with sufficient postage will be sent by bulk courier service, while the remainder will go via the bureau. SPECIAL NOTE: OPDX InterNet Subscribers will receive the complete press release as an additional bulletin.

What better way is there to start off your morning except by drinking a cup of coffee using your very own CALLSIGN MUG. See at http://home.earthlink.net/~jawjabber
All mugs are made with quality control in mind. They are dishwasher and microwave safe and if after you receive your mug you are unsatisfied just send the mug back in its original shipping container and I will refund you the cost of the mug. See at http://home.earthlink.net/~jawjabber for details.
If you what to buy your personal callsign mug all you will have to do is send a check or money order for the amount of the mug plus $4.00 for shipping. Remember to send your callsign so I can place it on the mug.(The mug you see on my web sit is just a sample mug. Your callsign will be placed on the mug you order.) Please USA orders only. See at http://home.earthlink.net/~jawjabber
To see a picture of the Callsign Mug and to get the order forms please click on the link below.

Don't forget those illegal six and ten meter beacons, that illegal beacon system on 14.100 sponsored by those guys in California, and all those repeater ID'ers that are illegally broadcasting callsigns all the time..... Oh, and don't forget all those packet stations sending beacons, those are illegal too....

What you are missing here, Jeff, it that some people are always looking for a cause. And you are missing the fact that a lot of people don't do their homework before they jump on the bandwagon.

The Russians throw a battery powered, handheld piece of space junk out of the window of MIR that will last for a whole 30 days and it's the end of the world.

Why, because it's an invasion of our Constitutional Rights to Own the ham bands.

Every day I turn on my HF radio, and I hear dozens of unlicensed Chinese, Indonesian, and Filipino stations on every HF band we have.

The digital satellites (UO-22, KO-23, and KO-25) are USELESS when they are over SE Asia because of all the QRM from unlicensed ground stations in the 2 meter band. These are real problems that aren't going to go away in 30 days, but nobody is putting web pages on about the problem, the Slims in SE Asia don't have email address we can complain to, like Swatch does, and AMSAT France can't use any of the satellites when the footprint is over SE Asia, so they don't know about it.

As Ceric says "Just because YOU can't see something, does NOT mean that it isn't there!".

These are real problems, but real problems need real solutions, and real solutions don't come from little boys with HT's and email addresses.

What I'd suggest we do, gang, is go to the Swatch web page at:

http://www.swatch.com/internettime/fs_comments.html

and READ the 'comments' from our fellow hams and then realize something. Every time we have one of these 'call to arms' regarding the ham bands, every time somebody starts posting email addresses for us to send 'comments' to, we wind up looking like a bunch of illiterate idiots, and we wind up pissing off a few more people who didn't know what ham radio was until we came along with our mindless, elementary school playground threats, none of which we can back up:

"I hope the US Military uses this satellite as a Star Wars systems test target!!"

"You are nuts. Look at the ill feeling you have already created. Read your own opinion polls! Who the hell has 146Mhz receivers anyhow? Only HAM operators, and they think you suck big TIME. BEAT it."

"Our Governments do not take kindly to this invasion of our (my) frequencies."

"I will encourage and support any possible litigation against your company to prevent this action or to seek damages as a result."

Sure you will, Lumpy, you'll be the first guy to kick in 10 grand to the VHF Legal Defense Fund.......

Wake up, children. It's 1999. We need to be thinking of ways to justify keeping what amateur frequencies we have, and the fact that we can send lots of mindless threats via email isn't a great justification.

If you want to send a note to Swatch, get somebody with a third grade education to compose it for you so you don't wind up looking like a total fool...... and when you send it, have enuff guts to sign your name to it, like my friend Carl Stevenson did......

If you read the 'history' of this 'problem', you will see that the French were 'duped' by the Russians. Did anybody every stop and think for a few milliseconds that maybe Swatch was too ?

Did anybody ever stop and think for a few milliseconds that maybe a nice explanation to Swatch that they have been duped into doing something they should not be doing might be just a TINY bit more effective than threatening to 'jam the uplink' ?

Of course not. When I passed the same test that Rebecca passed, I became the OWNER of the ham bands and I have the God given right to KEY the HT and nobody can ever take that away from me.

You guys are just too much..... probably 75% of you couldn't tell time if you had three Swatch Watches.....

73, Jim KH2D

P.S. To the pinhead in Ohio who told Swatch that they would be jamming the input to the local repeater 1) get a life and 2) get a VHF band plan......

252. send me your URL

253. Software Packet FREEWARE: PKT5MON 5.23 (english version!)

Newsgroup: rec.radio.amateur.misc
Date: 1999-04-05 00:00:00 UTC
From: RadioClub de Teleco <rct@lostrego.uvigo.es>
Message-ID: <3708E415.338799EB@lostrego.uvigo.es>
Source record: 146390

Hello everybody!

We'd like to inform you that the freeware program PKT5MON has been translated into English language.

For those of you who don't know, PKT5MON is a program that, with a simple
HAMCOMM modem, decodes PACKET frames which are sent between DX CLUSTER stations.
It's very useful for those of you who can't access a local DX CLUSTER but
want to receive DX-spots and WWV reports, the same way if you could access
one.

You have mucho more information and a screenshot on the web page of the program:

http://lostrego.uvigo.es/pkt5mon/
(there is an English language version as well)

Of course this program is FREEWARE and as it has had so much success in our
local ham radio community, we thought about distributing it via the net so
that everybody could use it.

Greetings from EA1RCT (RadioLab at University of Vigo, Spain)

PS. (Feel free to forward this message to any other forum which may be interested in this software)

YES, The Lincolns are still Being Sold.. The other that you can get used that is Identical to the Lincoln is the HR-2510.. other radios for 10/11 meter are

RCI2950
2970
2980
2990

Galaxy, Northstar, Emperior, and any other radios out there that can or already is modified for it.

Jeffrey Herman wrote:
>
> Give 'em a bath in denatured alcohol or acetone. Do so in an open area.

Acetone may attack the plastics in the case. Alcohol will clean some
of the grime but not all.

The idea is to clean the oxides, grime, and non-conductive film from the
contacts, and leave a lubricating layer to prevent galling of the
contacts. The lubricating layer also prevents re-oxidation and the
formation of non-conductive films that caused the problem in the first
place.

The lubricating film is non-conductive, but the microscopic asperites on
the surface of the contact will punch through the film and provide a true
metal-to-metal contact. This can reduce the contact resistance by a
factor of ten and make it much more stable.

For example, "Fix Modem Problems",

http://www.csolve.net/~add/system/modemtip.htm

shows how ordinary vaseline can reduce the contact resistance on your
telephone.

Simply cleaning the contacts may provide temporary improvement, but
without protection, the problem will soon return.

Best Regards,

Michael R. Monett,
Automated Production Test

Amateurs Protest Swatch Co. Intrusion on 146 MHz

URGENT!! Pass the word around on this one!

See: http://rob.carlson.org/swatch-protest

So I guess most hams are sleeping through this one?

OK, FYI, you can refer people quickly to go directly to:

http://www.swatch.com/beatnik/mission.php3?id=3

and then see http://www.swatch.com
for the overview of this awful travesty!!

What a disaster!

Hey there, Riley Hollingsworth, K4ZDH!!

How about contacting SWATCH for us? (Grin!)

Maybe you could go on the air on 145.8 with a few KW and warn them!

Ah the quick buck again, eh?

Ham radio did fine without Swatch for decades Mike!

Sponsorships and "partnering" (i.e. being in bed with) commercial
concerns will NOT benefit amateur radio long-term.

Remember it is AMATEUR radio - not PAID COMMERCIAL radio.

Anyone agree?

Sponsoring???

Next thing you know Burger King will be putting ads on every ham's 75m
SSB transmission, like a roger beep at the end of every transmission!

We have about as much use for your COMMERCIALS ON THE HAM BANDS idea,
as a FISH has use for a BICYCLE!!

Mike, we can soon kiss amateur radio goodbye if you, Swatch and the
Russian Pirates get your way!

Wow, some one must own stock in WD 40! In the Pro audio world, the caig cramolin r5/d5 is defiantly the way to go. I would not get caught dead spraying
WD 40 in an expensive mixing board. Leaves too much residue. I have seen boards with "customer repaired" using WD 40 with puddles of goo inside. A good
cleaner should clean and preserve. This leaves out just alcohol or other straight
petroleum products. If you clean a control in this matter, it will soon be noisy again.

Notes on cleaning switches:
If the switch is a knife type with a steel case, try to pry the back cover up to
expose the end of the switch slider. Put the switch in a vertical position and spray
D5/R5 in and work the control for 1 minute or so.
If the switch is a sealed plastic type..Do this only if there is no other choice.
Get a small shafted pencil soldering pencil. Burn a small hole with the pencil in
the back of the control. Make sure you work the control back and forth so none
of the melted plastic jams the control. Spray D5/R5 in the new hole. You then can
seal it with a dab of silicone sealer or equiv.

Kevin,

Well, everyone else seems to have put in their $0.02 so I thought I might add mine. Everyone is different, so my experiences may not work for you, it's just a matter of finding a method that works for you.

I got my first license in 1966 and for years had a lot of trouble with code, even though I loved to use it. It wasn't until I discovered the Farnsworth method (I saw your correction from the Koch Method) that I was actually able to get my code speed up. I decided in January that, this was my year for upgrading. On March 6, I walked into the license testing facility as a Novice and walked out a General. On April 3, I walked in as a General and walked out as Advanced. I'm hoping to do a similar upgrade in May, to the Extra.

I don't necessarily recommend that you push yourself like this, because, taking two written tests, the Tech and the General, and the 13 WPM code test, all in one sitting, makes for a very nervous applicant. But, it worked for me.

In article <7e7blu$id1$1@alexander.INS.CWRU.Edu>,
gr349@cleveland.Freenet.Edu (Kevin J. Margalis) wrote:
>
> I've recently begun learning morse code. I'd appreciate it if

> test, hopefully sometime this summer. I tried learning the
> characters at 15wpm (sent at 18wpm, but 15wpm overall speed),
> thinking that this would enable me to progress more quickly,
> but like I said it just seems to be a bit too fast for me to
> handle.
>

One of the things that also worked for me was, finding out how the test was given. If you are taking your test at a testing facility, that

is associated with the ARRL, the 5, 13, and 20 WPM tests are given with 20 WPM character speed. At the slower speeds, 5 and 13 WPM, this gives you lots of time between characters for you mind to convert the sounds.

The other thing you need to know is that you don't need to have solid copy, to pass. After the test is given, you are given a set of 10 multiple choice questions to answer. You only have to get 7 correct to pass. Even if you miss some characters, you can still ace the test. If you get more than three wrong, then they look for one minute of solid copy. For the 5 WPM test you only need 25 characters in a row correct, and pro-signs count as 2 characters. For the 13 WPM test you would need 65 characters in a row.

Being able to copy 2 to 3 WPM faster, than the test requires, allows for the nervousness factor.

> I'm copying random code groups right now. I'm really looking
> forward to having learned all the characters, so that I can
> start copying actual words and made-up QSO's. They've got to
> be more interesting than "pseudo-words" like "KMMKKKM".
>

Randon code groups was good for me because it helped me stop anticipating the next character and allowed me to concentrate on the sounds of the characters. The groups should also be random in size, so you are not anticipating the break between the groups.

Also, I would recommend learning all of the characters, at the slower word rate, before trying to increase your word speed. (I think the Koch method works just the opposite of this.) Then, when you are able to copy 90% at a particular word speed, increase the word speed by one or two WPM. I found that I had to keep pushing myself to learn the sound of the characters rather than concentrating of how many dots and dashes I was hearing. Some of the characters, at first, are difficult to seperate, like U, V, and 4, but after a while, they distinguish themselves from each other. There will also be one or two characters that continue to give you trouble. For me it's the letter Z. I don't have trouble with G or 7, but Z drives me crazy.

> I work at this about 5 days per week. Usually 2 or 3 sessions
> of 20 minutes each. More than 20 or 25 minutes, and my
> concentration seems to suffer. (Maybe this will change once I
> can do QSO's, instead of meaningless groups of those few
> characters I currently know.)
>

With most people, a session, more than 15 or 20 minutes, is a waste of time. I'm one of them. I practice for no more than 15 minutes every day and only when I am most alert, which for me is in the mornings. That's also when I did my testing. I found a testing site that gave the tests in the morning.

It has also help me to be on the air. I work 90% CW on 40 and 15 Meters, so this helps me get in a little more practice. If you can just get your Novice license, time on the air will help reduce the nervousness factor that you will have during the test.

> I'm making steady progress, and really think that my goal of
> taking and passing the 13wpm exam sometime this summer is
> realistic. (I could probably pass the 5wpm exam much sooner,
> but 13wpm is what I'm really after.) Any comments on my
> method of learning morse would be appreciated.
>

My last recomendation would be to get yourself a copy of Morse Academy. I tried a lot of other code programs, but this was the one I liked the best. I found that most of the code programs had some kind of problem working under various operating systems and hardware configurations, so I created a bootable floppy, with only a basic DOS system, and just Morse Academy. Since most of the code programs were written to work from DOS, this worked out great. I can carry the floppy around and plug it into any computer, and it works great.

The biggest advantage that I found, with Morse Academy, is that it has the ability to generate sample code tests, for Novice, General, and Extra (the G option). These sample tests are exactly what you are going to hear, when you are sitting at the testing facility. I only used the G and the K options, with Morse Academy, and completly skipped the learn section, because it required keyboard feedback. I didn't want to add another level of translation. I figure, I already know how to write. But, try it, it might be good for you.

Well, I've rambled on long enough. Good luck. I'll be listening for you on 40 and 15 Meters. Even though I upgraded to Advanced, I still hang out in the Novice bands. Go figure.

WOW! I would want this brought out and dealt with, whether I was
LEFT, RIGHT or in between!

HOW can they get away with covering something like this up
for almost SIX YEARS??

Are Americans SO DUMB that they let these people get away with
everything? Even murdering scores of people domestically?

I won't get into the claims about what RELIGION those people
were. That has nothing to do with it.

Seems like if government is not held accountable for this, we will
soon all be living in a terribly capricious, fascist police state.

VKE was updated yesterday and posted on my website for downloading. With Field Day coming upon us, be sure to grab and copy of VoiceKeyExpress. Let VKE call "CQ FielddDay" while you save your voice for doing more important things, like asking someone to bring you another cold one, etc.

If you have any questions about VKE, check out my website, and/or drop direct e-mail to me. (You can e-mail me directly from my website too.)

73 and good luck on Field Day

Hey George,

I think you DO have something to say here, but we can't HEAR you for the VOLUME and INTENSITY of your OBNOXIOUSNESS!

If you could CALM DOWN and take that CORN COB out, we would LISTEN to what you have produced about WACO and the FCC / FBI law-breaking that may have occurred.

Trouble is, you are being RUDE!

You are not following the advice of your own religion's founders, one of whom told YOU to:

"SPEAK THE TRUTH IN LOVE."

When you speak the truth without any love, you are doing no better than the "devils" which believe and tremble."

Get a clue, bud!

SET VENOM=0
SET TRUTH=10
SET CHILL=10

After reading all of the information on the Swatch web page I can see no violation of amateur rules. I wish someone would point out specifically what rules they are in violation of since they make no mention of advertizing the Swatch company but rather transmitting messages from readers of thier site. As long as these messages contain no profanity they are no different than any other 3rd party traffic.

Has anyone from the Queen Mary radio club ever described the boat? Since the Queen Mary is a commercial enterprize and they make space available for the radio club they are in essence sponsoring the club, is it in violation for an operator to talk about the ship and how much fun it might be to visit? Thus providing advertizing to a world wide audience over HF.�� This senario exists with many other corporate sponsered clubs, so why is so different for the Swatch Company? Note: Their site makes no mention of Swatch Advertising being transmitted from the satellite.

you have to be caerful because diodes can be dangeroius sometimes.
Make sure you have youerself fully grounded with soem of those
grounding strapps and then only touch diodes with one hand at a tiem.
Avalanche brakedown diodes can be realy nasty so use a diode tool.

> what tool would be used and what special features would one want in this tool?

it must be small and sharp on the ends and cut like sissors.

> What is the "hard" part in removing the diodes? Is is just a matter of using a
> fine tip soldering iron and heating the diode contacts and removing the diode?

if the diode goes into avalanche brakedown it cud be nasty for you.
Instead, power off everything and use some diagonal cutters to clip out
the diodes. you can clip just one end in case you want to resolder
later.

DUH!!

The following rules are planned to be violated:

No one-way transmissions.

No unlicensed operation.

No commercial advertising in the amateur bands.

Need I go on?

The President of AMSAT-France says you are DEAD WRONG,
so I suggest you go argue with him.

He can give you better answers than I can.

Also, the SPECIFIC RULE NUMBERS that will be violated are posted out
there on web pages I have cited if you want to read them...

I didn't post them. I will tell you who DID: Some of the MANY
THOUSANDS of amateurs who are outraged by this plan to STEAL our
amateur band for commercial purposes!

Deal with it!!

From:

http://perens.com/Articles/Swatch.html

How SWATCH Violates The Law® -

International Radio Regulations
Article 1 - Terms and Definitions
Section 3.34 Amateur Service:
A radiocommunication service for the purpose of self-training,
intercommunication and technical investigations carried out by
amateurs, that is, by duly authorized persons interested in radio
technique solely with a personal aim and without pecuniary interest.

Article 32: Amateur Service and Amateur-Satellite Service
Section I. Amateur Service
(2) It is absolutely forbidden for amateur stations to be used for transmitting international communications on behalf of thrid parties.
(3) The preceding provisions may be modified by special arrangements between the adminstrations of the countries involved.

U.S. Amateur Regulations
(This rule also appears in most nation's individual laws concerning Amateur Radio)
Section 97.113 Prohibited transmissions
97.113 (a) No amateur station shall transmit any communication the purpose of which is to facilitate the business or commercial affairs of any party.....
...
(c) No station shall transmit communications in order to engage in any form of broadcasting...

Would you do business with a corporation that knowingly and outrageous promotes violations of international and national laws?

= = =

If it is such an innocent and LEGAL thing for Swatch to break the International Law, with the help of RUssian Pirates, all of which you defend, then why is the French AMSAT President so concerned about this??

Please answer that after you read this letter:

This is a letter from AMSAT-France President Bernard Pidoux, F6BVP to the other AMSAT organizations detailing the situation with the new satellite.

Letter from Bernard Pidoux regarding Beatnik

Dear AMSAT colleagues,

AMSAT-Russia, with the help of SCSC (Space Flight Control Centre) in Moscow has contacted AMSAT-France in December 1998 for the design and manufacture of an RF module and electronic PCBs similar to the ones used on board RS-17 and RS-18 satellites. By contract we agreed that AMSAT-Russia was in charge of building the satellite frame, integrating the VHF and electronic modules into the frame and choosing and implementing the messages to be sent by the satellite. The contract signed by Vladimir Solovyev (SCSC) and Gerard Auvray F6FAO (AMSAT France) specifically mentionned under paragraph 8.2 that "the

voice messages and HTML pages transmitted by the satellite should comply with the international amateur rules. No direct advertising can be made on the air".

Soon after the contract had been signed, we discovered through the technical discussions we had with SCSC that they had made a separate commercial contract with the Swatch company in Switzerland. This company wanted to call the satellite "Beatnick" and to send voice and HTML messages about Internet Beat time. We said to SCSC that these message contents were not compliant with amateur radio ITU regulations. Oleg Volkov replied that they took all the responsibilities and that we could not cancel the contract with them or they would suit us.

Thus AMSAT-France was obliged to deliver the electronic modules with the software for CPU. The EPROM program comprized test messages and the ESD circuit was filled with pre recorded test voice messages by AMSAT France. Acceptance certificate of the work was signed by SCSC and Gerard Auvray. We received a copy of the voice message recorded by SCSC and we still think that they are not acceptable. The name of the satellite itself, "beatnik", indicates the identity of the sponsor. Some voice messages refers to the BEAT, a registered trade mark by Swatch. Thus we suggest that no AMSAT organization should describe the contents of the message or encourage listening to this non amateur compliant satellite using our amateur band. Furthermore we ask that keplerian elements of this satellite should not be published in the AMSAT keps bulletins. The batteries capacity of the satellite is however limited and the expected lifetime is 30 days.

I would like to tell you that AMSAT France is very sorry for this bad situation and hopes that you will understand that we did not want to achieve this. We had good relationship with the former team under the management of Viktor Kourilov, of the Astronautical Federation of Russia who was responsible of RS-17 and 18 projects and we did not realize the risks of contracting with a new one.

The character of the present satellite lead us to cancel our educational project. Formerly AMSAT-France has been deeply involved in the RS-17 and RS-18 projects, including technical support and flight model manufacture. With the help of French schools AMSAT-France is now developing his educational amateur satellite project.

I apologize for the trouble this project could make to the amateur satellite community and hope that you will help us to limit its impacts.

Best regards,
Bernard Pidoux, f6bvp

President AMSAT France

274. Re: Learning Morse code

Newsgroup: rec.radio.amateur.misc
Date: 1999-04-05 00:00:00 UTC
From: Jesper Kristiansen <jkristia@yahoo.com>
Message-ID: <3708DB75.490AA5F8@yahoo.com>
Source record: 146492

I just passed the 20 wpm this weekend. The method I used was a bit
different, but it worked for me.
I started with 18wpm character speed and 13 wpm overall speed from day
one.

BUT BUT BUT !!!
First when you have to learn the characters you will practice like EISH5
for a day, and then TMO0 for the next day
and so on, until you are familiar with the characters. Then I started to
include all characters, at this "high" speed, but I only send 2 - 3 groups
of 5 characters each time. That way I still had time to "think" when I
missed a character. After a few days I started to get almost 100% on these
3 groups, and I then increased number of groups slowly. After 3 weeks I
was copying 20 groups of 5 close to 100%, so now was the time to include
the numbers and comma, poeriod and slant bar, and it was like starting
over again. A lot of missed, because I now had to think again everytime I
received one of the new characters. But after another week I could copy
almost 100 % again, except for number 3-4-7-8, they stille give me a hard
time. Well now I felt ready for the examn, but I had one week left before
the exam, so for the last week I tried to work at 20wpm, and it's fast,
very fast. 18wpm is ok, but the last 2wpm are difficult. But after passing
13wpm, I gave 20wpm a shot, and passed, and I'm sure you can do the same.

If you want to use the program I used, you can get it from my homepage.
Its a '95 program using your soundcard.
its at www.qsl.net/oz1kto

Good Luck

vy 73
Jesper

The cleaner from radio shack is pretty good #64-4315 or the other one
64-4320. I can't see that one is any better than the other. the 64-4320
costs a dollar more.

Six months ago, Kenwood jerked the then TH-79 Dual Band Handheld from the market. (or liquidated the stock of them; could buy a high power version for $278 from Amateur Radio Supply). I thought a new dual-bander was coming. Now, they have released the TH-79 AKSS....which appears to be the same radio..?? But what is with the $479 price? A hundred bucks more than a FT-51R? I don't think so! Can any of you Kenwood fans tell me what one gets for all this cash besides a very expensive HT?

Apparently you want to close your eyes to all the rules violations
that are clearly detailed for you on the web pages I cited.

Apparently you think the French President of AMSAT is apologizing
for nothing when he points out how the Russian Pirates duped him into
helping with this illegal operation.

Apparently, you just don't care which commercial interests take over
2m band for 30 days at a time.

Well, enjoy the loss of your band!!

Looking for some help with an old Heathkit IO-4560 oscilloscope. I used to be a design engineer at good ol' Heathkit back in the 70's, and as such, I was recruited by my kid's science class to fix their ailing Heathkit scope. It is a model IO-4560. I don't have a schematic or a book as they bought it second hand. The problems seems to be at the low level input to the horizontal amplifiers. The drivers seem to be ok, as the dot will center when I disconnect the input to the amps.

Any help would be greatly appreciated. I only really need the schematic not the whole book.

Assuming you are refering to a non surface mount pc board...purchase
yourself some "solder wick". Preferably NOT the radio shack version. On
the solder side of the PCB place the solder wick (which looks like small
shield of coax cable), and then place the tip of the low power soldering
iron on top of it. With the solder joint under the solder wick. The wick
will "suck out" the solder and leave a nearly clean hole. Wiggle the part
to be removed and it will break away from the solder. Do this on both ends.
You may need to use a small screwdriver and slip it under the diode and
pressure it upward to remove it.

If you can provide a "hardened site" i.e. something underground that will
block most if not all of the EMP then you should be able to use nearly any
equipment. Or get a rig and secure it underground and inside a metal box
and use it only when needed.

Yes tube equipment is considerably safer than modern solid state devices.
Of course this will require a source of 110v ac.

Well there is no question about that Cedric, I guess I was really looking for someone to point out what the violation was, since non-amateurs sending a message over an Amateur Satellite would be no different than Boy Scouts greeting each other during a Jamboree, or someone passing a message over a traffic net, and the fact that Swatch has made no mention of advertisements being transmitted. I just read another thread from the Russians and it looks like the whole things off anyway...

Escape and Evasion training facility pretty common at Basic Training
installations (like Fort Dix).
There was one at Lewis many years ago when I took Basic there (1967).

At Fort Benning, we had a whole company of men who would play
"Agressors" in training for the Infantry School courses (Ranger, OCS,
NCOC). They had their own insignia, uniforms, flags, camps . . .

As far as the Towers . . . real security watch-towers aren't slapped
together out of plywood and 1x8's.

And the portable "jails" look like parts of pre-fabricated building of
some sort. Why would all that head space extend beyond the "bars?"

As Buffalo Springfield said

"paranoia it strikes deep . . ."

With most sliders, cleaners usually wash away the lubricate in the slider and make the slider stiff and sticky. They never work the same. I usually just replace the sliders.

As far as cleaners go, the Cramolin system is the best way to go, similar to the Caig cleaning system. It's a 3 step operation. There is the deoxidizer, the wash, and the preservative. All three are sprays. Caig used to use Cramolin as their main cleaning formulation but they have since changed their formulation to this DeOxIt stuff which is not the true Cramolin. I get my Cramolin from a place called JLI Electronics. You get 400ml for around $10.00, twice the amount compared to Caig which is 200ml for around $8.00.

What about third party traffic??? No control station??? Non-amateur message content??? Commercial content????

On a "Sputnik" amateur satellite???? I would also suggest that no ham give any parties any reports on heard signals either. Ignore the little bird. It will only live so long. Further, support no more birds by anybody else that try to pull this crap.

WD40 *is not* an electronic cleaner and should not be used on electronic or electrical equipment. You might get away with it but why would you want to try when there are perfectly good contact cleaners available? In addition, WD40 is flammable and *could* cause a fire if you use it around contacts that may arc. My son-in-law ruined a good alternator by spraying WD40 on the armature trying to lubricate the bearings.

DUH, I better get my 6m beacon off the air before I lose my license... Try again.
P.S□ the last bird that AMSAT-F put up with the Russians a voice beacon, that's a one way transmission big guy.

> No unlicensed operation.

DUH, who said it was unlicenced?

> No commercial advertising in the amateur bands.

DUH, Where has Swatch indicated that there would be advertising on the amateur bands? They have only indicated that messages would be transmitted, they even suggest greetings to friends and relatives.

> □
> Need I go on?

Well you can if you want, but so far you haven't said anything relative to the issue and unless you've been having conversations with AMSAT-R you can't possibly know if operation will be under an amateur call or not and unless your talking to the marketing department of Swatch would have no first hand knowledge of whether advertisments were planned to be transmitted. Your mistaken completly about 1 way transmissions so that leaves you with a page full of nothing.
□

> The President of AMSAT-France says you are DEAD WRONG,

If the messages transmitted from the satellite are identified with an amateur call and have no advertisments for the Swatch company then the above does not apply. Simply by Identifying the satellite as "Beatnik" or "The Swatch Beatnik Satellite" is not illegal, I've heard many corporate amature clubs identify as "This is the (insert corporate name here) amateur radio repeater" W8QQQ etc. If this were illegal it seems to me it would have been dealt with by now, but it's not, so it hasn't :)

> &#65533;

> between the adminstrations of the countries involved.

If this is true then you'd better call your buddy at AMSAT France and tell him,
G&#65533;rard Auvray, F6FAO, AMSAT
France engineering vice president's daughter recorded a message on the last
Sputnik, I never saw her call sign mentioned anywhere so perhaps she was a third
party?

> U.S. Amateur Regulations
> (This rule also appears in most nation's individual laws concerning
> Amateur Radio)
> Section 97.113 Prohibited transmissions

> 97.113 (a) No amateur station shall transmit any communication the
> purpose of which is to facilitate the business or commercial affairs
> of any party.....

Transmitting messages from individuals saying hello to friends and relatives is
not business or a commerical affair and that IS what Swatch was/is soliciting.
Let's not forget that the Boy Scout Jamboree goes on the air every year, Boy
Scouts discuss thier rank and Boy Scout related items over the air, and the Boy
Scouts ARE a commercial enterprise and not a non-profit organization.

> .
> (c) No station shall transmit communications in order to engage in any
> form of broadcasting...

You need to go read Part 97 and learn about the provisions for beacons, which are
of course 1 way transmissions exactly the same transmitted on the last
satellite, I suppose since the message on the last bird was recorded by a cute
French girl nobody seemed to mind.

> Would you do business with a corporation that knowingly and outrageous
> promotes violations of international and national laws?

So far you haven't shown that they intend to break any.

There are radio clubs on the campuses of corporatons all over the United States,
Since many of these identify themselves with a club name including the
corporation e.g the "Goodyear Amateur Radio Club*" does this not identify the
name of the sponsor?
Sure seems like it to me. If the Goodyear club came into some money and put up
thier own bird do you think they might call it the Goodyear Amateur Satellite?
Huh? Do ya think?
* for example only, it's a fine club.

Right off the top you might try W1AW. The schedule can be gotten from "http://www.arrl.org/w1aw.html". It operates on 1.818, 3.5815, 7.0475, 14.0475, 18.0975, 21.0675, 28.0675 and 147.555 MHz.

There is also a W6 or K6 station that runs continuous code practice on 7.095 MHz, approximately. Their signal is almost always 20 over S9 at my QTH. I think it sends at 5, 10, 15, and 20 WPM in rotation.

Other than that, just tune around the novice portions of the bands and start copying.

Martin

GOOD FOR YOU, KEVIN. Keep up the good work. It sounds like you have a good grip on it right now.

Different methods work for different people. I like your method of several short sessions each day. The first couple days, 1 and 2 character letters, then 3 characters, then 4.

W1AW code practice is a good place to practice once you have all of the letters and numbers down (and some punctuation). They have slow and fast code, slow code consists of 5, 7 1/2, 10, 13, and 15 WPM, fast code is 10, 13, 15, 20, 25, 30, and 35 WPM. So you get 10, 13, and 15 WPM three times a day. See ARRL's site for more info.

And please, feel free to ask any questions at all. The only stupid question is the one you didn't ask.

>> Factory Service Tech and it beat everything else.

For the life of me, I don't see how anyone can have good results CLEANING switch contacts with a petroleum based lubricant. LUBRICANT is used to lubricate.... that is, it leaves a slick deposit to reduce friction of parts that tend to rub together and protect parts from air and oxidation. CLEANing solutions are designed to clean contacts; that is, remove all dirt and residue from surfaces. This is just the opposite of a lubricant. You can't have both unless you use extremely expensive conductive grease type materials. WD 40 is not a good conductor. I would not want to coat small fine switch contacts with this material.

Off-the-shelf TV tuner cleaner would be about the most easily obtainable cleaner you might find.

Personally, I have found in 30 years radio maintenance that the most reliable fix for an intermittent switch or pot is to replace it. Digikey is a good source for both.

It might be helpful to post your true e-mail addr if you would like to
actually sell something.

I agree! Except stick with TriFlow. The contents have a much lower vapor pressure and the fix lasts for years. It is miraculous on pots, too. I suspect the antioxidants help. If you want a surprise, try it on motor brushes! I expected a burnt mess but the sparks disappear and the motor speeds up. I haven't seen any long-term downside yet - and I spray that stuff everywhere. :)

Give 'em a bath in denatured alcohol or acetone. Do so in an open area.

If it was not excessive at Nuremberg, then how is it excessive now? I understand that we cannot release prisoners who have done the same things that the Clinton NAZIS have done, even though the Clinton NAZIS are not punished. I suppose that to make justice fair and uniform we must find a way to unhang the Hitler's henchmen. Since this is impossible, I think you might be able to see a need for a uniform application of justice.

This places a burden of maturity and responsibility upon us, just as was placed upon the jury at Nuremberg. While no one looks with joy at this task, some things must be done in the defense of humanity against such genocidal monsters.

314. Fourth Biannual Elmers Directory Mass-Ack In Progress

Newsgroup: rec.radio.amateur.misc
Date: 1999-04-05 00:00:00 UTC
From: pschleck@novia.net
Message-ID: <3TXN2.11788$mv3.771810@newscene.newscene.com>
Source record: 146614

Last month, I began the fourth biannual mass-acknowledgement and accuracy check of my Amateur Radio Elmers Resource Directory. As part of this check, I sent E-mail to every Elmer on my list at their last known address(es) asking them to reply to me and note any changes to their entries. Most change requests from respondents have been processed and may be viewed in "Amateur Radio: Changes to Elmers Resource Directory." Because of time constraints, not all changes have yet been posted (in particular, not all new HTML registration forms received to date have been applied). I hope to get these done by early summer at the latest.

The following Elmers did not reply (by the posting time of this message) and will be deleted from the directory sometime early this summer:

If anyone has any information on Elmers whose mail has bounced (or who haven't responded), please write me at elmers-request@novia.net (the default Reply-To: of this message).

I'd like to thank those that did respond right away for their replies and continued assistance in keeping the list accurate and up-to-date (as well as a lot of positive and informative feedback about use of the list by the readership). As a result, the list will remain a usable net resource for some time to come.

(Apologies to disinterested parties. This will be my last post on the subject for at least another 2 years.)

316. Elmer: Building EMP-proof transceiver

Newsgroup: rec.radio.amateur.misc
Date: 1999-04-05 00:00:00 UTC
From: Michael Young <nobody@all.org>
Message-ID: <923298783.125.67@news.remarQ.com>
Source record: 146616

Dear Elmer:

I am looking to build or acquire a transceiver with a strong likelihood of surviving EMP from a distant air-burst nuclear device. I'm not certain of my motivations in wanting to do so. I attribute these wild ideas to the little voice that has guided me through troubled times past. Whether I actually hear the voice or not is something I will share outside of therapy. Allow it to suffice that this is the same voice that drove me to brush up on my CW skills very recently.

Are kits or designs available that do not make use of IC's? I am led to believe that tubes and discreet devices are not as susceptible to damage from EMP. Are there web resources that discuss EMP, and communications equipment that can survive in this environment? What effect can I expect a nuclear detonation to have the airwaves?

I realize a public query of this nature will bring more than its share of crackpot responses. However, I am counting on the emergency-preparedness minded to help point a direction to start searching.

Thanks.

Michael.

320. *** How do you remove "DIODES"? ***

Newsgroup: rec.radio.amateur.misc
Date: 1999-04-05 00:00:00 UTC
From: jhulet@aol.com
Message-ID: <19990405045726.17318.00002762@ng122.aol.com>
Source record: 146620

Hello,

I am wondering what is involved in removing diodes? Say if someone was to modify a radio and it required a couple of diodes to be removed.... First, what tool would be used and what special features would one want in this tool? What is the "hard" part in removing the diodes? Is is just a matter of using a fine tip soldering iron and heating the diode contacts and removing the diode?

Is seems that so many modifications out there today require the removal of diodes that I am considering learning the trade...

Thanks again for any light you can shed on the subject...

332. RFI problem - false alarm with smoke detectors

Newsgroup: rec.radio.amateur.misc
Date: 1999-04-06 00:00:00 UTC
From: John - WB5NUA <johnwunder@my-dejanews.com>
Message-ID: <7edkd6$bl8$1@nnrp1.dejanews.com>
Source record: 146332

I have two photoelectric smoke detectors that are part of a monitored alarm system. I have determined that they are not RFI proof (not FCC part 15 either). They go into false alarm with 350 Watts on 20 meters (antenna is beam at 50 feet). I tested them temporarily on 9 volt battery power (not wired to system) and they still trigger at about 350 watts. Has anyone found solution for this? Are there any FCC part 15 detectors for monitored systems? I have contacted the manufacturer (ESL, Sentrol) and they are looking into this. They also make Ion Detector type units, that they believe are less sensitive to RF. I appreciate any info on your experience in this area. 73's -John/WB5NUA

Don't use WD-40 on anything that is high impedance. It conducts. I once sprayed it in the guts of a marine SSB transceiver and it killed the unit. I had to bake it for days in low-temp oven before it worked again.

Well there is no question about that Cedric, I guess I was really
looking for
someone to point out what the violation was, since non-amateurs
sending a
message over an Amateur Satellite would be no different than Boy
Scouts
greeting each other during a Jamboree,

Get a clue! The Scouts have a CONTROL operator there!
That operator is a LICENSED amateur. Please stop using repetition and
circular logic to try to buttress your flawed position!

That is NOT exactly like when a non-amateur puts a voice beacon on the
air and EVERY MESSAGE contains the Company (unlicensed remember, Tim!)
SAYING it's company name, on OUR amateur airwaves all over the globe
in violation of national and international rules.

You REALLY should begin THINKING about this one instead of
rationalizing away these acts of piracy from your comfortable spot in
the land that let off O.J and Bill!

You wouldn't recognize the violations in this, if they walked up to
you on the street and slapped you!

BTW - Swatch will have their check in the mail to you pronto!

>If the messages transmitted from the satellite are identified with an amateur
>call and have no advertisments for the Swatch company then the above does not
>apply.

But of course you are ASSUMING this to be the case, even though they
have plainly stated their intention to have their trademark named
verbally & audibly in every message!

Non-commercil? FEH!!

> Simply by Identifying the satellite as "Beatnik" or "The Swatch Beatnik
>Satellite" is not illegal,

Ha! In your not-so-humble opinion maybe.

But Tim, YOUR OPINION to the contrary will not invalidate
international laws!

Most countries do NOT allow a product name to be NAMED OVER THE AIR on
the amateur bands, including all European countries.

You are defending something like your life depends on it and you don't
have a CLUE what you are talking about!

>I've heard many corporate amature clubs identify as

AMAT-E-U-R, Tim!!

An ARMATURE is part of an electric motor!!!

>"This is the (insert corporate name here) amateur radio repeater" W8QQQ etc. If
>this were illegal it seems to me it would have been dealt with by now, but it's
>not, so it hasn't :)

If you could park this pirate satellite over AMerica that would be OK<
I suppose.

But even if you COULD, that is NOT what it will say!

>> Article 32: Amateur Service and Amateur-Satellite Service
>> Section I. Amateur Service
>> (2) It is absolutely forbidden for amateur stations to be used for
>> transmitting international communications on behalf of thrid parties.
>> (3) The preceding provisions may be modified by special arrangements
>> between the adminstrations of the countries involved.
>
>If this is true then you'd better call your buddy at AMSAT France and tell him,
>G�rard Auvray, F6FAO, AMSAT

Funny, but Tim, I don't see the word EXCEPT after that sentence at
all!!

(2) It is absolutely forbidden for amateur stations to be used for
transmitting international communications on behalf of thrid parties.
PERIOD!

>France engineering vice president's daughter recorded a message on the last
>Sputnik, I never saw her call sign mentioned anywhere so perhaps she was a third
>party?

Didn't your mother ever tell you this basic rule of life, Tim:

"TWO WRONGS DO NOT MAKE A RIGHT!"

>> U.S. Amateur Regulations
>> (This rule also appears in most nation's individual laws concerning
>> Amateur Radio)
>> Section 97.113 Prohibited transmissions
>> 97.113 (a) No amateur station shall transmit any communication the
>> purpose of which is to facilitate the business or commercial affairs
>> of any party.....

And that IS the whole point of this exercise.

>Transmitting messages from individuals saying hello to friends and relatives is
>not business or a commerical affair and that IS what Swatch was/is soliciting.

With their Trade Mark name included, yes.

>Let's not forget that the Boy Scout Jamboree goes on the air every year, Boy
>Scouts discuss thier rank and Boy Scout related items over the air, and the Boy
>Scouts ARE a commercial enterprise and not a non-profit organization.

Poor comparison, between a social service organization and a business.

>> (c) No station shall transmit communications in order to engage in any
>> form of broadcasting...

And there it is again! They break ALL these rules and TIm says it is
OK! Ah well, Tim. ANything goes, and it WILL if you get your way in
this one!

>You need to go read Part 97 and learn about the provisions for beacons,

It is NOT a beacon though, so again, you are TOTALLY barking up the
wrong tree.

A rule that allows tricycles, does not get used to justify the use of
motorcycles, hence, you are blowing smoke once agian just like all the
rest of your crap arguments in this matter!

How much is Swatch paying you, "little guy?"

>which are
>of course 1 way transmissions exactly the same transmitted on the last
>satellite, I suppose since the message on the last bird was recorded by a cute
>French girl nobody seemed to mind.

Funny, but irrelevant comment.

>> Would you do business with a corporation that knowingly and outrageous
>> promotes violations of international and national laws?
>
>So far you haven't shown that they intend to break any.

Bollocks! Pure bollocks Tim, and if you had half a brain (even one
tied behind your back) that still wouldn't make this fair for you!

>> If it is such an innocent and LEGAL thing for Swatch to break the
>> International Law, with the help of RUssian Pirates, all of which you
>> defend, then why is the French AMSAT President so concerned about
>> this??

>> Please answer that after you read this letter:
>
>I'll be happy to, my comments are imbeded in the letter below.

Your comments so far have been absurd drivel, and poorly reasoned so I
will expect nothing any better in the rest of this diatribe!

>> edit for brevity
>>
>> Thus AMSAT-France was obliged to deliver the electronic modules with
>> the software for CPU. The EPROM program comprized test messages and
>> the ESD circuit was filled with pre recorded test voice messages by

>> AMSAT France. Acceptance certificate of the work was signed by SCSC
>> and Gerard Auvray. We received a copy of the voice message recorded by
>> SCSC and we still think that they are not acceptable. The name of the
>> satellite itself, "beatnik", indicates the identity of the sponsor.
>
>There are radio clubs on the campuses of corporatons all over the United States,
>Since many of these identify themselves with a club name including the
>corporation e.g the "Goodyear Amateur Radio Club*" does this not identify the
>name of the sponsor?
>Sure seems like it to me. If the Goodyear club came into some money and put up
>thier own bird do you think they might call it the Goodyear Amateur Satellite?
>Huh? Do ya think?

Obviously you only think one way, and it is a waste of time trying to
get you to think beyond the ALmighty Dollar that you love and the
selling out of Amateur Radio that you are helping to promote.

>* for example only, it's a fine club.
>
>> Some voice messages refers to the BEAT, a registered trade mark by
>> Swatch.
>
>So if an amateur is on the Goodyear Club repeater and mentions how good the
>"Goodyear All Weather 100" series tires are, he is in essence advertising for the
>company on a company sponsored repeater.

Correct. In most countries that is a violation of the law, for which
they would be prosecuted. Again, you want to force American values (or
lack thereof) on other countries.

Well, this is done insensitively in many other spheres of life,
especially in Asia, so I am not surprised to see someone advocate it
in the arena of Amateur Radio too. You think you own the planet, but
you don't!

>If we apply this rule to 2m repeater
>operations it would certainly change what could be said over the air don't you
>think? No more usage of trade mark names on the air? har har

Again, your parochial thinking prevents you from seeing beyond your
short-sighted vision of a world whose borders end at the AMERICAN
coastline!

>> Thus we suggest that no AMSAT organization should describe the
>> contents of the message or encourage listening to this non amateur
>> compliant satellite using our amateur band.
>
>Why do we not want anyone to know the contents of the messages?

Do we have to wear oit out to drum the reasoning into you Tim?
No, I suspect you are too dense to ever get it.

At least I CAN understand your reasoning evcen if I disagree with it.

You indicate that you can't grasp what Cedric or anyone else who
expresses concerns about this matter has said at all!

>This seems to me to be the crux of the entire arugument sheesh... yea, let's keep
>everyone in the dark.

Ha ha ha ha ha! Yeah, TIm! S-U-R-E! Tim, yeah, THAT is the crux!
What a dimwit comment!

>> Furthermore we ask that
>> keplerian elements of this satellite should not be published in the
>> AMSAT keps bulletins.
>
>Brilliant, that will really stick it too em. Are they planning to sabatage the
>Swatch Website? It already has an online tracker.

No, it is the PIRATES like SWATCH and the RUssians (amnd maybe you)who
think of such devious plots! NOT the decent people who express concern
about piracy.

Your time will come I expect. Hollingsworth may be looking for you
already for all we know.

Apparently, if it's illegal, Tim is for it!

>My dimes worth,
>
>Tim ka8ddz

Or maybe 1.5 cents anyway!

Be well, Tim ,and I hope you are not too offended by my well-reasoned
remarks about all of this.

You really should go do something else. This is obviously not even
beginning to dawn on you yet!

There has never been anything concrete that cell phones cause brain damage. There was a study done several years ago that hams had a higher incidence of cancer but the study was statistically flawed because the amateur population has a tendency to be older and older people are statisically higher to get cancer. There as never been shown a increase in cancer rates by people that work with HF VHF and UHF on a regular basis (AM, FM radio engineers, TV engineers, radio installers etc.) These people work with it alot more than the casual amount ham radio operators do.

Joe Molter N8IDA

I certainly would not worry if you follow the basic guidelines for RF by the FCC. The frequencies that you need to worry about are those in the microwave range and then if you stand in front of your antenna.

Most switch contacts are self cleaning if they switch enough current - the arc cleans them. However, sometimes when used in a very low current application they do get oxidized. I've had good luck by removing the switch from the circuit and putting it across a CURRENT LIMITED supply set at about an amp. Exercise the switch a few times - you'd be supprised how well it works.

Amazing, now I see messages on the Swatch comments site claiming that it is all an April fool hoax. From someone named Tim(!) but maybe these are phoney? ButtheFrench guy also said it is a "poisson Avril!" What is that? April Poison?

Maybe that is French for April Fool!

I also see a bulletin is out now on the web saying -

Just in! In this memo from AMSAT Russia President Eugene Labutini, RA3APR, AMSAT-R apologizes for any trouble which was brought to amateur satellite community and hope that amateurs in the entire world will understand this situation and separate AMSAT-R and SCSC. He writes that in the future AMSAT-R will "stop any attempt from SCSC to use AMSAT-R in commercial projects".

This is a letter from AMSAT Russia Eugene Labutin, RA3APR, to the other AMSAT organizations apologizing for the situation with the new satellite.

Letter from Eugene Labutin regarding Beatnik

"Dear AMSAT colleagues,

I was very disappoint to receive message from Bernard Pidoux, f6bvp, president of AMSAT France.

I want to explain the situation on this matter.

Everything what happened does not have any relation to AMSAT-R. All discussion with Swatch Company in Switzerland was made by Space Flight Control Center (SCSC), Vladimir Solovyev and Serge Samburov singed all documents. They do not inform AMSAT-R that they going to sign this contract under the name of AMSAT-R. Everything was made behind AMSAT-R and I have got this information from only f6bvp message. More than this - only three persons of AMSAT-R have right to sign this type of documents - president and two vice presidents.

RA3APR, Eugene Labutin - president of AMSAT-R
RU3AIZ, Alex Matvietz - vice president of AMSAT-R
RA3APW, Karen Tadewosyan - vice president of AMSAT-R

Nobody of these persons was even informed that this contract was signed.

AMSAT-R very sorry for this bad situation, and very sorry that some people using AMSAT-R name in their commercial project.

AMSAT-R apologizes for any trouble witch was brought to amateur satellite community and hope that amateurs in the entire world will understand this situation and separate AMSAT-R and SCSC. AMSAT-R will stop any attempt from SCSC to use AMSAT-R in commercial projects.

Best Regards
Eugene Labutin, RA3APR.
President of AMSAT-R "
= = = =

Again, one has to wonder WHY everyone is apologizng when this operation will not be breaking ANY American Amateur Radio Rules!!

Why can't we just leave Swatch alone?

Anyway, it is probably just a trick on people like Cedric, Jeff. Tom and 4-1000, who just can't let it go!!

In studying for the technician license, I noted that a technician has CW privileges on 6m. It seemed to me that making use of this might help prepare for the tech-plus upgrade and QRP DX by providing some CW experience before hitting real DX conditions, especially at low-power. Are there any "reserved" freqs or nets for this purpose on 6m?

Also: I have a number of QRP CW transmitter plans at home, but as far as I can tell, none intended for 6m. Is this caused by an FCC/United Nations conspiracy to pollute my purity-of-essence with overseas communist propaganda, or are there more complicated reasons? :-D Can anyone point me at some 6m CW QRP transmitter plans?

It's been a LONG TIME since I was on the air. Have kept my call (original W5 call) and am thinking of getting back on but wish to keep it simple. Please recommend a hand-held or mobile rig for idle chatting around town or on country roads. Not interested in DX or power. I remember fondly the days of noiseless six meters and two meters. Even bought a vintage Benton Harbor Lunch Kit (six) but haven't fired it up yet. Am I dreaming or is there a quiet corner out there for casual chatting. Thanks, Sam

Source record: 146347

There are some who say that the Morse code is useless....

Well here is what I have to say. And since I am K&#65533;nig Hugo IV (joke), this
is what shall occur...

Let us consider the conflict in Yugoslavia, or better yet, the poorly guarded Russian military bases containing nuclear missiles. Let us say that Milosevic or Saddam decides to send one of these "Nukes" into New York Harbor on a container ship.... Whoa... where's NYC? Now, think about the radiation.
Any FM communication in or around the former NYC area is useless... SSB? I don't think so... AM? Nope... Okay, now let us consider the telephones... Hmmmm.. that's a hard one.... Do I hear CW out there? Yes. Try talking to California from the East Coast via SSB on 10M at 12pm... Now use CW... A big difference in readability... well maybe, maybe not. But one thing is sure, a series of tones (think of 1s and 0s in a computer) is much easier to copy, and you can tell your friends that you use a digital mode.

Okay, some of yous guys might not agree.... but just because YOU hipocrates can not fathom using a mode that has been in use for over 100 years, don't ruin our FUN!!!! If you just want to jab w/ SSB then stay in your own section of the band, or better yet, don't participate in the hobby. The hobby is not for just YOU! It is enriched with just as much culture as the USA and it should not be racist. Didn't that end with MLKJr.? or better yet, the Civil War.

In short :), if you don't like the way I (yes me) drive, stay off MY sidewalk!

Der K&#65533;nig des Welts, Hugo IV. :) and also KC2BMG and a CW operator. Yes, I
participated in WPX SSB, but my main event is WPX CW..... oh yeah, and
Field Day..... cya guys...

The information comes from Bruel & Kjaer, the audio test-gear
manufacturers. I don't know the mathematical basis, but I trust the
source. You may be right about the equivalence of sum and difference for
pure noise, but I'm not sure it applies if the probability distributions
of positive and negative excursions from the avalanche diodes are not
equal. In that case, I think there is sum difference.

George, you are a kook and a good example of why conservatives are always getting tarred and feathered. Why dont you spend your time on Free Republic? There you fit in a little bit better but you would probably think that most of the kooks there were commy Clinton suck ups.

Let's see, since we posting this stuff on rec.radio.shortwave...

My Drake SW8 was a Philco Tombstone in it's past life.

My Sony 7600G was a transistor AM back in the late 50's

My Sangean 818 was an 8-track player back in '73.

As for my Baygen, it was a detector back in 1915 !

No, I was simply pointing out that there amateur satellites that transmit one way communications, and guess what, they aren't illegal! Hmmm.... beacons, which we hams are familiar with operate as one way transmitters.

I'm not saying I'm happy with the Swatch situation, but I don't think we'll lose the 2 meter band over the situation either.

I'm sure I'll catch a few more flames over some of these statements, so fire away <grin>. At least I live somewhere I can state my opinions.

Welcome to the Auxiliary Communications Service Newsletter, developed by the ACS Training Unit of the State of California Governor's Office of Emergency Services. Please visit our ACS Home Page at http://acs.oes.ca.gov

The purpose of this weekly newsletter is to bring those of us in emergency communications closer together by sharing common ideas, and by introducing new technology into the emergency services community. All individuals with an interest in emergency communications, disaster preparedness or helping the community at large are encouraged to participate here in an open forum.

You will find a virtual community here, with representatives from many different organizations with the same common goal: emergency response. We encourage everyone, from whatever organization you represent (or just yourself!) to bring us your ideas, suggestions, concerns, manuals, handbooks, or opinions so that we may share them with the group. To those of you who have just joined us, welcome aboard!

>From the Editor's Desk:

The ACS Headquarters Training Unit is looking for a volunteer to serve as an ACS Plans/Programs Coordinator at the State level. This position involves developing plans, classes and training for the ACS program at the State level, assistance in the develo pment of the ACS Newsletter and EMCOMM Bulletin series. Most of the work required is conducted on the Internet and e-mail. Previous expwerience in emergency management and/or volunteer coordination is desirable. If you'd like to help, contact me at larton@garlic.com

Stay safe, everybody -- see you next week! Dave Larton, Editor
.....

Please Welcome:

Randy Long/WB6AVV <wb6avv@qsl.net>
Masonville, Colorado
Working as the emergency coordinator for ARES Colorado D-10. Covers Larimer, Weld and Jackson counties. Serving currently on the Larimer County Y2K steering and emergency response committees. Memeber of the Local Emergency Planning Committee (LEPC) for Northeastern Colorado.

Pete E. Cammarata, KF6BVK (CHP Victorville, alternate)
<cotton@snowline.net> Pinon Hills,CA

Rhonda L. Giuffrida/Emergency Management Assistant
addr=<RhondaG@co.oswego.ny.us> Fulton, New York
I have worked for the Emergency Management Office for 18 years. I have worked closely with our RACES group for Oswego County. They are very dedicated men and women. I highly respect and admire the job they do for us and the community. The group have always shared your bulletins with our office and I enjoy them very much and it keeps me up-to-date on their roles, interests, new technology, etc. Keep up the good work you do!

Ken McTaggart N6KM
<n6km@arrl.net or n6km@amsat.org> Sonoma CA
Unit Leader, Sonoma Valley ACS Unit, Sonoma County....interested in reviving packet operations on VHF and activating HF digital freqs for ACS/RACES ops.

Tom Gibson
<w3eag@worldnet.att.net> Plymouth Meeting, PA
I am a long time member of ARES/RACES and APCO. I chair the volunteer resources committee for APCO-International.

Chuck Heron / KD7BWG
<kd7bwg@futureone.com> Payson, Arizona
I am DEC for Gila County Arizona ARES. Net meets on Wednesdays at 2000 Hrs. Not too many members yet...but growing. We use a local hilltop repeater at 145.17 MHz. PL, 162.2

Also, I am a member of Gila County RACES. This net meets on Thursdays at 1900 Hrs. It uses the Gila County RACES repeater on Signal Peak near Globe, AZ. Frequency is 146.74 MHz, PL 162.2

Randy Miltier/K7RPM
<miltier@mind.net> Ashland, Oregon
Hi Dave, long time no see! Your page was forwarded to me by a friend. He and I are going to try and get some ARES activity going here locally. It looks like there's some good information here and we're looking forward to the challenge. Let's see if I remembered anything from my Bay Area days. I guess this stuff kind of stays in your blood. Hope you're doing well...Randy
.....

>From the Mailbag:

From: "Christensen, Paul " <Paul.Christensen@mkg.com>

Nice artical on digital video to internet... I'd like to have that capability also. I was wondering if it was necessary to limit access to the video or web site, and if so, what method was used.

Has any consideration been given to a sister publication that contains how-to and possibly simple projects (or summary and where to find). I guess ACS newsletter is a place for "I'd like to have A..." type statements so I say...

I'd like to have A... detailed understanding of what steps CAP went thru and what methods ended up working best for them, ideally detailed enough so that I could duplicate the process. The debugging of a system is often a bigger problem than designing it. I am also interested in hardware, tips and gadgets. I suspect many of us have some items in our communication baggages that would be of interest to others.

One of my favorite gadgets results from a belief in using 'primary' batteries (Alkaline/Lithium) in emergency work because of their long shelf life and because its not always practical to recharge. Even the HT I use on a daily basis uses a shell containing rechargables so I can change to Alkalines whenever I run low. I make whatever I can operate on D and AA cells as it seems most prepared agencies stockpile these and its practical for me to stockpile them as well. To that end, I have modified a number of MagLite flashlights to power my HT, RF amplifier, videocam and other equipment. I have tried a number of connector types and built a number of prototypes before deciding what my personal standard would be and how I would access the battery power. This has happened over a period of years, and there are not enough years between emergencies for each of us to discover better ways of doing things without help from the larger community... But then you knew that, ergo the ACS newsletter.

pc wa6til, Oceanside, San Diego County, Ca.
.....

Current Events:

FROM: Steve Onines, AC6FR

Hello Dave, I wanted to report to you about an emergency communications exercise that we held here in the North Bay area on March 20th. It was sponsored by the Emergency Radio Response System (ERRS) of the LDS or Mormon church. The area involved stretched from San Rafael to Santa Rosa. There were 16 wards (congregations) and about 70 ham radio operators involved, making it the largest exercise of it's type held here. Additionally, we had several local hams with extensive disaster experience participate and observe.

It began at 0900 with each person departing from home and traveling to their church building. There, they established an emergency operations center, complete with operating radio station. An emergency communications net was established on the KC6NEO repeater (147.285). We used a series of questions and

responses rather than a disaster scenario. With that many units on the net, we really had to have strong net control!

The net continued until 1100, when we began an "on the air" debriefing. Each unit was able to talk about lessons learned and problems encountered. Later, a more informal debrief was also held at the local pizza spot.

Was it worth it? Everyone involved certainly thought so. We learned, for example, that "Murphy" is alive and living in Northern California. Radios overheated and broke, batteries failed, coax had the "wrong" connectors; you name it and it happened. Our learning curve seemed to go straight up.

Most of us want to do it again and soon. It was well worth our time and effort. The lessons learned were important and valuable preparation for an actual emergency.

We would recommend an exercise like this to any organization that wants to be ready for a disaster. I would be happy to provide copies of the operations order and scenario to any interested party that wants to hold a similar program.

Steve Onines AC6FR Santa Rosa Region, Assistant Emergency Communications Coordinator 114 Veronda Ave. Cotati, CA 94931 707 664-8199 <onines@jps.net> P.S. Dave, the ERRS replaced the MARA organization in the LDS Church.

REACT '99 CONVENTION INFORMATION

To all REACT members, by now all teams should have received a registration form and an information letter from the Nebraska '99 convention committee. (This information will also be in the next issue of the REACTER) The convention committee decided to mail these forms out to all teams (mailing list obtained through REACT International) due to the timeliness of the REACTER.

We would appreciate it if those who subscribe to this list would check to see if their teams have received the form and letter. Please xerox the registration form and pass it out to each of your team members if possible.

Concerns have been raised on some issues so we will pass along as much information as we can.

Travel info: Airline flights into and out of Grand Island are through commuter, UNITED EXPRESS. Your travel agents should be able to obtain this information and help you make arrangements. (Most major airlines will also have this information). There are two major cities to choose from when flying into and out of Nebraska; LINCOLN and OMAHA. Arrangements have been made to pick up (and bring back) every REACT member and shuttle them to Grand Island, unless you decide to rent a car and drive to Grand

Island, from either Lincoln or Omaha airports. This information will be obtained from your returned registration form.

Motel: The rates obtained were the best we could get. Considering the rates from previous conventions, (I'm sure these were the best they could get also) we felt pleased with the rates. These rates apply to up to 4 people in a room. Divided out this comes to about $13.00 or $14.00 per person. For those who attended the '98 convention in Janesville, this motel does give you a complimentary breakfast (and not just rolls) and they have an indoor swimming pool and hot tub.

Please feel free to e-mail either of us if you have any other further concerns or questions. Thanks,
Julie Brendle
(JBrendle@navix.net)
Jenny Jacobson (jj11851@navix.net)

This week's EMCOMM Bulletin:

EMC178 Attitude Makes the Difference 1/2
To: Emergency Communications Units - Information Bulletin
To: Emergency Management Agencies via Internet and Radio
By: Auxiliary Communications Service (ACS) of the
California Governor's Office of Emergency Services

EMC178 Attitude Makes the Difference 1/2 For release 4/5/99

We thank those who send us their newsletters as it provides an enlightening panorama of people helping people. It certainly makes for interesting reading and offers many ideas and assists.

There are many ways that those with communications skills are serving their communities. This series is about one such unit.

A newsletter that came was from a unit celebrating 20 years of service. Congratulatory letters included the President of the United States, the Commander of the Los Angeles California Highway Patrol Communications Center, radio stations KFI/ KOST/KACE radio Traffic Center and the Airwatch Team.

Their "volunteer communications service serves in many ways, depending on the requirement: parking and crowd control, directions and information, VIP shadowing, first aid, radio contact with police, fire, ambulance, FAA, coordination between different radio systems, gate and perimeter security, vehicle or foot patrol, lost and found, observation/reporting of traffic conditions, reporting scores of competitive events, and short range TV coverage."

In their 20 years of service they discovered an essential principle: "Attitude makes the difference."

So let's take at look at the largest REACT unit in the United States, Crest REACT #4252, California.

"In l978, in the middle of the CB radio craze the unit started when a few men and women got together to form a team of volunteers to monitor CB Channel 9 emergency channel."

They "began with 20 people and became known as the Corona-Norco REACT Team. A major freeway corridor they traveled became a chain of communicators. Every half hour or so someone from one of three communities (Riverside, Norco or Corona) would be leaving the house enroute to work with the CB on. Reports were relayed back to those following as to what roads were jammed, what lane the accident was in, etc.

Than along came GMRS and a whole new jargon to learn: repeater, tone, input, dip switch. Many obtained a GMRS license for personal and team use. At the time ham radio was not really popular in the REACT organization." (Later that changed).

Soon it was determined they "needed a repeater and they applied for a grant and were awarded $3500" which went to put a repeater in the San Bernardino Mountains.

Like other units, that team was not excused from the ups and downs of the time regarding membership. At about the time that the CB craze was diminishing, and the team was trying to survive, there was a Repeater Users Group formed to serve Southern and Central California, portions of Arizona and Nevada. Not long after there were 20 repeaters in the GMRS system from San Diego to north of Bakersfield and Fresno."

Continues, Please see EMC179 next week.

To subscribe to bulletins, use the Subscription Services web page at <http://acs.oes.ca.gov/subscribe.html>. If you don't have web access, just send an e-mail message to <mailto:emcomm-bulletin-sub@harthaven.com>.

- For training assistance contact the ACS Training Officer at the web site or send an email to larton@garlic.com
- Submit suggestions, topics or comments on the bulletins to cary.mangum@macnexus.org or cary_mangum@oes.ca.gov

Bulletins are on the ACS Web page: http://acs.oes.ca.gov -and a Landline BBS: 916-262-0856 (graphical & standard interface); and a FTP Archive: ftp.ucsd.edu/hamradio/packet/tcpip/incoming for some bulletins. For earlier ones: ftp.ucsd.edu/hamradio/races

.....

Please let others in the emergency services field know of the newsletter, and encourage them to join... If you have opinions, suggestions or written material that you'd like to share with the group, let us know. We're always looking for new ideas and suggestions that will benefit everyone.

See you next week!

378. Swatch sattelite

Newsgroup: rec.radio.amateur.misc
Date: 1999-04-06 00:00:00 UTC
From: barryo@fastlink.com.au
Message-ID: <7ec030$140$1@nnrp1.dejanews.com>
Source record: 146397

At least one message on the Swatch website www.swatch.com has suggested
that amateurs deliberatly transmit on the satellite frequency so that
interested listeners will be denied the fun of hearing the Swatch
sattelite. If I am unable to hear the sattelite due to amateur radio
interferance I will be most annoyed.

Instead of encouraging immature amateurs from posting silly messages
to the website you should be encouraging people to post useful information
on how and when to hear the satelitte. In this case the FCC has no
authority so why not go with the flow? It's not as if the whole band
is going to be rendered useless by this fun project.

I just hope that Swatch don't consider a boycott by a few radio amateurs
to be anything to worry about.

I would like to know what sort of setup I need to hear the sattelite and
what specific frequency and mode I need to listen on.

Enjoy.
Barry

379. FCC Revision of Scanner Rules... Enforced by Unterstormfuhrer Hollingsworth

Newsgroup: rec.radio.amateur.misc
Date: 1999-04-06 00:00:00 UTC
From: mf_luder@my-dejanews.com
Message-ID: <7ec065$14d$1@nnrp1.dejanews.com>
Source record: 146398
Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur.misc,alt.fan.art-bell

All these Clintonian fascist rules because scrambling would cost money. Talk about your paranoid conspiracy theorists- they all found jobs in the cell phone industry. If they can't get Milosevic for war crimes, try FCC violations, Hollingsworthless....

22. We modify section 15.121 to clearly prohibit the modification of scanning receivers to receive Cellular Service transmissions, regardless of the date of manufacture or number of units modified. The Commission's rules specify that any modification of a scanning receiver that changes its operating characteristics voids the equipment certification. We find that modifying a scanning receiver to receive Cellular Service signals changes its operating characteristics, invalidates the equipment certification, and results in equipment that does not comply with the Commission's rules...

I'll call Unterstormfuhrer Hollingsworthless and turn myself in right away.......

I know very well about the Fusion...though that's not quite the same thing
as a diamond monster. Actualy, it's a pathetic excuse from 3DFX to immitate
NVIDIA. It shows how little you know to be reccomending that over one of
the TNT cards. You should realize, being a reseller and all, that very few
ppl bought into the diamond cards.

Oh yeah, and while we're trying to make people look STUPID...why not check
the price of the Diamond Monster Fusion you have listed on your
(ahemCRAPPYahem) web page. It certainly is *NOT* listed for $125.
Jeesh...some people thing just because they can use frontpage they're
qualified to run a web business.

Hi John,

That last statement, about the difference of two noise sources being
better than either source alone, could you elaborate on that a little?
I mean, in the case of noise, what's the difference between the
difference and the sum, if you get my drift?

> Ed WB6SAT

Ed WB6SAT:

You are generally quite right. But....

WD-40 is cheap, and the lighter, more aromatic components of it, when pressure blown onto a contact, will do a pretty credible job of cleaning oils, dust, cigarette tars and mouse piss. And most of the WD-40 will evaporate. But yes, there is an oily residue that remains. And this residue will hold airborne contaminants very well. So, the WD-40 does a good clean-up quickly, but it leaves a residue that actually accelerates future contamination.

Now, if we're talking cleaning a switch contact, we not only want to wash away the gunk, but we want to remove the metal surface oxidation and sulfides. The metal chosen for contacts are a compromise between conductivity, melting point, hardness, and oxide formation. Ideally, you would like a contact that deforms slightly, to make a wiping action when it makes and breaks, thus breaking surface oxide skins. You would also look for a metal with a soft and relatively conductive oxides. So tin is better than aluminum.

If you want to truly clean a contact, you need to either chemically etch the contact, or mechanically abrade it. And once it's clean, then you want to slather on some compound that keeps the contact wetted (submerged in a protective goop) to prevent contact with the oxygen in the air.

Most home jobs aren't critical enough to go the full contact renewal route. I usually wash with WD-40, then wash with rubbing alcohol (and remember, this also leaves an oil film). If I have to burnish the terminal, I'll wash it again with the rubbing alcohol, and follow up with a small squirt of isopropyl alcohol (no oil).

No isopropyl? Wet a cotton swab with high proof vodka.

Don,

Look at the specs he gave. The 823 to 849 is the cell phone transmit.
They are missing. The 868 to 894 are the cell tower transmit. They are
missing. This scanner cannot recieve cell frequencies. Do not buy it

thinking that you can modify it because you can't. You could use a down converter however. It is still a very good 200 channel scanner. I have had 2 of them and the price is very good. If you really want cellular buy a cell capable scanner to begin with.
Good Luck
Rick

Hi, all!

I want to attend your attention to my programs:

UA9OSV CwType - My terminal program to transmit morse code
(Windows95).
It allows to send CW both from the keyboard and from the paddle
connected to the joystic interface(or any other
hardware port). At sending from the paddle it supports yambic mode,
memory of an element of a char... It is able
to co-operate with AAlog logger.

UA9OSV CwGet - My program to receive morse code via sound card
(Windows 95).
The sound card should be able to work in a "mono-16bit-10025Hz" mode.
Program was tested with the IBM K6-233
processor. It is very interesting to me to learn about running of this
program on weaker computers.

http://ua9osv.virtualave.net

Check the article in QST/April page 33. You should also seek the instruction
of a friend followed by practice. Soldering is almost art.

You don't need a D/A. You do need a shift register shifting at faster
than 70MHz, which is possible in the faster flavours of TTL. I'd use
ECL but then I take any chance I get to use ECL ....

PLC, e.g. the planned use of domestic power lines to carry high speed digital data, is the latest of a series of threats to HF amateur radio communications.

The spectrum that will be re-radiated from the unscreaned power lines will extend from near DC up to about 30 MHz.

Considering the above, DTC has addressed all institutions and HF band users aiming to prevent the HF bands to become useless in any domestic environment.

I think John means the noise is more symmetric in amplitude
distribution. The negative peaks look like the
positive peaks. Its not whiter, but it is probably
more Guassian.

Opinions expressed herein are my own and may not represent those of my employer.

I agree. This is a bullet proof receiver - triple conversion -- very
good sensitivity, especially 800 Mhz. Used one as a remote receiver
for a repeater in a high intermod area, and the receiver was seldom
impacted by all the RF. Not bad for a radio shack handheld scanner!

Rochester Minnesota Hamfest
and Electronics Show

The Rochester Hamfest will be held on Saturday, April 10, 1999. The
Hamfest is an annual computer and electronics show event sponsored by
the Rochester Amateur Radio Club, Inc. located in Rochester, Minnesota.

Our 22nd RARC Hamfest
Event!

When: Saturday, April 10, 1999.
Where: Graham Arena East on the Olmsted
County Fairgrounds
Time: Doors open for public at 8:00 a.m.
Ham radio, electronics and computer dealers
Commercial vendor and flea market table space

Hourly door prize drawings
VEC testing on the same day as the hamfest
Free parking available around the site on the
fairgrounds
Food service in the building and immediate
vicinity

THE USE OF CLUSTER BOMBS TYPE BLU/AB

source - http://www.gov.yu/

Along with the most diverse and latest destructive weaponry used in air to ground operations, NATO forces
have been using cluster bombs as well. I have here a sample, rather the remains of a bomb that our experts
have neutralized. You won't be able to see the triggering charge and the explosive content for safety reasons.

This is an American made BLU/97 AB cluster bomb. Each plane can carry two containers with 210 individual
bombs each. This means that in a single passing an area some 100-150 meters wide and about 1000 meters
long is showered with 420 single bombs.

The cluster bomb is primarily intended for attacks on unsheltered troops, on columns of vehicles and other
technical devices, as well as buildings.

The destructive effect of the bomb has on troops, is primarily due to the explosion of the metal jacket with a
range of about 150 meters. The Shattered shrapnel are large enough and have sufficient energy to pierce an
armored plate 6.4 mm thick at a distance up to 11 meters, and to disable vehicles at a distance of up to 75
meters. At the site of impact, both cumulative and piercing effects take place. An interesting accompanying
effect is the presence of a fireball 16 meters wide produced with a special inflammable mixture of zirconium
and cycloton.

The use of this type of weaponry indicates without any doubt that the aggressor intends to inflict large
casualties. They are quite imprecise and it is not possible to control their drop site. According to reports from
the localities targeted until now the most vulnerable are civilians. Injuries caused by these bombs are multiple:
mutilation due to fragmented action and burns which make medical treatment more complex and provoke
permanent disability. Until now they have been used on various localities most of which were not military
targets.

Essentially it is is a highly inhuman weapon intended for mass
destruction and casualties. This is particularly
aggravated by the fact that some 20-30% of the bombs dropped remain in
the targeted area for deliberate
delayed action making the civilian population particularly vulnerable.

I removed this from antennas, it really doesn't belong there so I hope you don't mind.

First let me say, you can't possibly offend me, and I'll try to respond in a more humble fashion if it
will help to show more clearly my opinion on the matter. This is getting quite large so it's edited.

> >DUH, who said it was unlicenced?
>
> Who said that it was? OK then, "little guy", what is the CALLSIGN of
> the operation ??

So we'll agree that neither of us know for sure whether it's licensed or unlicensed operation. Since it wouldn't require much effort at ALL to have an amateur tack his call onto the 10 minute ID timer, lets assume it will have a valid callsign for the purpose of our discussion. If it didn't have an amateur call their wouldn't be much left to discuss and I would concur that it would be in violation.

> > No commercial advertising in the amateur bands.
>
> >DUH, Where has Swatch indicated that there would be advertising on the amateur
> >bands? They have only indicated that messages would be transmitted, they even
> >suggest greetings to friends and relatives.
>
> By unlicensed operators with no control operator in violation of
> International law.

No control operator is necessary, since it's being operated as a beacon. The same as the last RS-18 or Dove-17 or any other satellite that is transmitting as a beacon and transmitting one way.

 97.203 Beacon station.
(a) Any amateur station licensed to a holder of a Technician, General, Advanced or
Amateur Extra Class operator
license may be a beacon. A holder of a Technician, General, Advanced or Amateur Extra
Class operator license
may be the control operator of a beacon, subject to the privileges of the class of
operator license held.
(b) A beacon must not concurrently transmit on more than 1 channel in the same amateur
service frequency band,
from the same station location.
(c) The transmitter power of a beacon must not exceed 100 W.
(d) A beacon may be automatically controlled while it is transmitting on the
28.20 28.30 MHz, 50.06 50.08 MHz,
144.275 144.300 MHz, 222.05 222.06 MHz or 432.300 432.400 MHz segments, or on the

33 cm and shorter wavelength bands.
(g) A beacon may transmit one-way communications.

Key points, automatically controlled means no control op present at the transmitting site.
A beacon may transmit one-way communications.

If I put a beacon on the air with my sons voice that says "Hello From Detroit Michigan" he is a 3rd party, is not a control op, and is unlicensed. As long as the beacon i.d's with my call sign the station is perfectly legal.

> >and unless you've been having conversations with AMSAT-R you can't possibly

> >transmissions so that leaves you with a page full of nothing.
>
> Of course, the President of Amsat France is apolgizing for a page full
> of nothing.

I don't doubt the President of AMSAT is appologizing, I only question whether Swatch's proposed operation is going
to be legal or not. There is no doubt that AMSAT-F felt as though they had been duped, but their apology doesn't effect one way or the other whether the transmissions would be legal or not.

> Your immature, combative attitude reveals just how unsure you are
> about the whole thing!

Ok so I post to the newsgroups some thoughts on what may or may not be legal about this project and all of a sudden I'm immature? Heh heh, go read the comments sent to Swatch.

> >apply.
>
> But of course you are ASSUMING this to be the case, even though they
> have plainly stated their intention to have their trademark named
> verbally & audibly in every message!

Yes I am assuming this, I suppose I like to give someone the benefit of the doubt instead of thrashing their web site with hateful, threatening e-mail. Even if they did pull it off, the time to protest is after the operation, do it formally with

information about what was said, callsigns used or lack there of etc. Since no one knows for sure exactly what arrangements Swatch had made I think it's ridiculous to nail them to the cross without having any details.

If at the end of each transmission I decide to say "and boy do I love Pepsi" while it might be a bit strange it is not illegal,
if my son who is unlicensed and a 3rd party decides to say "boy do I love Pepsi" at the end of each transmission it is not illegal.
If it is, please site the violation number so I can better understand.

> Non-commercil? FEH!!

>
> Ha! In your not-so-humble opinion maybe.
>
> But Tim, YOUR OPINION to the contrary will not invalidate
> international laws!

Well O.K. to hell with my opinion, site the law that prohibits me from calling my station anything I want, as long as the appropriate call sign is used. e.g. "From ARRL Headquarters, Newington, CT" hammy now did the FCC assign the callsign W1AW or did the assign the call "ARRL Headquarters". Now if you want to tell me that it's illegal for the Swatch Satellite to identify itself as "Beatnik" along with an amateur call then I guess we'll have to put a stop to the ARRL's illegal station I.D as well.

> Most countries do NOT allow a product name to be NAMED OVER THE AIR on
> the amateur bands, including all European countries.

I have no knowledge of this, could you name some of the countries where this law exists?

> You are defending something like your life depends on it and you don't
> have a CLUE what you are talking about!

Whoa hold on there pahhhd ner, I'm not defending anyone, I'm just interested in knowing whether Swatch was indeed going to break the law or not. As far as having a clue, you need to get one with respect to international 3rd party traffic.

> ?
> (2) It is absolutely forbidden for amateur stations to be used for
> transmitting international communications on behalf of thrid parties.
> PERIOD!

Well according to you perhaps but the FCC, and the government who issued my license tells me otherwise, I'll bet if you take a second look at the ITU reg your quoting you'll find the exceptions. By the way the ARRL has a web page which shows a list of all the countries we have third party traffic agreements with, you are full of it.
http://www.arrl.org/field/regulations/io/3rdparty.html

? 97.115 Third party communications.
(a) An amateur station may transmit messages for a third party to:

(1) Any station within the jurisdiction of the United States.
(2) Any station within the jurisdiction of any foreign government whose administration has made arrangements with the United States to allow amateur stations to be used for transmitting international communications on behalf of third parties. No station shall transmit messages for a third party to any station within the jurisdiction of any foreign government whose admin-istration has not made such an ar-rangement.

> >> U.S. Amateur Regulations
> >> (This rule also appears in most nation's individual laws concerning
> >> Amateur Radio)

> >> 97.113 (a) No amateur station shall transmit any communication the
> >> purpose of which is to facilitate the business or commercial affairs
> >> of any party.....
>
> And that IS the whole point of this exercise.

Newp, sorry no business is being conducted, the ole agument was won long ago, yes Virginia you can order a pizza using the 2m autopatch, and when the Pizza shop picks up the phone and says "Pizza Magic" it is not a violation and that has been written about in QST. Now if the Pizza shop get's on the air from thier shop and says "Come on down to Pizza Magic, we have a special tonight" were talking about a different senario, simply using a trademark name on the air does not hold up. All this of course depends on the content of the messages and whether an amateur call is used on the satellite.

> >Transmitting messages from individuals saying hello to friends and relatives is

> >> form of broadcasting...
>
> And there it is again! They break ALL these rules and TIm says it is
> OK! Ah well, Tim. ANything goes, and it WILL if you get your way in
> this one!

No not quite, you seem to be drifting again. Because I question the interpretation of a particular regulation you seem to feel as though I have an "anything goes" attitude and your very very wrong, for one I'm not trying to "get my way" I don't support the

commercial use of the amateur bands either, all I'm saying is that before we publicly
hang the Swatch company we should:
A) Know whether the transmission will be identified with an amateur call
B) Know the content of the messages being sent

Well how is it irrelevant? Since you claim it is illegal to transmit third party
international traffic "period" I wonder why AMSAT-F would have allowed this?

> >> Would you do business with a corporation that knowingly and outrageous

> >So far you haven't shown that they intend to break any.
>
> Bollocks! Pure bollocks Tim, and if you had half a brain (even one
> tied behind your back) that still wouldn't make this fair for you!

Again, since AMSAT-F doesn't seem to want to share exactly what these messages are,
and since neither of us know whether an amateur call will be used should we just
assume it's illegal without having any details? Also you make comments like
"knowingly" promotes violations of international law, really? You know for a fact that
the Swatch company is doing this knowing they could be in violation and not a simply
misunderstanding of radio regulations? You must be clairvoyant as well.

> >> If it is such an innocent and LEGAL thing for Swatch to break the

> selling out of Amateur Radio that you are helping to promote.

Instead of accusing me of selling out amateur radio why not respond to the proposed scenario, If a third party makes a comment on the Goodyear* Amateur Repeater and says "I love Goodyear Tires" is this in violation? Even though the club may have paid for all the equipment privatly, if it's on the campus or even off site, but Goodyear pays for the room the club is in then they in essence are sponsoring the club. Soooo now we have a Corporation, sponsoring a club repeater, with a third party traffic making a comment about the Goodyear company. Do you think this is in violation? Simple question, nothing to do with Almighty dollars or selling out ham radio.

> >* for example only, it's a fine club.
>
> Correct. In most countries that is a violation of the law, for which
> they would be prosecuted. Again, you want to force American values (or
> lack thereof) on other countries.

Really? Most countries? Please name a few for me that would prosecute a radio amateur for mentioning a brand name on the air, I'm dying to see the list. I haven't worked a DX station yet that hasn't mentioned the brand name of his station equipment, sheesh talk about absurd drivel, where are you getting this from?

>
> Well, this is done insensitively in many other spheres of life,
> especially in Asia, so I am not surprised to see someone advocate it
> in the arena of Amateur Radio too. You think you own the planet, but
> you don't!

You know, I enjoy discussing the topic of whether the Swatch satellite project violates ITU radio regs but your comments are beginning to annoy me, where in my commentary do I bring you to the conclusion that I think I own the planet? Let's stick to the discussion if you can.

> >> Thus we suggest that no AMSAT organization should describe the
> >> contents of the message or encourage listening to this non amateur
> >> compliant satellite using our amateur band.
> >
> >Why do we not want anyone to know the contents of the messages?
>
> Do we have to wear oit out to drum the reasoning into you Tim?
> No, I suspect you are too dense to ever get it.

O.k lemme spell it out for you, AMSAT-F claims the messages they heard were unacceptable, really? OK why not share them with the rest of the amateur community, of course I'm not making any decisions on what's going to happen with the satellite but I'd rather be permitted to make up my own mind whether the messages are unaceptable or not. I suppose if AMSAT-F says it's no good that's just fine with you, but not for me.

> Ha ha ha ha ha! Yeah, TIm! S-U-R-E! Tim, yeah, THAT is the crux!
> What a dimwit comment!

Dimwit comment? Your whole argument has been that these messages are of a commercial nature, how would you know whether or not they are unless they were published or made available, tell me what about that is so dimwit please? Like many you seem to be good with the name calling but come up short when asked to site references.

> Your time will come I expect. Hollingsworth may be looking for you
> already for all we know.

My time will come for what? Because I decide to engage in a discussion about whether the Swatch satellite project is legal or not my time will come? Why would Hollingsworth be looking for me? Talk about dimwitted remarks.

> Apparently, if it's illegal, Tim is for it!

Apparently you have difficulty understanding the discussion, I never once said I was in support of Swatch at all, show me in a previous post where I did and I'll eat my words. I simply had a difference of opinion, regarding issues like whether or not it was a beacon transmitter and whether the content was in violation of amateur regulations.

> You really should go do something else. This is obviously not even
> beginning to dawn on you yet!

Look here's the bottom line , you seem to be more interested in attacking me personally that you do discussing the issue. This whole thing was handled completly wrong which is why I even got started in this discussion, someone finds a web page where Swatch is planning to transmit messages from a satellite launched from space, now instead of organizing ourselves and having AMSAT-NA or the ARRL or any other organization of your choice contact Swatch and ask what their specific intentions are, a few individuals jump the gun and post the address with instructions to tell Swatch how you feel!

Well, they sure did, go read the pages. Nothing but hatefull threatening letters. What might we have gained by approaching Swatch when AMSAT-F learned what had happened? Explaining that they could potentially be in violation of ITU regulations and that the world wide ham community would strongly oppose this. Perhaps offer a win win solution

where Swatch would provide links or a page containing ham radio informaton and we as an amateur community would help promote Swatch (off the air) in exhange for messages of amateur content on the satellite. But noooo were gonna jump right in and tell Swatch how were gonna f*** em and boycott their products, all this to a company who may simply not have known specifics of the frequency of choice. Now take a look at the AMSAT page and take note where they talk about how big of an endeavor Phase III is going to be and how they really need some money now. Har har, yea go hit up Swatch for a contribution, they should be real excited about working with the amateur community by now. Under the heading "Donations" go to:
http://www.amsat.org/amsat/amsat-na/orginfo.html
Swatch may have indeed been contacted by AMSAT, but if they were nothing was made public and the first comment's from AMSAT-F were to boycott Swatch.

I was planning on using this device with my Pro 2006 scanner. I have the "FM Discriminator" mod completed and was wondering if I could plug that into the Hamcomm HCD214 interface? The hook-up instructions I saw at the web page (www.radioamateur.com) said it could be plugged into the speaker jack for it to work. But, I have read here and in other newsgroups and web pages, that you have to use the "FM Discriminator" to be able to properly decode the signals. Please post or email your replies and any advice/help is greatly appreciated!!

418. Deeply Distrubed Jammers - K5BLB, WA9KJI, WB0CXJ, KK7HO

Newsgroup: rec.radio.amateur.misc
Date: 1999-04-07 00:00:00 UTC
From: "3.950 Monitor" <3950mon@aol.com>
Message-ID: <370BBA48.15F3BF34@aol.com>
Source record: 146224
Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur.misc,rec.radio.shortwave

The above listed jammers continue their feeble attempt at spinning, their law breaking
activities on 3.950, shortwave amateur radio.

Their goal is to disrupt the legal and public communications of other law abiding
amateur radio operators. The reason that these 'opponents of free speech' jam 3950,
is because they disagree with some of the views expressed on this frequency.

Some of the jammers (K5BLB and KK7HO) are so full of hatred that they have
openly discussed killing other amateur radio operators on this frequency. The
danger is that as these criminals get more and more angry, and violent because
of their extreme beliefs, someone will likely get killed or maimed.

I only wish that the FCC and Mr. Hollingsworth would put an end to their activities
before we are reading about 'silent keys' in the ARRL magazine, which should have
been prevented.

OK, thanks. Same questions for 2-meters then:
Any schedule or gentleman's-agreement-bandplan for Technician
code-practice? Any homebrew 2-meter (QRP or not) CW transmitter plans?

> you have the entire alphabet memorized. I found this very helpful.

My problem with the W1AW practice is that the text isn't much like what people actually send on the air, and certainly not like a QSO or an FCC test. In fact I have trouble finding examples that are really similar to the test. The MFJ 418 is good because it has QSO practice (with enough randomness that you can't memorize everything), but a few things aren't like the test. It never uses some of the prosigns that are on the test (AR, slant, etc) and it repeats callsigns, names, etc. Of course I can just discipline myself not to take advantage of the repeated parts. My suggestion to MFJ would be to "teach to the test"-- make their practices include everything that's tested.

432. Coin with Morse code

Newsgroup: rec.radio.amateur.misc
Date: 1999-04-07 00:00:00 UTC
From: brewsterc@excite.com
Message-ID: <brewsterc-0704991813460001@pm6-202.msp.infi.net>
Source record: 146238
Cross-posted to: rec.radio.amateur.misc,rec.collecting.coins

A Canadian friend of mine who collects coins sent me a 1944 Canadian "nickel" that has a message in Morse around the edge. Its says "We win when we work willingly." (Looks like a W exercise for code practice.) The code is a bit strangely spaced and some of the detail is obscured on mine. The number of cents is represented by the roman numeral V to double as the victory kind of V. The coin I have is what we used to call a "steely" and it comes complete with certified-genuine WWII-era rust.

If you find one of these, the message starts at the bottom. You'll need a good magnifier and something to hold the coin.

Maybe the coin collectors can tell me more about this coin-- what years was it made? Were they all steel?

Request: If you respond to this posting, please send me a copy. My net access is intermittent. Many thanks...

First off, anyone with a HOTMAIL account has no right to protest spam, commercialism, or violation of our rights. HOTMAIL is the biggest spam factory alive. AND

Jamming the project in any form is arrogant, and far more unethical and counter productive than the "perceived" intrusion into the space that a few amateurs seem to think they own personally.
The same bigoted attitude of the CB world has moved to space. The sputnik replica may bring a number of new people into the hobby. The threats against it are degrading to everyone associated with amateur radio. They make us all look very bad. Of course Musat and the other Sputnik replicas were not spam, uh, right? How much has amsat France paid to launch "their" satellite?
Get your facts straight before making threats.
See ya on down the road jack_ _ _ _'s

CROSS BAND REPEATER
1) Turn on Radio
2) Lock the keyboard (look in owners manual on how to do this)
3) Turn off Radio
4) Press and hold [SQL] & [MAIN] & [BAND] & turn the power on

To stop cross band repeat
1) Turn off radio
2) Unlock keyboard

442. Re: A no-code license should be two year, non-renewable.

Newsgroup: rec.radio.amateur.misc

Although I have now passed my 5 wpm code, I was a no-code technician for 8+ years, right after it became available. I have now passed my general written test TWICE, only to still fail at 13 wpm. I must take exception to the person who originally wrote this post (and was too chicken to put his REAL name in) and the second follow up, who also didn't leave a name. I and many others served our communities well with our no-code licenses. I did and still do volunteer with the Office of Emergency Services, the American Red Cross Disaster Relief Services division, as well as functioning as a trained severe weather spotter. I have been as asset to my community, as a reliable communications resource in emergencies. (and I have worked MANY), remember all the tornadoes in March 1997, and 20-30 + so far this year. Unlike you, I do not sit around moaning that the hobby is not what I want it to be, I get out and make it what I want it to be. Sure, I would like to see code done way with, or at least the maximum requirement dropped to either 5 or 13 wpm, but I don't sit around whining about it like many of you who want code mandatory do. There are bad hams who are no-code techs, and there are just as many Extras who are filthy both in person and on the air as well in their language and many are just plain terrible operators in general. Passing morse code does not automatically make one a saint. (Sorry to burst your bubble there, but deny it all you want, it HAS been burst, as you all know this is the truth.)

You can go on believing you are right and I am wrong, but you will fade away and crumble to dust, just like CW, while the rest of us continue to improve and expand our hobby and get on with our lives.

Signed,
Matt Nelson

And so was Jesus Christ. This brings us back to the
root causes of Waco: a deep and bitter hatred of
Christians on the part of those CIA MK-ULTRA operators
who made up the Cult Awareness Network who were the
only advisors to the FBI at Waco. Satanist and Marxist
just cannot stand Christians.

Returning to the original point of this thread at:
http://www.atlcom.net/~geozim/index.htm

FCC JAMS HAMS,
the FCC is a criminal faction of a criminal executive branch,
engaged in a criminal coverup which is further protected by
a criminal Justice Department, also a party to the crime.

The FCC knowingly, intentional, deliberately, willfully and
purposefully supplied radio jamming equipment to the FBI and,
with reasonable assumption, to the US Air Force for the
purpose of jamming AM and FM radio broadcasters, TV
broadcasters and the Amateur Radio Service. The amateur
station jammed was defined as a Title 47, Code of Federal
Regulations, Part 97.405 Station in Distress, relaying
emergency communications critical to safety of human life.
As a result, appoximately 100 people died.

FCC is also a deliberate violator of the Freedom of
Information Act, using an exemption of documents not
allowed under the list of exempted documents types.
Whereas, I have not posted details on this to the
website yet, you can read the 36 descriptions of
FOIA requested documents in the FOIA Administrative
Appeal letter. All of these are denied on the basis
that I have figured out what the nature and content
of the documents are, and the FCC does not want to
verify my logical, analytical and deductive work
that has narrowed down the documents almost to the
point of writting them myself. Actually, I already
have two of the documents, and stand ready to
publish them, as soon as I can arrange to leave the□

country, and post them from a safe place.

Neither last nor least, but in closing on FCC criminality,
FCC is a criminal co-conspirator with FBI to classify
documents pertaining to the criminal operations of the
FCC and FBI. Such classification of documents for the
purpose of avoiding criminal prosecution is specifically
described as a criminal violation in any Executive Order
pertaining to such classification at the time of
classification.

Get the FCC out of the control business, contact your☐
Congressman, ask that he support Henry Hyde of the House
Judiciary Committee to convene a hearing into the
criminal coverup by FCC Chairman Kennard of the
criminal operations of the FCC and FBI and US Air
Force engaged in Communications Act violations.

Get the American Radio Relay League out of its
tyrannical misrepresentation of the amateur community.
Publish the fact that the ARRL board voted not to
reveal the criminal operations of the FCC and FBI.
What decent person would be a member of such
a criminal organization. If you are in the ARRL,
moral integrity demands you quit.

O. I C.

It's necessary to rid the world of AIDS too. Is NCI (TM) doing
anything along those lines ?

Has NCI (TM) lodged any formal protests with the government
in Yugoslavia about the problems over there ?

Personally, I would think you jumped on the band wagon for
a little P.R. but that's only my opinion. Anyway, maybe you
you can get Cedric to sign up.

Keep up the good work. What amateur radio needs are
organizations like NCI (TM) to save us from disposable hand
launched Russian space junk. Thousands of lives will be
saved if you can stop the Russians from beaconing 1 watt
voice messages for 30 days.......

Hi Chris,

The Torch & V design was started in 1943 to promote the war effort. 24 million coins were made in 1943 of an alloy called tombac (88% copper, 12% zinc). In 1944 and 1945, about 29 million more were made in steel (nickel and chromium plated). Apparently the plating was applied to the strips of sheet metal and then the blanks were punched out, so while the fields of the coin are well protected, the edges rust easily. A lot like the 1 and 2 pfennig coins of Germany (copper plated steel strips, coins punched from that).

Anyway, you're exactly right about the morse code message. Most coin shops should have one or two of these for sale in excellent condition for about $1 US.

Christopher Brewster wrote:

Some additional notes:
The V design was engraved by hand directly onto the master
die.

A batch of the chrome-nickel-steel planchets were produced
sans chrome. These look like ordinary nickel 5 cent pieces.

Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.misc,sci.electronics.misc,sci.electronics.equipment

I picked up a Motorola Speaker Mic, part no. NMN6128C, at a recent hamfest. I need the pin-out for this mic. As I received it, the mic has a "modular" type connector, that appears it would mate with its intended HT by sliding/snapping into place. There are five insulated wires, and one bare stranded wire (ground?). I want to use the mic with my Yaesu FT-50 HT. Any idea where I can find the correct pin-out information?

Motorola's web site is vast and unfriendly to retail customers. I searched in vain for an hour, and don't expect a reply to my email to them until maybe October (of 2003). Thanks for reading, and tres-thanks for replying.

> pure noise, but I'm not sure it applies if the probability distributions
> of positive and negative excursions from the avalanche diodes are not
> equal. In that case, I think there is sum difference.

I just tried a quick'n'dirty test in Matlab,

```
x1=randn(10000,1); %make 10000 random (normal dist.) numbers
x2=randn(10000,1);

y1=(sign(x1).*(1.00001.^x1-1)); % a hack to make it asymmetric
y1=y1-mean(y1); % make sure theres no DC

y2=(sign(x2).*(1.00001.^x2-1));
y2=y2-mean(y2);

plot(y1+y2,'*');
figure
plot(y1-y2,'*');
```

The difference was very clear, y1+y2 is asymmetric around 0, just as y1
and y2 alone,
but y1-y2 is symmetric.

I first thought that, too. The fact, that this story started March
20th, makes it unlikely, that this is an April fool.
BTW: poisson != poison. Poisson means fish. "Poisson Avril" is an old
tradition in France. On April 1st You attach paper fish on the back of
people (preferrably in a way, that they won't notice).
>
> Maybe that is French for April Fool!
>

Exactly.

> AMSAT-R apologizes for any trouble witch was brought to amateur
> satellite community and hope that amateurs in the entire world will
> understand this situation and separate AMSAT-R and SCSC. AMSAT-R will
> stop any attempt from SCSC to use AMSAT-R in commercial projects.

If this is true, AMSAT was cheated by SCSC. I do not wonder that, at
the moment Russian companies try to make money from everything You
could dream of. If You want to make business with Russia and Russian
companies, You have to know that.

> Why can't we just leave Swatch alone?

They ARE breaking international treaties, if they use amateur radio
frequencies. I could not find even a single word in their web pages
about operating under a licenced call sign. Instead they even want to
transmit messages from non licenced people adding their (Swatch) name
to every message.
Under these circumstances I can't beleive this NOT to be a commercial
abuse of the strictly NON commercial 2m amateur band.

BTW. I had a phone call yesterday with a guy from BAKOM (Bundesamt
fuer Kommunikation, the Swiss FCC, http://www.bakom.ch/). They haven't
heard of that up to then. As far as the guy knew, Swatch did not
contact the BAKOM about that. It puzzles me, however, that no Swiss
amateur has contacted the BAKOM up to now. Aren't they concerned about
this intrusion?
IMO there are two possibilities:
1. Swatch has made a contract with SCSC without knowing that operating

a commercial satellite on amateur frequencies is illegal. Although I tend to give them a chance (in dubio pro reo) I think this case is unlikely.
2. Swatch simply ignores that they ar doing something illegal claiming responsibility is at SCSC (the operator) and they have a right to transmit their spam (they paid for that right).

The fact, that there is no public statement from Swatch after nearly three weeks of comments sent to their comments page makes me believe, that they try to wait for the complaints to end (one more reason to keep complaining) and that 2. is the most likely case.

BAKOM will investigate the case and (hopefully) keep me informed (as I asked them to do so). If I get new information I will post it to rec.radio.amateur.space,rec.radio.amateur.misc and rec.radio.amateur.policy.

I hope this will come to a happy end. Maybe we even can convince Swatch to support AMSAT in general (this might be the best promotion for them). To convince them to do so we should avoid, however, to send them profane mails with harrassing comments (e.g. the never ending preposterous comparisons with Hitler and Nazi-Germany, which tell actually more about the character of the poster).

Hope this helps

Best 73

YES!

Not only is it an exaggeration, but you have now revealed that it is a
deliberate lie!!

You said that there was QUOTE:

" Nothing but hatefull threatening letters."

Those are YOUR words, Tim!
YOUR Lie!

Did you read it THIS time?????

*** THICK AS A BRICK!! ***

OK, Tim, since you are SOOOOO incredibly dense, I will spell it out
for you.

You apparenly don't realize that WORDS HAVE MEANING!

You apparently are SO emotionally distraught that you do not realize
you are lying to try to over-emphasize (hype) your idea to us!

There were MANY, MANY non threatening messages!

There were even compliments.

There were requests for information.

Tim, you are behaving SO stupidly. Why don't you grow up and stop LYING to try to buttress your faulty position here???

There were no MEAN messages that I saw, and only a small number that said they would actually boycott Swatch!

Most of the messages I saw on there yesterday were just guys politely asking them to reconsider.

Please stop lying Tim, it make your bad reasoning look even worse than it already is, when you do that!

>what a boycott is.

Ha ha ha ha! THAT is not the point Tim.

YOU have NOT-SO-CLEVERLY changed the subject from
BOYCOTT SWATCH (i.e. not buy thier products) To
BOYCOTT THE SATELLITE!!

Sorry Tim. You fail again. The rest of us DO know how to READ and we
spot your stupid human tricks very easily!

Same tactic as you have used every day this week:
1) Time loses argument
2) Tim changes subject or lies to try to cover up.

Won't work.

>> Some individual hams in the USA did that.
>
>And so did AMSAT-F in the letter published on the ARRL site

They did NOT. You are a repetitive LIAR!

The PResident of AMSAT-F did NOT ask amateurs to boycott SWATCH.
You are LYING and you have been CAUGHT in that lie.

>> You really should get a clue!
>
>Perhaps if after reading the above quote you'll have one too.

If you think getting a clue means to accept your lies, then...

SORRY... NO!

At least it appears they are not going to make manufacturers embed the
frequency control section in epoxy which would likely render the unit
un repairable without exchanging an expensive entire circuit board.
Sounds like the masked ROM will suffice. Since most amateur radio
transceivers are " type certified " under FCC Part 15 as scanning
receivers this will catch them up in this also.

Of course your reply is in line with the rest of your posts, thanks for the spelling check, I suppose I could have spent the time that you did and made sure the comments were grammatically correct but I'm more interested in the discussion than poking fun at misspelled words which you seem to have mastered. I notice once again you come up short on answering the question. Do you have an answer or reply that might add to the discussion or do you just want to sling mud? You never really reply to the questions but rather write cute one liners like "quit while your ahead" and "Hewt on foniks werkt for me, Tym"

The question regarding Swatch was, considering the alternatives, that is, possibly partnering with Swatch to benifit them and the amateur community, what have we accomplished by attempting to stop the Swatch satellite project?

Yes that is correct, congratulations, you've correctly interpreted my statement this time without changing the meaning.
Cedric, why do you think we have organizations like AMSAT and the ARRL? In Washington, the ARRL speaks FOR us their comments carry a lot more weight and that's why you organize, I suggested that an organized reply to Swatch would have been more appropriate than the comments sent to Swatches web page and instead of commenting on the subject you bring up first amendment rights and the fact that we live in America. So instead of putting words in my mouth why not comment on my suggestion. Do you feel that AMSAT or the ARRL contacting Swatch directly and suggesting a win win situation would have been more appropriate and accomplished more for the amateur community, or do you think that the comments sent directly to the web page siting international law violations and threats of boycotting Swatch products were better. A simple question Cedric.

Tim

I don't have the schemetic for that mic, however it is for
the Saber series radios. Listed below are the radio connector
pin outs that the mic mates to. You could also remove the back
of the mic and trace the wires and figure it out that way.
Watch out for differences in mic/spkr impedances between
the Yaesu and the Motorola product.
btw, I did this same thing once and "gutted" the Motorola
mic and "gutted" the mic that I wanted to use and just swapped
out the mic and spkr, retaining everything else including the mic
cord so that I didn't have to rewire a new cord, this retained the
original mic cord "look".
. This ensured that I had the same mic and spkr and
it worked great.
Per Motorola Manual # 68P81045C75-0;
pin 1= spkr
pin 2= spkr
pin 3= data
pin 4= mic
pin 5= we*
pin 6= busy
pin 7= opt sel
pin 8= opt b+
pin 9= key/fail*
pin 10= keyload*
pin 11= aux tx/kid*
*Note: some of the pins listed support the encryption equipment
for the radio, and others support eeprom programming of the radio.
Hope this helps. Duane WA6EIK

Really? I never mentioned not buying thier products in this post, I did talk about the posts by other amateurs boycotting thier products but didn't mention it with respect to the comments from AMSAT-F, only that they suggested a boycott.

The word Boycott, according to Webster

Boycott (boikot) v. To abstain from buying OR USING to express protest

AMSAT-F is discouraging listening to the satellite. Since the Satellite is sponsored by
Swatch that's a boycott.
You conveniently added (i.e not buy thier products), again I never said that.

> >Swatch may have indeed been contacted by AMSAT, but if they were nothing was made
> >public and the first comment's from AMSAT-F were to boycott Swatch.

Now if someone suggests to you not to listen to K-Rock, and you don't are you not boycotting the radio station?
If someone suggests you don't read the New York Times and you don't are not boycotting the newspaper.
If someone suggests you don't listen to advertisments from Swatch are you not boycotting Swatch?

> Sorry Tim. You fail again. The rest of us DO know how to READ and we
> spot your stupid human tricks very easily!

I just wonder about your comprehention. Tell me Cedric, by discouraging amateurs from listening to the commercials on the Swatch sponsored satellite are you saying that this is not suggesting a boycott? Again, just a simple question. Do you have an answer or more comments about lies and cover ups?

> Same tactic as you have used every day this week:
> 1) Time loses argument
> 2) Tim changes subject or lies to try to cover up.

Ha ha ha, this my favorite. When all else fails let's point out that the other guy is losing the argument, like everyone reading this can't decide for themselves and have to be told by you. har har har

Robert, you have spoken the truth!

Here is an update, and you can now see what the attitude of SWATCH
is about the whole thing:

THANKS TO ROB CARLSON for his excellent work on this matter.

Rob got the FACTS instead of just OPINIONS and GUESSWORK, which is
all that most of the rest of the radio amateurs appear to have
bothered to do, especially a certain person who has been making
strident comments and dishonest claims in this newsgroup.

Forwarded Bulletin follows:

Date sent: Wed, 7 Apr 1999
From: Rob Carlson
Subject: Swatch replies, disrepects the amateur community
Organization: University of Maryland Baltimore County

SWATCH PROTEST AND BOYCOTT BULLETIN
April 7, 1999 10:45 EDT
http://rob.carlson.org/swatch-protest

Since I released my first open letter concerning the Swatch "Beatnik"
satellite on ham bands, the response has been incredible. While I
can't
hope to duplicate the distribution of the first message, I'm sending
this
to everyone who took the time to send me an e-mail as well as all the
recipients of the first letter. This will also be posted on the web
site
for review by the hundreds of visitors who are showing up every hour.

My Swatch Protest and Boycott web site is the most up to date source
of
information on this issue, and I'm updating it constantly. You can
access
the site at:

http://rob.carlson.org/swatch-protest

This morning at 5:00 a.m. EDT when I checked the Swatch web page for
any
updates, there was a message from Swatch addressed to the amateur
community at:

http://www.swatch.com/beatnik/mission.php3?id=1

However, this message is not an apology or a promise. According to them,
the satellite will not be changed or disabled. Swatch has given us a single page response, and one rife with Swatch company "market-speak" and
self-gratification for this project. Frankly, their reply simply restates
and formalizes Swatch's indifference for the entire issue of amateur frequency allocation and ITU regulations.

I encourage everyone to view the full text of the message for themselves,
but I will highlight some parts in this letter. In particular they write,

"Thousands of people from all over the world have sent us their messages
of hope, peace and brotherhood, which have been transmitted to a satellite whose task will be to scatter them in space. Naturally, since
they are radio signals, they can also be heard on Earth on some frequencies in areas with satellite coverage. This means using channels
normally used by radio amateurs, which we consider as some of the major
exponents of the freedom of communication."

In case you didn't get that the first time, let me boil away the double-talk with my interpretation of Swatch's words:

"We think we are doing a good thing, and we needed some frequencies, so
we took yours. But since we're doing it for "hope, peace and brotherhood" and "freedom of communication", we didn't think you'd mind
and frankly, we're astonished you're making a big deal out of this."

All I can say to swatch is: Surprise! Amateur radio operators don't take
very kindly to attempts to hijack portions of our amateur spectrum for non-amateur transmissions, regardless of whether you're pointing a satellite at Pluto or the headquarters of the Federal Communications Commission building in Washington, D.C.

In their letter, Swatch writes that the only goal of the satellite is to
"scatter [the messages] in space," and that any of the signals which would
fall to earth would be an unintended consequence. Just one mouse click
away, however, on the page:

http://www.swatch.com/beatnik/mission.php3?id=3

they write that their use of the amateur frequencies will "[allow] radio-rads worldwide to listen to your voice." Radio-rads. Worldwide.
So which is the intended audience for the satellite? Space, or the "radio-rads" of Earth? Perhaps Swatch can clarify this contradiction.

Since I saw the reply this morning, the thought on my mind has been, "Wow,
we did it. Now what?" The question now is where do we go from here?

Both myself and Ron Hashiro, AH6RH, had anticipated that once Swatch understood the nature of the applicable international laws and the underlying spirit of the amateur space service, that they would rush to
cancel the project. However, this has turned out not to be the case.

Ed Mitchell, KF7VY, wrote to me yesterday that, "It is hard to imagine that during what must have taken six months or more of negotiations and
contract executions between SWATCH and the Russian Space Agency, the legal
issues of this never came up. They had a lot of time to understand the issues." Now it's obvious that the issues were understood, and ignored.

A single sentence paragraph in Swatch's letter to amateur operators reads,
"It is a great opportunity for Amateur Radio to gain an even wider audience." That's all well and good, except this morning's letter is the
first mention that the Swatch company has made of the amateur community
since I first visited their web site on February 20, 1999. If amateur radio operators had not responded with such dedicated ferocity over the
last four days, I don't believe that Swatch had any intention of including
the amateur community in their Beatnik marketing campaign.

If Swatch continues to be so cavalier and unapologetic over their use of
the amateur spectrum, it's clear that official action will have to be taken in order to prevent future abuses by their company, and others who
might follow their lead.

Andrew Reynolds, WD9IYT, believes that the most effective step is to directly file a formal complaint about this illegal operation with the ITU
via the FCC. They might not be able to fine Swatch, or the Russian space
concern that is helping them, but they inquire with the respective governments, and make them pay attention to this issue. He says that

"A
boycott of Swatch products would be a non-event if it is only hams
(remember, there just ain't that many of us), and writing them
nastigrams
is something that they're probably going to just ignore. Smack' em
across
the face with a government enquiry and they're gonna wonder what hit
them."

Tony, K4KYO, also suggested writing letters to the Swiss Embassy in
Washington, DC, quoting applicable regulations and ITU treaty
provisions
protesting the misuse of the ham bands for commercial purposes. I
have no
specific information or addresses for the Embassy, but if anyone does
please send them to me at rcarls2@umbc.edu.

Ed Mitchell, KF7VY, has detailed the ITU violations on his web site:

http://hamradio-online.com

and writes, "The ITU has a prohibition on third party traffic (except
where agreements exist between countries) of the type planned by
SWATCH,
regardless of whether it is commercial or not, in nature. Even if this
were to be turned into non-commercial messages, the use of Amateur
satellite and Amateur frequencies in this manner is clearly beyond the
realm of reasonable."

"If SWATCH can set up an ad campaign around this theme, and, SWATCH
can
use Amateur frequencies to transmit non-commercial messages as a
matter of
"Good will" - where does it stop? Imagine if other companies adopt
this
scheme - collecting non-commercial messages in association with the
marketing of a new product and transmitting them from satellite . . .
In
effect, Amateur satellite frequencies can be legally commandeered for
use
by corporations engaged in bona fide marketing activities. And that
would
be the end of the use of Amateur satellite frequencies by Amateurs."

Ron Hashiro, AH6RH, writes, "The actual on-the-air activity is a third
party traffic that has one requisite word within the message content."

"However, the word (a registered trademark) and what it supports (as
revealed by the current web and marketing campaign) supports a
financial
interest that is advanced by a message given on-the-air within the
amateur

radio service, which violates the SPIRIT of the ITU rules. One would never expect this type of activity to occur on any amateur radio band anywhere within the world."

"More importantly than just the on-the-air activity, it diverts the voluntary efforts and unpaid contributions of many amateurs into an effort
that they were not aware would have an immediate commercial outcome which
violates the above spirit of ITU rules. I believe these licensed amateur
technicians/operators have strong feelings about the project as originally
conceived as they would not willingly advance a commercial venture with a
trademark message that is being sent on-the-air."

One suggestion I have received is to begin other amateur operations on the
Beatnik frequency of 145.815 such as digipeaters, beacons, and simplex communication. Remember that as far as FCC and (I believe) ITU regulations are concerned, unlicensed operations on the amateur frequencies have no rights as far as use and interference complaints and
are essentially non-existent.

However, I can't endorse this course of action since the impact on other
frequencies in the amateur satellite portion of the two meter band isn't
really certain, and I doubt that Swatch is too concerned about if anyone
actually hears the message, as long as they're thinking about Swatch all
the while they're trying.

Other suggestions have been similar and include overloading the satellite
uplink. I've been told that the actual makeup of the satellite digital
audio circuit is almost identical RS-17 and RS-18. In my first alert message, I misunderstood the following quote from an AMSAT bulletin:

"Up to ten messages will be transmitted by the tiny, battery powered satellite. Each message will be 7 seconds long and include a 7 second pause."

Now I realize that it referred to ten total pre-recorded messages on the
satellite, and that the satellite could be programmed to cycle through these ten messages by changing to another one every 24 hour period. There

is no uplink frequency because their is no uplink, and the satellite cannot change or remove the messages at any time during the operational
life of the unit. I apologize for the confusion.

At this point my opinion is that we should try one last time to encourage
Swatch to do the ally themselves with the amateur community. The following suggestions come again from Ron Hashiro, AH6RH, on the steps that we should tell Swatch to take:

* Immediately communicate to AMSAT-FR and the amateur community that it
now understands the full magnitude of the spirit underlying the applicable
international law and is willing to remedy the situation by modifying the
project, with AMSAT-FR's approval.

* Would like to reposition the project in part as a corporate sponsor of
amateur radio and the amateur radio space service. (It may also find other adjoining ways to reposition the project appropriately.)

* Acknowledge and thank AMSAT-FR, other AMSAT type organizations including
AMSAT-Russia and the amateurs that makes amateur radio satellites possible.

* Obtain assurances from the Russian agency that it would not solicit future corporate clients in the previous fashion that would expose future
clients to adverse public reaction.

* Publicly thank the Russian agency for their part in making the "revised" project possible.

* Update their web-site and marketing campaign accordingly.

* Acknowledgement by all sides that the lesson learned is that the message
content of an on-the-air operation within the amateur radio service should
not advance the financial interests of commercial companies.

73 and good luck,
Rob Carlson, KC2AEI

Ponder this for a minute, Robert. Who does the satellite belong to ?
And who launched it ?

If the pizza store up the road paid me $50 to advertise their pizza
on a VHF repeater, and every 5 minutes I announced on the VHF
repeater "THE PIZZA STORE UP THE STREET HAS GREAT PIZZA -
CALL THEM AT 555-1212 FOR FREE DELIVERY", who will the FCC
issue the violation notice to, me or the pizza store ?

Hello AMSAT Russia.......

That is because you are illiterate!!!

A literate person would know that Christ told
the Jews that they are the spiritual offspring
of Satan.

A literate person would know that Christ required
his people to stand a weapons inspection (Luke 22.38).

Being a Christian, by definition, means first knowing
who Christ really is, not believing what the
Judaizers want you to believe. Emotion has nothing
to do with reality.

FCC JAMS HAMS,
the FCC is a criminal faction of a criminal executive branch,
engaged in a criminal coverup which is further protected by
a criminal Justice Department, also a party to the crime.

The FCC knowingly, intentional, deliberately, willfully and
purposefully supplied radio jamming equipment to the FBI and,
with reasonable assumption, to the US Air Force for the
purpose of jamming AM and FM radio broadcasters, TV
broadcasters and the Amateur Radio Service. The amateur
station jammed was defined as a Title 47, Code of Federal
Regulations, Part 97.405 Station in Distress, relaying
emergency communications critical to safety of human life.
As a result, appoximately 100 people died.

FCC is also a deliberate violator of the Freedom of
Information Act, using an exemption of documents not
allowed under the list of exempted documents types.
Whereas, I have not posted details on this to the
website yet, you can read the 36 descriptions of
FOIA requested documents in the FOIA Administrative
Appeal letter. All of these are denied on the basis
that I have figured out what the nature and content

of the documents are, and the FCC does not want to verify my logical, analytical and deductive work that has narrowed down the documents almost to the point of writting them myself. Actually, I already have two of the documents, and stand ready to publish them, as soon as I can arrange to leave the□ country, and post them from a safe place.

Neither last nor least, but in closing on FCC criminality, FCC is a criminal co-conspirator with FBI to classify documents pertaining to the criminal operations of the FCC and FBI. Such classification of documents for the purpose of avoiding criminal prosecution is specifically described as a criminal violation in any Executive Order pertaining to such classification at the time of classification.

Get the FCC out of the control business, contact your□ Congressman, ask that he support Henry Hyde of the House Judiciary Committee to convene a hearing into the criminal coverup by FCC Chairman Kennard of the criminal operations of the FCC and FBI and US Air Force engaged in Communications Act violations.

Get the American Radio Relay League out of its tyrannical misrepresentation of the amateur community. Publish the fact that the ARRL board voted not to reveal the criminal operations of the FCC and FBI. What decent person would be a member of such a criminal organization. If you are in the ARRL, moral integrity demands you quit.

Forwarded from Rob Carlson:

SWATCH PROTEST AND BOYCOTT BULLETIN
April 7, 1999 10:45 EDT
http://rob.carlson.org/swatch-protest

Since I released my first open letter concerning the Swatch "Beatnik" satellite on ham bands, the response has been incredible. While I can't hope to duplicate the distribution of the first message, I'm sending this to everyone who took the time to send me an e-mail as well as all the recipients of the first letter. This will also be posted on the web site for review by the hundreds of visitors who are showing up every hour.

My Swatch Protest and Boycott web site is the most up to date source of information on this issue, and I'm updating it constantly. You can access the site at:

http://rob.carlson.org/swatch-protest

This morning at 5:00 a.m. EDT when I checked the Swatch web page for any updates, there was a message from Swatch addressed to the amateur community at:

http://www.swatch.com/beatnik/mission.php3?id=1

However, this message is not an apology or a promise. According to them, the satellite will not be changed or disabled. Swatch has given us a single page response, and one rife with Swatch company "market-speak" and self-gratification for this project. Frankly, their reply simply restates and formalizes Swatch's indifference for the entire issue of amateur frequency allocation and ITU regulations.

I encourage everyone to view the full text of the message for themselves, but I will highlight some parts in this letter. In particular they write,

"Thousands of people from all over the world have sent us their
messages
of hope, peace and brotherhood, which have been transmitted to a
satellite whose task will be to scatter them in space. Naturally,
since
they are radio signals, they can also be heard on Earth on some
frequencies in areas with satellite coverage. This means using
channels
normally used by radio amateurs, which we consider as some of the
major
exponents of the freedom of communication."

In case you didn't get that the first time, let me boil away the
double-talk with my interpretation of Swatch's words:

"We think we are doing a good thing, and we needed some frequencies,
so
we took yours. But since we're doing it for "hope, peace and
brotherhood" and "freedom of communication", we didn't think you'd
mind
and frankly, we're astonished you're making a big deal out of this."

All I can say to swatch is: Surprise! Amateur radio operators don't
take
very kindly to attempts to hijack portions of our amateur spectrum for
non-amateur transmissions, regardless of whether you're pointing a
satellite at Pluto or the headquarters of the Federal Communications
Commission building in Washington, D.C.

In their letter, Swatch writes that the only goal of the satellite is
to
"scatter [the messages] in space," and that any of the signals which
would
fall to earth would be an unintended consequence. Just one mouse
click
away, however, on the page:

http://www.swatch.com/beatnik/mission.php3?id=3

they write that their use of the amateur frequencies will "[allow]
radio-rads worldwide to listen to your voice." Radio-rads.
Worldwide.
So which is the intended audience for the satellite? Space, or the
"radio-rads" of Earth? Perhaps Swatch can clarify this contradiction.

Since I saw the reply this morning, the thought on my mind has been,
"Wow,
we did it. Now what?" The question now is where do we go from here?

Both myself and Ron Hashiro, AH6RH, had anticipated that once Swatch
understood the nature of the applicable international laws and the
underlying spirit of the amateur space service, that they would rush
to
cancel the project. However, this has turned out not to be the case.

Ed Mitchell, KF7VY, wrote to me yesterday that, "It is hard to imagine that during what must have taken six months or more of negotiations and contract executions between SWATCH and the Russian Space Agency, the legal issues of this never came up. They had a lot of time to understand the issues." Now it's obvious that the issues were understood, and ignored.

A single sentence paragraph in Swatch's letter to amateur operators reads, "It is a great opportunity for Amateur Radio to gain an even wider audience." That's all well and good, except this morning's letter is the first mention that the Swatch company has made of the amateur community since I first visited their web site on February 20, 1999. If amateur radio operators had not responded with such dedicated ferocity over the last four days, I don't believe that Swatch had any intention of including the amateur community in their Beatnik marketing campaign.

If Swatch continues to be so cavalier and unapologetic over their use of the amateur spectrum, it's clear that official action will have to be taken in order to prevent future abuses by their company, and others who might follow their lead.

Andrew Reynolds, WD9IYT, believes that the most effective step is to directly file a formal complaint about this illegal operation with the ITU via the FCC. They might not be able to fine Swatch, or the Russian space concern that is helping them, but they inquire with the respective governments, and make them pay attention to this issue. He says that "A boycott of Swatch products would be a non-event if it is only hams (remember, there just ain't that many of us), and writing them nastigrams is something that they're probably going to just ignore. Smack' em across the face with a government enquiry and they're gonna wonder what hit them."

Tony, K4KYO, also suggested writing letters to the Swiss Embassy in Washington, DC, quoting applicable regulations and ITU treaty provisions protesting the misuse of the ham bands for commercial purposes. I have no specific information or addresses for the Embassy, but if anyone does

please send them to me at rcarls2@umbc.edu.

Ed Mitchell, KF7VY, has detailed the ITU violations on his web site:

http://hamradio-online.com

and writes, "The ITU has a prohibition on third party traffic (except where agreements exist between countries) of the type planned by SWATCH,
regardless of whether it is commercial or not, in nature. Even if this were to be turned into non-commercial messages, the use of Amateur satellite and Amateur frequencies in this manner is clearly beyond the realm of reasonable."

"If SWATCH can set up an ad campaign around this theme, and, SWATCH can
use Amateur frequencies to transmit non-commercial messages as a matter of
"Good will" - where does it stop? Imagine if other companies adopt this
scheme - collecting non-commercial messages in association with the marketing of a new product and transmitting them from satellite . . . In
effect, Amateur satellite frequencies can be legally commandeered for use
by corporations engaged in bona fide marketing activities. And that would
be the end of the use of Amateur satellite frequencies by Amateurs."

Ron Hashiro, AH6RH, writes, "The actual on-the-air activity is a third party traffic that has one requisite word within the message content."

"However, the word (a registered trademark) and what it supports (as revealed by the current web and marketing campaign) supports a financial
interest that is advanced by a message given on-the-air within the amateur
radio service, which violates the SPIRIT of the ITU rules. One would never expect this type of activity to occur on any amateur radio band anywhere within the world."

"More importantly than just the on-the-air activity, it diverts the voluntary efforts and unpaid contributions of many amateurs into an effort
that they were not aware would have an immediate commercial outcome which
violates the above spirit of ITU rules. I believe these licensed amateur
technicians/operators have strong feelings about the project as originally
conceived as they would not willingly advance a commercial venture with a

trademark message that is being sent on-the-air."

One suggestion I have received is to begin other amateur operations on the
Beatnik frequency of 145.815 such as digipeaters, beacons, and simplex
communication. Remember that as far as FCC and (I believe) ITU
regulations are concerned, unlicensed operations on the amateur
frequencies have no rights as far as use and interference complaints and
are essentially non-existent.

However, I can't endorse this course of action since the impact on other
frequencies in the amateur satellite portion of the two meter band isn't
really certain, and I doubt that Swatch is too concerned about if anyone
actually hears the message, as long as they're thinking about Swatch all
the while they're trying.

Other suggestions have been similar and include overloading the satellite
uplink. I've been told that the actual makeup of the satellite digital
audio circuit is almost identical RS-17 and RS-18. In my first alert
message, I misunderstood the following quote from an AMSAT bulletin:

"Up to ten messages will be transmitted by the tiny, battery powered
satellite. Each message will be 7 seconds long and include a 7 second
pause."

Now I realize that it referred to ten total pre-recorded messages on the
satellite, and that the satellite could be programmed to cycle through
these ten messages by changing to another one every 24 hour period. There
is no uplink frequency because their is no uplink, and the satellite
cannot change or remove the messages at any time during the operational
life of the unit. I apologize for the confusion.

At this point my opinion is that we should try one last time to encourage
Swatch to do the ally themselves with the amateur community. The
following suggestions come again from Ron Hashiro, AH6RH, on the steps
that we should tell Swatch to take:

* Immediately communicate to AMSAT-FR and the amateur community that it
now understands the full magnitude of the spirit underlying the
applicable

international law and is willing to remedy the situation by modifying the
project, with AMSAT-FR's approval.

* Would like to reposition the project in part as a corporate sponsor of
amateur radio and the amateur radio space service. (It may also find
other adjoining ways to reposition the project appropriately.)

* Acknowledge and thank AMSAT-FR, other AMSAT type organizations including
AMSAT-Russia and the amateurs that makes amateur radio satellites
possible.

* Obtain assurances from the Russian agency that it would not solicit
future corporate clients in the previous fashion that would expose future
clients to adverse public reaction.

* Publicly thank the Russian agency for their part in making the
"revised" project possible.

* Update their web-site and marketing campaign accordingly.

* Acknowledgement by all sides that the lesson learned is that the message
content of an on-the-air operation within the amateur radio service should
not advance the financial interests of commercial companies.

73 and good luck,
Rob Carlson, KC2AEI

> If you bothered to read the Swatch site you would know they don't plan to transmit
> ANY ads.

What about the endless HI HI from Musat and some other inane amateur spams that everyone seems so proud of. This project may be beneficial by creating interest in the hobby among a much wider group than is usually reached. I know a number of people who got excited about amateur radio and satellites after hearing the first Sputnik40 replica on scanners.
A few arrogant individuals seem to think they own the airwaves just like the internet hackers who think they own the net and slowed it down when one of them got jail time.

"Jamming" this project in any form is a very "low brow" response. Who gave you the right to speak for everyone.

>I use the computer all day. And I'd like to operate RTTY, PSK31 etc too.

If all you need is RTTY, PSK31, logging, ect, then try picking up an older slower computer. I've found that some of the old 286/386/486's were much better shielded than the newer ones. Further the slower speeds (25, 33, ect) didn't seem to produce as many birdies. Also much of the RFI is caused by the monitor. An old laptop with an LCD screen solves this. The old laptop power supplies were separate boxes that you could move away from your equipment, although I never had any trouble with RFI from them. The prices are amazing. I recently picked up a working 386 for $20 at a swapmeet. It was capable of most ham activities and had an LCD orange screen. It had no RFI at all (at my place, locations may vary)...

Have you asked the sales people, at the Radio Shack store,
if you could order them? They are usually pretty good at that
kind of thing.

Another source would be Amateur Electronic Supply. They have
them listed on their web site, "http://www.aesham.com/",
for $11 each.

When you think you are ready for one of the written tests, try
this site:

AA9PW's Amateur Radio Exam Practice Page at
http://www.biochem.mcw.edu/Postdocs/Simon/radio/exam.html

You can get a real good idea of whether you are really ready
for one of the tests. It really helped me through the Tech,
General, and Advanced tests. I'll let you know how it does for
the Extra test in May.

Another site would be the following, but I like the first one
the best.

Ham Exam: Amateur Radio Practice Exams
http://w5ac.tamu.edu/ham-exam-v2/ham-exam.html

Here is a few more sites that might be of interest:

Morse Code Practice Java Applet
http://www.teklasoft.com/java/applets/morse/morse.htm

I haven't tried it yet, but it might be nice.

Ham/Morse Academy - AH0A
http://www.speroni.com/AH0A.html

This is a great program for studying your code.

Nick,
Cw can also be used on 2m, just a reminder. The 98-99 repeater directory
lists 50.0-50.1 for cw,beacons, 50.1-50.3 for ssb,cw
50.3-50.6 all modes.

506. shocking interference from PC

Newsgroup: rec.radio.amateur.misc
Date: 1999-04-07 00:00:00 UTC
From: Hamish Moffatt <hamish@rising.com.au>
Message-ID: <7eedgr$4ia$1@arachne.labyrinth.net.au>
Source record: 146440

I've recently discovered some new exciting sources for QRM in my shack.

Lately WWV(B?) in Hawaii is a 155, rather than a 579. I can't hear a damn thing on 20m. Turns out, this interference is being caused by the switch-mode power supply in my PC. Unplugging it fixes everything, but since it's ATX, it runs even when the PC is not actually switched on. Actually the inteference is much worse when the PC is off!

The power supply also whistles when not switched on. It's less than 3 months old, but has whistled since day 1. Any solutions other than just replacing it?

I also found that, depending on which antenna I'm using, my mobile phone charger puts nice 2 Hz pulses on lots of bands too, particularly 10 MHz, 14 MHz, 18 MHz. If the phone is removed from the charger, it makes constant static instead of pulses. Time to relocate it; too bad I can't relocate the PC.

>to cover 10 & 11 meters like the Uniden 2510.
>Any suggestions??

My suggestion, spend a few minutes a day learning enough FCC rules, regs, electronic theory and (dare I say) morse code then take a test and get your amateur radio license, then you won't have to run the risk of messing up a nice radio by potentially screwing-up a mod. I have heard it's easier to modify a CB to work the gray-band or the freeband than it is to modify a ham rig to go there. Have fun. Happy law breaking!

508. How to Protest Swatch Ham Band Broadcast

Newsgroup: rec.radio.amateur.misc
Date: 1999-04-07 00:00:00 UTC
From: k5pf@aol.comPaul
Message-ID: <19990406220113.17319.00003531@ng122.aol.com>
Source record: 146442

The Swatch company intends to transmit commercial messages in the 2-Meter Amateur band, as you have read in other posts. It is confirmed in a recent ARRL Letter.

If you feel this is an inappropiate thing for Swatch to do, send a message using this URL: http://www.swatch.com

On the web page, go to the lower right corner and click on The Club. Then choose Forum. You can type a message in the space provided. Include your name and call letters.

Points you might mention:

1. This may cause harmful interference.
2. This is not in keeping with international radio allocations, and their country is a signing party to the applicable treaties.
3. The "audience" is this portion of the radio spectrum will be extremely limited. If they are paying to advertise between 145.8 and 146.0, somebody seriously misrepresented the impact and number of "impressions" to the manufacturer.

Sorry, I can't help you, Larry, with the proper pricing of this equipment you're selling, but I just want to comment about at least two people who responded to your query. I'm pretty certain I'm not alone when I say these 1st two responders are jerks. Guys, come on. The poster, the guy asking for some help just lost his father and he's asking for simple but real help. After the BS out of these two jerks, I would not blame this guy in the least for just tossing his dads equipment in the trash. Way to go guys...lots of people are down on hams because they thinks we're just a bunch of glorified CBers. You just proved it to this man.

Larry, you might want to see if a local school has or wants to start a radio club, or see if there's a local club (not school-affiliated) in your area and donate your dads gear to them.

Sorry for your loss.

Dear OM:
&#65533;
There will be a HAM activity from Argentina, celebrating the 75th anniversary of the contact between Carlos Braggio, r-CB8, at Buenos Aires, Argentina, and Ivan O'Meara, z-2AC, at Gisborne, New Zealand, that established the world record of distance in 1924.
&#65533;
The Radio Club Argentino, LU4AA, will celebrate this anniversary between 16 and 23 of may of 1999.
&#65533;
1) The official station of RAC, will use during this period, the special callsign L75CB;&#65533; every QSO with this station, will be confirmed with an special QSL card.
&#65533;
2) At 21st. of may (the day of the anniversary), L75CB will transmit continously (24 hours), on CW, the mode used by Braggio and O'Meara during that contact.&#65533; Stations contacting L75CB on this mode, that day, will receive, also, an award.
&#65533;
L75CB QSL’s via LU4AA. Bureau or P.O.Box 97 - Zip Code 1000 - Buenos Aires, Argentina
&#65533;
3) During this period, between 0000 hours of 16 of may, and 2400 hours of 23 of may of 1999, every amateur radio station in Argentina is allowed to use an Special International Prefix.
&#65533;
Stations beggining with LU, will use L2.&#65533; LU4AA will use L24AA
Stations beggining with LW, will use L3.&#65533; LW8EZU will use L38EZU
Stations beggining with AZ, will use L4.&#65533; AZ1AAA will use L41AAA
&#65533;
There will be a program of diplomas to work at this period.&#65533; If you want to receive it, just ask me and I will send it.
&#65533;
Every question, or comments, should be sent to lu4aa@lu4aa.org, the e-mail address of the RCA, LU4AA
You can also visit LU4AA's web page, at http://www.lu4aa.org
&#65533;
Javier O. Retorto - LW8EZU - Junin, Buenos Aires, Argentina.

>
>

That's exactly what it is, Tom, although they didn't have the modern name for it. The only time I ran across the TP term was in a 1930's brochure for Vibroplex semi-automatic telegraph keys. It said the Vibroplex would help one avoid Telegaphers Paralysis.

As a former professional CW operator standing 8 hour shifts, I can attest that your wrist takes a beating. At my station (KLC), we removed the rubber feet from the Vibroplex bugs and re-did the holes to accept rubber suction cups. As you came on duty, you spit on the cups and stuck the bug to the desk. It would remain there until you were finished--and sometimes that was 16 hours later if the relief didn't show!

To emphasize the beating one's wrists took, keep this in mind. It was a straight 8-hour sift. No lunch hour. Every two hours, you banged out a Traffic List for five to 15 minutes. Once or twice during the shift, you included the weather forecasts--which added another ten to 15 minutes of steady brass pounding.

And when you were not hitting the key to transmit, you were copying messages on a manual typewriter.

It was not a place for "sissies". (grin)

Apparently arguing with a totally clueless fellow-amateur who does not
READ the messages he repsonds to on Usenet, because he is so busy
thinking about what HE is going to say next.

You still have not even begun to grasp the basic thoughts I have been
conveying to you, because you ALWAYS have to have an answer whether it
is right or wrong.

THATis why you blindly consider it acceptable to go fly a satellite
over someone else's sovereign territory and violate their laws, AND
violate international treaties to which America, Russia and France are
all signatories.

Your justifications for your reasoning are absolutely laughable, Tim!

You should quit while you are ahead, before you embarrass yourself
even further with this absurdity!

switched topics yet again and wrote:

>Look here's the bottom line , you seem to be more interested in attacking me
personally that you do discussing the issue. This whole thing was
handled completly
wrong which is why I even got started in this discussion, someone
finds a web page
where Swatch is planning to transmit messages from a satellite
launched from space,
now instead of organizing ourselves and having AMSAT-NA or the ARRL or
any other
organization of your choice contact Swatch and ask what their specific
intentions are,
a few individuals jump the gun and post the address with instructions
to tell Swatch
how you feel!

>Tim ka8ddz

OK, if THAT is the bottom line, then your argument has several
different bottom lines (at least according to you)...

Responding then to the CURRENT "Tim's-bottom-line-whim-of-the-moment"
let me say that I am flabergasted that you can't think and act for
yourself. You claim it is unethical for people to state their point of
view to one another unless they let some large organization speak for
them! STRANGE! I have nothing against ARRL speaking to Swatch about
this! But I see nothing inherently "wrong", illegal or dangerous if
someone wants to give their point of view to Swatch.

This is America Tim! We have a First Amendment here. We AREA allowed
to speak for ourselves!

You are SOOOO Paranoid about what someone might say!

Source record: 146462

Jason, I am an expierenced radio electronics technician (25+ years) so I will see if I can answer your questions. Solid state diodes are a single p-n junction device, they allow current flow in only one direction, or in the case of a Zener at a certain breakdown potential. Each require different techniques to remove them without damaging the underlying circuitry, they are normally not static sensitive but the surrounding circuitry can be, so use anti-static straps or workstation. Diodes come in a couple of flavors, radial lead, axial lead, and surface mount. Radial, looks like a two lead transistor, metal or plastic can, very heat sensitive, leads penetrate the circuit board, requries a method of solder extraction, pump, vacuum extractor, or wick, too much heat and you throw away the board, if you wish to save the removal,(for later reinstallation), you need to use a good heat sink clip on the leads. I use a vacuum solder extractor, they cost $1000+ for a good temperature control unit. Axial lead, looks like a resistor or capacitor with a glass, metal, or plastic body with a white red or black band on one end, the same tools are needed to remove these as the radial however they are usually somewhat smaller and require more care to prevent damage. Now for the newer stuff, most are surface mount, and depending on the equipment can be as small as .5x1mm, little plastic rectangle with one end white or silver. Musts are a good benchtop magnifier, or low-power(3x-5x) microscope, tweezers, and an electronics vise. The extraction method is a micro-extractor, or a hot-air extractor, the latter will run $1200+, if you are very expierenced you could use wick and a micro-pencil iron, the problem with surface mount is ROOM and too much heat, as both ends have to be desoldered AT-THE-SAME-TIME, very hard unless you have specialized equipment. Unless you are very careful you will DESTROY the diode and maybe the underlying trace. If you can, take a trade class on the subject, check your community college/IBEW Unit. I would not recommend you try this, unless you can afford the mistakes, without a couple months of training/practice. Some will disagree but I will gladly fix those mistakes for $65 per hour plus parts and shipping.

No Code International has lodged formal complaints with the
FCC, the US State Department, the ITU, and both Swiss and
Russian radio regulatory agencies, protesting the announcement
of the impending commencement of messages of a commercial
nature on frequencies allocated to the Amateur Radio Service
and the Amateur Satellite Service by The Swatch Group Ltd.,
of Switzerland, using what was supposed to be an educational
amateur radio satellite.

The satellite is reportedly scheduled to be launched from
the Russian space station MIR some time this month and would
transmit in the 145.8-146 MHz Amateur Satellite Service sub-
band.

NCI has also sent messages to the directors and officers of
the ARRL, TAPR, AMSAT, and the IARU, asking them to join in
the effort to stop this commandeering of amateur frequencies
for broadcast messages of a commercial nature.

For more information, links to articles on the subject, and
to view a copy of NCI's formal statement of protest, see:

> them!

I did not say this, I never once mentioned unethical, and never once mentioned "unless they let some large organization speak for them" I suggested that we might have benifited by having AMSAT-NA or the ARRL contact Swatch and explain that they may be in violation of radio regulations and that a win win situation may have come from this by convincing Swatch that amateurs might help promote thier publicity stunt (off the air) in exchange for message by amateurs with amateur content. As opposed to threatening them with boycotts of thier product. Do you feel that your point will be better made by misquoting me?

> STRANGE! I have nothing against ARRL speaking to Swatch about
> this! But I see nothing inherently "wrong", illegal or dangerous if
> someone wants to give their point of view to Swatch.

I don't think it's illegal or dangerous either Cedric, just a poorly managed response by the amateur community.

> This is America Tim! We have a First Amendment here. We AREA allowed
> to speak for ourselves!

Absolutly

> You are SOOOO Paranoid about what someone might say!

Paranoid? Not hardly, Tell Swatch exaclty how you feel, but in the end if Swatch could have been persueded to work WITH the amateur community and sponser the satellite without the commercial content we could could have benifited greatly. Instead amateurs sent threatening emails of boycotts in an attempt to stiffle the whole project. So while your ready to throw your first amendment rights in my face, consider the alternative and then tell me what we have accomplished.

Sigh! What a pathetic exaggeration/lie...

Tim, I have told you a MILLION times NOT to exaggerate!

When you tell Swatch, no more Swatch products in my house ever again, that's a
threat.
When you refer to someone as hubris, that's hateful.
Is this an exaggeration?

-from the Swatch site:
You have violated ME, As well as my license. No Swatch products in my house ever
again!
How to beat the illegal use of Ham bands.
1. Boycott swatch.
2. Use the frequencies so their message does not get through.
Turn your beams to the bird...if you cant beat em ... jam em!
What hubris allows the SWATCH (planned-obsolecense timepieces) to usurp a public HAM
frequency? Is that a boycott rising now?

> AMSAT never asked amateurs to boycott Swatch!

From the ARRL page:
Pidoux apologized for the situation and called on AMSAT organizations to refrain from describing the
contents of the satellite's messages and to discourage listening "to this nonamateur-compliant satellite
using our amateur band." He also asked that the Keplerian elements not be published by AMSAT

In other words, boycott the satellite. Perhaps a quick look in the dictionary would help you to better understand
what a boycott is.

> Some individual hams in the USA did that.

And so did AMSAT-F in the letter published on the ARRL site

> You really should get a clue!

Perhaps if after reading the above quote you'll have one too.

This of course was in response to his question "How much is Swatch paying you?" to which I replied, "Nothing, I'm just sharing my thoughts on the interpretations of radio regulations" How about quoting the entire question&#65533; and answer next time Cedric

> You still have not even begun to grasp the basic thoughts I have been

> all signatories.

No I do not blindly consider anything, I responded with comments about RS-18, which by the way transmitted a message celebrating Air and Space, not ham radio which was also sponsored by a French Aeronautical organization, not ham radio.
I also pointed out that at least under Part 97 beacon transmissons are allowed and are appropriate on those frequencies. I also pointed out that 3rd party international traffic IS permitted and sited the ARRL page that showed the countries that allow it. This was in response to his statement that International 3rd party traffic is not permitted PERIOD.

Well it sounds like AMSAT-R would stop any attempt, but depending on how you interpret it, it may simply mean that they would stop any attempt to use AMSAT-R and not nessesarily stop the project. Damn it's 2 AM. This was a letter posted to the AMSAT reflector.

I was very disappoint to receive message from Bernard Pidoux, f6bvp, president of AMSAT France.

I want to explain the situation on this matter.

Everything what happened does not have any relation to AMSAT-R. All discussion with Swatch Company in Switzerland was made by Space Flight Control Center (SCSC), Vladimir Solovyev and Serge Samburov singed all documents. They do not inform AMSAT-R that they going to sign this contract under the name of AMSAT-R. Everything was made behind AMSAT-R and I have got this information from only f6bvp message. More than this - only three persons of AMSAT-R have right to sign this type of documents - president and two vice presidents.

RA3APR, Eugene Labutin - president of AMSAT-R
RU3AIZ, Alex Matvietz - vice president of AMSAT-R
RA3APW, Karen Tadewosyan - vice president of AMSAT-R

Nobody of these persons was even informed that this contract was signed.

AMSAT-R very sorry for this bad situation, and very sorry that some people using AMSAT-R name in their commercial project.

AMSAT-R apologizes for any trouble witch was brought to amateur satellite community and hope that amateurs in the entire world will understand this situation and separate AMSAT-R and SCSC. AMSAT-R will stop any attempt from SCSC to use AMSAT-R in commercial projects.

Best Regards
Eugene Labutin, RA3APR.

President of AMSAT-R

538. ARRL and Swatch, Get a Grip

Newsgroup: rec.radio.amateur.misc
Date: 1999-04-08 00:00:00 UTC

I have had the misfortune of watching ARRL as a member for a decade now.

ARRL is pursuing a typical party line. While there must not be profane, political or blatant advertising messages, God forbid some undesirables (read that as hams under 30) be attracted to the HOBBY. And that's what it is- a HOBBY.

ARRL has an unspoken agenda to not advertise the hobby in public. SWATCH violated this. ARRL advertises for new hams in QST ! Who gets QST ? ARRL members ! And don't sell me that newsstand BS, read the USPS release in QST, no one gets it that way. So who will ARRL attract ? Friends and relatives of hams.

This isn't surprising as that's how ARRL hires. Check out December 1998 QST and see who works there. Relatives, friends and contester friends. The Carcias, 3 Wolfgangs, N1DG, KB1HY, K1ZZ, N1RL, KB1BE, the list goes on. Anyone who doesn't fit the above category is given the 5th degree before being hired, to the point of harassment. Superior education, achievement and experience are nothing, who you know in YCCC or PVRC is everything.

Anyone who criticizes this (literal) Old Boys Club gets summarily dismissed, ridiculed and in many cases blacklisted.

But experience is the best advertiser. I have had 2 interested professional, educated parties ask me about ham radio. I told them the above and the direct and veiled ridicule of small stations by obsessed nutcase hams. I spoke of outrageous stations and dangerous RF power like K1ZM, W4ZV and W3LPL. These people spend money on attorneys fees and WASTE THE COURTS' TIME so they can put up not one, but multiple towers in excess of 150 feet because the 50 or 75 feet towns offered them won't do ! COMMERCIAL STATIONS WITH A QUARTER OF THE DIRECTIONALITY OF THEIR ANTENNAS AND ERP ARE REQUIRED TO HAVE RF WARNING SIGNS !

Would K1ZM live next door to himself ? Does the cost of a Mercedes S class sound like an investment you'd make in ham radios ? I told them my personal dealings with the many nosey hams on VHF, many if not most of whom are in reality antisocial freaks whose last hope for friendship is others like themselves. The 2 walked the other way from the hobby.

Yes, Virginia, revenge is sweet.

The satellite fas built by amateurs and therefore belongs to them.
The russian space agency launched/will launch it and may have a
contract with AMSAT to use it for ballistic experiments. (In that case
this is a win-win situation for AMSAT and SCSC). This gives SCSC by no
means the right, however, to sign a commercial contract with anybody
and abuse amateur radio frequencies to transport unlicenced or even
commercial messages.

> If the pizza store up the road paid me $50 to advertise their pizza

>
> Hello AMSAT Russia.......

In that case they would issue it to You, because You agreed to
transport that message. AMSAT-R never has signed a commercial contract
with Swatch, this was (illegally) done by some members of SCSC. In
that case it is SCSC and/or Swatch, which will get into trouble.

I have read the ARRL interpretation of the new FCC regulations and it sounds like my 746 is included in the "crackdown'. It says any receiver capable of receiving above 30MHz and outside of the HAM bands with the ability to scan is considered a scanner and must be made un-modifiable. Literally this means I would not be able to add any component that changes the receivers receiving characteristics. I think this would include filters!

These regulations have the net effect of trying to drink water from a screen bottomed cup. There still is not any enforcement on the listening of cellular phone conversations. All these regulations have done is to place an unfair burden on hardware Mfg because the services sector do not want scramble their frequencies. When we are all done with the regulations the cell co's will have implemented scrambled technologies and we will have radios that will not be able to be modified to hear the scrambled signals. Stupid! Stupid, in the fact that is places a burden on the legitimate manufacturers of amateur radio products. As a purchaser of these products it increses my costs and decreses my flexibility. The people own the airwaves that the governemnt regulates, together we can change any law and reverse any regulation! But the amatuer radio community is somewhat fragmented and small so it is easy to turn down our volume.

This 5-cent piece was struck in tombac, a brass alloy, in 1942 and in
chrome plated steel in 1944 and 1945. The normal beaver reverse was
resumed in 1945 in pure nickel. The beaver reverse was also stuck in
tombac in 1942

I have just been given two Motorola Maxtrax radios, but I don't have any information about them. They are obviously two channel units, but I don't know what band they operate in or what mode (trunked or conventional)

Both units have two model numbers on separate labels on them; HUD1745A2 and D43MJA73A5CK.

Motorola's web site was of little use.

Anybody know what these are?

I have a quick question about Motorola radios. It seems that I see alot of them for sale in this ng, but they always seem to be about the same price as normal ham ht's, or priced higher. What makes these Motorolas attractive to people? I dont' have much experience with them, but they seem to have less options than the newer ht's. Thanks.

Jim,

On many (maybe most?) issues I agree with your views because you have a
well-developed ability to cut through the peripheral crap, and get at the
real nut of the issue. In this case, I think you've missed the real issue.

This is not about some bootlegging scofflaw in a SE Asia rain-forest;
it is about a deliberate and well financed commercial promotion by
an international corporation arrogantly using the amateur bands to
advance their pecuniary interests.

K1ZZ, in a fax to the CEO of Swatch, got right to the *real* issue
her. He said:

"While it could be argued that a single, limited-lifetime satellite
would have a negligible impact on the usefulness of the band for
amateur pursuits, if commercial satellites were to become more
common the interference would be intolerable. Therefore, the
amateur radio community must stand against the "beatnik" satellite
because it represents such an undesirable precedent."

From CWDXER:
>ARRL has an unspoken agenda to not advertise the hobby in public.

Not so. One reads about Amateur radio frequently in places other than QST. The league encourages favorable press.

>Check out December 1998 QST
>and see who works there. Relatives, friends and contester friends.

Perhaps this is a function of who APPLIES for a job at HQ. This is not a career path for "normal" people. You'd be lost at HQ without a strong interest in ham radio. Kinda like all those hams who work for the FCC.

> I have had 2 interested professional,
>educated parties ask me about ham radio. I told them the above and the direct
>and veiled ridicule of small stations by obsessed nutcase hams. I spoke of
>outrageous stations and dangerous RF power like K1ZM, W4ZV and W3LPL.

Good start, Old Timer. What else did you share about how great ham radio is?

> I told them my personal
>dealings with the many nosey hams on VHF, many if not most of whom are in
>reality antisocial freaks whose last hope for friendship is others like
>themselves.

Oh. Not the kind of sales pitch I give for Amateur radio. Never mind....what happened?

> The 2 walked the other way from the hobby.

Gee, fellow CW operator......are we surprised? Why would you present ham radio is such a negative way? Have you somehow been burned by the ARRL?

>
>Yes, Virginia, revenge is sweet.
>
>

Thanks for clearing this up. Thank goodness you drove these two away. We don't need any more "professional, educated parties" hanging out at the lower edge of the band and snagging all the good DX in pile ups.

Cross-posted to: rec.radio.amateur.space,rec.radio.amateur.misc,rec.radio.amateur.policy

Jim's point is valid. We have to look at this violation in the light of all the other dumb violations we hear every day.

SWATCH should have known better than to try and sneak this on to RS19, the French AMSAT folks should learn to read contracts better, and the Russians, well the Russians are hungry. What do you expect?

In the scheme of the things we hear every day, this ain't much.

Think about those illegal 10 Meter taxi cab operations on converted CB radios in NY, think about those spy stations, how about all the South American operations you hear that can't possibly be ham radio related?

The folks you should really get mad at are the very people who made your appliance radio. Do you really think they sell exclusively to ham radio operators? Do you really believe that when an insurrection takes place, or in a place where laws aren't enforced, that the folks out there are ignoring a cheap source of radio communications equipment?

Of course not!

So SWATCH decides to carry out an Advertising campaign on the ham bands. Maybe we can petition the Swiss Government to slap these folks on the wrist and tell them not to do it again. That's about all you can hope for ladies and gentlemen.

The reality of international allocations of the radio bands is that cooperation is usually more profitable than confrontation. However, no country cooperates just for cooperation's sake. If there's a motive or profit to be made by breaking international law, most countries won't hesitate.

Maybe we need to recast the hobby in such a way that international motives are better aligned. Maybe we should allow for this sort of thing in return for something, such as better funding of future satellites.

Think about it. Think hard. Then try posting a message. I'd like to see something intelligent come from this debacle.

> ---
> Christopher Brewster, kc0evq

Christopher,

You are correct, none of the code practice sessions, sent on the
air, are going to be anything like the FCC test. You could move
up to the novice portions of the band and copy some QSOs there,
but you have the same problem. None of the QSOs would be
just like the FCC test.

I see, from Buckmaster's, that you are currently a Tech+, so I
assume you are working towards the 13 WPM test. I passed the
General tests in March, the Advanced last weekend, and to
prepare for the code portion I used Morse Academy, on my PC.
I found that Morse Academy comes as close as you can get
the the FCC exam. When the code test started, it sounded like
I was sitting at home working at my PC. I will see how well
it prepares me for the 20 WPM test, next month.

There is an option, "G", that generates simulated QSOs, with
all of the prosigns, and contains the kind of information that
will be on the FCC test. These QSOs can then be played back
using the "K" option, at any speed you like.

You can get a copy from:

Ham/Morse Academy - AH0A
http://www.speroni.com/AH0A.html

Morse Academy is written for DOS and sometimes has trouble
with certain hardware configurations, but then they all do.
To avoid any problems I made a bootable floppy and installed
it there. It works great that way and is portable to any
computer that's handy. I've tried it on 486's and 586's. It
should work on the old 286's and 386's.

If you need something that runs under Unix, I have that as well.

Dear all,

Please subscribe and discuss at Icom IC-2800 community!!

http://www.onelist.com/searchlist.cgi?searchval=icom-ic2800&language=0&maturity=0

New top-of-the-line dual bander adds video excitement to audio excellence. Advanced features and a unique, 3" (diagonal) TFT color LCD display await you. View GPS and APRSTM maps, catch SSTV or broadcast TV,... even watch digital camera and VHS images. Experiment! The high visibility screen accepts NTSC video input (PAL in the European model) via a simple connection port that accepts most standard camera plugs. A 6-pin data port makes the '2800H 9600bps data ready. ICOM's popular independent band controls are here, making it easy to work V/U, U/V, or cross band repeat. Also get: CTCSS encode/decode, simple band scope, fast scanning, 232 memory channels, air band reception, and much more. The control head is totally separate from the main unit, with a connection cable and independent mounting brackets included as standard equipment. Explore SEEING as well as hearing more of today's amateur activity.

Best Regards,
Bo

FCC Official Acknowledges OOs Really Are "Official"

WRONG. I'D RATHER HAVE NO HAM RADIO THAN A BUNCH OF FEDERAL SANCTIONED ILLEGAL SNITCHES, SO I'VE WRITTEN MY REPRESENTATIVES IN CONGRESS TO URGE THE ELIMINATION OF THE ARS AS A TROUBLE MAKING UNNECESSARY SERVICE AND WASTE OF SPECTRUM.

WASHINGTON, DC, Apr 8, 1999--The FCC's top amateur enforcer, Riley Hollingsworth, K4ZDH, says that hams who receive notices from ARRL Official Observers should take them seriously or take the consequences. "Failure to take the notices seriously and to take corrective action where possible will not be tolerated by the Commission," Hollingsworth said in an enforcement-related letter to a South Carolina amateur. "The volunteer work of these Official Observers is a critical element of the Commission's enforcement program," he said, adding that failure to act on an OO notice could lead to fines and other sanctions.

OO's ARE NOT SWORN OFFICERS OF THE FEDERAL COURT AND THEIR "EVIDENCE' IS INADMISSIBLE, UNLIKE FCC EVIDENCE.

According to the FCC letter, the Commission has received "numerous complaints" about Whiten "regarding profanity, obscenity, broadcasting extreme racial slurs, deliberate interference and failure to properly identify." Hollingsworth also said he'd heard complaints that Whiten had played recordings over the air "for the purpose of harassment or deliberate interference."

1.INTERFERENCE IS ILLEGAL
2.IGNORANCE AND FREE SPEECH IS NOT (SEE FIRST AMENDMENT)

Hollingsworth noted that Whiten had "apparently ignored notices from Official Observers," and pointed out that the volunteer OOs work "in accordance with an agreement between the Commission and the ARRL and in accordance with our statutory authority."

THE FCC HAS NO AUTHORITY TO DELEGATE THESE POWERS TO UNSWORN AGENTS WHO ARE NOT OFFICERS OF THE COURT.

And, don't get me started about why it is the President can have fellatio performed on him in a public building with someone he isn't married to, but we will hang Whiten because he said nigger, fuck, and "spear chuckers" on the air.

Ironic, hmm ? Whiten says it and Clinton acts it out in public buildings. Since when are words given more weight than deeds ? Since the New World Order's very own Mutt and Jeff, Clinton and Blair, took over.

They're legal to use in the commercial and public safety bands as
well as on the amateur bands. Ham rigs are not. Thus folks who want
a legal dual use radio are interested in them. There is also a mystique
about Motorola radios, that they're tougher and better built than ham rigs.
That's not always true, but perceptions aren't always shaped by truth.

Yet, He did NOT tell them to attack ANYONE with those swords, did He!

To the contrary - in fact, He rebuked them for cutting off someone's
EAR and then He healed the injured party.

>He also very
>rudely beat the moneychangers with a whip.

That is a untrue!

The word WHIP is not even IN the New Testament ANYWHERE!

If you are going to hide behind o cloak of "Christianity" - at least
learn to do a more convincing job of lying!

Your efforts to change the true nature and
character of Christ have failed.

The trouble is still that you are being RUDE!

Also, this political/religious lunacy does not belong in:

I'm thinking of designing a digital voice "vocoder" to run digital voice in and out of a 9600 baud packet connection on a ham radio. Does this break the codes and ciphers rule of Part 97?

574. Christie Aponte (WP4MTI) Update - Back in hospital....

Newsgroup: rec.radio.amateur.misc
Date: 1999-04-08 00:00:00 UTC
From: admin@ultranet.com
Message-ID: <EzaP2.930$BJ.612760@petpeeve.ziplink.net>
Source record: 146158

Feel free to forward this message to any interested parties.....

Those of you who have been following the progress of ham radio operator Christie Aponte, WP4MTI,will be interested in the following update.

Christie is the young, ham operator who was severely injured when a drunken driver collided with her family's automobile. She has undergone multiple surgeries here in the states, and faces the prospect of many more in the future. Hams around the globe donated money and equipment to replace her ham station that was stolen during one of her trips to Boston for surgery.

Christie emerged from surgery yesterday to repair her hip, tendons and abdominal muscles. Doctors were happy with her progress, but she is a bit discouraged and depressed. She is also in a great deal of pain.

If you'd like to cheer her up, send one of your QSL cards or a greeting card with a get well message to:

Christie Aponte
c/o Jamie Aponte
Royal Sonesta Hotel
5 Cambridge Parkway
Cambridge, Massachusetts 02142
USA

Christie will probably be at the hotel until the 19th, so please act without delay.

Thanks for your help.

Hi Gang
Would anyone have any information on the Adjustments on the main
board for a 706 MKII? The owners manual is very sparse on this.
If you have any information you would like to share you may send it to me via
E-mail at D.R.Abshire@att.net

Anyway my 706MKII is only putting out about 65-70 watts PEP on HF and 20-30
on 6 meters. 2 meters seems to be OK. Oh by the way I did check this into a
dummyload.......

I'm not familiar with that specific part number, but personally, I would
open it up and use my ohmmeter to determine the circuit configuration. I've
done this several times with other units and have successfully
"reverse-engineered" the circuit.

I don't really believe that, Hans. How many companies like Swatch
would buy into 'illegal' world wide advertising ? I would bet they had
no idea what ham radio was when they signed the contract with the
Russians.

I see the entire deal as grossly insignificant. What saddens me
the most is that again we have proven that we are totally incapable
as a group of responding intelligently to a common threat.

snipThere's the rub. I see it now. It used to be a SERVICE. We got to play with our radios, and many genuinely "advanced the radio art" while we payed for the frequencies by providing communications when called upon. This still happens. I took my general exam in April of 1964 in Dallas after a bus ride from Waco. I was 14. You could NOT study the question pool back then. Extras drew schematics.
If it's now just a "hobby" that is a great loss.
H.
WA5IGW
By the way, when I took my 1st phone (remember that?) in 1971, I made 100%.
First try.
I added the Advanced Amateur Radio then for the hell of it.
Gotta get that 20 WPM

You idiots don't seem to realize that Swatch is making monkeys out of you by letting you post all your threats and spew on their comments page. When any unbiased person looks at that page who do you think they will see as wackos, Swatch or the HAM's who leave threats, spam, and abuse in their public posts.

Also, we went through this argument years ago when public broadcasting started taking commercial funding. It helped public broadcasting without compromising their ethics or freedom and you don't see blatant advertising on PBS.

Dave, check your swr. The 706 starts cutting back in power output as the swr increases. I am sure you know that,but the 706 is specially sensitive to any swr.Even a small amout of swr will cut back the power output considerably.
P.S I love my IC-706mk2....

> because of their extreme beliefs, someone will likely get killed or maimed.

You could also "help them", meaning the radio jammers, by making a
phone call to their local law enforcement. Police tend to take a dim view of
threats of bodily or property harm, either by telephone or via other "electronic
means" - such as Ham Radio for instance. It's called " Terroristic Threats "
by legal terms, and can get one arrested *on-the-spot* if deemed serious enough.

Give a call to the local Sheriff or PD in their home town when their on the air
jamming and making threats, then hear them shi+ their pants when the Men
in Black knock on their front door asking for an explanation of their anti-social
behaviour. (give it a try eh?)

> I only wish that the FCC and Mr. Hollingsworth would put an end to their
> activities before we are reading about 'silent keys' in the ARRL magazine, which
> should have been prevented.

Hopefully these QRM'ers will do it to themselves via a stroke.

Also, they don't have
the BALLS to confront anyone else. Of this I am SURE. If you walked
up to one of them unannounced and asked if they were a ham or mentioned 3950
they'd shi+ their pants and shrink away in fear in a mili-second.

592. Neat callsign idea ! (I think anyway)

Newsgroup: rec.radio.amateur.misc

Greetings,

I got fed up with my private e-mail address being hit, by crazy junk
mails..!!
So I discovered a handy way of changing that..!!

Instead of Listing my private e-mail address, I got a free e-mail address
from Ultimate Networks..
That way, all the junk mail went into their folder..I picked out the mails
that I wanted, and bingo. I didn`t have to use my private e-mail for
anything other than that.>!!

I also got to customise my address, so it reflected my callsign..!!
I found out as well that the facility would notify me whilst I was on
ICQ(TM) and let me know when I had mail..
All at a remarkably low price of FREE..!!!

so 73`s and good luck!

gi7vuf@un.zzn.com

****
Get your FREE customised e-mail address at Ultimate Networks !

6LQ6's recently replaced with NOS stock $300

Phantom 500 10 meter amplifier, Needs 10 6LQ6s (Ouch!) $150.00 Sold

Texas Star Killer Bee HD250V, 10 meter amplifier, Class C, Direct keyed only
$85.00

Varmint XL350, 3 tube, 10 meter amplifier, With the famous "Super Mod" switch,
Clean,
Tubes 80% or better Swings 500 pep on YS-60 peak meter. $250.00

Heathkit SB201 10-20-40-80 Linear amplifier, Fresh 572B Tubes, Manual, Works
great $375.00

HTX202 RadioShack 2 meter handheld, Speaker Mic, Box, Manual, Wall charger $100 SOLD

Crate Stealth 60 Tube Guitar amp, In great condition. Manual $200.00

Yamaha 12 string acoustic, beautiful guitar with case!! $500.00

Yamaha RX11 Drum Machine $100.00

Rack mount Lab power supply, Power Ten Inc. Model 3300D-10010, 0-100 VDC, 0-10 Amps,
Voltage and current LCD read outs, Clean $200.00

Bird 4391 Analyst, Microprocessor controlled CW power / Pep Power / Modulation /
and more, uses bird 43 slugs. Carrying case, manual, $400.00

Bird slug 50-125 Mhz, 5,000 W Peak mode / 1000W Max average Power $60.00
Like new, low use

Bird slug 50-125 Mhz, 10,000 W Peak mode / 1000W Max average Power $60.00
Like new, low use

Siltronics model 90 VFO -6 $85.00 Clean

Alan CTE HQ135 25-29 Mhz Wattmeter 10/100/1000 watt scales, illuminated, Low use like new in box $40.00

Alan CTE 36" apartment dwellers antenna, adjustable swr, Low use Like New $25.00

Alinco DJ-S11 Mini 2 meter hand held, in box, low use, slight scratch on front $65.00

Cushcraft R5 five band Vertical, uses short counterpoise radials $150.00

Radio Shack Digital SWR/Power meter RMS and PEP 0-30 Mhz $30.00

Watts 0-160 PSI precision Regulator & Sub-regulator filter block assemblies NEW $100.00 Ea.

Recoton CBM430 Amplified Desk Mic $20.00

Mirage B3016 2 meter FM/SSB amplifier, with preamp, 30 in 160 Watts out. $200.00 Sold

SBE Trinidad AM Base, Excellent condition with Manual and D104 Mic $120.00

Realistic TRC459, AM/SSB 40Channel CB ,unique flat console design, dial a watt, Stock Mic. $130.00

Sears Road talker 40 AM/SSB 40 channel Mobile, In box, Low usage, No Manual, Clean No Mods $100

Sears Road talker Base/Mobile 40 channel AM/SSB, In box, Low usage, No Manual , clean, No Mods $100 SOLD

Uniden HR2600 with chipswitch modification, 575-M6 mic, Manual and chipswitch manual $260.00

Yaesu FRG 7 SW receiver, good condition $160.00

Ameritron AL 811 HF Amplifier uses 3 811 tubes, minor flaw on face plate, 7.5 to 8 on condition, works perfect, full output with manual $400 SOLD

Complete ammunition reloading set up, 2 Presses, scale, several dies, tumbler, Case trimmer, books, Brass, 2 powder drops, trickler, A whole lot of stuff ...dies for 223, 45 long colt, 7mm Rem mag, 30-30, 308, 22 hornet, 30 carbine and others $320.00

Craftsman compressor 4 HP 30 Gal, In good condition, with hose and regulator/seperator setup $200 Local pick up only in the Simi Valley Ca. area

Roland 4 track multi-tracker recording system, Higher end model, Nice mixer/EQ section. Not sure of the model #, must check in storage. $300.00 Clean condition, with manual

* I buy, sell and trade vacuum tubes

Will possibly trade above items for:
Drake equipment and accessories
Bird 43
Bird HF slugs
Digital camera
Yaesu Y0 100 scope
Yaesu FV101 VFO
Electro Voice Mics
Johnson Viking II with Johnson VFO
Collins 30L1 in good condition
Collins R390A
MFJ antenna analyzer. The one with resistance read out
Drake RV-7 VFO
Power supply for the Drake TR 7
Yaesu FT-7 in very good condition
or ??? what do you have?
Astatic 10DA SSB mic head
Astatic Night Eagle
Yaesu FL2100B

JPG Pictures available on some items *

--The stuff that will never make it to the bench for repair--
Below sold as is:

Siltronics Albatrose 23 channel AM/SSB mobile with big ol venier slider knob $25.00 Works, Occasional Intermittent TX

Pierce Simpson Bengal AM/SSB 23 channel base SSB works AM doesn't $30.00

Zachery T AM Base No TX week RX $30.00

President Washington w/ freqs and slider (Worked perfect before UPS got ahold of it) Came back from
Hawaii , No TX or RX, Possible damaged loop mixer crystal $60.00

Robyn tiger 23C Needs Audio transistor $10.00

Messenger 250 23 channel base CB, beautiful gold and brown, good cosmetic condition, Possible power supply problem $40.00

Icom IC230 2 meter parts radio, No Knobs $20.00 TX works.

*All items do not include shipping.
*Shipping Via UPS ground unless otherwise stated
*All items guaranteed to work unless otherwise stated.
* Most larger items are professionally packaged and double boxed.
* Buyer splits packing charges.
* Most prices negotiable.
* Use of 10 meter amps on 11 meters is illegal.
* References available upon request.

To all radio amateurs

SB SPACE ARL ARLS002
ARLS002 ARRL Advises Swatch to Cancel "Beatnik" Launch

The ARRL has weighed into the burgeoning controversy over messages gathered by the Swatch watch company and programmed for transmission on 2 meters from the mini-Sputnik satellite. In a fax today, League Executive Vice President David Sumner, K1ZZ, suggested to Swatch Group CEO Nicolas E. Hayek that the Swiss firm cancel the launch of the "Beatnik" satellite and use a commercial satellite for its project instead.

"The Amateur Radio community must stand against the 'Beatnik' satellite because it represents such an undesirable precedent," Sumner said. He proposed that Swatch cancel the launch, planned for April 16 from the Russian Mir space station, and fulfill its commitment to transmit messages from space using excess capacity on a commercial satellite.

Over the past week, an increasing number of voices from among the amateur community have been raised in protest against plans for the mini-Sputnik to transmit messages related to the Swatch company's campaign to establish the "Swatch Beat" as a new "global concept of time." Via its Web site, Swatch reports it has solicited more than 5000 messages--including voice and text files--for possible transmission on the new satellite. Messages selected for use were supposed to include a reference to the "beat" theme.

Sumner pointed out that international regulations define the amateur service as one engaged in by "duly authorized persons interested in radio technique solely with a personal aim and without pecuniary interest." He told Swatch that canceling the launch and owning up to its mistake would "go a very long way toward repairing the damage that has been done to your company's image."

Swatch has acknowledged the amateurs' complaints and has included several on its Web site. It also has opened an e-mail comment box to gather opinions on "Should we send your messages into space?" But the company says the messages the satellite will send "are not advertising and do not contain the brand name Swatch." The company

asserts that its campaign also provides "a great opportunity for Amateur Radio to gain an even wider audience." The company has promised to post the "final list" of messages sent for transmission by the satellite.

AMSAT-France has distanced itself from the soon-to-be-launched mini-Sputnik. AMSAT-France President Bernard Pidoux, F6BVP, has apologized for AMSAT-France's role in the situation and called on AMSAT organizations to refrain from describing the satellite's messages and to discourage listening "to this nonamateur-compliant satellite using our amateur band." AMSAT-France had contracted with AMSAT-Russia--with help from the Russian Space Flight Control Center (SCSC)--to build the RF and electronics modules for the new satellite. AMSAT-Russia was responsible for building the satellite frame, integrating the electronics, and programming the messages the satellite would transmit on 2-meters, Pidoux said.

After the contract was signed, Pidoux said, AMSAT-France found out that the SCSC had made a separate commercial contract with Swatch to put its "beat" messages on the satellite. AMSAT-France protested, citing contract provisions prohibiting "direct advertising" on the air, but it completed its part of the contract to avoid a lawsuit, Pidoux said.

AMSAT-Russia President Eugene Labutin, RA3APR, said the Space Flight Control Center signed the Swatch contract "under the name of AMSAT-R" and did not inform AMSAT-Russia what they were doing. He apologized on behalf of AMSAT-Russia.

The new Sputnik-99 satellite arrived on Mir aboard a Progress rocket April 4. It will carry a 100-mW transmitter and transmit on or about 145.815 MHz. The satellite will have an approximately 30-day life span. It will be able to transmit up to 10 different voice messages in addition to digital messages and telemetry. Data will include battery voltage and internal temperature.

Has anyone noticed that for some companies, fiscal year 2000 started April 1, 1999, and we have heard not a single peep out of anyone? If Y2K is going to bring the world crashing down on us, why have we not heard of any problems with FY 00 so far?

Not a bad attempt at spinning Tim, but the truth will get you
again! Since you are appear to be the defacto spokesman for the
3950 criminals, let's look at your position in detail.

KK7HO spun:
> Deeply disturbed at the take-over and Jamming practices of that "So Called"
>net. The net members jam harass, heckle, make noises every damn night. They
>want control of 3950 They want to be the ONLY ones to operate there.

The Liberty net is one of 1000's of regularly scheduled weekly amateur
radio nets. For 14 years the Liberty Net has been on it's known frequency
of 3.950 mHz.

Amateur radio is (was) known as a hobby for gentlemen, and it's common
courtesy to yeild a frequency of a recognised net to the net control operator.
This is tradition goes back to when the hobby started in the early part of
this century.

Not to be confused with 'gentlemen', you actively disrupt the normal use
of the frequency by any means available to you, including death threats.

In fact, you have become so efficient at your harassment and jamming
that you've driven the normal Liberty Net members down to 3.948 to
escape you and your threats. Now, you complain that the transmissions
from 3.948 are interfering with your jamming on 3.950.

This is the first indication that you are loosing your grip on reality, Tim.

You have threatened the lives of two net participants on the air. And there
is concern that your extreme views and hatred is driving you mad, Tim.

>Deeply disturbed at the net at the net members running down our military at a
>timelike this let alone ANY time. Deeply disturbed that something has not been
>done by now.

More spin. But evidence that it's the CONTENT of what's said that upsets you
despite your claims to the contrary. You don't agree with the statements made
about our military in Kosovo, so you openly jam and threaten anyone that
attempts to raise an issue that you disagree with.

>We can only hope that Hollingsworth is aware of all the jamming and harassing
>being done by this group. This thread is an example. The want 3950 as THEIR
>"PRIVATE" BROADCAST FREQUENCY. They cannot stand to see 3950 put to
>normal amateur use.

I'm sure that the FCC and Mr. Hollingsworth are aware of your death threats
and continual harrassment on the HF bands. Again you are attempting to paint

the victims of your harrasment as the perpetrators. It won't work Tim.

>And again this thread they started is an example. They will Lie, slander and
>defame. They go to almost no end to get 3950 free of anyone who want to use it
>normally.

Still trying to reverse roles, and create confusion about who the bad guys are. But all one needs to do is just tune into 3.950, and hear you and Sid swearing and acting like the fools that you are. It won't be long now, and you will be off the air. I can't wait!

Uhhh! Beware of people who think that everyone else is stupid and that they are omniscient. This guy needs to get the cork out of his ass and realize that americans occupy very little space on this planet that in fact we are outnumbered! Once he realizes how small his corner of the world really is then he might gain some humility. This is somewhat surprising since he sounds well traveled. This is the ugly american syndrome at its worst. I am the greatest and everyone else is shit!

There my nickel and keep the change!

627. Thoughts on MFJ-1798 antenna?

Newsgroup: rec.radio.amateur.misc
Date: 1999-04-09 00:00:00 UTC
From: Michael Young <nobody@all.org>
Message-ID: <923639324.497.18@news.remarQ.com>
Source record: 146179

I'm looking for more information on the MFJ-1798, top-loaded 80m-2m vertical. There's a strange dearth of information in dejanews; is this a new model? I'm looking for subjective and quantitative comparisons to other multi-band verticals, such as Cushcraft's R7000. I've seen MFJ's literature, and read through their on-line manual. The hyperbole claims that it's the "all time best multi-band vertical" performance wise, but don't put any numbers on it.

Thanks.

Michael.

>to join NCI and help us to modernize ham radio?

"...modernize ham radio" by eliminating the code tests, correct? But you'd still view code as an archaic mode of communication, correct? So we can only conclude that your modernization of ham radio couldn't be complete without then working to eliminate code. You'll of course deny that conclusion, but your goals are quite transparent.

It must really eat at your insides when you tune across the HF bands and hear that about 50 percent of the QSOs are conducted using Morse. (That of course contradicts the definition of "archaic.")

I disagree about how hams will come across. The majority of comments seem well stated. Meanwhile, you can post to the Club Forum section. It is not public, and probably gets to the head people faster via Marketing and Public Relations.

go to:
www.swatch.com

By the way, thanks for calling us "idiots" for trying to head this off. We really appreciate your support! Ha!

Public Radio is not a good analogy. When they made a change, they stayed in control of the situation. How would you feel if the advertisers had started "riding in" on the signals without permission? And how disciplined would advertisers have been if nobody keep a tight rein on them?

It is much easier to stop something in the earliest stages rather than later after it's gathered momentum.

You got a mouse in your pocket, Jeff? I seriously doubt that you are
correct, but even if you are, what difference does it make? Someone
"working to eliminate code" will not eliminate code. Only the FCC
can eliminate code.

Taken out of context, anything typed can be edited to construde any meaning anyone else wants. Apparently, you chose to edit what was said to meet your needs. Next time, at least be fair about things...when responding to a post, be man enough to quote the ENTIRE quote so it is a true and accurate account of what was said, not just the portion that provides you with some type of personal soap box that you think will cause people to listen to whoever is on it. Have a nice day...and thank you for spending your time reading and responding.

Cedric, Cedrisson, 4-1000 or whom ever you are today. Your comments seem to get more and more bizzarre, I suppose if a group chooses to boycott a radio station and not listen to it, it's really not a boycott according to you since you don't possess the radio station or choose not to buy the radio station? Now that's funny.

If a group decides not to watch a particular news network and discourages others from watching is that not boycotting the network? What would you call it? I'm dying to know, but I doubt you'll answer. As far as balls go, I didn't know whether or not you have them had anything to do with debating an issue, but I suppose that's all you have left to share on the topic. One question though, how big do your balls have to be to post from an anon email account?

> who has condoned it like an oaf!

So that brings us back around to the point I made early in the discussion, since AMSAT-F won't share exactly what the messages are and since no one knows exactly what was going to be transmitted how do you know they were breaking international laws? I'm not condoning anything, I was debating the interpretations of the regulations which you seem to have a problem understanding, and since I question the interpretation you make comments like "If it's illegal Tim's for it!" and assume I condone what Swatch is doing. I suppose if I question the Constitution of the United States I should be hung for treason eh?

By the way, are you totally unable to discuss an issue without name calling? You seem unable to post without calling me a liar, an oaf, and running spell checks on my posts. I bet you were the pride of your college debat team.

once I got a card from an OO in benton harbor, michigan which claeimd
that I dident id properly in my finael transmission thru a 2M repeater
there. but mostly, he just dident like out of town hams on "his"
machiene. also, he was listening on the repeater output and couldn't
even hear me on the input becuse I was in a fringe area. he was a jerk.

so I wrote to the arrl and to their credit they took it up with the OO.
he had his status lifted as OO a few months later because lots of pple
had complained about him.

couldent have happened to a more diserving guy.

OOs are a bad idea in general and shud be dumped.

Hello to the group,
I have a nice 6 meter rig for sale. It is an Icom IC-551d and it comes with the matching power supply IC-PS20. The rig does AM,CW, SSB, and puts out a full 80 watts and is very clean. The rig does not have the FM board in it. It comes with the Icom optional low noise hand mic all gear is a 9 out of a scale of 10 and ready for delivery. The rig also comes with the separate standard power cord, manuals (radio & P/S), no original carton though (sorry)!

The price is $450. firm , buyer pays shipping.

From: David Lee <dwl@slip.net>
Message-ID: <7elci9$fl3$1@owl.slip.net>
Source record: 146201

Hi,

I am interested in setting up a "remote base station". The way I understand it this works similar to a repeater which would be good because I'm interested in using some repeaters I can't reach with my HT. The repeaters I'm trying to reach are on 2m and 70cm and 50Mhz.

Can anyone recommend a good base station that can be worked as a "remote base station"? I'm also looking for recommendations for a very effective non-beam, small size, antenna.

Thanks
David

I'll remember that the next time my radio is connected to a card reader.

"Some people" will say almost anything, but you have to look at whether
what they say is plausible. None of my radios has any idea what the date
today is, so today is going to be just like any other day.

For any computer system that *does* store dates as year and day-within-year,
they will have to store *three* digits for the day, so they can represent
a whole year. Thus, April 9 would be stored as 09999. If "all nines"
is used as an EOF marker, it would be 999999. Notice the difference
between those two numbers? The computer can certainly tell that they
are different.

The same applies to September 9 - some people have said that 9/9/99
could cause problems. But any system that stores day/month/year must
use at least 2 digits for day and month, so September 9 is 09/09/99.
Any "all nines" marker would be 99/99/99.

People say the dumbest things sometimes.

Dave

Now here is a great idea!!

Anyone want a SKED over SPEAK FREELY or PHONE FREE?

I would be happy to do that any time with anyone! Easy to do with any
sidetone generator and a lot less TVI!

What a blast!

>Try ICW, to hell with I Phone. This CW thing just wont quit will it ?
>
>Even better, a small QRP transciever on CW beats the living hell out anything
>else. The best part its WIRELESS, look in your history books and find out what

I think 144.100 and down should be avoided. the weak signal guys use it for moon bounce and long haul
(dx) . When I send code practice I used someting above the ssb calling freq. (144.220-.250) or Fm
simplex and afsk(tone modulated) . I use a pk232 tnc set up like packet and use morse mode to send a
text file from the computer. error free and stable speed.

Hi All,

Just a note... if any of you think the actions of SWATCH is disregard of international amateur radio regulations from "just a small company", be sure to take a close look at the bio on Mr. Nicolas G. Hayek, the co-founder, Chairman of the Board of Directors and Chief Executive Officer of the Swatch Group.

At http://swatch.com use the site navigator (extra little window) and click on "Mr. Swatch".

Mr. Hayek, who basically told the ARRL to "kiss off" in my opinion (See The ARRL Letter, Vol 18, No 15), is MUCH MUCH more connected than with Swatch. This is a man with MAJOR connections to many large ventures.

What will be the next move of big business?

73,

Dennis - N4NR

671. CW saves stranded fishermen

Newsgroup: rec.radio.amateur.misc

CW was once again a life saver. This time for a pair of fishermen who were stranded after their small boat swamped on New Jersey's Round Valley Reservoir.

The February 25th edition of the Hunterdon County Democrat news reported the plight of the two would-be anglers. Not having any radio gear or a cellular telephone with which to summon assistance, the two used a flashlight to send an SOS distress call in Morse. As luck would have it, a passing motorist recognized the message and called the rescue squad. They located the two men about three miles from where they'd put their boat into the water.

As an aside, the news report said that the motorist had learned the code as a Boy Scout. And talk about coincidence. The story also reported that he spotted the fishermen's SOS as he was listening to a radio broadcast dealing about the bronze whistle recovered in 1993 from the doomed passenger liner Titanic.

FCC OFFICIAL ACKNOWLEDGES OOs REALLY ARE "OFFICIAL"

The FCC's top amateur enforcer, Riley Hollingsworth, K4ZDH, says that hams who receive notices from ARRL Official Observers should take them seriously or take the consequences. "Failure to take the notices seriously and to take corrective action where possible will not be tolerated by the Commission," Hollingsworth said in an enforcement-related letter to a South Carolina amateur. "The volunteer work of these Official Observers is a critical element of the Commission's enforcement program," he said, adding that failure to act on an OO notice could lead to fines and other sanctions.

Hollingsworth's comments were contained in an April 7 station-inspection follow-up letter to Richard Whiten, WB2OTK, of Easely, South Carolina. Hollingsworth and an FCC engineering team visited Whiten's station on January 22 after what Hollingsworth called "longstanding complaints" about the operation of Whiten's station. Whiten reportedly cooperated in the station inspection. According to the FCC letter, the Commission has received "numerous complaints" about Whiten "regarding profanity, obscenity, broadcasting extreme racial slurs, deliberate interference and failure to properly identify." Hollingsworth also said he'd heard complaints that Whiten had played recordings over the air "for the purpose of harassment or deliberate interference."

Hollingsworth noted that Whiten had "apparently ignored notices from Official Observers," and pointed out that the volunteer OOs work "in accordance with an agreement between the Commission and the ARRL and in accordance with our statutory authority."

"One thing I have really picked up as I travel around to groups is the frustration of the OOs," Hollingsworth told the League this week. "We're going to correct that, pure and simple."

In his letter, he told Whiten that, although the FCC considers hams to be self-policing, "the success of that regulatory approach depends upon the adherence to notices of possible improper operation from other licensed amateurs who are recognized Official Observers." The FCC asked Whiten to list all notices from OOs he has received since the start of his license term on September 27, 1994, and any corrective actions taken in response.

The FCC also set aside a February 10, 1999, grant of the vanity call sign W2OTK to Whiten and said his license expiration date remains October 15, 2001.

Hollingsworth also took advantage of the opportunity provided by his letter to Whiten to spell out the FCC's position on obscene and indecent Amateur Radio transmissions. "Obscene speech is not protected by the First Amendment and cannot be broadcast at any time," he advised. Indecent speech also is not protected between 6 AM and 10 PM, in accordance with the so-called "safe harbor" policy the FCC uses with commercial broadcasters.

Hollingsworth said that while FCC personnel did not notice any technical violations during their January inspection, they did have "serious concerns" about a linear amplifier under construction that was capable of greater than legal output. Hollingsworth asked Whiten to provide details of the amplifier and how it's been used.

Hollingsworth also told Whiten he would be forwarding, under separate cover, tape recordings made of Whiten's transmissions last November on 20 meters. "You will be requested to provide a full explanation for those radio transmissions," he wrote.

"No decisions have been made yet in this case," Hollingsworth told the League. "We're still seeking information."

Now that I have your attention, it does seem he has a problem with international treaties.

Of course, I have wanted to test the fan on my 2m rig on air, under real world SWR to see if it works, and my satellite tracking software is often unreliable, at best.

SWATCH's response makes it sound like they only want to help give everyone a voice and equal access under law to ham frequencies, God knows we are pigs what with hoarding those 30 MHz out of 55 GHz to ourself !... Seems it should've had a CB Radio giveaway sweepstakes then.

see. it is sort of like the govnerment. they keep on passing laws for
years and years and now there is no way to not breake sum law or other.
freedom is going fast. it wud be better if they did nothing for a
while.

same way for the arrl. alls they do is make things worse. always have.

"How to sound like a "GAY HAM" in one easy lesson."
By Pat Handy, KZ4DYK(E) and Steve Sunshine, Male Prostitute

Step One: Use as many "QUEER" signals as possible. Yes, I know they were invented solely for FM, the "FUN IN THE SUN MODE" and are totally inappropriate for closet use, but they're as fun and as entertaining as a good Liza Manelli impersonation. They keep straight people guessing as to what you really meant. I.E. "I'm going to QSY to the phone." Can one really "Suck You" over the phone? QSL used to mean, "I am a Queer Single Lady", but now it appears to mean, "guess". I guess I missed it when the ARRL changed the meaning for LAMBDA's benefit. It is also best to use "OK" and "QSL" together. Redundancy is the better part of Gay-dom.

Step Two: Never laugh when you can say "HE HE". No one will ever know you aren't a long time gay boy if you don't tell them. They'll think you've been a gay ham since the days of J. Edgar Hoover.

Step Three: Utilize an alternative gay ham vocabulary. Use words like "dwestinated" and "no swir thats thust tho thilly !". It's OK to make up your own words here. I.E. "Yeah Tom, I "pheel Bart's zaphonix" occasionally myself."

Step Four: Always wear a pink triangle to hamfests and when in South Carolina "for I.D." As mentioned in Step One, anything that creates hatred is always encouraged. That's why we have the ATF.

Step Five: The better the copy on two meter FM, the more you should use phonetics. Names should be especially used if they are androgynous and you have a burly female or feminine male voice. I.E. "My name is PAT" or "ROBIN" or "CHRIS" If at all possible use the less common HF phonetics "HBB42SMU... Hey Big Boy 4 2 Sex Me Up." And for maximum "GAY points", make up shocking phonetics. "My name is Bob... Bend Over Buddy."

Step Six: Always record the calls of yourself and everyone who is (or has had) sex in a group, whether they are alive there or not. While this has been unnecessary since AIDS, it is still a great memory test. You may also use "and the group" if you're an "old timer" or just have a bad memory. Extra points for thaying everyone's call and then clearing in a thilly way "Gay 9, Chow, Chow now Queer !."

Step Seven: Whenever possible, confuse the gay terminology. It keeps people guessing. Use "butch" when you mean "girly", and vice-versa.

Step Eight: When on a date, always finish your turn,
taking as long as possible before turning it over. Whenever possible,
pass it around a few times first. This will discourage the breaker, and
if it is an emergency, encourage him to switch to another partner and
not bother you.

Step Nine: Always make sure you try to communicate with only a
handheld and a rubber. This will put out a kind of "GAY mating call":
"Well, Joe, I can hear the repeater just fine here. I wonder why you
won't meet me?" You will score if you are mobile, and with the other
ham lying in the passenger seat.

Step Ten: If you hear two straight amateurs start a conversation, wait
until they are twenty seconds into their contact, and then break in to
call them homophobic. Make sure you keep the
repeater tied up for at least three minutes. This way, once the two
have re-established contact, they won't even feel like eating dinner.

Step Eleven: Always use the National Queer Meet Calling Frequency for
personal conversations. The more interesting, the longer you should use
it. Extra points are awarded if you have recently moved to Greenwich
Village for no artistic reason.

Step Twelve: Make sure that if you have a personal problem with
someone, you should voice your opinion in a public forum,
especially a net. Make sure you give their name, call, and any other
identifying remarks. For maximum points, call Janet Reno and initiate
legal proceedings.

These eighteen easy steps should put you well on your way to
"GAY-Hood". I hope these helpful hints will save you some time in your
quest to sound like the perfect "FAG". I should also note that these
steps need not apply to solo operation, as nobody really cares
because that handheld isn't going to get out too far with just a rubber
on.

Are you interested in really learning electronics?

Don't miss this excellent set of electronics courses from
Heathkit. They cover all of the basics very well and include
books, VHS videos, software and parts and equipment to
perform many experiemnts as described in the courses.

Take a look at...
http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=89211199

Thanks a lot,
Joe

MIKEY SPINS
>For 14 years the Liberty Net has been on it's known frequency
>of 3.950 mHz.

Most of the others that USE 3950 have been on THAT frequency alot longer!!

>Amateur radio is (was) known as a hobby for gentlemen, and it's common
>courtesy to yeild a frequency of a recognised net to the net control
>operator.

True, also true is the fact that the net control operator usually "asks' if he can use it for his net when it is "Occupied" . W1WCR has never done this he Just moves in and attempts to "TAKE-OVER" the frequency. His "So Called" net does nothing but jam, harrass and heckle through out the week and the "So Called" net isn't even on then. They attempt to "Control" 3950 and harass others or run them off by jamming so that 3950 can be their "Private Broadcast" frequency.

>Not to be confused with 'gentlemen', you actively disrupt the normal use
>of the frequency by any means available to you, including death threats.

GROW UP - your spewing the same spin and propaganda they do.

>In fact, you have become so efficient at your harassment and jamming
I don't jam and harass

>that you've driven the normal Liberty Net members down to 3.948 to
>escape you and your threats.
I don't jam and harass, I have not made any threats AND "driven them down" - you can do better than that. They Go where they will voluntariliy. You think that because I or "Others" occupy 3950 that that "drives them down" to another frequency. I notice that you attempt to speak of good amateur practice but say nothing of them moving JUST 2 kHz away. Now that's not good amatuer practice - is it?
Now, you complain that the transmissions
>from 3.948 are interfering with your jamming on 3.950.
2 kHz away ?? shouldn't it be 3 kHz;.

>This is the first indication that you are loosing your grip on reality, Tim.
>
>You have threatened the lives of two net participants on the air. And there
>is concern that your extreme views and hatred is driving you mad, Tim.

You are A Damn LIAR - you know it - everyone else knows it - but spin spin spin all you want. There are enough truths and facts, recordings and documents to set you or any of the other nit members straight..

Oh C'mon Goerge!!!

Now you are turning 180 from any of your previous statements thus far!
What are you really?
1. an anyti-american terrorist?
2. a paranoid individual?
3. a foreign citizen?
4. a troublemaker????
6. someone wanting a huge amount of attention.

Frankly, I think its all of the above (but thats just me).

If you have these so called documents, PRODUCE THEM!
I will not accept any excuses (such as the ever famous:
must post these from a safe place outside the country, etc).
However, if there is some other reason why you cannot
produce them (such as the documents are still certified as
classified, or are part of an ongoing investigation, etc), then
you have no credibility with any of us.

As you can tell by my handle here, I AM a licensed ham
(originally of Phoenix Arizona and now living quietly
in central Kansas) and DAMN proud of it. I tend to be
very intolerant of folks such as yourself than make
big noises but produce little real evidence.

You are ALL BLOW AND NO SHOW

694. Stay away from LEMON FT-100 !

Newsgroup: rec.radio.amateur.misc
Date: 1999-04-10 00:00:00 UTC
From: Matdee <mattde@pacbell.com>
Message-ID: <01be8356$960fda40$LocalHost@85j82d949b943f>

Took delivery 2 wks ago of a new FT-100. I am waiting to take
my ham test next week and thought I would start off with
the new mini-radio by Yaesu. Power it up from a regulated
lab grade power supply for rcv only. The display went DEAD
and actually smelled something burning just after 1/2 hour of
use. Shipped it back to the dealer for a warranty claim - Hamradio
outlet Nv. I now hear since then many other people have had their
FT-100 crap out on them. STAY AWAY from the FT-100.
It's the radio equivalant of a Yugo or Vega. A real radio LEMON!

Matt D. N.Mex

my Grundig Ocean Boy also must have been a detector in it's former life,
because I could not find the BFO. My Sony 7600G (Saudi model) obviously was
used by T.E.Lawrence (Lawrence of Arabia), but that time using Wehrmacht
tubes RV12P2000 or (battery model only RV2,4P700). Any more questions? Helmut

Lawrence of Arabia was in the 'Great War' - 20 years before RV2,4P700
(and RV12P2000 appeared around 1938-39) which was used in the "bad
war", domestic battery valves were DF11, DAC25 etc
Tschss.....

I couldn't disagree more. I have had mine only a few weeks now, but love it so far. It has been used on both 2 meters and 50 Mhz (though not much, haven't hard wired it to my battery yet, so haven't used it at full power there.) However, I used it right after I got it in the house for a couple of days hooked to my Astron RS-35M power supply at full power on 2 meters for extended periods of time. Everyone I have talked to says the signal is very strong and clear. Of course, something could happen, but that's what warranties are for, you know.

On a side note, I have noticed that it is a bit hypersensitive to being on when I start the truck up. It is currently wire to a distribution box that I made to power my scanner and my TM-V7A. I run the V7 at full power from this busbar, it has direct 10 awg wiring to the battery. I have temporarily attached the FT-100 to this busbar, and have been using it on 2-meters there as well, but at reduced power. The reason I'm going to run new wires just for it to the battery is that I don't want a 100 watt radio sharing the same tap as a 50 watt radio, etc. However, at the moment it does occasionally give a "VFO" or "MR" error message (depending on what mode it's in) when starting the engine. The V7 doesn't, but it's really better to have the radio off when starting up anyway. A minor inconvenience bundled with what I so far consider a super rig.

Most aren't. All you have to do is leave a radio that has a metal case
unhooked from antennas and power cables. It should survive. MK

A statement, reproduced below, was recently proclaimed:

> ...Hollingsworth noted that Whiten had "apparently ignored notices from
> Official Observers," and pointed out that the volunteer OOs work "in
> accordance with an agreement between the Commission and the ARRL and in
> accordance with our statutory authority."

Really.

If this is so, then please consider the following points:

1) I would request for Corporate Officers of the ARRL to show us
proof, meaning court-admissible legal documents, that the ARRL
can legally act on the behalf of the FCC Division of the C.I.B. - in the
capacity of a chartered Non-Governmental Organization. (N.G.O.)

2) I would like to see documents which indicate that the ARRL, acting in the
capacity of a NGO (proxy?) to the FCC/CIB, is legally permitted to take an active
part in Federal Law Enforcement activities.

3) I would like to know where in the Federal Register, or Code of Federal
Regulations, it has been published that the ARRL is now a division of the
enforcement arm of the CIB. (I believe this must be published in the Federal
Register(?) Is this akin to "deputizing" a private corporation (ARRL) to undertake
law enforcement activities (FCC/CIB), much like in the capacity of bail collection
agents?)

4) Finally, I would like to know if the ARRL had to re-file it's 401-C Tax
Exempt Status with the Internal Revenue Service, and a retainment
for the same was legally tendered. This in lieu of their Organization now
apparently acting in the capacity of a NGO. Are private, not-for-profit NGO's
permitted by federal law to retain IRS Tax-Exempt status?

Show me.

I'm looking for an S-100 bus modem. Yes, honest, S-100 bus, 300 baud modem.
I want to add it to an S-100 bus system I have and add one to my display
wall at work where I have a number of S-100 items. Any S-100 bus modem you
may have in that box of wires in the shack. I'll buy it from ya. I'd also
be interested in an acoustic modem (coupler) if you have one of those.
Please reply to me directly at chipsndips@snet.net.
Thanks.

Alan

> Why is there always some contrarian ready to say "I disagree that your
> radio crapped out, mine didn't". Think about it, lid. His radio broke.
> Not yours. Learn English.

You had better not be referring to me as a lid, buddy boy. I try never to take things on these lists personally, but as it seems the second paragraph of your message points directly at me, as I have been the only one so far to write saying that my radio was fine, I AM taking this personally Why don't YOU learn english? I did not say I was disagreeing that his radio had broken, he has (had) the radio, so he knows it quit. BUT, his message was a blanket statement that all FT-100s were bad, and that simply isn't true, as my post was intended to illustrate.

THINK next time before you post such an inflammatory remark, instead of looking like the JERK you just made yourself out to be. The word "lid" is reserved for someone who doesn't follow good operating practices, and is in general a bad example of an amateur radio operator to the rest of the community at large. You don't go around using it as a way to disagree with someone, trying to inflict insult for the he** of it. If you do, and that person is not deserving of it, you had better get ready to get responded to, and most likely in a manner not NEAR as courteous as I have been.

Any further remarks you make on this issue, especially towards me, will be ignored by me, and will only serve to illustrate my point.

END.

Are you disputing that the ARRL, or for that matter...anyone,
can record and/or collect evidence which the FCC (or any other
enforcement agency) can use in a court case?

>2) I would like to see documents which indicate that the ARRL, acting in the
>capacity of a NGO (proxy?) to the FCC/CIB, is legally permitted to take an active
>part in Federal Law Enforcement activities.

First you have to identify just what active part you are
concerned about. Clearly anyone can take, record and
provide evidence of wrongdoings which are then used
by appropriate law enforcement officials to take action
against the law breakers. Many video tapes by
non police have been used to convict people of
crimes. How is acting as an OO any different?

>3) I would like to know where in the Federal Register, or Code of Federal
>Regulations, it has been published that the ARRL is now a division of the

Private individuals can notify others of apparent
wrong doing at any time. That isn't against any law, nor
is any special permission needed. I can warn a
neighbor that their constantly barking dog is a
violation of the law. I can videotape the dog barking
on many different occasions and offer that as as
testimony in a court case without ever needing police

approval or any prior approval from anyone.

>4) Finally, I would like to know if the ARRL had to re-file it's 401-C Tax

My fiscal year starts July 1. Luckily the software we use doesn't really look at the system date, but at the time in 24 hour format with a start referential. It keeps it's own customer defined calendar instead.

If you're talking about Butch, he didn't suggest anything other than a possibility that the voltage was wrong, and there were no fuses in-line to take the hit.

> And for more SATISFIED (sheah, right !) owners of the FT-100

In general, I was happy with my Yaesu FT-2400 and my Kenwood TH-27. Five years ago I sold them to a friend and bought a dual-band FT-5100. My first unit died on me. Happened about two weeks after I had made the mod to open up receive on it so I'll chalk it up to my own fault. Luckily they replaced the radio and it's been working fine ever since.
>
> http://www.onelist.com/viewarchive.cgi?listname=FT100
>
> "Yaesu, Choice of the World's Most Disgruntled Owners."

Is there really any radio out there that is perfect? My TH-27 keypad failed during the first month. The FT-2400 is still operational today. A friend has an FT-1000D that smoked a few caps on 10M FM but Yaesu replaced the board.

Tony

727. OOs and the FCC- An Open Letter

Newsgroup: rec.radio.amateur.misc
Date: 1999-04-10 00:00:00 UTC
From: David Stinson <arc5@ix.netcom.com>
Message-ID: <370FEBBA.A426AE0A@ix.netcom.com>
Source record: 146096
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy

I'm no fan of WB2OTK, but I see Big Government
attempting to invest inappropriate authority in well-intentioned
"volunteers." I think it unwise and perhaps illegal.

Mr. Riley Hollingsworth, K4ZDH, says
"Failure to take the notices seriously and to take corrective action
where possible will not be tolerated by the Commission,"
and he says:
"The volunteer work of these Official Observers is a critical
element of the Commission's enforcement program,"
adding that failure to act on an OO notice could lead to fines
and other sanctions."

Clearly, Mr. Hollingsworth has sanctioned OO's as formal and
official extensions of the enforcement program.
They have been defacto deputized.
Defacto deputization in the absence of an executive order or
national emergency may in itself be illegal;
I don't know but I'd bet on it.

It is much more important to realize that
the OOs, while well-meaning, have no formal training in
law enforcement. They have no formal training in FCC enforcement
procedures. They have no formal psychological testing to weed out
people with "wannabe-cop" and "ham radio god" mental problems.
They do not even have any formal training in the laws and regulations
Mr. Hollingsworth is insisting they help "enforce" (his term).

The analogy of one neighbor calling the cops on another neighbor's
barking dog is incorrect. The local police may accept his reports,
but they do not deputize the reporter and make him a formal part
of law enforcement when he has had no formal training.
They do not take the word of the complaining neighbor and
issue an arrest warrent on that basis.
They investigate for themselves. They enforce the law themselves.

I don't think the notices handed out by the Amateur Auxiliary (OOs),
which Mr. Hollingsworth has said are to be taken as actual,
official enforcement documents, have a prayer of
making it through the first serious court challenge.

The FCC is tasked with enforcement. There are federal statues
defining what qualifies a person to be a formal law enforcement
operative and I'd bet a buck not one OO qualifies. I certainly
don't want some old man with a chip on his sholder writing me

a half-baked OO report which is then going to be viewed
by the FCC as an official enforcement document.
That's ridiculous and I'd bet another buck it's illegal.

The ARRL should be ashamed of its complicity in this
and abuse of the honest efforts of the OOs.
They are ADVISORS, not Law Enforcement Officers.
Feeding them fairy tales about how they are now "Arms of the Law"
is a direct abuse and affront and I, as a long time ham, resent it.

Sincerely,
David L. Stinson
arc5@ix.netcom.com

(Copied to Mr. Hollingsworth. I believe him to be
a sincere and honest man and do not fear to speak my mind to him.)

And further, there is a Memorandum of Understanding (MOU) between the
FCC and the ARRL detailing the agreement to utilize information provided
by OO's in prosecuting cases. Check with your local Division Director,
or Rod Stafford for details.

Excerpted from the Communications Act:

Section 4 [47 USC Section 154]. Provisions Relating to the Commission

(f)(4)(B)(i) The Commission, for purposes of monitoring violations of any provision of this Act (and of any regulation prescribed by the Commission under this Act) relating to the amateur radio service, may --

(I) recruit and train any individual licensed by the Commission to operate an amateur station; and

(II) accept and employ the voluntary and uncompensated services of such individual.

(ii) The Commission, for purposes of recruiting and training individuals under clause (i) and for purposes of screening, annotating, and summarizing violation reports referred under clause (i), may accept and employ the voluntary and uncompensated services of any amateur station operator organization.

(iii) The functions of individuals recruited and trained under this subparagraph shall be limited to --

(I) the detection of improper amateur radio transmissions;

(II) the conveyance to Commission personnel of information which is essential to the enforcement of this Act (or regulations prescribed by the Commission under this Act) relating to the amateur radio service; and

(III) issuing advisory notices, under the general direction of the Commission, to persons who apparently have violated any provision of this Act (or regulations prescribed by the Commission under this Act) relating to the amateur radio service.

Nothing in this clause shall be construed to grant individuals recruited and trained under this subparagraph any authority to issue sanctions to violators or to take any enforcement action other than any action which the Commission may prescribe by rule.

No, OO notices are NOT official enforcement notices. What they do is build a case if the behavior persists. He is on record that his improper operation has been heard and noted. If the behavior pattern persists, then the OO and the OOC for that area work with the League HQ in building a case to give the FCC. This case must meet rigid standards laid out by the League, including detailed logs of time and date, if possible, recordings of the on-the-air behavior that is an alleged violation, and corroborated by several other OO's. The FCC then either chooses to act, or not act on the package presented to it. It is entirely their choice. In the past, unfortunately, they often chose not to act, even in blatent cases of misconduct. Would continuation of that pattern be your preference. I sure hope not. The alternative is for them to act when they get the OOC package from the League. That is precisely what Riley is doing right now, and it is having a tremendous effect on the bands, and on the moral of the OO's who labored for the last decade, usually to only see their efforts dropped when it hit the Commission. Talk about discouraging. Many OO's simply dropped out of the program because of a lack of support from the FCC. Hopefully, that will turn-around again now. The ARRL OO program is NOT an out of control, rougue cop operation. It is well defined, controlled and managed, and probably the only thing between civilized ham bands and out-of-control chaos on 75.

I hope you're right, Paul. No one would be happier then me
if I've read Mr. Hollingsworth wrong on this one. I have no
quarrel with an honest OO advisory as an advisory and would
certainly take one seriously. However, I personally know
of a ham (several years ago) who was asked to leave a club
because of being a "jammer." There were two club members who
"had proof" it was him. Trouble is, they were wrong. I know-
I was at his shack during one of the alleged "jamming" sessions
and he wasn't even on the air. The real guy, whom I personally
believe but can't prove was in the same neighborhood, was
never caught. My friend is still occasionally accused of being
a "jammer" all these years later. What's to keep an honest,
but honestly *wrong*, OO from issuing a notice that will then
be taken as gospel?
I truely hope you are right and I am wrong on this one.

>Of course, you personally have nothing to worry about, David.
>Far be it from a man of your character to cause
>intentional problems in the ham bands...
I've tried to make some positive contributions in my 27 years
on the ham bands, but I also have my share of black marks and sins.
I very much take to heart Mr. Hollingsworth's admonition to
"go and sin no more."
But if I'm going to be called on the carpet for my sins,
I want it to be by someone who
knows about that which he speaks and doesn't have a personal agenda.
To quote another sinner in one of Doyle's Sherlock Holmes
adventures, "If I am in the hands of the law, let things
be done in a legal way" ;-).

It isn't. See Section 4(f)(4)(b) of the Communications Act,
which I posted today in response to someone else's message in
the same vein.

>Clearly, Mr. Hollingsworth has sanctioned OO's as formal and
>official extensions of the enforcement program.
>They have been defacto deputized.
>Defacto deputization in the absence of an executive order or
>national emergency may in itself be illegal;

You lose - See Section 4(f)(4)(b) of the Communications Act.

>It is much more important to realize that
>the OOs, while well-meaning, have no formal training in
>law enforcement. They have no formal training in FCC enforcement
>procedures. They have no formal psychological testing to weed out
>people with "wannabe-cop" and "ham radio god" mental problems.
>They do not even have any formal training in the laws and regulations
>Mr. Hollingsworth is insisting they help "enforce" (his term).

The OOs only provide information. The pros at the FCC sift
through it to determine its validity (that's Riley's job) and
are the only ones who can issue enforcement sanctions
(penalties). The OOs can only send Advisory Notices which are
not sanctions.

Those amateurs who do not heed Advisories or at least check
them out to see if they are applicable are playing with fire if
they get caught with the hand in the cookie jar by the FCC.

>The FCC is tasked with enforcement. There are federal statues
>defining what qualifies a person to be a formal law enforcement
>operative and I'd bet a buck not one OO qualifies.

You lose. At least one OO whom I know is retired FBI and two
are retired police managers (one a chief). And that's only
locally.....

Check for loaded weapon before firing....

> I certainly don't want some old man with a chip on his sholder
> writing me a half-baked OO report which is then going to be
> viewed by the FCC as an official enforcement document.

If it's half-baked, take it for what it's worth. If it details
something that you did and shouldn't have done (or vice versa)
be foreworned that "you are in radar range" and you've had your
one free bite.

> That's ridiculous and I'd bet another buck it's illegal.

You lose again. See the Comm Act section quoted. It defines
just what the volunteer can and can't do and what the extent of
notice is.

I don't know, Paul... can you tell me where the FCC itself-
not the ARRL proxy-
has undertaken formal training of the OOs? If they have not,
then the section you're quoting does not apply and
we're right back to defacto deputization.

> The OOs only provide information. The pros at the FCC sift
> through it to determine its validity (that's Riley's job)
I hope you're right. Mr. Hollingsworth's own words
say the Commission views these documents as official
enforcement documents, not "reports" or advisories.

> Those amateurs who do not heed Advisories or at least check
> them out to see if they are applicable are playing with fire if
> they get caught with the hand in the cookie jar by the FCC.
You're again saying that the "advisories" are a part of the
official enforcement procedure. That's out of bounds.

>... There are federal statues
> >defining what qualifies a person to be a formal law enforcement
> >operative and I'd bet a buck not one OO qualifies.
>
> You lose. At least one OO whom I know is retired FBI and two
> are retired police managers (one a chief). And that's only
> locally.....
That's why I only bet a buck! And I'm glad to hear there
are a few OOs trained in law enforcment. That is still not
FCC training in enforcement of their regulations, so it's
still a moot point. Until the FCC formally trains the OOs,
there is no sanction from the Communications Act for this situation.

> If it's half-baked, take it for what it's worth.
I can't! The FCC has said *it* will take it seriously!
That's the rub.

I want to be on your side in this Paul...
I just don't want to see anyone else be
charged with a crime on the basis of a claim made by
unqualified individuals. When the FCC says it will
take enforcement action based on such claims,
people should be very upset by that.

Dear Swatch AG:

I object in the strongest possible terms to your use of the amateur radio service for promotional activities. My wife, in common with a lot of people of her age, is 39. For how long are we to put up with these things? I myself am nearly 35 and am quite mad, but I do enjoy listening to the BBC World Service. If this project goes ahead unabated... Pearl Harbor... dark days of the war... Teapot Dome scandal... Rosenbergs... Watergate... young hippies roaming the streets, raping, broadcasting on ham satellites,looting, killing. Why can't you do something morally uplifting, like promote the human body? There is nothing embarrassing or nasty about the human body (except perhaps the intestines and the bottom).

Yours, etc.

Steve Johnston (Mrs)

Some interesting work is apparently being done in the area of single-cycle pulse-based communication in extremely wide bandwidths, on the order of 1-2 GHz. See http://www.time-domain.com, particularly the "Impulse Radio Overview" paper referenced at http://www.time-domain.com/technology.html. I hadn't heard about this stuff before it showed up as a news item on Slashdot. Has anyone else looked into it?

While the transmission technique (pulse-position modulation) is simple to understand, there doesn't seem to be any information on the site with regard to how to lock a receiver onto a low-power, low-duty-cycle pulse train in such a wide bandwidth. Anyone have any thoughts on how a "time-domain discriminator" might work?

This sounds like something out of the April issue of QST, but evidently it's 100% on the level, made practical by the advent of modern high-stability timebases at economical prices. It actually may not be much of an exaggeration to suggest that this family of techniques represents the End of Radio As We Know It.

Everyone is so focused on January 1, 2000 that folks have forgotten that many companies and governments operate their budgets on a FISCAL year, not a calendar year. This means the FY 2000 has already started for those on a 1 April FY. On 1 July 1999, LOTS of people will start FY 2000 and the federal government FY 2000 starts on 1 October 1999.

Has anyone heard of any company with a 1 April FY experiencing any problems? At least one of the local governments that I deal with uses 1 April and they are now into FY 2000 with no problems at all.

Sorry to spoil the fun, but this thread has gone far enough.

It was an April fool hoax.

Absolutely nothing. But one OO report by itself carries virtually no weight. Without an audio tape, and no other reports from other OOs, I don't think the report would go very far. Indeed, I suspect an OO who tried to sandbag someone would probably be stripped of his credentials very quickly.

In other words, knowing how to signal SOS using lights saved the fishermen.
They didn't use radio at all, and they didn't even use anything other
than those two letters of Morse.

This may be a good argument for teaching everyone how to send and
recognize SOS in primary school. I don't see how it's a good argument
for knowing the entire Morse code alphabet for use in radio transmisssion.

I never got any response on my first mail, so here I try again.

Are there anyone on this group who are using, or has used, the magnetic loop antenna from MFJ (MFJ 1782).
If so, I would appreciate your comment. I'm planning on putting one up on my balcony, but are they worth the money ?.

Thanks.
Jesper

I don't believe that you will completely remove the RFI from your station.
ALL computer generate a certain amount of RF. This is accepted by the FCC
in their test labs. One way to REDUCE RFI is to purchase Type "B" computer
equipment, (motherboard, power supply/cabinet, drives, etc.) and install it.
The normal home use computer equpment does not have to meet the min.
requirement for an office. You may find more info in about any computer
magazine. Hope this helped a little. Also, remember, RF can't be grounded!

SB DX @ WW $OPDX.404
Ohio/Penn DX Bulletin No. 404

The Ohio/Penn DX PacketCluster
DX Bulletin No. 404
BID: $OPDX.404
April 12, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, KP2BH, N6HR, WA6KBL, N7WDX, K8YSE, AH0W, BA1DU, DJ5AV & DX News Letter, EA5FID, G4BUE & DX News Sheet, HJ3PXA, LW8EZU, OK1JR, PP8EB, PS7AB, RA3DQ and VE7TLL for the following DX information.

3B9R UPDATE. The Rodrigues Island DXpedition is now QRT. They were expected to go QRT as of 2200z, April 10th (this is when their license was to expire). Frank, AH0W, reported last Thursday that he hoped the team would end up with 40K QSOs in the log by the end (they were 35K at the time of the report). I am sure Frank will provide a DXpedition wrap-up upon his return to the states.

5N99, NIGERIA. Stan Matejicek, OK1JR, informs OPDX that he has been in Lagos since March 31st, on a short business trip. He was able to receive his licence from NARS (The Niregia Amateur Radio Society - he is a Life member) and has received the callsign 5N0MSV. Stan will stay here until the end of the May. He is working/operating from the Embassy of the Czech Republic. Look for him to be on the bands during their afternoon time (Stan states, "We are one hour +GMT). He was spotted this week during various times (between 1530 and 0000z) on 10/12/15/17/20/40 meters. Stan mentions 40 and 30 meters look like very interesting bands during the night, however not very many QSNs have been reported. He should be able to produce an excellent signal on 20/17/15/12/10 meters using a TS-950SDX and a 1K amp into a 12 element Log-Periodic. SPECIAL NOTE. Stan states that he is now using the 5N99 prefix until the end of April because the 1999 World Soccer Championship (for young played through the age of 21) is being held in NIGERIA. On May 1st, Stan will go back using his callsign 5N0MSV. QSLs go via his home callsign OK1JR, Stan Matejicek, Moskevska 1464 Praha10, Czech Republic. Stan will be here for the next two months and has promised to send all direct QSL cards back as quickly as possible during June and July of 1999.

8J1, ANTARCTICA. The "DX News Letter" reports that the Japanese club station 8J1RL is situated on Ongul Island (IOTA AN-015). OPDX has found this station active on 21246 kHz between 1600-1630z. QSL via JARL bureau.

9N7, NEPAL. Charlie, K4VUD, who is currently here, has had his callsign changed. Look for him now to sign 9N7UD instead of 9N1UD. It has been reported that foreign visitors are now designated with a "7". Meanwhile, Charlie has been active on 20/15 meters. Look for him on/around 21295 kHz between 1400 and 1500z, and on 20 meters CW/SSB (14022/14200) after 0130z. QSL via K4VUD.

DX CONVENTION. The Lynx DX Group has announced that "Convention'99" will be held May 7-8th, at the Rocas Blancas Hotel in Alicante, Spain. Anyone interested in joining them may contact Juan, EA5FID, from the Organization Committee, via E-mail at: ea5fid@jet.es
Also visit their Web site at: http://web.jet.es/lynx

EG, SPAIN. There has been a lot of questions being asked about the EG prefixes being used by Spanish operators, and OPDX would like again to point you to OPDX.402 (if you do not have it, send an E-mail to: opdx-request@nshore.org -- Put the word archive on the subject line -- and the following command in the body of the text: get volume99/402.0) Basically, the EG prefixes are to celebrate 50 years of the URE. Those callsigns will be used throughout April, 1999, and there is even an award available. For more details also check out the Web page at: http://www.ure.es/aniversario/diploma.html

IOTA NEWS.....
NA-051. On April 10th, VE7QCR and VE7TLL were active as VE7ISL/p from another new Canadian Island, Maude Island. This was a one day operation only. If you were lucky to work them, QSL via VE7TLL and for all VE7ISL operations.

NA-169. Hillar/N6HR and Elsie/N7WDX report that they have been able to reach a Memorandum of Agreement with the Makah Nation Tribal Council, and that they have received permission to land and operate from the rare Tatoosh Island. The island off of Cape Flattery in Northwest Washington is a sacred "Makah Indian" burial ground. They state that the full report will be released at the IOTA Meeting in Fresno. They did mention that they will be on the air during the IOTA Contest July 24/25th with at least two KW stations giving out NA-169 QSOs to the deserving. Look for more details to follow.

SA-027. Look for PY5B (SSB) and PV5L (CW) to be active from Arvoredo Island (DIB 46), May 13-17th. Look for them on the IOTA frequencies and Brazilian nets. QSL via PP5LL, Jayme Lira, PO Box 08, Florianopolis/SC, 88010-970, Brazil. E-mail address: pp5ll@netplan.net

SA-047. Look for PR5B (SSB) and PT5L (CW) to be active from Mel Island (DIB 34), April 21-28th. Look for them on the IOTA frequencies

and Brazilian nets. QSL via PP5LL, Jayme Lira, PO Box 08, Florianopolis/SC, 88010-970, Brazil. E-mail address: pp5ll@netplan.net

QSL INFO AND NEWS......
ZY8A is QRT now! Eduardo, PP8EB, reports that the Anavilhanas Archipelago DXpedition made some 2320 QSOs on SSB and CW. He would like to thank the people that put them on the DX Clusters and for making contacts with them. A special thanks goes out to IBAMA - the Brazilian Institute of Enviroment and Nature, Brazilian Army and Brazilian NAVY that led them to the archipelago by ship. The correct way to QSL via PP8KB at: P.O. Box 691, Manaus Am Brasil, Zip 69011-970

FT5ZH QSLS. Jeffrey, WA6KBL, (for F6KDF, the Lyon DX Gang) reports that the first 2000 cards have been filled out and were sent to the European DX Council to be stuffed into envelopes along with the addresses to go onto the envelopes. They should be sent out very soon, but this is now out of the hands of F6KDF members so they don't know precisely how long before they are mailed. The rest of the cards have been printed in Germany, and there was a misunderstanding about the transport of these boxes of cards to France. This has been cleared up this week, and they are on their way to the F6KDF radio club. The F6KDF group is sorry about the delay but rest assured that everyone will get their cards. Jeffrey states that he will be bringing one card to the Fresno DX Convention if anyone is dying to see one.

BY1PK, the official station of Chinese Radio Sports Association, participated in last weekend's Japan International DX CW Contest. The operators were BA1AA, BA1AB, BA1DU, BA1OK, BA1RB and others. QSL via P.O.Box 6106, Beijing 100061, CHINA.

SAD NOTE. OPDX was informed that well known DXer, William Elasmar, HK3RQ, has recently become a "Silent Key, SK", after a long and stressfull coma. HK3RQ was very well known to many old timers who had their first HK QSO confirmed through his activity on SSB and CW. OPDX sends out our deepest sympathy to the family and friends.

SPECIAL EVENT. The Cadena El Conquistador, Inc. (NP3P) announces that the XXII Vieques Cultural Festival will be held from April 16-18th, at the Fort Count Mirasol. The Vieques Cultural Festival is sponsored by the Yaureibo Cultural Center of Vieques in coordination with the institute of Puerto Rico culture and the Municipal administration of Vieques. The fort was built in 1845 by orders of the Spanish governor of Puerto Rico, Rafael Aristegui y Velez, better known as Count of Mirasol. The sponsoring Radio Club of the S. E. is the CADENA EL CONQUISTADOR, Inc. (NP3P). The four main frequencies of operation will be 28350, 21350, 14300, and 40 and 80 meters. The starting time is 1600z on April 17th and the ending time is 1600z April 18th. The first 500 stations to contact NP3P will get a certificte. To request a certificate send QSL to:
CADENA EL CONQUISTADOR, Inc. (NP3P), P. O. Box 161, Fajardo, PR 00738-0161
For more information and details, send E-mail to: np3p@hotmail.com

SPECIAL EVENT. The Argentina hams have plans to be active in celebration of the 75th anniversary of the contact between Carlos Braggio, r-CB8, in Buenos Aires, Argentina, and Ivan O'Meara, z-2AC, in Gisborne, New Zealand, that established the world record of distance in 1924. The Radio Club Argentino, LU4AA, will celebrate this anniversary between May 16th and 23rd. The following will be applied:
1) The official station of RAC will use during this period the special callsign L75CB; every QSO with this station will be confirmed with an special QSL card.

2) On May 21st (the day of the anniversary), L75CB will transmit continously (24 hours), on CW, the mode used by Braggio and O'Meara during that contact. Stations contacting L75CB on this mode that day will also receive an award.

3) During the period between 0000z, May 16th, and 2400z May 23rd, every amateur radio station in Argentina is allowed to use a Special International Prefix. Stations beginning with LU will use L2 (ex. LU4AA will use L24AA). Stations beginning with LW will use L3 (ex. LW8EZU will use L38EZU). Stations beginning with AZ will use L4 (ex. AZ1AAA will use L41AAA).

L75CB QSLs are via LU4AA by the Bureau or P.O. Box 97 - Zip Code 1000 Buenos Aires, Argentina, For more details or questions/comments send an E-mail to: lu4aa@lu4aa.org (The E-mail address of the RCA, LU4AA) You can also visit LU4AA's web page at: http://www.lu4aa.org

THE ENDING OF THE DXNS. It was announced this week, in a letter from the RSGB dated March 29th, that effective June 30, 1999, "the RSGB will no longer be producing the RSGB DX News Sheet. The decision was made by the RSGB's Management Committee on the recommendation of Peter Kirby, G0TWW, General Manager in the face of a diminishing number of subscribers and the existence of a number of packet and Internet alternative sources of DX information. All inquiries about the closure of the DXNS should be referred to Barry Cooper, G4RKO, Commercial Manager at RSGB HQ." Your editor would like to say that the DXNS was one of Europe's finest printed DX bulletins, and I will sadly miss the change of DX information with DXNS's current editor Chris Page, G4BUE.

ZS, SOUTH AFRICA. Victor, RA3DQ, informs OPDX that he and another amateur Oleg, UA3HK, are planning a 2 week trip to Cape Town (ZS1) from April 16-29th. They plan to be on the air 80-10 meters (Yaesu FT-900) on CW/SSB. They are currently looking for Cape Town HAMs for possible assistance!
Victor can be contacted at: ra3dq@qsl.net
Also, visit Victor's Web site at: http://www.qsl.net/ra3dq/

Much of boot camp is dedicated to teaching recruits how to kill
an enemy with bayonets, knives, or even their bare hands.

Oh brother, what drivel from an indivdual who didn't go to boot camp.
You CW idiots are now equating Morse Code with sighting down a high
power rifle and taking a man's life. It kind of cheapens the dead
soldiers' lives, whatever side they were on. Please use some other
analogy.

From: Tim <ka8ddz@eaglequest.com>
Message-ID: <3710F0BC.33C96E1F@eaglequest.com>
Source record: 145925

Tony, I've run both tri-banders and 3 elecment monoband yagis, IMHO the difference isn't that much at least not from an operating point of view, while the numbers may show better gain, directivity etc. I have not found a significant difference at the receiving stations end with respect to signal, at least not enough to warrant putting up 3 antennas when I could run one. You might want to take a good look at a log periodic too. Not sure why but they seem to be very popular outside the U.S but you see very few of them here.

>(That of course contradicts the definition of "archaic.")
>73, Jeff KH6O (ex WH6U, KH6OO, et cetera)

That "we" is not my mouse and I, but rather all of us who distrust
NCI's motives. You can't deny they're working to eliminate the code
tests (because they [falsely] believe that code is archaic), so why
should it bother you to speculate that they would naturally work to
eliminate use of code (because they [falsely] believe that code is
archaic). You yourself won't even rule out that that's a possibility.

Ponder the title they've given themselves -- NCI, not NCTI.

73,
Jeff KH6 Over

True, but paying attention to spelling and grammar adds credibility to your comments. Your choice of words and how you use them are the only method we have available to measure your intellect and logical reasoning skills. (I have to admit, though, that it is pretty obvious that you're purposely "playing dumb" -- analyzing the full header of your posts exposes identical "footprints" of someone else on r.r.a.m who is posting without any spelling errors.)

Every citizen should report criminal activity to authorities. Citizens who spy on their neighbors and report every infraction are like snitches and are usually detested by the neighborhood. Citizens routinely attempting enforcement by playing cop can be dangerous to others and themselves. (Citizens in Arizona have almost the same powers of arrest as do the police. Fortunately most are unaware of it and call the police who determine if an arrest is appropriate.)

Didn't Germany make use of a citizen snitch program before the war...

Snitches are like toilet paper. They're unpleasant when used, but necessary for the job (of law enforcement). The problem is the slippery slope. We already have one overzealous ham on the newsgroup that takes it upon himself to play ham cop and warn others of their minor (ID time) violations. Give him a little real power as a FCC snitch and boy he could really feel important, and of course make others life very rough. Most of us speed and most of us never get caught. Imagine if we allowed citizen patrols to turn in speeders. Even if the violation was unjustified, there would be your name on the records. How would you look when license renewal time comes up? Well he's probably guilty, they would say, if not why is his name here? I am all for the use of police snitches in *specific* cases that cannot be solved in any other way. But to give blanket authority to a large group of hams to play ham cop is a dangerous precedent. How would you like old Dick watching your every move Cecil, and just waiting for you to make that one mistake (like using your IC706 on CB). Heck, if they give him snitch status tomorrow, he may turn you in just from your admissions here on usenet...

Brian wrote:

> Its coded in Part 97. Why do you just now raise an objection?
Please quote the relevant sections of Part 97 that deputize OOs
as federal auxillary enforcement officers, as defined
in the Communications Act.

> Riley is ultra-cool. Don't say nuthin bad about Riley.
I like him just fine. But he's not the boss. His boss
gives him the policy guidelines. I take issue with
some parts of this policy, not Mr. Hollingsworth.
I have stated before that I believe him conscientious and sincere.

> Hmmmm. The amateur radio service is federal.
>I don't see any states out
> there issueing amateur radio call signs.
??? Don't understand how this is relevant.

>OO's are sanctioned in Part 97, not by Riley.
>The regulations say that we are self-policing, furthermore,
> the regs say that we have OO's (deppitty dawgs, if you will).
Again: Please quote the relevant sections that sanction
OOs as auxiliary enforcement officers. If it's there,
it's in direct conflict with the Communications Act,
which requires FCC (not ARRL proxy) training for any such office.

> They are all tested, licensed amateur radio operators.
So are WB2OTK, Walter Barstool, Brain-dead Dave, etc. etc.
That sure doesn't qualify them to make charges against people.

> They enforce nothing.
That's not what Riley says. He said the commission will
take action on the strength of OO notices and explicitly
gave them standing as legal enforcement documents.
What's to misunderstand? It was a very clear position.

> Hmmmm. Show me an OO court and I'll jump up and down
>and scream right along with you.
Have you been listening??

> Part 97 says we police ourselves.
>Part 97 also provides for Official Observers.
Even if it does, that's NOT THE POINT!
They are OBSERVERS. They are ADVISORS.
The FCC is now giving them status as (untrained) ENFORCEMENT OFFICERS.
This is out of bounds on several counts.

> I'm sure the FCC regulatory authorities and Mr Riley
>have the ability to
> discern whether an OO report is valid or not.
Why are you sure? If the word of an OO with a simple
Hallicrafters S-120 and a cassette tape recorder is all that
is needed to determine who is guilty....
then exactly why does the FCC need a large staff,
a huge, expensive monitoring system and computers
to crunch vectors and voice prints???
Is it some pork barrel project, or is this big organization
and all this equipment actually required to make a case??
The answer is, of course, that the OO CAN'T be sure!
He hasn't the training or the equipment.
He can only ADVISE. Any other position means the
FCC has wasted taxpayer money and time on an unneeded system.
(I'll hold my breath until they admit that, OK?)
And when the FCC enforcer says -explicitly-
that the commission will act on that OO report just
as though it were a report from a trained,equipped field officer--
we've got a problem!

Let me say it again... Please listen!
He did NOT SAY that the reports would be used to
help them make a case. He did NOT say they would
investigate once they got a report.
LISTEN CLOSELY----
He CLEARLY SAID that the commission would act on the
strength of OO reports! He DEMANDED formal
replies that are LEGAL TESTIMONY in a CRIMINAL INVESTIGATION
be made to OO reports of UNTRAINED VOLUNTEER OBSERVERS.

Don't you get it??

God....Why do I bother???

"Well, it won't happen to me.
"What do I care if someone gets nailed by mistake.
Won't happen to me...."
Nice attitude.
How Very 1990s.
Bet you change your mind when that first OO card shows up.

sigh....

What would be the FCC's incentive for eliminating the use of code?
Indeed, how could the FCC legally eliminate the use of code? and why?
Code is presently allowed on ALL HF ham frequencies. Why would that
ever change?

So even if NCI declared their support for eliminating the use of code,
besides losing half their membership, there is no possible way for
NCI to convince the FCC to eliminate the use of code. You are beating
a dead horse that was never even born.

Clean,

Tubes 80% or better Swings 500 pep on YS-60 peak meter. $250.00

Heathkit SB201 10-20-40-80 Linear amplifier, Fresh 572B Tubes, Manual, Works great $375.00

HTX202 RadioShack 2 meter handheld, Speaker Mic, Box, Manual, Wall charger $100 SOLD

Crate Stealth 60 Tube Guitar amp, In great condition. Manual $200.00

Yamaha 12 string acoustic, beautiful guitar with case!! $500.00

Yamaha RX11 Drum Machine $100.00

Rack mount Lab power supply, Power Ten Inc. Model 3300D-10010, 0-100 VDC, 0-10 Amps,
Voltage and current LCD read outs, Clean $200.00

Bird 4391 Analyst, Microprocessor controlled CW power / Pep Power / Modulation /
and more, uses bird 43 slugs. Carrying case, manual, $400.00

Bird slug 50-125 Mhz, 5,000 W Peak mode / 1000W Max average Power $60.00
Like new, low use

Bird slug 50-125 Mhz, 10,000 W Peak mode / 1000W Max average Power $60.00
Like new, low use

Siltronics model 90 VFO -6 $85.00 Clean

Alan CTE HQ135 25-29 Mhz Wattmeter 10/100/1000 watt scales, illuminated, Low use like new in box $40.00

Alan CTE 36" apartment dwellers antenna, adjustable swr, Low use Like New $25.00

Alinco DJ-S11 Mini 2 meter hand held, in box, low use, slight scratch on front $65.00

Cushcraft R5 five band Vertical, uses short counterpoise radials $150.00

Radio Shack Digital SWR/Power meter RMS and PEP 0-30 Mhz $30.00 SOLD

Watts 0-160 PSI precision Regulator & Sub-regulator filter block assemblies NEW $100.00 Ea.

Recoton CBM430 Amplified Desk Mic $20.00

Mirage B3016 2 meter FM/SSB amplifier, with preamp, 30 in 160 Watts out. $200.00 Sold

SBE Trinidad AM Base, Excellent condition with Manual and D104 Mic $120.00

Realistic TRC459, AM/SSB 40Channel CB ,unique flat console design, dial a watt, Stock Mic. $130.00

Sears Road talker 40 AM/SSB 40 channel Mobile, In box, Low usage, No Manual, Clean No Mods $100 SOLD

Sears Road talker Base/Mobile 40 channel AM/SSB, In box, Low usage, No Manual , clean, No Mods $100 SOLD

Uniden HR2600 with chipswitch modification, 575-M6 mic, Manual and chipswitch manual $260.00 SOLD

Yaesu FRG 7 SW receiver, good condition $160.00

Ameritron AL 811 HF Amplifier uses 3 811 tubes, minor flaw on face plate, 7.5 to 8 on condition, works perfect, full output with manual $400 SOLD

Complete ammunition reloading set up, 2 Presses, scale, several dies, tumbler, Case trimmer, books, Brass, 2 powder drops, trickler, A whole lot of stuff ...dies for 223, 45 long colt, 7mm Rem mag, 30-30, 308, 22 hornet, 30 carbine and others $320.00

Craftsman compressor 4 HP 30 Gal, In good condition, with hose and regulator/seperator setup $200 Local pick up only in the Simi Valley Ca. area

Roland 4 track multi-tracker recording system, Higher end model, Nice mixer/EQ section. Not sure of the model #, must check in storage. $300.00 Clean condition, with manual

* I buy, sell and trade vacuum tubes

Will possibly trade above items for:
Drake equipment and accessories
Bird 43
Bird HF slugs
Digital camera
Yaesu Y0 100 scope
Yaesu FV101 VFO
Electro Voice Mics
Johnson Viking II with Johnson VFO
Collins 30L1 in good condition
Collins R390A
MFJ antenna analyzer. The one with resistance read out
Drake RV-7 VFO
Power supply for the Drake TR 7
Yaesu FT-7 in very good condition
or ??? what do you have?
Astatic 10DA SSB mic head
Astatic Night Eagle
Yaesu FL2100B

JPG Pictures available on some items *

--The stuff that will never make it to the bench for repair--
Below sold as is:

Siltronics Albatrose 23 channel AM/SSB mobile with big ol venier slider knob $25.00 Works, Occasional Intermittent TX

Pierce Simpson Bengal AM/SSB 23 channel base SSB works AM doesn't $30.00

Zachery T AM Base No TX week RX $30.00

President Washington w/ freqs and slider (Worked perfect before UPS got ahold of it) Came back from
Hawaii , No TX or RX, Possible damaged loop mixer crystal $60.00 SOLD

Robyn tiger 23C Needs Audio transistor $10.00

Messenger 250 23 channel base CB, beautiful gold and brown, good cosmetic condition, Possible power supply problem $40.00

Icom IC230 2 meter parts radio, No Knobs $20.00 TX works.

*All items do not include shipping.
*Shipping Via UPS ground unless otherwise stated
*All items guaranteed to work unless otherwise stated.
* Most larger items are professionally packaged and double boxed.
* Buyer splits packing charges.
* Most prices negotiable.
* Use of 10 meter amps on 11 meters is illegal.
* References available upon request.

Well, let's see....you code bashers have consistantly made
totally ridiculous charges that you can't support against
code advocates...Then
You spent a few weeks wrigling away from your admissions of
rules violations on the air - and was that just the few that
you felt like talking about? Maybe you'd just have to call
it payback time.....You really wouldn't want to screw up on
the air and let it be heard, would you?...nor engage in one
of your favorite pastimes of "talking to those guys" on your
IC706. You can bet a few of your "pals" have Riley's fone
number tacked up over the rig... (:-P}

No need to falsify anything at all. Just the facts, Ma'am

> > tests

True ... NCI is working to eliminate unnecessary Morse code tests.

> > (because they [falsely] believe that code is archaic)

Your opinion is your opinion ... not everyone agrees. Many DO
believe that Morse code is archaic ... the tendency towards
that belief seems to concentrate towards the more technically
knowledgeable and up-to-date end of the amateur spectrum.

> > , so why
> > should it bother you to speculate that they would naturally work to
> > eliminate use of code

Speculation leads you to ASSume "facts" not in evidence, Jeff,
with the result that you come to the wrong "conclusion."

> > You yourself won't even rule out that that's a possibility.

NCI, and its directors, including myself have repeatedly
stated that we have NO intention of EVER seeking any sort
of ban on the use of Morse by those who voluntarily choose
to use it ... you're making a "leap" from "I don't like
horse meat." to "All horses should be slaughtered to the
point of extinction." ... it just doesn't logically follow
that you can "deduce" the second statement from the first.

> What would be the FCC's incentive for eliminating the use of code?
> Indeed, how could the FCC legally eliminate the use of code? and why?
> Code is presently allowed on ALL HF ham frequencies. Why would that
> ever change?

It won't change ... nor is it NCI's goal ... the "hidden
agenda" is either an unreasonable, paranoid knee-jerk
reaction on Jeff's part, or simply an attempt to generate
FUD/flames against NCI.

> So even if NCI declared their support for eliminating the use of code,
> besides losing half their membership, there is no possible way for

> NCI to convince the FCC to eliminate the use of code. You are beating
> a dead horse that was never even born.

Jeff is good at that ...

You ask for the superfluous. The FCC delegates authority to OOs. Thus it is.
It doesn't take an act of Congress. That is what Exexutive agencies do, after all.

790. RS HTX-202 Repair Question

Newsgroup: rec.radio.amateur.misc
Date: 1999-04-11 00:00:00 UTC
From: "David E. Lafferty" <dplaff@alltel.net>
Message-ID: <7erei6$o4n$1@news1.alltel.net>
Source record: 145957

I've got a problem with my Radio Shack HTX-202.
The BNC connector is loose and I have intermittent
contact on both TX and RX. I removed the back plate
but am unsure what all else needs to be removed so I
can try to get to the problem. Can anyone advise me
of what all needs to be removed?

P.S., tightening the nut on the BNC connector will not
correct the problem for more than a few hours. I'm
going to have to get inside and see where the problem
is.

Thanks..
David

797. NEWBIE COMPUTER RFI QUESTION

Newsgroup: rec.radio.amateur.misc
Date: 1999-04-11 00:00:00 UTC
From: Jim Long <longj@erols.com>
Message-ID: <37116409.1ABEEB9A@erols.com>
Source record: 145964
Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.misc

Hi folks,

I am having some computer RFI problems and am hoping for some help from the group. For the sake of disclosure, I AM NEW AT THIS! I am studying for a tech-plus ticket,
so my correspondence may not meet your technical expectations. Please bear with me.

I had been experiencing tremendous RFI when operating my computer and my ICOM
IC-746 at the same time. The RFI had been the worst on 160, 80,40 and 30m,
but was present on all bands. To aleviate the problem, I've run two 8' ground rods, located seperately, one for the antenna and one for the radio and other shack equipment. #4 ground wire runs from one of the rods and is clamped to a 1/2" piece of copper pipe. I run a chasis ground from my 746 to this pipe. I initially ran a chasis ground from my computer to this pipe but found that created slightly more interference (ground loop?).

This has eliminated 75% of the problem. The noise practically nonexistant on 10m and above, vastly improved on 40m, but still quite bothersome on 160m and 80m

My concern is that the computer RFI is travelling up the shield of the coax and back
down the center conductor. When the radio is not connected to an antenna there appears not to be any RFI problems, indicating to me that the radio's shielding is more than adequate.

Both computer and rig are plugged into SEPERATE BX circuits with self grounding receptacles. My tranceiver is connected to a half-wave dipole

with RG8-M (92% shielding) coax. The antenna is not yet grounded(my ligtning arrester just arrived today). The ICOM is grounded to the main

cold water pipe at basement level with #8 gauge copper mesh.

HERE IS MY QUESTION:

Will a line isolator such as a Radio Works T-4G eliminate this problem completely?

Thanks for all advice.

Jim

Of course you couldn't. But these fishermen *didn't even use a radio*.
Nor (it appears) did they know any Morse code beyond SOS. So they
didn't communicate any of these things to their rescuers.

If you can find some other example where being able to send Morse code
by radio saved someone, go ahead and tell us about it. You can
certainly hypothesize such cases, but that doesn't mean they are very
likely to happen. Real examples are more interesting.

This was a real example, but there was no radio and (apparently) no
knowledge of Morse code involved. So it's rather a stretch to say
that this case proves that knowing Morse is useful.

Dave

We, as a nation, tried that for years with a 55mph speed limit on the Interstates. We didn't like it and it was changed. One obvious way to eliminate vehicular accidents is to eliminate vehicles. Same for guns. Same for knives. Same for ponds. Same for trees. Same for anything.

There is a 5 GHz wireless LAN by Radiolan that uses pulse position
modulation (on a carrier), and is based on four slightly different timings of
pulses of a relatively low rep rate. The receiver locks onto the
rep rate and then looks for "jitter" of one pulse relative to another.
Perhaps Time Domain does this.

Nothing in any of the literature about impulse radio that I have
seen refers to high stability timebases. What they claim is
furnished by modern technology is picosecond time interval measurement
(see the front page of Friday's USA Today for a photo of said
chip).
>
>-- jm KE5FX

It should be kept in mind that no impulse radio is legal at any
power level because it produces intentional radiation in forbidden
bands (See FCC part 15). We can all speculate what the chances
of the FCC having a religious conversion on this topic and allowing
radios to overlay existing allocations are; this observer thinks that
is a long way off if ever and in any event probably after Time Domain's
patent expires in 5 years. According to what I read, the FCC hasn't

even issued an *experimental* license for impulse radio, and you
can get those licenses for almost anything. And if you thought
the FCC was a tough sell, its a pushover compared to ETSI in Europe.
Then there is the rest of the world.

Actually the 90's are probably a lot cleaner than the 50's since these days most people are using well designed commercial gear. Those old homebrew transmitters and modified rigs of the 50's were a lot worse. Chirps, spurs, hum ect...

> Perhaps Time Domain does this.

Perhaps, although in a carrier-less mode you'd theoretically have to
examine the entire 1 GHz or so worth of frequency space to lock onto the
transmitter's PRN sequence. That is what bugs me about the Fullerton
stuff -- it seems to me that the "time domain" advantages could come
into play only after a synchronous link is established. Especially at
the microwatt ERP levels they are talking about, that must be the one of
the toughest hurdles to overcome. I note that most of the micro-power
impulse work at LLNL is geared toward single-point applications like
burglar alarms, studfinders, and such.

> Nothing in any of the literature about impulse radio that I have
> seen refers to high stability timebases. What they claim is

True, I stand corrected... although I'm still not sure what
ultra-precise time interval measurement does for them in an
asynchronous, low-duty-cycle system.

> It should be kept in mind that no impulse radio is legal at any
> power level because it produces intentional radiation in forbidden
> bands (See FCC part 15).

But they are running at such low power levels as to be virtually
undetectable, much less interfering.... basically they are trading BW
for log(S/N) in the Shannon equation. That is what seems so intriguing
to me about the concept -- a few microwatts of power can go a long way
when it's synchronously recovered in a 1 GHz channel. It sounds great
until you start to think about the practical implications of the
'synchronous' part.

Could very well be. There is also the issue of the government not
wanting We The People to be messing with any more non-interceptable
communications modes than we already are.

> According to what I read, the FCC hasn't

> Then there is the rest of the world.

Still, you can imagine the radio spectrum looking like a very different
place in the next few decades, if even a fraction of the hype is to be
believed. Someone on Slashdot was pointing out the grim implications
for SETI, and the dangers of assuming that the rest of the universe uses
frequency-domain carriers. :-)

>nd he says:
> "The volunteer work of these Official Observers is a critical
> element of the Commission's enforcement program,"
> adding that failure to act on an OO notice could lead to fines
> and other sanctions."

Whoa! Of COURSE failure to act on an OO notice could lead to fines and sanctions. If you get an OO notice and do not take corrective action, you easily can attract the attention of the FCC. Like the school bus in my neighborhood that was going 45 in a 25 MPH zone, yesterday. I spoke nicely to the driver and asked if she could help us protect children by slowing down. If she chooses to not do it, it could very well lead to "fines and sanctions." But not from me. From a cop.

The OO's can advise people, but do not have enforcement powers. OO's can help gather evidence, but it is the responsibility of the FCC to confirm, then act. And yes, the FCC does give specific guidelines for collecting evidence. (Sample: The date/time/frequency must be recorded on a tape AT THE TIME THE ORIGINAL TAPE IS BEING MADE, versus being dubbed in later. It goes without saying that the FCC wants the ORIGINAL tape--not a copy.)

>The analogy of one neighbor calling the cops on another neighbor's
>barking dog is incorrect. The local police may accept his reports,
>but they do not deputize the reporter and make him a formal part
>of law enforcement when he has had no formal training.
>They do not take the word of the complaining neighbor and
>issue an arrest warrent on that basis.
>They investigate for themselves. They enforce the law themselves.

It is my understanding that this exactly how the FCC handles OO situations. They won't go after someone strictly on the basis of an OO report. As for the neighbor situation, won't the police ask the complaining party, "Have you mentioned the barking dog to the owner?"

> I certainly
>don't want some old man with a chip on his sholder writing me
>a half-baked OO report which is then going to be viewed
>by the FCC as an official enforcement document.
>That's ridiculous and I'd bet another buck it's illegal.

You're right. It is ridiculous. And I'd bet another buck it won't happen that way. Of course, you personally have nothing to worry about, David. Far be it from a man of your character to cause intentional problems in the ham bands. And if you slip up with a second harmonic or key clicks, I am positive that you will accept the OO report in the friendly, self-policing attitude in which it is offered and will immediately take corrective action.

Hello All,

This is Mike, KQ6MU.
A friend of mine, and I, are trying to build
a 2m repeater. We got a Motorola Micor VHF Hi
Base Station. It was tuned to 155 MHz. We need some
help on duplexing this, tunning it to the 2m band, and
other things that will be needed to "Mod" this to a
repeater. If anyone can give us info on this, we would
greatly appreciate that. Anything is welcome.
E-mail me with info please.
Thanks & 73,

Mike Green KQ6MU

Your mistake is presuming that the FCC will take
and conclude enforcement based only on OO information.
I seriously doubt that will ever happen. The OO information
can probably support probable cause and set in
motion the additional direct FCC monitoring that would
be needed to back an actual criminal charge
and the court case/trial that could follow. Do you really
think the FCC would prosecute based ONLY on the
information of an OO?

Cheers,
Bill K2UNK

815. NCI and The Future

Newsgroup: rec.radio.amateur.misc
Date: 1999-04-11 00:00:00 UTC
From: ejune@intuitive-data.com
Message-ID: <09990310210556.OUI18.ejune@intuitive-data.com>
Source record: 145982

My web browser encountered a strange time warp the other day and I was able to read web pages from the future. Naturally, I did a search on "ham radio" and found this interesting article from the June, 2001 on-line edition of SeaQue magazine. It is an interview with NCI president Wilbur Befuddled.

Editor: So now that the FCC has decided to keep the code testing requirements for ham licenses, what is NCI up to these days?

Wilbur: NCI has decided to expand into areas outside Amateur Radio. Right now we are taking on the U.S. Marine Corps and just sent a petition to the Secretary of Defense asking for changes.

Editor: Changes in the Marine Corps? Please elaborate.

Wilbur: Lots of our good buddies, er, members, have been washing out of Marine Corps boot camp, which can be pretty demanding. It takes hard work and perseverance to make it through, and that simply isn't our style.

We have examined the issue and decided that boot camp is a vestige of the past and should be eliminated as a requirement for any rank in the Corps. Much of boot camp is dedicated to teaching recruits how to kill an enemy with bayonets, knives, or even their bare hands. That skill is clearly obsolete in this modern age. Today we have cruise missiles, laser guided bombs, and other smart weapons which do the job much more efficiently.

Editor: That's an interesting (ahem) point of view. But aren't those skills part of what it means to BE a Marine?

Wilbur: Hogwash. Look at the last conflict in Iraq, not a single one of the 150,000 Iraqi casualties was caused by a Marine in hand-to-hand combat. They were all caused by smart weapons. Those that claim we need to continue testing in these areas are hopelessly clinging to an obsolete tradition. The last time a Marine killed anyone with their hands was way back in the 1930's, during World War II, when we fought the Koreans on Oki-wow-wow.

Editor: Don't you mean in the 1940's when we fought the Japanese on Okinawa?

Wilbur: Whatever. Now understand that we're not against a Marine killing an enemy with a bayonet if they choose to. I don't know why they would, since you can only kill one person at a time with a bayonet,

while a smart weapon can take out thousands. We're only against the training and *testing* of that skill as an entry requirement. We want everyone to skip right by that training/testing and get into pushing buttons and turning knobs on those machines that send out the smart weapons.

Editor: I have to admit that I was briefed on your position before this interview. How do you react to the CNN poll of active Marine Corps servicemen which showed that 90% of the Marines believe these skills are indeed valuable and should continue to be taught and tested?

Wilbur: They just want to see everyone else suffer through what they went through. They aren't thinking objectively. They don't know what is good for them. Kinda like the Generals, Advanced, and Extras who gave us so much flack during the no-code debate. Notice that the arguments we are making are exactly the same as those we used in the no-code debate. Therefore, we have to be right. Q.D.D.

Editor: Don't you mean Q.E.D.?

Wilbur: Whatever.

Editor: Let's get off the subject of the Marine Corps and back to ham radio. What has the NCI been up to in that regard?

Wilbur: Well, we just petitioned the FCC and asked them to force all amateur radio transmitters to be type-accepted.

Editor: But wouldn't that mean that homebrewing your own rig would be prohibited?

Wilbur: Exactly. But homebrewing leads to a big problem for our members. If they are in QSO with a ham who has built their own rig, it makes them feel inferior. The homebrewer is being elitist and implying that he is better than our member simply by stating "my rig is homebrew". The self worth of our member is damaged, and we need to feel good about ourselves at all times.

Editor: That's an odd reaction for your member to have. I use an Icom, but when I meet someone with a homebrew rig, I have an entirely different reaction. I admire the person for the hard work they must have invested in building it, and hope that someday I might become that skillful.

Wilbur: Well, you wouldn't fit in so well at NCI. Enough said.

Editor: What else is NCI up to in the ham radio arena?

Wilbur: Arena? Huh?

Editor: It's an expression. Never mind. What else are you up to?

Wilbur: We're just finishing up another petition for the FCC which asks them to revoke all the 1x2, 2x1, and 1x3 calls out there and issue 2x3

callsigns in their place, each of which must begin with "K".

Editor: What on earth for??

Wilbur: It gets back to the need of our members to feel good about themselves at all times. When our members encounter a 1x2 on the air, it makes them jealous and there goes the old self worth again. We can't have that. Everyone should be the same.

Editor: And why must they all begin with "K"?

Wilbur: Well, all those WA and WB 2x3 calls are obviously held by people who have been in ham radio a lot longer than we have. Again, there goes the self worth.

Editor: Fascinating... I mean, anyway, we're out of time for this month. I'd like to talk with you more, would it be all right if we continued on and published the rest in the following issue?

Wilbur: Sure, it's not like I have anything better to do. The guys on channel 19 er, I mean the repeater, have been getting tiresome lately anyway. ----------

If that darned time warp shows up again, I'll try to get the 2nd half of the interview from the July, 2001 issue of SeaQue.

I don't think we should abolish the no-code license, instead let's limit
it to a three year license. I came into the hobby under a no-code and in
a years time had my extra. It's not difficult...

Bill Sohl wrote:
>... Do you really
> think the FCC would prosecute based ONLY on the
> information of an OO?

Not my words.
I again quote Mr. Hollingsworth, himself:
>"Failure to take the (OO) notices seriously and to take
>corrective action...will not be tolerated by the Commission...
>... failure to act on an OO notice could lead to fines
> and other sanctions."

Moreover, Mr. Hollingsworth's demand that Mr. Whiten
produce every OO notice he has ever received, and
give written testimony as to the circumstances of
each notice, clearly shows the commission gives these
informal little cards from volunteer observers the same weight
as reports from trained federal field officers,
and that they are to be regarded as official and
legal enforcement documents. How else could he demand
a formal response to them?
This retroactive investing of legal federal document status
in what is clearly an informal advisory from a private "club-type"
organization is unprecedented and doesn't have
a prayer in federal court. A federal officer might as
well demand that I give him written response concerning
every church bulletin I've received reminding me of my (many) sins.
There is no real difference.

Mr. Hollingsworth did NOT say "failure to act on an OO notice
could lead to FCC investigation, followed by fines" etc.
He clearly, distinctly and repeatedly said that the
commission would take action based on OO reports.

This is the central problem- The Communications Act
section so often quoted in this thread says the FCC must
TRAIN these people to be competent in their reports
if they are to be used as auxiliary enforcement personnel.
Not the ARRL- The FCC. And "training" is not calling
them on the phone and giving them a few "tips,"
or handing out pamplets.
It's credible training (like in a classroom)
in how to determine who has actually
committed these acts.

And what about the equipment needed to make this determination?
Some OOs write reports on signals they *believe*
might be coming from one person or another,
but they have NO TRAINING and NO EQUIPMENT
with which to credibly make this very serious charge.

That would be OK if the FCC only used the "reports"
as guidelines for their own investigations.
That would be valuable and useful.
But they have NOT said that!
They have explicitly, repeatedly said they will use the "reports"
as though they were coming from trained and
properly equipped FCC field officers.
If that's not what Mr. Hollingsworth meant,
then I earnestly and respectfully ask
that he clarify the situation.

The vast majority of OOs are good, decent people
concerned with doing a service to us all.
But a few "bad apples" can smear someone with
a dirty accusation that will never wash off.
Only proper screening and training of competent
enforcement people can prevent this from happening.

I applaud the OOs. Their value to us all is
self-evident. But their value is as Trusted Advisors,
not Enforcement Officers. Let their reports be
taken seriously and handled competently.
But demand that the trained federal officers of
the FCC do their job in determining who should
be charged with an offense-
not unscreened, untrained "volunteers."

If you ruin a person's reputation through an unjust accusation,
no matter how good the intentions or honest the accuser,
it can never be repaired. It is a moral crime.
We must be diligent against it.

Kind Regards,
Dave Stinson

824. NCI and The Future (part II)

Newsgroup: rec.radio.amateur.misc
Date: 1999-04-11 00:00:00 UTC
From: ejune@intuitive-data.com
Message-ID: <09990310235342.OUI78.ejune@intuitive-data.com>
Source record: 145991

Well as luck would have it, that time warp showed up again. From the July 2001 issue of SeaQue magazine (on-line edition), here is part two of the interview with NCI president Wilbur Befuddled.

Editor: Before we get started with part II of our interview, I need to pass on a message from my boss. He wanted to thank you and your organization for your efforts to bring a flood of new folks into the hobby by eliminating the code tests. That would have swelled our readership and made us lots and lots of money. Had you succeeded, I would have long since cashed in my stock options and retired to FO land!

Wilbur: FO land?

Editor: Tahiti. Anyway... In the first part of the interview we focused on what NCI has been up to since the FCC elected to keep code testing as a requirement for an Amateur Radio license. Now I'd like to focus on Wilbur Befuddled the man. How long have you been a ham?

Wilbur: I've been licensed ever since the FCC stopped requiring you to come into their field offices for testing. My volunteer examiner was a good buddy, er friend, of mine. I must have taken the 13 WPM code test at the FCC office a dozen times, and each time it sounded like so many little beeps. The audio equipment my VE uses is much better, and his 13 WPM tape sounded to me like it was only 1-2 WPM!

Editor: Are you sure he wasn't actually PLAYING it at 1-2 WPM?

Wilbur: Let's not go there.

Editor: OK... So you're a General?

Wilbur: No, I'm an Advanced. I would be an Extra except that I once vowed to NEVER be an Extra, don't want to give in to all of that elitism.

Editor: So you can copy code at 20 WPM?

Wilbur: Well no, but that doesn't have anything to do with it. I vowed never to do it, don't you understand?

Editor: OK. "Whatever" as you say. What kind of operating do you do on the air?

Wilbur: I hang out on the local repeater and I'm also into shooting skip, er DX-ing. My favorite frequency is 27.950 MHz.

Editor: But 27.950 MHz isn't in the ham bands. It isn't even in the CB band. What gives?

Wilbur: Ham band, free band, whatever.

Editor: You say you are into DX-ing, huh? Tuning patiently for the weak ones, busting pileups, and all that?

Wilbur: Well, no. I didn't get into DX-ing voluntarily. When the NCI membership list got published last year, I found that very few U.S. hams would answer my CQs. So I turned to DX-ing. I check into a DX Network every day on 20 meter phone and get on the list. This is the only way to fly! I don't have to work at the tuning and scanning part, and I don t have to feel bad about myself if I can't break a pileup. I just work whatever DX pops up on the net. Yesterday I got a LU7, pretty good huh?

One great thing about the net is that if the DX is weak and I'm having trouble copying, the net control station (a heck of a nice guy) will relay for me. The idea is to get the QSL card, right? Now don't jump to the conclusion that I have bad ears and can't copy the weak ones. If the DX is at least 7 pounds on the meter, er 7 S-units, I can usually make the contact without any help at all.

Editor: So you don't do much operating on CW?

Wilbur: Are you kidding? The audio on my receiver is even worse than the audio back at the FCC office. Its all a bunce of garbledy-gook to me. Besides, working CW requires that you memorize all of those abbreviations, know how to spell, and know the Q signals. The only Q signal that I know by heart is QRS, since I used it so much back in my Novice days.

Editor: OK, I think that's enough about Wilbur Befuddled the man. I'd like to get back to NCI for a moment. Other than restructuring the Marine Corps, doing away with homebrewing, and eliminating short callsigns, what else is in the NCI hopper?

Wilbur: Well, I shouldn't really be discussing that because we are in the very early stages of study and planning on some issues. But what the heck. Right now we have a working committee looking at the problem of SAT tests.

Editor: SAT tests are a problem?

Wilbur: For our kids they sure are! Our kids have a God-given right to go to Harvard if they want to, but Harvard is rejecting them. Their SAT scores are high, at least a 700 combined score, but no dice.

Editor: 700 isn't that high, Wilbur. The maximum is 1600 and you can practically get 400 by signing your name.

Wilbur: Huh? Oh. But anyway, our kids need to feel good about themselves, as do your kids and all kids. Aptitude and achievement are just not necessary in that equation.

Editor: What else?

Wilbur: We're in the preliminary stages of looking at tenure for teachers (should be stronger and easier to get), simplifying the FAA pilot licensing requirements (all those ratings and tests are unnecessary), eliminating report cards for students, and lots of other things. Maybe if we do another interview later, I might be able to elaborate more after we've firmed up our plans.

Editor: Gee, sounds like some fascinating stuff. OK Wilbur, that's all the time we have.

Wilbur. Well thanks for having me. Good numbers to all your readers. Er, seventy threes. Er, I mean 73.

Editor: 73 to you Wilbur, and keep the shiny side up.

Wilbur: 10-4 on that!

Since there is a perception that those with Technician Licenses are not "true ham" and that their licenses should expire in 2 or 3 years I propose the following:
Novice: No renewal, expires at end of 1 year. The name of the license is sufficient explanation for this rule.
Technician: Upgrade at end of 2 years or license expires.
General: Retake all elements at end of 5 years.
Advanced + Extra: Retake all elements at end of 10 years.

Eric, Obviously your diatribe is against dropping the CW requirement.
But more importantly I can tell you've not been through MCRD as a
recruit (Marine Corps Recruit Depot),thus, your analogy is inane.
First, most of boot camp is not spent in hand-to-hand combat or learning
to fight with a bayonet. Second, boot camp has changed quite a bit over
the years with physical abuse by drill instructors almost abolished,
introduction of sports medicine principles, and the list goes on.
So leave the Corps out of your stupid argument. If the USMC can change
and modernize, so can amateur radio.

You should have heard Tiny Tim last night broadcasting some serious
sucking up to Hollingsworth. According to Tim Hollingsworth is going
to "get" the eastern group and protect his bunch. He was bitching
about
a "organized campaign" of "sound bites" to discredit the western
group.
I encourage all those who are fed up with Tim and the criminal
element
to contact the FCC and encourage them to step up enforcement. The
sooner pond scum like KK7HO and K5BLB are off the air the better.
Make tapes,send email do anything you can to get rid of these vermin.
You shouldn't have to be embarassed to let non hams listen to the
amateur bands. We have an opportunity to clean up 75M lets use it.

> I seriously doubt that will ever happen.

Reading details of Riley's enforcement actions, it's very clear that he -and FCC- intends to offer more than ample opportunity for offenders to clean up their act, and continue 'normal' amateur activities--just mend their ways and abandon their nonsense. Permanently. For those who ignore the warnings and continue, there is more than ample 'evidence' to be collected by FCC monitoring that will make whatever case is needed. If they add previously received OO reports that brought the offender to the FCC's attention to this officially collected evidence, it only helps cement the case and in no way constitutes any sort of impropriety.

In order to better serve the amateur community i believe
a directory is in order. With this directory amateur operators
can now identify and contact the O.O's. We can't expect the
O.O's. to know everything can we?

If the O.O's can identify themselves here, or if any helpfull
non O.O's amatuers wish to help with compiling this list then
please do so here:

> and other sanctions."

Riley is ultra-cool. Don't say nuthin bad about Riley.

> Clearly, Mr. Hollingsworth has sanctioned OO's as formal and
> official extensions of the enforcement program.
> They have been defacto deputized.
> Defacto deputization in the absence of an executive order or
> national emergency may in itself be illegal;
> I don't know but I'd bet on it.

Hmmmm. The amateur radio service is federal. I don't see any states out
there issueing amateur radio call signs. OO's are sanctioned in Part 97, not
by Riley. Riley is a public servant who has been given the task of enforcing
the regulations. The regulations say that we are self-policing, furthermore,
the regs say that we have OO's (deppitty dawgs, if you will). They don't
enforce squat - they simply inform. They inform the rules offenders of the
violations, and they inform the FCC of the rules violations. Its encoded.

> It is much more important to realize that
> the OOs, while well-meaning, have no formal training in
> law enforcement. They have no formal training in FCC enforcement

> people with "wannabe-cop" and "ham radio god" mental problems.
> They do not even have any formal training in the laws and regulations
> Mr. Hollingsworth is insisting they help "enforce" (his term).

They are all tested, licensed amateur radio operators. They enforce nothing.
They simply make note of rules violations of the very regulations that all

have been tested on. If necessary, the FCC enforcers will use evidence gathered by OO's (or anybody else) to enforce their case.

> The analogy of one neighbor calling the cops on another neighbor's
> barking dog is incorrect. The local police may accept his reports,
> but they do not deputize the reporter and make him a formal part
> of law enforcement when he has had no formal training.
> They do not take the word of the complaining neighbor and
> issue an arrest warrent on that basis.
> They investigate for themselves. They enforce the law themselves.

Hmmmm. Show me an OO court and I'll jump up and down and scream right along with you.

> I don't think the notices handed out by the Amateur Auxiliary (OOs),
> which Mr. Hollingsworth has said are to be taken as actual,
> official enforcement documents, have a prayer of
> making it through the first serious court challenge.

Part 97 says we police ourselves. Part 97 also provides for Official Observers.

> The FCC is tasked with enforcement. There are federal statues
> defining what qualifies a person to be a formal law enforcement
> operative and I'd bet a buck not one OO qualifies. I certainly
> don't want some old man with a chip on his sholder writing me
> a half-baked OO report which is then going to be viewed
> by the FCC as an official enforcement document.
> That's ridiculous and I'd bet another buck it's illegal.

I'm sure the FCC regulatory authorities and Mr Riley have the ability to discern whether an OO report is valid or not. If you're cussing on the air, overdeviating your transmitter, or sending spurious signals out of band, then I suggest you take your OO report seriously.

> The ARRL should be ashamed of its complicity in this
> and abuse of the honest efforts of the OOs.
> They are ADVISORS, not Law Enforcement Officers.
> Feeding them fairy tales about how they are now "Arms of the Law"
> is a direct abuse and affront and I, as a long time ham, resent it.

Every citizen should be considered an arm of the law. Its when every citizen shirks their responsibility do we end up with shows like NYPD Blue. Enforcement is not just a COP thing.

846. honda power steering fluid question

Newsgroup: rec.radio.amateur.misc
Date: 1999-04-11 00:00:00 UTC
From: stereodoc1@aol.com
Message-ID: <19990411132914.04128.00002263@ng-fi1.aol.com>
Source record: 146013

My power steering fluid in my 87 prelude was low so I added some Honda PS fluid to top off the reservoir but it wasn't enough to bring it to the full mark. So I went down to the local parts store and purchase a bottle of PS fluid that was marked specially engineered for Honda car. I poured it in the reservoir and before I realized it, the fluid was different looking from the fluid that was in there. The fluid was clear as opposed to the purple stuff I put in a few days prior. Plus it didn't feel like PS fluid. It felt more like brake fluid and the smell was different too. Now I am all freaked out about what I put in the reservoir. Right now everything runs OK however I heard a strange noise from under the hood for a brief moment and I don't know if it is the pump that made the noise or not. Should I give myself some piece of mind and have the PS system flushed? Or does anyone think I am safe with this fluid that says it's safe for Honda. One thing I don't know is if this stuff was soluble with the fluid that was in there already. Any ideas?

I agree,and although I have been licensed only 3 years (attained extra class 7 months into it) I would gladly hit the books and take more tests,especially needed is a more difficult CW test.Nothing impossible,25-30WPM seems fair to me.AB7RS

848. Firestik Top Section For A-99

Newsgroup: rec.radio.amateur.misc
Date: 1999-04-11 00:00:00 UTC
From: Tony Heatwole <heatwole@shell.clark.net>
Message-ID: <7eqm9t$9du$7@callisto.clark.net>
Source record: 146015

Hello. I have heard of some people adding a Firestik top section to the top of the Solarcon A-99 (replacing the current top section). I've heard that many people claim that this has dramatically improved the performance of the antenna. I'm just wondering if any one knows WHY exactly the section helps, and where I might be able to get one. Or if any one reading this has one for sale, please let me know and we'll work out a deal. Any and all help is appreciated. Thanks a lot for reading and thanks in advance.

851. Tribander Or Monoband Beams?

Newsgroup: rec.radio.amateur.misc
Date: 1999-04-11 00:00:00 UTC
From: Tony Heatwole <heatwole@shell.clark.net>
Message-ID: <7eqo3c$9du$19@callisto.clark.net>
Source record: 146018

Hello. I have a question about which set-up you think would be the best one for everyday overall well performance. A 2 element beam for 40m, a 5 element beam for 20m, a 5 element beam for 15m, and a 5 element beam for 10m. Or, an X9 tribander beam with the 40m add-on kit. Now I know that all of the monobanders are better then the tribander, but are they better by a large enough margin for it to be worth it for me to get all of those monobanders rather then just a tribander? Any and all help is appreciated.

>
>Moreover, Mr. Hollingsworth's demand that Mr. Whiten
>produce every OO notice he has ever received,

If I throw out an OO notice, what law is broken?
There is no document retention requirement for OO
notices. The burden of proof is on the FCC to
PROVE that any OO notices were received by the
person.

>and
>give written testimony as to the circumstances of
>each notice,

Easy to do..." I have no recollection of any notices."

>clearly shows the commission gives these
>informal little cards from volunteer observers the same weight
>as reports from trained federal field officers,

They can claim anything. If it goes to court, that
is were the proofs must be made by the FCC. The
defendant needs to show nothing unless there is a
specific FCC Part 97 rule that requires it.

>and that they are to be regarded as official and
>legal enforcement documents. How else could he demand
>a formal response to them?

And I don't believe they constitute such an official
status. Has there been case law established that
validates such a claim? Is the OO notice identified as

such in Part 97?

>This retroactive investing of legal federal document status
>in what is clearly an informal advisory from a private "club-type"
>organization is unprecedented and doesn't have
>a prayer in federal court.

I agree. So what's your beef.

>A federal officer might as
>well demand that I give him written response concerning
>every church bulletin I've received reminding me of my (many) sins.
>There is no real difference.

Police can ask for lots of things that people have no
legal obligation to provide.

>Mr. Hollingsworth did NOT say "failure to act on an OO notice
>could lead to FCC investigation, followed by fines" etc.
>He clearly, distinctly and repeatedly said that the
>commission would take action based on OO reports.

Until such time as you can show one such example, I will
believe that the OO notices will constitute nothing more
than the trigger to further FCC investigation by trained
FCC staff. The fact that the FCC might follow-up directly
with an alleged violator because of an OO notice(s)
does not mean they have a case to prosecute.
Many people will change their illegal behaviors when confronted
by the FCC without need of prosecution.

>This is the central problem- The Communications Act
>section so often quoted in this thread says the FCC must
>TRAIN these people to be competent in their reports
>if they are to be used as auxiliary enforcement personnel.
>Not the ARRL- The FCC. And "training" is not calling
>them on the phone and giving them a few "tips,"
>or handing out pamplets.

Fine. As before, show me where the FCC has
mis-used the OO reports and I'll listen.

>It's credible training (like in a classroom)
>in how to determine who has actually
>committed these acts.
>And what about the equipment needed to make this determination?
>Some OOs write reports on signals they *believe*
>might be coming from one person or another,
>but they have NO TRAINING and NO EQUIPMENT
>with which to credibly make this very serious charge.

And if so, then any competent attorney will blow such
reports apart.

>That would be OK if the FCC only used the "reports"
>as guidelines for their own investigations.
>That would be valuable and useful.
>But they have NOT said that!
>They have explicitly, repeatedly said they will use the "reports"
>as though they were coming from trained and
>properly equipped FCC field officers.

And if so, then any competent attorney will blow such
reports apart.

>If that's not what Mr. Hollingsworth meant,
>then I earnestly and respectfully ask
>that he clarify the situation.

Me thinks you read too much into what he has said.

>The vast majority of OOs are good, decent people
>concerned with doing a service to us all.
>But a few "bad apples" can smear someone with
>a dirty accusation that will never wash off.

If I were the recipient of such a report, then I would
reply to the OO demanding that such a report be recanted.
The process works both ways. If I received a second such
report I'd do the same AND I would notify the FCC that
someone is sending out bogus OO reports. This is
not a tough thing to deal with if you don't view it
in such a paranoid perspective.

>Only proper screening and training of competent
>enforcement people can prevent this from happening.

I am less worried about it happening then you.

>I applaud the OOs. Their value to us all is
>self-evident. But their value is as Trusted Advisors,
>not Enforcement Officers. Let their reports be
>taken seriously and handled competently.
>But demand that the trained federal officers of
>the FCC do their job in determining who should
>be charged with an offense-
>not unscreened, untrained "volunteers."

I firmly believe that there will not be any FCC
fines levied or loss of license against anyone based
solely on OO reports.

>If you ruin a person's reputation through an unjust accusation,
>no matter how good the intentions or honest the accuser,
>it can never be repaired. It is a moral crime.
>We must be diligent against it.

I am far less worried that I might become the brunt
of some renegade OO than I am of the current crop of

bad operators who should be kicked off the air and/or fined. I can take care of my own reputation as I have noted above.

Cheers,
Bill K2UNK

My girlfriend has a Honda, and you MUST USE ONLY GENUINE HONDA POWER
STEERING FLUID. ***DO NOT*** use **ANY** substitute brand. Honda PS Units have special
seals within the unit and use of any other brand, and *the mixing* of any off-brand
with Honda is asking for trouble. I would take the car to a Honda Service shop if
you mixed fluids, as the chances are the internal ball seals are now swelled and
bad.

Citizen snitch program? Are OO's wearing armbands and Goose steppin? Loose the biker mentality and get a reality check. Ever heard of Neighborhood Watch? Why is "Right to Carry" sweeping the nation? Maybe the cops can't be everywhere at once, but so what. Its someone else's responsibility, someone else's problem. If it doesn't directly hurt you, ignore it. If it does, just dial 911 and everything will be fine.

Dave, why -do- you bother? I like the new attitude at the FCC, and if/when the 1st OO card shows up, I'll investigate my equipment or consider my operating habits and make any required changes. I'll staple the notice in my logbook and note any actions taken in my logbook. I operate my station in good faith that I am following the FCC rules. Would you suggest otherwise? I guess its just "a 90's thing" to want a clean signal and an operating style that attracts QSOs rather than broadcast racist political statements.

Sigh.a.nara,
Brian/N0iMD

Gosh, slower speeds (and legal speed limit) and slower speed accidents.
Longer reaction times and fewer accidents. Fewer fatalities and lower
insurance premiums for those of us that obey that stupid law. How awful.

Also Lawrence Livermore seems to have claimed to invented it as well and files patents though their patent claims were files after time-domains. The interference issue is definitely a big one as Livermore sold licenses to several commercial customers, and sort of downplayed the fact that the FCC has not issued a type acceptance on the technology. So the licensees are suing since they spent a pile of money on a technology they can't use.

I saw mention of pulse on carrier wave, that sounds like an adaption we could use. What kind of data rates can you get with that technology and say compared to using spread spectrum?

For my son's kindergarten science fair, I'm hosting a table on Radio. I plan on taking my low-band gear to the fair and am hoping to make a quick contact as part of an amateur radio demonstration. Because I'll only be working off a random wire for an antenna, I was hoping to find someone in advance who could help guarantee a quick QSO for the kids. The closer to California, probably the better!

There are three separate kids groups between 12:30 and 2:30 PDT. I will be setting up in the morning and hope to have everything up by 11:00AM PDT. I would like to find one or more hams how would be ready to test around 11AM, test out bands and conditions, then be available for a "CQ" call during the fair hours. Interested??

If so, please send email to 'mbercow@palm.com'. Please do not respond to this message as I will not see it until after the event. Also, you could call and leave a message at 408-326-9050 (work number).

Thanks in advance!!!

There are three separate kids groups between 12:30 and 2:30 PDT. I will be setting up in the morning and hope to have everything up by 11:00AM PDT. I would like to find one or more hams how would be ready to test around 11AM, test out bands and conditions, then be available for a "CQ" call during the fair hours. Interested??

If so, please send email to 'mbercow@palm.com'. Please do not respond to this message as I will not see it until after the event. Also, you could call and leave a message at 408-326-9050 (work number).

Thanks in advance!!!

Mark, N1DVH

Hi All,

I have a piece of NTS Traffic that I might need delivered to Conway Ark. if this other route proves to be futile... if it does is there anyone in this newsgroup that could forward it to the proper people for delivery?

Please reply via E-MAIL ONLY! as I don't subscribe to this newsgroup and I don't read the often!

Thanks!

If the document are illegally classified, and you still
agree with an illegitimate government in their classsification,
then you have no credibility with anyone who counts. If the
documents mean so much to you, then get them declassified,
file a lawsuit, and demand a Vaughn index, then publish the index.

I am sick of you liberal blowhards who never act on anything.
Quit bellyaching, take action, then report back here when you
have something to talk about. I have done my part by pissing
you off, now get to work. It is not my job to sacrifice myself
for a bunch of disloyal scum who do not care about their country.

Ah, now we get interesting.
Sorry dude, but you miss my point. when I say all, I mean
ALL that YOU "supposedly" have.

Since you are now deliberately evading the issue, I submit that
you have no such documents purporting illegal actions on the part of
the US Government. Further, I submit that you may, in fact, be
considered an "enemy alien" and have duly noted your e-mail address
and other information and forwarded it to the proper authorities.

Also, you cannot possibly demand money upfront for documents that
can be obained for a mere fraction of the cost. And last, this point
about all documents printed since the beginning or recorded history?
You know better than that. The Library at Alenadretta was sacked some
1400 years ago and we have never entirely recovered all the lost
knowledge from
that little episode.

I dare say, you are the one responsible for making yourself look the
fool here George.
Granted, the US Government isn't perfect (no government ever is) but its
far better
than some that exist elsewhere on this tiny little world we have.

I figure if you have something to add to Amateur radio discussions that
don't involve
politics or yur rantings about black heleicopters and the waco
situation, then I'll
be willing to listen. However, until then, I cannot take you more
seriously than a bad cold.

yeah, That does sound like a good idea! I would gladly retest every 5 years if that were the case. I believe Novice tickets used to be 2yr non renewable, but I hardly think that the general preception is that tech are not real hams. Maybe the twisted preception of someone who is trying to get under your skin (I guess it worked). In general, hams I know, recognize the tech class as a credible ticket. Rememeber ham radio has something for everyone.

More CW bullshit........ Yeah right... as if we as hams have anything to do with that.
its an international agreement guys. GET IT???

If every ham in America wanted to do away with the code it wouldn't mean beans.

So you all go on and Argue and Fuss, Rant and Rave about something that you have no control over and let the REAL issues about ham radio go unadressed.

Anyhow .... the only ones wanting a no code ticket are part of the "I WANT IT NOW - GIVE IT TO ME" generation who do not want to put forth the effort required to learn CW.

Aint life a Bitch?

What a fine 1990s attitude!
"Me first! Screw you, buddy!"- the true Motto of 1990s America.
Do you live in southern California, by chance?

If the ARRL, through a raw power grab,
and the FCC, through overstepping its authority,
unjustly accuses -anyone-, makes improper demands against -anyone-,
then it is EVERYONE'S problem, friend! Because when you let
Rich Whiten be improperly prosecuted, no matter how much
he might deserve it, it won't be long before it's YOUR turn.

If the FCC wants to get Rich, then by God do it RIGHT.
They should do their job and stop attempting to
invest inappropriate authority in a private pool
of ill-qualified and ill-equipped volunteers.
If they want to build a case, then spend the MONEY.
Do the WORK.

Dave AB5S

Has the intended propose of the CB band ever been changed?
It was not intended to be a "HOBBY RADIO" back in the 60's.
You used to half to LIE on a F.C.C. application to get a CB License.
I once got a letter just for asking another station where I could buy a tire for my mobile and not identifying.
We were crossing a long bridge and the F.C.C. must have been right behind me and got my license plate.
That is what started me on the road to a "HAM" ticket.
It's original intent was for licensed base stations talking to their mobile units for business.
One licensee talking to a different one was against the rules.
I know that it is not used that way now, but did the F.C.C. ever really change that intent?

Hi Dave, I do agree with what you say. They should do their job properly.
It's what we pay then to do.
If they go after someone then it should be someone who needs going after and
they should spend the time to get the goods on them. We both know there are
plenty of those types on the ham bands today.
But you know government employees. They will go after the easy ones first no
matter how small the crime.
The big offenders will get away only to come back when the fuss has calmed
down. They know the F.C.C. cannot afford to spend a lot of time or manpower
on this problem for long.

I hope I am wrong here. I hope the F.C.C. makes me eat crow on this one.
I really like Amateur Radio but a few bad apples can really spoil it for us
all.

I have a similar RFI problem, but it comes from operating my 40 CW radio and it bothering my 2m radio and the FM broadcast reciever. When I key the 40m radio, the 2m radio goes full scale, and the fm receiver's station increases in noise some. My question is, where I have an indoor 55' dipole (and antenna tuner) located about 6' above my other radios (antenna in attic, me in second floor bedroom), could it just be large RF fields from the nearby 40m radio causing the problem, or is it excessive harmonics from my 40m radio? Thanks.

Me, Too, William! I'd like nothing better then to sit down
to a big crow pie if, indeed, it's being done correctly.
But I gotta tell ya, though-- it don't look good.

I don't like WB2OTK worth a flip, but the FCC tells him
"you're clean, keep doing what you're doing" and then,
when everyone raises heck about it, Rich is suddenly
Mr. Evil himself and getting nasty letters demanding
he reply to private, unoffical postcards like they were
FCC Field Office Notices.
I worked in Uncle Sam's Follies for nearly 15 years and
this sounds oh-so familiar....sigh.

This isn't a slam at Mr. Hollingsworth. His bosses hand
him the policy and he is forced to follow it.
And this sudden change in attitude about OTK smells
like word coming down from some congressman
to the commission, which then rolls down on Mr. H,
and he's forced to act on it. He has my sympathy.

Hi:

I just installed a 2 elements quad for the 10 and 15 mts bands from lightning bolt antennas, I have some questions:

a) Do you know the method for reflector tunning? (which frequency should I tune them?, tunning methods available?) b) What is the maximum F/B ratio that I can expect? c) How do you measure the antenna performance? (Gain, F/B Ratio, Side lobe rejection)

Best regards

Two things. First, the National Electrical Code requires all grounding
electrodes to be bonded together. You can't use isolated grounds.
If the electrical inspector, or your homeowner's insurance claims
adjuster, sees this, you're hosed and your insurance will be voided.
Second, you've discovered that ill-considered grounding often makes
RFI problems *worse*. Ground is not a noise sink. It is sometimes a
noise source, and it is almost always a path for conducting noise from
one piece of equipment to another. You have to carefully think through
your grounding system to avoid this. The most powerful technique
to avoid this is to use single point grounding technique, also called
ground windowing.

>This has eliminated 75% of the problem. The noise practically

>antenna there appears not to be any RFI problems, indicating to me that
>the radio's shielding is more than adequate.

Your analysis is probably correct. Grounding is not the correct answer,
however. Suppressing common mode currents on the feedline is the
proper answer to this problem. You need a common mode choke in the
feedline (also called a current balun). This will stop antenna currents
from sneaking back down the outside of the coax to the shack (hot shack
syndrome), *and* it will stop RFI in the shack from sneaking up the outside
of the coax to the antenna, and thus back down *inside* the coax to the radio.
The proper place for this balun is at the antenna feedpoint. That's where it
has to be to properly do the balanced to unbalanced transition. A second

choke near the shack can also be helpful in some cases (and we'd call
it an unun here even though it is the same old common mode choke), but
the one at the antenna is the first priority.

>Both computer and rig are plugged into SEPERATE BX circuits with self
>grounding receptacles. My tranceiver is connected to a half-wave dipole
>with RG8-M (92% shielding) coax. The antenna is not yet grounded(my
>ligtning arrester just arrived today). The ICOM is grounded to the main
>cold water pipe at basement level with #8 gauge copper mesh.

Eeuuw! What a mess! You have unintended ground loops galore.
You need to create a station single point and bond all grounds to it,
and only to it. In other words, pick a point, tie all incoming grounds
to it, and tie all equipment grounds to it, and only to it. You can then
hook that single point to an Earth ground electrode (ground rod)
if you like for lightning protection. The latter should be single point
bonded to all external grounding electrodes on the premises, IE
power entrance ground rod, telco entrance ground rod, buried
cold water piping, etc. Do *NOT*, however, connect to your gas
line. That's a violation of the National Electrical Code, and could
lead to an explosion if you take a lightning hit.

>HERE IS MY QUESTION:
>
>Will a line isolator such as a Radio Works T-4G eliminate this problem
>completely?

I'm not familiar with that product. As noted, what you want is a choke balun.
That can be a few turns of coax coiled up, or it can be several ferrite beads
slipped over the coax, or it can be a twisted pair wound on a toroid (most
commercial ones are made this way). You can buy commercial choke baluns,
but you can easily make your own. (Note, current baluns are always I:1,
other ratios require a voltage balun, that won't do a good job of RFI
suppression in most cases. So even if you need a voltage balun to give
an impedance transformation, slap a current balun behind it for RFI
suppression too.)

This still won't eliminate the problem *completely*. You also need to
deal with the *sources* of the RFI so that radiated RFI won't be picked
up by your antenna. That won't be nearly as strong as conducted RFI
sneaking up the coax, but it will still be a bother.

To do that, first you have to find out the exact sources of the RFI.
It is likely that your monitor is a major source of RFI. To test that,
turn it off and see if the noise goes away. Likely a lot of it will.
Monitors usually have plastic cases, so they have very poor
shielding. Signals also radiate from their power and video cables.
Attack the latter first with snap on ferrite chokes (Radio Shack
sells them). That should help. If more suppression is needed,
you're going to have to shield the monitor case. Adhesive backed
copper foil, or copper window screening, can be used to shield
the monitor (the CRT face is self-shielded by the shadow mask).

You can install the shielding inside the case (looks neater), or outside the case. Get a good bond all around, including to the dag coating of the CRT (hook to the bracket holding the faceplate). That should take care of the monitor. (Note, if you install the shielding inside the case, use fish paper to prevent arcing from high voltage points inside the monitor.)

If there is still noise, scrape the paint from the mating surfaces of the computer case to get a good bond, and add more screws. Good RF shielding requires that seams be sealed by a screw every 5 centimeters along a seam. Snap chokes over cables hooked to the computer too. Any large openings in the case should be sealed with copper screen or foil (don't block ventilation openings). This should virtually eliminate noise from the computer. Now you're left with keyboard, mouse, and other perpherials such as a printer or scanner.

Printers are also often noisy beasts, and you may need to shield yours heavily. This is often a PITA, so just turn it off when you aren't printing. That should deal with that noise source. You can treat your scanner the same way. Keyboards and mice are hard to shield. You can try snap on chokes on their cords, but the best solution is to try different keyboards and mice until you find quieter ones. I've found that the Focus 2001 keyboards are very quiet. I use a cheapy no name $5 mouse that's also quiet. Some of the name brands aren't so quiet, some are, experiment. (Keyboards can make noise all the time, mice usually only make noise when they're moved.)

The secret to good RFI suppression is shielding and more shielding. You don't want to give the noise a chance to get outside the equipment where it is being generated. This has virtually nothing to do with grounding. Hooking up grounds willy nilly gives the noise a way to escape the shielding, the grounding leads will radiate, ground loops will conduct noise, and you'll have more noise problems than when you started (though they may be different problems).

Grounding is important, primarily for safety's sake, but it isn't a panacea for RFI suppression, and you don't need it at all for RF purposes if you're using a balanced antenna like a dipole. (If you're using an unbalanced antenna, like a vertical or an end fed random wire, you do need a ground for RF purposes, but that ground needs to be at the antenna feedpoint, not back at the radio. It needs to be short and direct, easy to do with a ground mounted vertical, harder to do with other end fed antennas.) Get to know *why* you're connecting a ground, and learn how to install a total station ground system properly to avoid ground loops through your equipment. Doing grounding right isn't very hard, but you have to do it carefully or you can cause yourself more problems than you solve.

Do a dejanews search of the rec.radio.amateur.antenna newsgroup on the topic of grounding. I've posted extensively there on the do's and don'ts of proper station grounding. There's a lot of folklore about grounding among amateurs, and even in the amateur literature. You

need to learn to separate fact from fiction here, or you can easily create situations that aren't good, or safe. Remember that Kirchhoff's laws always hold, analyze your system's meshes to see where currents are going to flow. Make sure that they don't flow places you don't want them. Primarily you do that with single point technique. That brings everything to a single common potential. No potential difference, no current flow.

Hello all,

I have just acquired an old regen chassis that I hate to see stripped out for parts. I'd like to restore it and make it operable, but I need to find out what it is first, and if anyone has the schematic. I don't have the coil or tube lineup (I'm sure it's coil, detector, and audio but I'm not sure). The underside components are all there and seem to be in good shape. There is a small inductor shaped like a very thick washer that's loose and I have no idea about. It's hanging under the chassis. A schematic would be very helpful!

It appears to be a Pilot 'kit' - the kind that had all the parts and panels, but you had to drill the holes yourself.

I have photos at:

http://www.boatanchors.com - then click on the link at the top of the page 'Help identify this receiver'.

I'd like to find a schematic, and a replacement vernier for the right dial which is broken. If anyone has one or is at all familiar with this little regen, drop me a note.

Thanks and 73

Dave WB7AWK

Steve:
I appreciate your friendly and reasoned response.
Here are the problems I see:

K4YZ wrote:
>...If I were an OO I would certainly make sure that what I was
>reporting was substantiated or verifyable...
I do not doubt your sincerity, nor that of 99.9% of the OOs.
But you simply do not have the training or equipment
to charge someone with a radio offense with certainty.
If you could, then the FCC doesn't need that multi-million
dollar system they man to the tune of a zillion bucks a year.
All they need is a receiver and a tape recorder.
You CAN report to the best of your ability, and have
the FCC treat that as good, valuable advice, and
then go DO THEIR JOB by investigating to see if it's correct.
They have outright said they will treat these reports with
the same seriousness as they do those from their
expensive system. That's the problem. It's asking
for a terrible court battle that will drag the reporting
OO into it, as well. The accused and accuser will probably
go bankrupt. Only the lawyers will win.

>...Secondly is that not just anyone who asks gets to be an OO.
>The ARRL sets out certain criteria that must be met
>before they appoint anyone as an OO...
That is good an valuable. It's also irrelevant.
Section 4 of the Communications Act demands that the FCC,
not the ARRL, train these people to be competent
aux. enforcement officers. That has not happened in
any meaningful way. Until it does, treating their
reports as though they were official FCC notices
is inappropriate and probably illegal.

David,

Most UHF/VHF antennas designs for mobile use (including glass
mount) expect the large metalic surface of an automobile body
to act as a counterpoise (drives Corvette owners nuts).

If your installation can take advantage of the metal in the
window frame or perhaps metallic siding on your house, you
might pull this off. Otherwise the results are likely to be
poor.

Good luck,

Hans, K0HB

Read Section 4(f)(4)(B)(ii) CAREFULLY. It directly negates
your posting.

>That has not happened in any meaningful way.

In your (unqualified) opinion. When I helped set up the
Amateur Auxiliary interface at the Commission before I retired,
I examined the "checks and balances" and discussed them at
length with the League's General Counsel (who reviews and
approves all submissions from the OO system to the Commission)
and with the Chief, Legal Services Group at FCC (Riley
Hollingsworth's "hatchet squad") and found no problems with
them.

>Until it does, treating their reports as though they were official
>FCC notices is inappropriate and probably illegal.

How long have you been practicing communications regulatory
compliance law, and in what state(s) are you admitted to such
legal practice?

As I have stated quite a few times here, I will always be
happy to explain and teach compliance regulatory law which has
been my field for the last 30 years or so, but I will not argue
law with non-lawyer wannabees, no matter what grade of amateur
license they may (or may not) have.

Dave, that sure is a lot of conjecture.

Your conspiracy theory linking Senators, Commerce Dept "bosses," power grabbing ARRL officials, and poor little Riley is just marching along like a good little soldier is bizarre.

Maybe Riley is just a rogue wannabe BATF agent with really cool Leopold tactical scope on his rifle. Completely acting on his own and totally out of control. (in case you missed it, that was sarcasm again)

I think I've heard enough.

>>

The OO's are simply supposed to accurately report what they have heard with all the details. As far as I know they do not have any enforcement powers at all. I always considered them helpful, reporting to me any problems with my transmitted signal that I could fix before I DID get a notification from the FCC which DID have enforcement power.

The only problems for which I've received OO cards were poor quality signal reports (hum, chirp, etc) which I rapidly took actions to repair. If someone received an OO card for malicious interference, improper conduct on the amateur bands, etc., it would be appropriate to forward the report to the FCC also. The FCC wouldn't necessarily be able to act just on the OO report, but it would cetainly make them pay more attention to the offending station so they could look for repeat offenses and hear first-hand what was occurring.

>> power level because it produces intentional radiation in forbidden
>> bands (See FCC part 15).
>
>But they are running at such low power levels as to be virtually
>undetectable, much less interfering.... basically they are trading BW

The FCC rules don't say anything about that. They just say you
cannot have *any* intentional radiation in a forbidden band.

>for log(S/N) in the Shannon equation. That is what seems so intriguing

In Shannon's equation, you eventually become power limited at -1.6 dB
of Eb/No (energy per bit over noise density). This is only 2 dB better
than a state of the art rate=1/2 turbocode QPSK system.

>to me about the concept -- a few microwatts of power can go a long way

I have yet to see anyone seriously challenge the
major points I have made under this thread.

(1) FCC acted illegally
(2) FBI acted illegally
(3) ARRL acted in the interested of profit only
and therefore is disloyal to the US, Americans,
Amateur Operators, the Amateur Radio Service,
and its membership by voting to supress the
story on jamming.

I have made the error of not locking squarely on
point and refusing efforts to distract on trivia,
minutiae, and attempts to execute the messenger.

Despite the efforts to establish alternative arguments
and win at these, the thesis remains unchallenged,
because the evidence is unimpeachable, and clearly
made available for all rational and analytical minds
who want the truth.

Returning to the original point of this thread at:
http://www.atlcom.net/~geozim/index.htm

FCC JAMS HAMS,
the FCC is a criminal faction of a criminal executive branch,
engaged in a criminal coverup which is further protected by
a criminal Justice Department, also a party to the crime.

The FCC knowingly, intentional, deliberately, willfully and
purposefully supplied radio jamming equipment to the FBI and,
with reasonable assumption, to the US Air Force for the
purpose of jamming AM and FM radio broadcasters, TV
broadcasters and the Amateur Radio Service. The amateur
station jammed was defined as a Title 47, Code of Federal
Regulations, Part 97.405 Station in Distress, relaying
emergency communications critical to safety of human life.
As a result, appoximately 100 people died.

FCC is also a deliberate violator of the Freedom of
Information Act, using an exemption of documents not
allowed under the list of exempted documents types.
Whereas, I have not posted details on this to the
website yet, you can read the 36 descriptions of
FOIA requested documents in the FOIA Administrative

Appeal letter. All of these are denied on the basis
that I have figured out what the nature and content
of the documents are, and the FCC does not want to
verify my logical, analytical and deductive work
that has narrowed down the documents almost to the
point of writting them myself. Actually, I already
have two of the documents, and stand ready to
publish them, as soon as I can arrange to leave the□
country, and post them from a safe place.

Neither last nor least, but in closing on FCC criminality,
FCC is a criminal co-conspirator with FBI to classify
documents pertaining to the criminal operations of the
FCC and FBI. Such classification of documents for the
purpose of avoiding criminal prosecution is specifically
described as a criminal violation in any Executive Order
pertaining to such classification at the time of
classification.

Get the FCC out of the control business, contact your□
Congressman, ask that he support Henry Hyde of the House
Judiciary Committee to convene a hearing into the
criminal coverup by FCC Chairman Kennard of the
criminal operations of the FCC and FBI and US Air
Force engaged in Communications Act violations.

Get the American Radio Relay League out of its
tyrannical misrepresentation of the amateur community.
Publish the fact that the ARRL board voted not to
reveal the criminal operations of the FCC and FBI.
What decent person would be a member of such
a criminal organization. If you are in the ARRL,
moral integrity demands you quit.

931. YAESU VX-5 BATTERY

Newsgroup: rec.radio.amateur.misc
Date: 1999-04-13 00:00:00 UTC
From: "Jose R. Camara" <camara@quantacorp.com>
Message-ID: <37138BE9.76E5E983@quantacorp.com>
Source record: 145773

A couple notes on the Li-ion battery used in the VX-5. Please add other info you have on it or correct errors:

1. First, a good source of information on Li-ion batteries, what you can , should or cannot do with them: http://www.cadex.com/cfm/index.cfm?Pg=55&Lp=1&Db=&Mo= I'm not endorsing their products, but the FAQ is certainly one of the most complete and useful.

2. During charge, the YAESU FNB-59LI (standard VX-5 battery, 7.2V 1100mAh) will initially draw current continuously, then as it becomes more and more charged it will start to draw current in pulses (internally disconnecting itself from the applied voltage). At one point, for instance, it might be 'ON' (connected, drawing current) for 0.3s, then off for 0.5s. As it gets more and more charged the length of the 'ON' period shortens, and total (OFF+ON) period increases. Close to full charge, it will draw current only for 0.15s every 2s.

3. With the supplied AC adapter (12v/0.5A) and the battery in the radio, the battery will charge at 300mA, taking over 4hrs for a full charge from an empty battery. The CPU has no control over the charge (as it could, having easy access to dv/dt, perhaps even temperature depending on the sensor position), it is simply a current limiter that the CPU can sense as conducting or not. Apparently after a fixed delay after not sensing current, the CPU displays 'complete' instead of 'now charging'. The CPU doesn't seem to keep track or use the total time during charge, but it is instead the battery's internal circuitry that decides when to stop taking current.

4. The charging does take place just as well while the radio is on. It will stop while transmitting. By the way, transmitting whith the supplied AC adapter is sure to fry it (or at least burn the internal fuse), so DON'T!

5. Yaesu has a CD-15 rapid charger that will charge the battery while on the radio (drop-in style) or alone (spare battery). It can use the standard 12v/500mA adapter, but it will then supply only 400mA to the battery, taking about 3h for a full charge. It is only worth of its name 'rapid charger' while attached to external power supply, and will charge at a 600mA rate when used with the maximum rated 16V input, for a quick 2h charge.

6. AT YOUR OWN RISK, DON'T TRY IT AT HOME, CAN LEAD TO INJURY, DEATH, OR WORSE: Since the battery has its own internal circuitry that seems to administer the intake of current pulses, it coudl be OK to charge it at a Maha 777 universal charger, which limits current to 600mA or

use any current-limited power supply for a couple hours and then remove the battery. I don't know how the battery behaves during attempted trickle charge, if the internal current limitation is enough to prevent damage to the battery or not, if it will explode and kill you or not, so other than your suicidal curiosity, there is no reason to try it. Buy the rapid charger or charge it overnight in the radio...

Regards,
Jose

Jesper OM,

No, they are not worth the money, in my opinion. Much less expensive
to make your own, even if you have to buy a vacuum variable! And you
won't need a vacuum variable unless you are running high power (several
hundred watts or more. You can also make your own variable capacitor,
if you are reasonably handy.
Also, any linear wire antenna, even of very small gauge, if at least a
quarter wave in length, will have much better radiating efficiency than
a small tuned loop on a balcony, and will cost you pennies to build.

73 and GL,
Don, W6JL

Here is the typical lawyer logic.
Lay people are not qualified to know right from wrong.
The president (who is a lawyer) gets a blow job in the white house office
and tell us that it is not sex.
Lay people are two stupid to know the truth unless we pay a lawyer to tell
it to us.
Damm you lawyers. (woops.... too late.)
You and your kind are sending this great country down the tubes while you
get rich from it.

My posts were not meant as a "threat".
I have several friends who were unfamiliar with the concpt of a "killfile".
I was only trying to drive home the point that we (those who are not into
pointless fighting)do have an option other than just leaving the news groups.
Killfiles are a wonderful alternative.
And this is not meant as a threat, but "poof" you are in mine.
Have a nice day.
And I will bet that you are a lid on the air alos.

> c-squared
>. . .

I'm afraid this might mislead people who would read "proportional" to mean "directly proportional". Given that everything else is equal, shortening a dipole below a half wavelength or a loop below a wavelength circumference will indeed lower its efficiency. But there's certainly no "law" establishing that if you shorten it by one-half the efficiency drops by 1/2, and for moderate shortenings the efficiency reduction is typically much less than that. Some small antennas can be very efficient. Certainly many small antennas are closer to a dipole in efficiency than the 6 dB you've repeatedly regarded as being insignificant.

Thank you for explaining your "law" so well in scientific terms!

I use a 12v lamp from a "Night Sun" system (bought at the Local Bike Shop) with a handlebar fixture made by Vista-lite, which usually comes with a 6v halogen. I connected it and the HT to a 7 AH 12v gel-cell, (the price was right, $0.00) although a little heavy. I used to use a 2.5 AH gel-cell which cost about $20. I connect to a wall charger when not riding (usually ride to work) and it's always up. I've used the lamp for an hour or so, and the HT on and off for the same time, and haven't noticed any sag in the battery, much less ran it down. YMMV. 73 Jim W5AI

This statement is certainly not true. I'm not of that generation and I
have an HF license thus have nothing to gain but I am in favor of dropping
the code testing. Perhaps a more rigorous written might be appropriate.
OTOH I support the ARRL compromise. Left to their own devices the FCC
would have in all likelyhood reduced all code testing to 5 WPM by now.
The ARRL is working to hold that off and you procode fanatics think
they are the devil incarnate. How little you know.

Hello All,

This is Mike, KQ6MU.
I have a NEW Yaesu FT-50R Page.
It includes its specs., features, and other
technical info about the FT-50R Dual Band HT.
Please check it out:

http://kq6mu.8m.com/ft-50r.html

Thanks & 73,

Mike Green KQ6MU

The code waver was designed to help people who passed the 5wpm test but
cant go any faster because of physical
limatations that would keep you from
copying code such as hearing loss,ect.
but, I know several people who were
perfectly able to copy code who got there doctors to sign there waver!

One guy I know got it for a BAD BACK!
Another guy got it because he had a heart attack 10 years before, and he
got his Dr. to sign the waiver saying CW tests were too stressfull and
might bring on a heart attack!! Both are now extras!

I dont know if the fellow with the waiver was like that,all Im saying is
it happens every day! there was a rumor that a Dr. near Pittsburgh, pa.
was signing waivers for $50!!

Its a shame that perple take the EASY WAY OUT!!

DANG SHAME

The way I look at it is I have to crawl before I walk and I am going to
get my ticket and then I will go for the code. I hope you guy's don't
put everyone in the same bracket and think just because they get the
no-code tech they are not going to be HAMS. At least I am doing
something to keep it going. Once all the old HAMS are going what is
going to happen. So don't bad month everyone.

Thanks for taking to time to read this.

Ya all know how software writers put them eggs in software, right ?

I work at a magazine publisher and every year soome of our staff pick an magazine we publish in April and stick some goodies inside as a joke. This year we chose QST by the ARRL.

There are 100 QSTs out there (May issue, NOT April !) that should be arriving in your boxes with various goodies glued in this week or next.

Examples are these

free coupons for McDonalds
1 C note (only ONE, sorry !)
5 10 dollar bills
1 25 dollar certificate at Target
and the ever original girlie pix are in another 94, but SOME also have either Mick Ds or cash

Morse Code (which is REALLY what we're talking about) dates to
the early 1840s ... phone, even the crudest AM did not come about
until much later after the vacuum tube was invented. SSB came
even later, and FM did not become popular until the late 60's or
early 70's when a flood of older VHF/UHF commercial gear began
to become available on the surplus market.

Your assertion is all wet and reeling with procode spin as
usual, Jeff.

"What's in a name?" I think the quote goes ... read the "What we
believe" (aka the "Mission Statement" according, at least, to
your good buddy Dick Carroll) ... that's where the rubber meets
the road ... you'll notice it SPECIFICALLY disavows any intention
to work for any sort of ban on the use of Morse ...
```

> >> > You yourself won't even rule out that that's a possibility.
>
> >NCI, and its directors, including myself have repeatedly

> mentioned about limiting themselves to doing away with just code tests.

See above ... read the website "What we Believe" and the articles ...
you won'd find diddly about doing away with code usage ... in fact,
just the opposite.

But then you've never let the facts get in your way when
it comes to NCI-bashing, have you, Jeff?

> with the customers !! 73 to all

What is your point? Are you claiming that Bird watt meters do not
meet their specified accuracy?

Your comments raise a few questions, such as how do you know that the
true power was 40 watts and what were the ranges and conditions of
the Bird elements with which you made those measurements? And also,
if you were serious about the last comment there's the ethical
question of why you were showing a reading to your customers that you
believed was false and fully 25% greater than the true power.

New standard Bird 43 meters are specified at +-5% of Full Scale in
carrier mode (and +-8% in PEP mode where that's available). So, even
if the true power was 40 watt (and you didn't explain how you reached
that conclusion), then measuring it with a new meter and new 250 watt
element will not guarantee a reading any of better than around 237 to
263 watts, and using an old and mishandled meter and element of any
rating may also not give a particularly accurate measurement.

Right

It's no big mystery. The author of a newsgroup posting can delete his own posting. It's possible that the error was spotted, and corrected. Dejanews probably pulls its newsfeed at longer periods than your other services. Thus, it pulled only the surviving, corrected version, while some other services got both.

In either case, I've managed to misspell my own name both in Morse and on the keyboard as well. As with any other live media, backspace and self-correction is normally granted as a common courtesy. I see no reason why it should be any less appropriate with a NG posting. However, it makes no sense to huff a puff when a simple "........" would suffice.

I think we can all let this die now.

Michael.

Never used one myself. Try it. Find a used one. Borrow one. Should be
about as efficient as other small antennas. One advantage might be
directionality if it's sharp enough to null QRM. Been my experience a
single-ended wire (with a good ground) works as well as anything if you
can't use a dipole.
I'm working on a 160 meter rhombic array at the ranch. ;-)

I think someone is peeing up the wrong tree. I see no need to decide that CW sucks and we need to get rid of it, to get more people jamming the airwaves. There are already plenty of Hams now. The problem is, not enough of them are transmitting. Is that a problem? If you have roads should there always be a traffic jam?
At a recent Ham club meeting, they wanted to see a show of hands of those who had a HF station set up. It was a sad pitiful sight. 20% at the most. I bet most of the non hand raisers never or almost never got on any bands at all.
What are we supposed to be doing? Selling more radio gear or jamming the airwaves, or having a base of citizens knowledgeable about radios and electronics? Maybe we do need some new voices out there because I can think of a few I can't stand listening to. Maybe that's why those other people aren't on the air, they heard them too.

Hi, Dave.

I talked to a friend of mine who is very knowledgeable about these units, and he seems to feel this was likely a homebrew. From the photos, it seems there are three tube sockets. One would be used for a coil, another for the regenerative stage, and the third for an audio amplifier. The transformer was likely an interstage between the regen and audio. The (magnetic) earphones would typically be hooked to the battery and plate of the audio amplifier.

It looks like a battery set - that is the tubes were directly heated filament/cathode. It was hard to tell from the pix whether the tube sockets were four or five pin. The resistance control is likely to adjust filament voltage, and the presence of a transformer in the regen circuit was more typical of battery sets than later "AC" sets that used tubes with indirectly heated cathodes.

Regarding the schematic. You are probably best off by finding a typical regen schematic, then tracing out the wiring in your set. There were many minor variations but all followed the same basic approach. From the size of the tuning capacitors (one was tuning, the other is likely a regeneration control) it looks like it was built as a short wave receiver.

The coil will probably take some educated guessing, but if you can find a typical schematic, you might borrow the coil winding data from that project. The coil windings are probably not too critical provided you have the basic windings and taps hooked to the proper places.

It should be straightforward to make the set work again, after all these years. Good Luck!

Hi All,

After Drake's 4NB didn't do much for me on my QRN I decided to cobble something together that would work. While it is still a work I'd like to improve, I have something that works a whole bunch better than the 4NB. I used Ten-Tec's Model 297 accessory blanker for the Scout. The details of the project are on my web site. See them at:

http://www.wwc.edu/~frohro/R-4C/NoiseBlanker.htm

If you have any suggestions, I'd love to hear them.

73,

Rob, KL7NA

Welcome to the Auxiliary Communications Service Newsletter, developed by the ACS Training Unit of the State of California Governor's Office of Emergency Services. Please visit our ACS Home Page at http://acs.oes.ca.gov

The purpose of this weekly newsletter is to bring those of us in emergency communications closer together by sharing common ideas, and by introducing new technology into the emergency services community. All individuals with an interest in emergency communications, disaster preparedness or helping the community at large are encouraged to participate here in an open forum.

You will find a virtual community here, with representatives from many different organizations with the same common goal: emergency response. We encourage everyone, from whatever organization you represent (or just yourself!) to bring us your ideas, suggestions, concerns, manuals, handbooks, or opinions so that we may share them with the group. To those of you who have just joined us, welcome aboard!
.....

>From the Editor's Desk:

The ACS Headquarters Training Unit is looking for a volunteer to serve as an ACS Plans/Programs Coordinator at the State level. This position involves developing plans, classes and training for the ACS program at the State level, assistance in the develo pment of the ACS Newsletter and EMCOMM Bulletin series. Most of the work required is conducted on the Internet and e-mail. Previous expwerience in emergency management and/or volunteer coordination is desirable. If you'd like to help, contact me at larton@garlic.com
.....

Please Welcome:

Bonnie Bennion <bennion@ix.netcom.com>
Foster City, CA

I am with the Coast Guard Auxiliary. Currently, I am the District Staff Officer for Communications and the District Emergency Call-Out Coordinator. I have been with the Auxiliary for 25 years and find it very rewarding.

John Driscoll N2MKH <jdinsyr@dreamscape.com>
Syracuse, New York

I am associated with the Oswego Co. Emergency Communicators (RACES) and act as Packet Coordinator. We have a system set up in our area which serves as an emergency communications system and, as such, are associated with the New York State Emergency Manage ment Office (NYSEMO). Our packet group is the SYRacuse Packet User Group (SYRPUG). We have an emergency Communicators Net on the 1st and 3rd Sundays(local repeater)followed by an Informal Packet Net. We are available for public safety events as well as em ergency communications. We participate in FEMA and NYS drills in the area. Drop a line if you want more info. N2MKH

Current Events:

FEMA Establishes Donations Phone Bank for Humanitarian Relief for Kosovo Refugees

--High-level coordination underway between FEMA, USAID and DoD to ensure effective delivery of assistance.

Washington April 6, 1999 - The Federal Emergency Management Agency (FEMA) has established a phone bank to handle public donations for relief assistance for the Kosovar Albanian refugees, FEMA Director James Lee Witt announced today, as he urged Americans who want to help to call 1-800-USAID-RELIEF.

"Like all Americans, I am shocked by the conditions and the suffering that the Albanian people are enduring," Witt said. "I'm sure that Americans all across the country are anxious to help. At this time, we are asking for cash donations only. Because of security and logistical concerns we are not able to handle material goods.

"FEMA has extensive experience in coordinating donations as well as the deployment of supplies and equipment to help the victims of catastrophic disasters," Witt said. "We are going to use that expertise to help the Kosovo refugees."

Meanwhile coordination meetings took place today at FEMA's Washington headquarters following President Clinton's action on Monday naming Director Witt to help coordinate humanitarian relief for the refugees. Today's coordination meetings focused on ironing out procedures and operational details for a massive humanitarian relief effort, named Operation Sustain Hope by President Clinton. Brian Atwood, administrator of the U.S. Agency for International Development, was named coordinator of the overall effort.

Witt said that he is sending a high-level team, which includes FEMA's Deputy Director Mike Walker, to the NATO Mission in Brussels Wednesday, April 7. Walker will be responsible for coordinating the Agency's role in the relief effort with NATO and other organizations involved in the rapidly growing humanitarian relief effort.

The U.S. government has provided over $150 million in humanitarian assistance to displaced Kosovars since February of last year, including a provision of $50 million authorized by President Clinton on March 31. President Clinton also ordered the prepositioning of humanitarian supplies in the region well in advance of the current refugee crisis in preparation for a variety of contingencies. In addition, the U.S. has stockpiled enough food to feed 500,000 people for three months.

Seminar Puts Dogs' Noses to the Test Dogs undergo `urban' training in Alameda

The whines of the droopy-eared bloodhounds could barely be heard yesterday over the louder whines of the California Highway Patrol helicopter, its rotors whirling to acclimate the dogs to the noise.

Some of the tracking dogs walked confidently with their handlers to the noisy machine, parked at the old Alameda Naval Air Station against the backdrop of the Oakland skyline. But other bloodhounds were clearly skittish, their paws paddling in protest as they were put inside.

The simulated ride was one of several exercises designed to put the police and search-and-rescue dogs through their paces as part of the first Golden State Bloodhound Seminar, a weeklong program sponsored by the Alameda police.

``What we're trying to do here is basically teaching urban training, to teach the dogs how to track human scent at pursuit speeds,'' said Alameda officer Henry Guillen, a police dog trainer.

The bloodhounds, famous for their scenting and tracking abilities, were joined by other breeds, including rottweilers and German shepherds. They ranged in size from Q, a 4-month-old puppy, to Einstein, a 150-pound behemoth.

At first, Einstein was afraid of the CHP helicopter. But with the help of his handler, he got into the copter, sat down and looked happily out the window.

Elsewhere on the sprawling former air base, dogs were splashing in the inner harbor, looking for dead pigs immersed in the water to simulate drowning victims.

Pigs are used because they smell like cadavers, said Alameda police officer Jeff Schettler, a bloodhound trainer and seminar host. In drownings, bloodhounds can detect human scents that rise to the surface during decomposition.

The dogs were also let loose in the base's abandoned houses and winding streets, honing their urban ``scent discrimination'' skills by following only the person whose scent was introduced to them -- even hours before. The strongest scents come from body fluids, like blood or sweat.

Their tracking prowess in rough terrain -- including ``contaminated'' crime scenes --will also be tested near Lake Chabot.

The seminar has drawn police agencies from Arizona to Maryland and as far away as Italy.

Schettler's bloodhound, Ronin, has been a hot commodity nationwide.

Last year, the two were called to North Carolina to help search for Eric Rudolph, the suspect in the Atlanta bombings who is still at large. In Alameda last August, Ronin picked up the scent from clothing found near an abandoned baby girl and followed the smell to the mother, who was arrested, Schettler said.

This week's EMCOMM Bulletin:

EMC179 Attitude Makes the Difference 2/2
To: Emergency Communications Units - Information Bulletin
To: Emergency Management Agencies via Internet and Radio
By: Auxiliary Communications Service (ACS) of the
California Governor's Office of Emergency Services

EMC179 Atitude Makes the Difference 2/2 For release 4/12/99
(continuation from EMC 178)

"In time, a change of name was needed since their then name seemed tied to two specific communities. After brainstorming for over a month they came up with three names and decided to vote on one of them. The result was CREST. They tried to come up with a slogan or acronym as to what CREST stood for, and unofficially it seemed to be: Corona Region Emergency Service Team.

They had "a name. Now they needed an attitude. When they had needed to raise money for a repeater they got it on their first and only application. To instill the attitue was their next process. 'CREST' is the 'BEST'". "We tried the REST and decided on CREST." This led to an attitude they could do anything."

In time they "organized the CREST REACT Amateur Radio Club and tried another impossible feat - getting ARRL recognition for their team. It was a long hard road but with their attitude they were successful and enjoy that recognition still today."

Their most recent endeavor was "to form a CREST Communications Team. What with the uncertainty at the REACT International level in l997, they decided they would survive even if it meant removing the patch they had worn so proudly for l9 years."

"Their new organization encompasses their REACT, their Amateur Radio Club, the Norco Citizens Patrol, The Canyon Watch, The Repeater Users Group and others. In l998 CREST had a membership of 120+ strong and is looking to double it to over 250."

"Remember, we can do anything we set ourselves to do" wrote Ed Greany, President in the July-Aug l998 issue (no 9) of "CREST REACTivities". (The above material was extracted from his article.)

Their Norco Citizens Patrol has developed a new program, "Norco Cares About Seniors" that seems to fill an important need that may apply to many communities. It is focused on seniors that live alone in a house. Here is how it was described in the same newsletter:

"It involves a senior citizen, concerned family member or friend that fills out a simple request form. Requesting parties can request visits from the Norco Citizens Patrol (vehicles) or a regular phone call to check on their well being. Visits will be sent to the mobiles by N.C.P dispatchers or patrol staff. Mobile

members will advise the dispatcher when they are at the location. If contact is made the mobile members can stay and visit for a while if they wish. If contact is not made, they will notify N.C.P dispatch to attempt a phone call, check for notice of vacation, etc. If there are circumstances that seem strange, bazaar or "kooky" a call to the Sheriff's Dispatch is in order."
(end)

To subscribe to bulletins, use the Subscription Services web page at <http://acs.oes.ca.gov/subscribe.html>. If you don't have web access, just send an e-mail message to <mailto:emcomm-bulletin-sub@harthaven.com>.

- For training assistance contact the ACS Training Officer at the web site or send an email to larton@garlic.com
- Submit suggestions, topics or comments on the bulletins to cary.mangum@macnexus.org or cary_mangum@oes.ca.gov

Bulletins are on the ACS Web page: http://acs.oes.ca.gov -and a Landline BBS: 916-262-0856 (graphical & standard interface); and a FTP Archive: ftp.ucsd.edu/hamradio/packet/tcpip/incoming for some bulletins. For earlier ones: ftp.ucsd.edu/hamradio/races
.....

Please let others in the emergency services field know of the newsletter, and encourage them to join... If you have opinions, suggestions or written material that you'd like to share with the group, let us know. We're always looking for new ideas and suggestions that will benefit everyone.

See you next week!

>
>73,
>Paul Folmsbee K5PF

Paul -- As a followup to your message and my reply, we at the League have
been in contact with the President and CEO of Swatch, a Swiss company.

I don't believe we're going to be able to move Swatch off it's intended
course of using the ham bands in a couple of weeks for their "beatnik"
campaign (as they call it). It is a situation where a Swiss company has
contracted with the Russian space authority to use their satellite so it is
difficult to get any leverage to "force" either the space agency in Russia
or the Swiss watchmaker to change its plans. The good news, so to speak,
is that with a 100 mw xmitter, the chances are good we won't hear a great
deal of these "space bound" messages.

We are working on making sure that this doesn't happen in the future
however. And that is the important aspect of this whole matter.

73, Rod Stafford W6ROD

I have decided to move some of my big iron to make room in the garage.
Actually, She WHo Must Be Obeyed suggested it.

The following can be delivered to the Belton, TX hamfest this weekend,
17 April. If you are interested send me an email or give me a call
for additional information. All are in VG to excellent condition,
a.k.a., no dogs. None have obvious mods. All are complete. None have
been restored. Manuals are available to copy. Untested as of right
now unless noted. I may have time to give a "light up" test before
Saturday.

1. CE-100V - $225
2. SX-42 - $175 (works)
3. HT-37 - $75
4. HT-41 with 572B finals - $250
5. HT-32A - $125 each for two
6. Apache - $150
7. Mohawk - $150 (works)
8. Marauder - $150
9. Warrior - $250

Thanks in advance and best 73,
gary

>Speculation leads you to ASSume "facts" not in evidence, Jeff,
>with the result that you come to the wrong "conclusion."

It's a fact that their name, No Code International, does not specify
elimination of just the code tests - no speculation nor assumption,
it's factual.

>> > You yourself won't even rule out that that's a possibility.

>NCI, and its directors, including myself have repeatedly
>stated that we have NO intention of EVER seeking any sort

They've made themselves quite clear: "No Code International." Nothing
mentioned about limiting themselves to doing away with just code tests.

975. Re: Physician's Code Waiver

Newsgroup: rec.radio.amateur.misc
Date: 1999-04-13 00:00:00 UTC
From: Michael Young <nobody@all.org>
Message-ID: <923990652.338.33@news.remarQ.com>
Source record: 145910

The specifics are on the back of Form 610. Basically, it allows any medical condition your physician deems sufficiently bad to prevent you from passing the code test, even with special accommodations. They are required to reveal the details to the FCC, but not to the VE. The FCC makes the final ruling; the VEC is only required to pass along the signed waiver, not judge appropriateness. The waiver applies only if you previously passed 1A, probably something to do with ITU requirements.

Michael.

If you want something really simple, how about one of those switches they use in closets where, when you open the door the light comes on. In this can "lifting" the equipment would open the switch and turn on an alarm.

Or, instead of an audio alarm, you could use one of those strobe lights that are used for letting you know that a phone is ringing (Radio Shack sells them). Better still, use both the alarm and the light.

Good luck.

Keith Piercey VO1AE

I am not sure as to why you think my post was meant as a troll. True, the
humour might escape some folks, but the point is still true, if we all put
these clowns in our kill file, and refuse to respond to them, the noise level
should drop. Even the most diehard lid will leve the air if now one ever
responds to his drivil. These lusers are the LIDS of the internet.
If you desire, I will add you to my kill file and you to will vanish from the
posts that I see. The kill file is as good as the lidlist in my TNC. I
thank the guys who dreamed them up. Now if I could just get my radio to
"kill file" the Lib..oh never mind.

Name withheld to stop, or at least limit, spam. And following the arrest of
some of the folks who sell data slicers, we may all need to hide. And for
what it is worth, data slicers and Jfax allow the reception of NOAA/Meteor
APT images.

981. MFJ-9030 IMPROVEMENT

With proper kill-file programming, we could have two completely
seperate newsgroups within the same newsgroup.

The radiating/receiving efficiency of ANY SORT of practical antenna is proportional to its physical dimensions measured in fractions of a wavelength. This is a an unavoidable fact of life. In more scientific terms it is one of the un-assailable laws of the universe - just like e = m * c-squared

Above 0.25 wavelengths you are laughing. Below 0.1 wavelengths you have severe problems.

So the answer to your question is simple - a magloop is only worth the money when there is not enough open space to erect something larger, longer or higher.

You will save much money and, indeed, obtain more satisfaction and pleasure by making your own magloop. The main cost will be that of the high-voltage tuning capacitor.

I don't know what your local environmental circumstances are. But if you can suspend a thin, unobtrusive wire, up, down, or horizontally outwards (especially up and outwards) from your balcony, you may be able to erect for a few pennies an antenna which performs much more efficently than an expensive magloop.

Think in terms of a length of enamelled copper wire, the longer the better, some sort of ground connection such as your domestic water pipes, and a simple antenna tuning unit (a home-made coil using the same wire and variable capacitor). Give it a try. Even if you eventually come back to magloops out of curiosity, you will never regret it !

> accuracy of their instruments.

5% of full scale is 12.5 watts. The error at 40 watts (or 12.5 watts) cannot be "assumed" to
also be 12.5 watts by any reasonable person. That is nonsense and anyone who knows anything about analog meters knows that it is nonsense.

The % error in any high quality analog meter degrades "gracefully" as you go downscale. The errors at less than full scale are definitely related to the full scale accuracy. Pick up a catalog of meters and you will see that the full scale accuracy is what is specified. That does
not mean the meter is "junk" at other readings.

Here is the main idea. A properly designed D'Arsonval meter maintains a certain definite relationship between "deflection" vs "input" over its range. The full scale accuracy is correlated to that relationship. Because of that relationship the scale can be marked with considerable confidence across most of the scale. At this moment I am looking at a Simpson catalog that specs full scale accuracy. Yet the picture shows finely spaced markings all across
the scale. Is this some kind of "fraud"?

Hogwash.

Meter designers and manufacturers learned long ago how to deal with this problem of reproducibility, so that "one" meter scale can be used over and over.

For a rectifier meter the rectifiers do introduce a problem, but with quality control this problem is manageable, and is responsible for a slightly relaxed spec for this kind of meter.
AC meters also have a crest factor problem.

> If the accuracy of the
> Bird 43 wattmeter is not specifed at some points on the scale, as you
> say, then it's useless for making any kind of meaningful measurement,
> as is any piece of test equipment with unspecified accuracy.

My experience with my 43, with its 2-30 MHz elements, is that it is quite "accurate" across most of the scale within that frequency range.

> I'll bet that if you were to send the
> Bird 43 meter to the calibration lab and it measured 30 watts with 40
> applied, or even 12 watts with zero in, it would be returned as being

> in calibration.

Baloney. It would be sent to the factory repair shop.

> Most labs will
> return a meter as calibrated if it meets its spec. If it has no spec,
> it can't be calibrated. The fact that the Boonton was returned as
> calibrated doesn't mean that it's dead on, only that it meets whatever
> spec Boonton or your company put on it.

It meets the requirements that Boonton says it supposed to meet. And when it is adjusted at full scale, it is very accurate across a 13 dB range, as determined by accurate RF attenuators.
I have been using these meters for 30 years and I know their quality.

As for going separate ways, go which ever way you like. If that is the way you want to behave
toward me, I couldn't care less.

Additional equipment has become available for the Belton trip this Saturday, 17 April.

If you are interested send me an email or give me a call for additional information. All are in G or better condition. None have been restored. Manuals are either available or available to copy. Untested as of right now unless noted. I may have time to check for smoke before Saturday.

1. Globe King 500 (not sure which model but no VFO; missing rear door, needs work) - $300

2. Heathkit DX-100 (2 units; one nice one has a modulator problem; other is untested) - $150 for both

3. Hallicrafters SX-25 - $125

Rus,

Your getting a real bag of worms with Telephone interference. There are so many possibilities it can be mind boggling. I use a filter built by Rich, WB2OTK. It works very well, or K-COM sells a good series of them also. As a last resort go buy a phone from Radio Shack, its number is 43591. They do not seem to react to RF interference.

998. TH-D7A packet using a Windows CE

Newsgroup: rec.radio.amateur.misc
Date: 1999-04-14 00:00:00 UTC
From: Steve Meserve <stevenme@microsoft.com>
Message-ID: <7f25ah$n5q@news.dns.microsoft.com>
Source record: 145730
Cross-posted to: alt.ham-radio.packet,rec.radio.amateur.equipment,rec.radio.amateur.misc

I had the idea to use a Windows CE unit (Compaq h/w) as the terminal for my mini packet station, the Kenwood TH-D7A. This creates a very small but powerful packet station with one slight problem. Since the real (pg-4w) cables from Kenwood are not yet available (I'm told they are backordered), I used the 3/32" 3 conductor plug with 4ft of wire provided in the box by Kenwood, and added a DB9 to the other end. While the data connectivity works flawlessly, the RF situation couldn't be worse. As soon as I bring the cable (connected to a running CE) close to the D7A, RF hash appears. If the cable is actually plugged into the radio, all but the strongest signal are obliterated. I've tried another CE unit, an HP 660, and get the same results.

Has anyone else tackled this problem? Does the Kenwood cable (the pg-4w, if you can find one in stock) fix the problem? My guess is to use a torriod and wrap the cable around it, but I don't know how to calculate the torriod/windings to create a choke to cleanup this RFI. Any info is appreciated. 73's

Check out:

http://www.k-comfilters.com

I've had great success with their filters. We have an AT&T Trimline 210
(a most vile piece of equipment with respect to RFI) that used to
produce room level audio when we ran a KW on 40 meters. With the K-COM
filter, you can't even tell when we're on the air.

72/73,
Bob

This is not correct.

Within the past month or so, I purchased a *new* Model 43 with a *new* 250H element. I compared it with a recently calibrated Boonton Model 92B RF voltmeter and 50 ohm load setup. The readings compared as closely as I could read the scale at all levels from 10 watts to 250 watts. I found this to be impressive. I found the accuracy to be quite a bit better than the "guaranteed 5% of full scale".

The meter scale on the 43 is highly compressed at full scale but spreads out greatly at readings below full scale and is easier to read. For example, midscale is about 80 watts. At 40 watts the error is not +/- 12.5 watts for a 250 watt element. It is definitely not off by 31% at 40 watts.

5% of 250 watts does not imply 12.5 watts at "all" meter readings. That is not what the term means. In fact, the term doesn't really say much of anything about the accuracy at lower readings.

The manner in which they mark the meter scale indicates the confidence they have in those markings. The validity of the markings is verified at the factory, where they have made more than 230,000 Model 43s. The skeptical owner should verify this for himself, as I did.

The nonlinearity of the meter scale has to be considered.

I also checked my new 1000H element with the same results.

Hi Rob, KC2AEI,

I received a response from the ITU regarding a request
to intervene relative to the upcoming Amateur Space
activity by SWATCH onboard the Beatnik / Sputnik-99 /
RS-19 satellite.

The ITU requested that as a FIRST STEP, that the matter
be brought to the attention of "the Administration
responsible for Telecommunication matters in your country".
In the US, this would be the FCC.

The ITU also requested that this information be circulated
among those who could have been invited to send the same
request to the ITU.

The text can be viewed at:

http://home1.gte.net/rhashiro/am-beatnik.htm

Could you please update your web page accordingly,

http://wmbc.umbc.edu/rob/swatch-protest/

and I'll also post this into rec.radio.amateur.misc,
rec.radio.amateur.policy and rec.radio.amateur.space.

Incidentally, the FCC is aware of the upcoming event.

73 and aloha,

Ron Hashiro, AH6RH
Honolulu, HI

Which part of my statement is not correct: That the Bird accuracy is not as I said, that readings of 27.5 to 52.5 watts for a 40 watt signal are within its specified accuracy, or that you have to use a different instrument to get better accuracy than this? If you're referring to the last of this list, is your sole evidence the measurement of a single new meter? Certainly, any single meter or even the vast majority of meters could be much better than the specification. None should be worse. And a given one can be calibrated or verified to better than the specified accuracy, as I suggested in my posting. But it's perilous to infer the accuracy of all meters from a single sample. If all Bird meters were as good as yours, it would be foolish for Bird to specify them so loosely.

If "5% of full scale" doesn't mean 5% of full scale, then what does it mean? If I measure, say, 40 watts, exactly what range of power could actually be going through the meter with certainty guaranteed by Bird? If they can't specify a range of values, then there is no specification at all. I say this as a person who has spent most of his career designing test equipment, all with carefully defined specifications, although this is very basic metrology.

Out of curiosity, what was the specified accuracy of the Boonton you compared it with?

I wonder if it's possible to get a waiver for something like Attention Deficit and Hyperactivity Disorder (ADHD) or other cognitive problems? At our university, we must provide extra time on tests for people who have been diagnosed by our Learning Center with any learning or attention disorder. I think that this is a universal thing in academia.

Larry,

There is no doubt in my mind that you *can* learn code. Perhaps you were going about it the wrong way, or perhaps you were trying too hard or trying to go too quickly. I think the secret is to be relaxed and not in a hurry, and persevere.

Very good idea. I have contacted OFCOM (Swiss FCC) last thuesday. See
below for details.

> The text can be viewed at:
> http://home1.gte.net/rhashiro/am-beatnik.htm

> Incidentally, the FCC is aware of the upcoming event.

OFCOM is investigating the case, too.
Please do not spam them with complaints, they are really working hard
on the problem and are *very* cooperative fighting for the radio
amateur's rights (do I have to mention, that the guy working on that
case is an amateur, too?). If You have something they might be
interesed in, let me know and I will forward it to them.
As mentioned above I contacted them last thuesday and since then they
have tried to gather as much information as possible to hunt down
Swatch. There seem to be quite a few problems due to the fact, that
the satellite is not operated by Swatch, but the Russian Space Control
Center (if somebody has secure information *who* uploads the Swatch
messages, please let me know). Swatch only forwards the messages to
the operator. Cooperation with Russian authorities seems to be always
one way (complaints are never answered, but in some cases solved...).

I think, Swatch will not stop that project. N. Hayek's sense for right
and wrong seems to be (to be polite) strange. The only language such
people understand is brute force. This means boycott of their product
and anti PR in the mass media. I am shure that at least the second one
will happen, if Swatch has the satellite launched on friday.
So keep on complaining (politely!) on the Swatch comment page.
Spamming them won't help at all, however.

If everyone sends swatch 100 emails, it might just crash their mail server. And while I would never suggest illegal activity, there are ways to mail bomb a site and (cometimes) cost them their net connection. Plus, they have at least two 1-800(800-937-9282 Pa and 800-598-6949 NYNY) phone numbers. Call them from every pay phone you pass and tell them why you think it is a bad idea to spam hams.. They will have to pay, and just might get the idea that hams are not as polite as they might have wished.
The more brave (and/or foolhardy) could even get a pc to autodial the numbers, but you might be prosecuted for this.
The only way to get most businesses attention is to hit their balance sheet. 800 call average around a $1 (us) each. 100 calls per day per pissed ham could really add up.
Or just roll over and watch our frequencies get grabbed by the money hungry, couldn't careless, corperations.

Saber 1 uhf 12ch
6D core, H/pwr, non secure
Model # H44SAN7139CN
comes w/ 1 batt.motorola used (not so good)
plus 1 brand-new batt motorola (7.2v @ 1800 ma)
& ant. the shape of the radio is in
good shape I'll give it a 7.

*** Note ****

Asking $240.+ you paid for S+H

**** Need to read radio for band spread ? ****
Don't know band spread!

I'm not going to paid someone $40 or $30 so i can read
the radio. If I'm not going to kept it.

Then i used my scanner to see what were the
CH. And this is what i found.

Ch. 1 447.285
Ch. 2 449.925
Ch. 3 460.000
Ch. 4 460.500
Ch. 5 449.125
Ch. 6 447.125
Ch. 7 --- Blank
Ch. 8 --- Blank
Ch. 9 --- Blank
Ch. 10 --- Blank
Ch. 11 --- Blank
Ch. 12 --- Blank

Save $40 or $30.

And this is why I'm selling it!
1) I got it with a trade!
2) It cost to much for me to keep this radio.
I would need a charger, software, cable,
rib box and get this a 386 computer. Ha

1016. DM-3472 from Johnson Data

Newsgroup: rec.radio.amateur.misc
Date: 1999-04-14 00:00:00 UTC
From: Jamie Cutler <jwc@stanford.edu>
Message-ID: <3714D673.2F519004@stanford.edu>
Source record: 145748
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.equipment

Hello,

Just wondering if anyone who has ever worked with the
DM-3472 UHF Transceiver. It's from Johnson Data (johnsondata.com).

We're getting some strange behavior. Every once in awhile after a
power cycle, the radio permanently looses it's transmit frequency.
The radio has a loader that contains a small processor and EEPROM
to load the radio's synthesizer with a frequency. Occasionally,
the transmit frequency gets set to 268.41250MHz. It's quite stange.

I'll go into more detail if anyone is interested. I've contacted
Johnson but no luck getting ahold of them yet.

Thanks.

Steve,

I think that a single large piece of ferrite would do the trick with
only one pass through it. Look at how the power supply and other cables
from many laptop computers have those characteristic parasitic lumps on
them. I think that's what you need.

I was following along pretty well until the part about 'negative energy'...
Yeah, you can have negative energy flow, but energy's gotta be conserved
somehow!! Think 'unterminated transmission line'... where does the
energy go?? High SWR, reflected waves, hmmmm.... I bet the final amp is
getting pretty warm by now.... !!! Unless you use a tuner, which
probably will dissipate some heat itself.

Of course, you can also have ground losses, radiation patterns straight up
into space, maybe others I haven't thought of. The point is, there are a
lot of possibilities besides breaking a law of physics that hasn't been
disproved in 100 years. You'd have to eliminate all those things and then
some to make me drop my trust in thermodynamics. (Not faith.. trust...)

Roy Lewallen wrote:

> Which part of my statement is not correct: That the Bird accuracy is
> not as I said, that readings of 27.5 to 52.5 watts for a 40 watt
> signal are within its specified accuracy?

Yes. That is what I said. Suppose you read 12.5 watts. Does that mean the power is between 0 and 25 watts. Read the scale on a 43 in good condition and you will see that this does not make sense.

> If all Bird meters were as good as yours, it would be
> foolish for Bird to specify them so loosely.

It would not be foolish at all. See explanation below.

> If "5% of full scale" doesn't mean 5% of full scale, then what does it
> mean?

It means what it says and should not be extrapolated. If the reading is 250 watts the error can be +/- 12.5 watts (0.22 dB). It does not say that a 40 watt reading is also +/- 12.5 watts. In certain applications, for best "percent" error, we would try to pick a plug-in element whose full scale coincides with the power that we are interested in.

The maximum error in watts is not a constant number at every point on the scale.

> If I measure, say, 40 watts, exactly what range of power could
> actually be going through the meter with certainty guaranteed by Bird?

As I said before, the exact accuracy at readings below full scale is not specified (there may be some formula that they use and that my inquiry to them could not determine). It is very difficult and dangerous legally to "guarantee" the accuracy at every point on the scale. My guess is that they computer-check maybe five points in the factory. I also guess that their diodes are tightly specified and hand picked (I have seen this practice also). For reasons of their own they do want to be involved with tight specs on portable instruments that may be misused or abused or operated over a wide ambient temp range (because of the tempco of the diodes).

But if you look at the scale, the markings are very well done, and the pointer is an anti-parallax type for accurate reading. I don't think this is just "window dressing." There is a certain error associated with the ability to read the meter that has to be considered. At low wattage the percent error can increase somewhat because of this. If the needle gets bent because of misuse, or if the meter has an aging effect, these things aggravate errors over time. The D'Arsonval meter does have certain systematic errors with age.

There are digital instruments that are used only in metrology laboratories such as Rock-Col that are used to check things such as 43s, which are then used at the test stations on the production line. In some applications there may be a correction chart attached to the 43.

> If they can't specify a range of values, then there is no
> specification at all. I say this as a person who has spent most of his
> career designing test equipment, all with carefully defined
> specifications, although this is very basic metrology.

I am sure that I know as much about these matters as you do. And I know exactly what 5% of full scale means, and what it does not mean.

> Out of curiosity, what was the specified accuracy of the Boonton you
> compared it with?

It was calibrated by the Rockwell Collins metrology dept. I don't know the exact number but you can be damned sure it is not off by 1.6 dB at 40 watts. Government contracts require periodic and accurate calibration of all test equipment. And the 92B is an excellent instrument that is capable of very close calibration. I use a Boonton 100:1 voltage divider for xmit measurements, and it has been verified also.

The 43 and the two elements that I bought are just a random sample of one each. Also, I am confident that Bird checks the 43 at their test stations to better tolerance than what they guarantee at the customer's site. This is common practice. The guarantee to the customer is more relaxed than their production line test. Companies have to do this to cover their butts. Tek does the same thing, I'll wager.

I also know that the 43 can be abused. I have seen plenty of that.

And if the instrument is initially much better than 5% of full scale, then over a long time, with proper usage, it will probably still be within 5% of full scale. I know that is how I would spec it.

And be sure to filter out the harmonics, amplitude ripple and other spurious.

Dave

I suspect it is a homebrew.

Most of the components are 1920 vintage
and are very common items. Early homebrews
typically used wood breaboards and bakelite
front panels, not metal; so there is a bit of
an anachronism here. The large
rheostat is for controlling the filament voltage
on the two tubes. The tube sockets appear
to be wafers--again a contrast to the earlier
vintage vernier dials and transformer.

The larger capacitor was probably used for
tuning. 140-pF was a "standard" tuning capacitor
value during the 30s and 40s, manufacturers
supplied coil sets for that value tuning capacitor.
The smaller variable was most likely used in series
with the tickler winding, as a throttle control, to set
the regeneration point.

If the tube sockets are 4-pin, likely tube candidates
are 30, UX199, and UX201. Blank 4-pin coil forms
are available from Ocean State Electronics. Antique
Electronic Supply I believe offers 5 and 6 pin forms.

I seem to be missing something here. SWATCH is apparently pissing off
all hams with their plan to transmit a message, and for the most part
only hams will hear the message. This sounds like a net loss for them.
They should fire the idiot that ever suggested the idea to them.

That is correct. It is not speced at 5% of the reading, but of full
scale.
That means it could be way off at the lower power readings. Lots of
meters becides the Bird watt meters are speced that way, that is why
for the analog meters, you should try to get the reading on the
upper portion of the scale.
The scale is not linear and the diodes are very poor in calibration
at the lower levels. They are operating in the square low reagon
and could be way off.

I will agree that the Birds are usually more accurate than that. I
work with lab instruments calibrating other instruments every day
and find a quality instrument will normally beat the specs by a
large ammount under controlled conditions, but if they are operated
in a very hot area or very cold area, they can 'drift' near the
limits. Don't know about the Bird, but suspect if you place one at
the extream ends of the temp range, it will be luckey to hold as
near as 2 or 3 %.

Virtually all test equipment manufacturers guarantee and stand by the accuracy of their instruments. Certainly all the companies I worked for did. I've spent many, many hours writing specifications, verifying them, and establishing that I had with high confidence that all instruments would meet their published specifications. The specifications are written so they can be met. If the accuracy of the Bird 43 wattmeter is not specifed at some points on the scale, as you say, then it's useless for making any kind of meaningful measurement, as is any piece of test equipment with unspecified accuracy. I'll qualify that to say that it's useless unless you've specifically calibrated it against a standard which does have known accuracy. (Incidentally, I've heard that at least on some of the ranges, the Bird is near the lower end of its spec at one end of the frequency range and near the upper end at the other. I haven't investigated this personally, though.) I believe that the reason Bird gets by with such a sloppy spec is that they don't have any serious competitor that's willing to guarantee a better one. Or perhaps the market for their instrument feels as you do -- that hey, what the heck, I know they're pretty good.

You mentioned the calibration of the Boonton meter. (I apologize for cutting the quote too quickly.) I'll bet that if you were to send the Bird 43 meter to the calibration lab and it measured 30 watts with 40 applied, or even 12 watts with zero in, it would be returned as being in calibration. You might check this with the lab. Most labs will return a meter as calibrated if it meets its spec. If it has no spec,

it can't be calibrated. The fact that the Boonton was returned as calibrated doesn't mean that it's dead on, only that it meets whatever spec Boonton or your company put on it.

At this point it's clear that you have an entirely different approach to measurement verification than I do, so this is probably a good time to once again go our separate ways.

Check out a ham store catalog -- recommend either Amateur Electronic Supply
or ham Radio Outlet. Look for filters made by K-Com. They have two types
of filters:

-- One is enclosed in a plastic case with telephone jack on one end, plug on
the other. Just unplug your phone and plug in the filter. Recommend you
inset the filter at the phone.
-- The other filter is naked -- just filter with four leads coming off it.

Back when I was seriously on the air, I installed the naked filters in the
wall behind each phone outlet in the house and put the plastic-enclosed
filters on each phone that was experiencing interference. Cleaned it right
up.

It's all academic now. We had a great session with the 5th grade class with a "sparks to spaceships" presentation by W8JW involving a spark gap transmitter loaned from the AWA museum in Holcome. NY. We also had ATV demos and brief overview of the 2meter/10meter repeater and Internet phone involving the K2COP repeater which is online for Iphone calls. Unfortunately I learned later that the K2COP internet connection was not working.

Not sure exactly how to connect to K2COP/r. I did it one time using a demo version of Iphone that has since expired. Guess I got to break down and buy the SW. It was a lot of fun using it and I look forward to getting on Iphone again and making use of those repeaters that are connected to the internet. Sure home the FCC doesn't stop that action.

Source record: 145769
Cross-posted to: rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.equipment,alt.ham-radio.mods,rec.radio.amateur.boatanchors

In all my years of working with instrumentation in the mechanical, electrical, and chemical areas, my training and experience tell me that Roy's understanding of percent of full scale is correct. If a manufacturer specifies percent of _reading_, that is exactly what is meant. But percent of _full scale_ is quite different - the actual reading can be in error as much as this percentage of the full scale reading _anywhere_ along the scale. In general, stating accuracy as percent of full scale is done to make a poor calibration look better than it actually is. For those wanting to quibble about definitions, ISA (formerly Instrument Society of America, now International Society for Measurement and Control) publishes a number of International Standards giving definitions of all of these terms.

I suspect Bird is just lazy in not giving better accuracy statements. For example, I have seen precision digital instruments specify accuracy as X% of reading + Y% of full scale +/- 1 count. In this case, the X value relates mostly to how well the true reading matches the divisions of the instrument's scale. The Y value relates more to the errors obtained when switching from one scale to the next. Finally the +/- one count relates to the ambiguity of the digital electronics (such as a counter or A/D converter).

What Bird really needs to do is present a calibration curve of actual value versus indicated value. Added to this should be two additional curves, one above and one below, indicating the 95% confidence limits as determined for a large number of instruments. This sort of statistical accuracy presentation is expensive, obviously, and I doubt if Bird will ever give one.

Percent of full scale is, in my opinion, a cop-out for Bird. Whenever accuracy is stated this way, it means the actual accuracy of any reading will always be worse than the full scale accuracy (unless the reading IS full scale, in which case the accuracy is the full scale accuracy).

It is not correct. High quality meters of all types routinely specify full scale accuracy. Because of quality control of the relationship between "deflection" and "input" they can mark the scale with considerable confidence. The accuracy degrades "gracefully" below full scale.

I definitely do not agree with your comments on this. They are contrary to my experience with high quality laboratory analog meters of many types.

I didn't think I'd ever learn code either. But I found out that ten days in a tent while it's raining like hell outside is plenty of encouragement. With enough batteries and a walkman I tolerate old Gordo's code practice tapes for hours on end. When I look back at 5WPM I can't believe how slow it is.

I have some Bird equipment for sale, and here is the list:

1. Bird 8201 500 watt 50 ohm dummy load in great condition W/ N
connector $275.00
2. Bird 4381 RF Power Analyst W/ N connector, no manual. Don't know
if it takes regular batteries or rechargeables. It has a charger
connection great condition, but can't test $575.00
3. Bird 4304A 25-1000 MHZ 500 wattmeter, increments of
5,15,50,150,500 scale W/N connectors great $275.00
4. Bird 43 N $150.00 good
5. Bird 43 N $150.00 good
6. Bird 43 N $125.00 scratch, and little dent on bottom
7. Bird 1000C 100--250 MHZ 1000 watts $38.00
8. Bird 1000C " " " $38.00
9. Bird 500C 100--250 MHZ 500 watts $38.00
10. Bird 500C " " " $38.00
11. Bird 250C 100-250 MHZ 250 watts $38.00
12. Bird 50C " " 50 watts $38.00
13. Bird 50C " " 50 watts $38.00

14. Bird 1K W max it looks like a element
with a BNC connector in the middle, and states on it
40 DB 125-250 MHZ $55.00

15. MA-COM nice heavy dry dummy load I would guess
about 200 watts capability model 44017 $70.00

ALL OF THIS ITEMS ARE PLUS SHIPPING

> Tony - G3SKR / W2TG email: tgold@panix.com

With a 250 watt element, +/-5% of full scale is +/-12.5 watts. So it
can read as much as 52.5 or as little as 27.5 watts with a 40 watt
power level and still be within its specified accuracy. If you want
better accuracy than this you'll have to use a different instrument,
or perhaps get the meter specially calibrated against a known standard
of greater accuracy.

People frequently misunderstand the 43's spec to be 5% of reading.
It's not.

But Deja News will show that an article has been cancelled; the article gets yanked and a cancellation message is put in its place. On the date I posted that ...---... article (and thereafter), you see no cancellations from me.

It would be a simple test for an independent third party to post an article containing a line beginning with ...---... and compare the Deja News version with that of talkway.com.

Both news.hawaii.edu and Dejanews.com agree on the fact that my posting was correct.

As far as apologizing to "rosie" -- I don't apologize to anyone who tosses rocks all the while hiding behind the cloak of an anonymous screen name. His last name-calling post showed his true spirit.

If you're going to go back to Morse sent along a wire, then you need to remember that voice sent along a wire isn't all that much younger: 1876. Morse and phone via wire are very close in ago, as are Morse and phone via radio. (The first phone broadcast, including music, was made Christmas Eve, 1906. See "History of Radio to 1926.")

Say what you want; the chosen title "No Code International" makes no mention of code exams.

Swatch has retreated. They have said that due to a problem with MIR, they donated the batteries from the Beatnik satellite to power other systems on the MIR station. Here is the latest from their web site:

=====begin=====

Spasiba Swatch.

On April 16th, the Russian Space Program and Swatch were to launch the satellite "beatnik" in orbit with the capability of sending voice and text messages from people all around the world.

Unfortunately, the Russian transmission "Gelios", a key link with the MIR space station, was severely damaged a few days ago.This has created a situation of uncertainty and made communications to the MIR problematic.

Swatch has decided to donate the batteries supporting the beatnik satellite to the MIR cosmonauts who will be using them to run the printer onboard which is the lifeline to earth through which the cosmonauts receive their daily instructions and key operations points.

To thank Swatch for this gesture, we have decided to publish the messages that had been recorded in the beatnik memories and that we are now not able to transmit on the radio waves.

The first Russian satellite "Sputnik" has a special place in the hearts and memories of the Russian people.The gesture of Beatnik has made Swatch special too.

Here are the beatnik's messages
{messages deleted - if you want to read them, go look at www.swatch.com}

There has been a lack of understanding between us and some of you have been very agressive regarding the transmission of these messages. It was a real shame!

Now that this situation has been resolved, we would like to invite you to take part, with us, in this cyberspatial mission, spreading these positive messages all over the net.

Why not just hide a switch somewhere that kills the pump?
That way if a thief starts the car, he won't go too far.

>It is not correct.

Yes it is by definition of what an accuracy statement referenced to
full-scale is. Read ANY elementary book on instrumentation.

>High quality meters of all types routinely specify full
>scale accuracy. Because of quality control of the relationship between
>"deflection" and "input" they can mark the scale with considerable
>confidence. The accuracy degrades "gracefully" below full scale.

What you refer to here is a different accuracy statement. This implies
accuracy as a percent of reading. This was not what was specified.

As I stated yesterday, precision instruments usually give an accuracy
statement including both percent of reading and percent of full-scale.
Percent of reading accuracy is easy to measure with a linear scale, but
much more difficult with a nonlinear scale. With nonlinear instruments,
you are concerned with two things - how well the scale calibration fits the
instrument response curve, and how well the curve represents reality. The
Bird accuracy statement tells you only that the one reading, that taken at
the full-scale reading of the dial, is within 5% of the actual value. It
tells
you nothing of how well the dial calibration fits the actual instrument
response.

In the instrumentation industry, manufacturers routinely go through the
game of "specmanship". I would much rather have an instrument with an
accuracy of 1% of reading plus 20% of full scale than I would one with 5%
of reading and 5% of full scale. In the first case, I can do one
calibration at the full-scale value and then make any measurement to within
1%. In the second, all measurements are no better than 5%. And when a
manufacturer gives only the full scale accuracy for a nonlinear
measurement, you have no actual idea of the real accuracy at lower scale.
It likely is not as bad as only the full-scale accuracy suggests, but the
only guarantee from the manufacturer is the one point.

>I definitely do not agree with your comments on this. They are contrary to
>my experience with high quality laboratory analog meters of many types.

Please go back and consult the actual accuracy specifications on these meters. The better ones will state accuracy as a percent of reading. The excellent ones will give you a full set of statistics.

-----BEGIN PGP SIGNED MESSAGE-----
Hash: SHA1

Swatch's website at http://www.swatch.com has been updated
with a really bogus-sounding message claiming that they have
donated the batteries from the satellite (which didn't belong
to them in the first place) "to save MIR from a
disastrous communications failure" by using the batteries to
run a printer they claim are the Cosmonaut's only link to earth ...

... like we don't all know that the Cosmonauts have 2m FM,
packet radio, and SSTV capabilities in addition to MIR's
operational communications systems :-)

Swatch's PR people really must have done their advanced
studies at Bandini University :-)
(for those who may not be familiar, Bandini is a US
fertilizer company well-known in some areas for its
bovine-derived product :-)

My personal compliments to *all* who wrote strong, yet polite
messages of protest to Swatch ... together, the amateur
community as a whole turned this around. To those who used
foul language: next time (and their will, unfortunately
be a next time when *someone* will try something like Swatch
tried ... or worse), keep it clean, firm and to the point,
but dignified.

Let's hope that we can continue to work together whenever
necessary to fend off attempts at encroachment on or
reallocation of our precious amateur bands.

73,

Hello
I have a Icom 740 that I need help with trouble shooting. The rig lights up fine in moble and with built in power supply. All the relays appear to be working fine. In other words all the mechanics of the radio work fine. The problem with the rig is there is no transmit nor receive. I mean no even a little bit. I can key down a radio next to the Icom 740 and no receive, no meter movment nothing. The same thing with the radio in the transmit mode all the relays work but no signal not even a millwatt of output. When the rig is put in the FM mode I can hear the white noise come out of the radio but there again no receive or transmit. Does anyone have any idea which board I should look at?
Thanks for reading

Your "shack" may be prepared for disaster, but are you? Are you really aware of the latest emergency preparedness products and procedures? Find out this weekend!

The Los Angeles Fire Department warmly welcomes Amateur Radio and Monitoring enthusiasts to the:

LOS ANGELES EMERGENCY PREPAREDNESS FAIR

April 16, 17 and 18, 1999
10 am - 4 pm
Los Angeles Zoo North Parking Lot

This is a FREE event for the whole family.

City departments will be demonstrating how families can prepare for effective response to emergencies. They will be joined by more than 140 agencies and vendors. Fire engines, rescue vehicles and emergency helicopters will be on display. Search and rescue teams will demonstrate the latest emergency response techniques. The United States Armed Forces will demonstrate their disaster support capabilities. Emergency supplies and services will be on sale from private vendors. There will be face painting, fingerprinting, food, free prizes and entertainment.

Remember, Admission is FREE !!!

The Los Angeles Zoo is near the intersection of the 5 (Golden State) and 134 (Ventura) Freeways in Griffith Park. Follow the "LA Zoo" signs from either freeway. The huge outdoor exhibits will be in the Zoo's north parking lot.

For more information, visit: http://www.lafd.org/eqfair.htm

See you there!

Brian Humphrey
Firefighter/Paramedic

Hi,
The "Fuzzy Modes" web site, which specializes in human readable visual modes
for Radio Amateurs, has been moved to:

http://www.qsl.net/zl1bpu/

Please update your bookmark.

Human readable visual modes include Hellschreiber (Feld-Hell, MT-Hell) and
Medium Scan TV.

The "Fuzzy Modes" web site has plenty of information on these modes, and
includes really good software for Hellschreiber transmission and reception.
Hell is a sensitive weak signal mode, and the performance is very good.
There are probably well over 100 Amateur Hell operators world-wide.

The new site has upgraded pages, new information, and several improvements.

It's not always LAZINESS!

I helped a friend with a technician licence get our equivalent of Extra Class, by arranging a docyors certificate. In this case, I had more trouble getting my friend to admit that he was disabled, than actually getting the certificate or the licence.

My friend has Parkinson's Disease, which seriously disturbs his motor ability, and therefore his ability to write or send on a key.

1074. So you really want to know about the ARRL and OO Program

ubj: The Incredible Shrinking OO's at Dayton - 1993
Date: 4/14/99 7:54:32 PM Eastern Daylight Time
From: w9xn@NetUSA1.net (Martin A. Chittum, Sr.)
To: Richwhiten@aol.com

A remarkable event occurred at the Dayton Hamfest in 1993. After years of being harassed with blanket mailings by ARRL OO's (including K9MX, N9MX, W8IRT and others), an amateur was actually verbally and physically assaulted by one of these "Official" League functionaries. Ironically, this sad occurrence took place just a few feet from the site of an upcoming FCC Forum. ARRL OO David Boyd (K9MX), apparently incensed by the fact that he had been unable to "nail" WB2OTK, began shouting taunts across a crowded room in the direction of Rich Whiten. It was hard to believe that a man who represented both the ARRL and the U.S. Army Officer Corp. would behave in this manner. But there he was, screaming insults and threats at Whiten, while Rich was pushing a handi-ham in a wheelchair (Tom McMillen, WB3HGW).

Unable to gain a response with his jeers and taunting, Boyd actually physically assaulted Whiten. He shoved himself right up against Whiten and yelled out that he was now "getting in the face" of WB2OTK. He actually challenged Rich to "do something about it". Whiten defended himself with a mere shove. It is fortunate for Boyd that WB2OTK is not a person who would gain any pleasure from thrashing a pathetic little man with a chip on his shoulder. Had Boyd assaulted a different kind of man, the results might have been far more tragic.

When this episode began to wind down, Boyd and his OO henchmen stormed out of the arena. But OO K9MX didn't leave without first threatening to "bring down" WB2OTK "if it is the last thing that I ever do." We haven't heard much from David Boyd in the past few years. Perhaps he has thought better of using his position as an OO to carry on a vendetta against a fellow ham and that ham's friends.

Within a few weeks of these happenings, a strong letter of protest was filed with David Sumner, K1ZZ, at the ARRL. What was the result? Sumner refused to acknowledge any ARRL responsibility for the incident. He claimed that the OO's were all volunteers and that they had no professional or expert status that could, or would, be supported by the League. In other words, when an OO misbehaves, the ARRL suddenly has no "official" connection with them. So much for the "official" status of Official Observers.

And now, in 1999, the advisories of OO's such as David Boyd, K9MX, are being elevated to the status of de-facto Notices of Violation from the FCC? It seems that Rich Whiten is still being pursued by the ARRL's gang of untrained vigilantes. The only difference is that now an uninformed bumpkin at the FCC thinks he can use smoke and mirrors (provided by the OO's) to

create evidence where no admissible evidence exists. Would anyone blame WB2OTK if he decides to challenge the illegal practice of elevating an OO's report to the status of Notice of Violation? We think not.

(The events at the Dayton Hamvention were witnessed by dozens of amateurs and their families including N0JPZ and son, WB3HGW, W9XN and son, and the xyl of WB2OTK. Amazingly, most of these events were captured on a video tape that is in the possession of WB2OTK. No amount of spin-control from Newington can change the contents of that tape.)

Submitted by witnesses to these events.

> W8IRT and others), an amateur was actually verbally and physically

Does this surprise you Richard ? All amateurs are entitled to receive
between 10-25 lbs of ARRL produced environmentally unconscious junk
mail a year, as a ARRL public service to the amateur community !

It was hard to believe that a man who
> represented both the ARRL and the U.S. Army Officer Corp. would behave in
> this manner. But there he was, screaming insults and threats at Whiten,
> while Rich was pushing a handi-ham in a wheelchair (Tom McMillen, WB3HGW).

Richard, he was just annoyed by the fact that Tom couldn't be drafted
for combat.

>
> Unable to gain a response with his jeers and taunting, Boyd actually
> physically assaulted Whiten. He shoved himself right up against Whiten and
> yelled out that he was now "getting in the face" of WB2OTK.

Richard, you do realize that hams often like to share what they had for
lunch at flea markets, don't you ?

Please, we are masters of spin and contortion. Slobodan Milosevic
stopped by for pointers on his way from Dayton in 1993.

1076. The OO's Creed

Newsgroup: rec.radio.amateur.misc
Date: 1999-04-15 00:00:00 UTC
From: Pope David the First <hisholiness@arrl.org>
Message-ID: <4TeR2.2808$fH2.1229@c01read04.service.talkway.com>
Source record: 145685

I believe in ARRL the Father Almighty,
Maker of heaven and earth.&#65533;

And in Riley Hollingsworth their only Son our Overlord;
who was conceived during ARRL Board's Annual Meeting,
born of the many Virgins at ARRL HQ, suffered under
FCC staff cutbacks, was buried under ARRL requests;
he descended into hell; the third
year he rose again from the dead; he
visited W1AW, and sitteth on his ass
in a leather swivel chair in Gettysburg;
from thence he shall come to judge the
quick and the dead, yet not ye contesters whose
poor operating is part of their unsavory lifestyles..&#65533;

```
I believe in the Ghost of Saint Hiram of Rettysnitch;
the wholly boring Amateur Service; the communism of K1ZZ;
the public stoning of violaters; the resurrection
of the bodies of half dead hams; and the lack of a life everlasting.
Over over.

1077. DX question

Newsgroup: rec.radio.amateur.misc
Date: 1999-04-15 00:00:00 UTC
From: Carl Schulz <meteu@mailbag.com>
Message-ID: <7f42cjfbs1@grandprime.binc.net>
Source record: 145686

I just got my Tech ticket. I'm still waiting for my call sign. I have a friend in Chicago (I'm in Madison, WI) that is studying too. I am going to buy a 2 meter rig soon. I thought we might be able to talk on 2 meters (aprox 160 miles between us). Will this work? if not, what is a good band to use? I don't have my code yet so HF is out. According to the ARRL handbook it's possible but a local ham told me it's not.

Also, being in the midwest, what is a good band to use to talk to any of the coasts? I have another friend that is going to be touring the country and may take up ham radio too. I thought it could be cool to talk while he is out and about the country.

Thanks for your help.

1078. Re: Already Plenty HAMS

First, this isn't a flame on Tom. I'm just adding my two cents worth.

How many people want to get on the HF bands but can't afford the gear? I'm one. I am glad there is a no code tech. It got me in the door. HOWEVER, I am going to learn the code. I find it very interesting and look forward to mastering it someday.

I do know people that have a license just to talk around town but what is wrong with that? I started with a CB in my first car (still have it). Later I moved to GMRS and now to Ham. My station will be small. Al I am going to start with is a 2 meter rig and a home brew antenna. I am going to learn the code, save some money, upgrade my equipment and become a better ham. That is my goal.

Some purists out there may not like the people that use the no-code test as a way in. They may not feel that we no-code folks are not worthy of ham radio. Tough.

I had an idea for a car "alarm'. The idea was to hook up a fuel pump cut off switch to a reciever. When you transmit the right DTMF code on that frequency. it kills the fuel pump and stalls the car.

If anyone actually tries this, I want a 10% cut of the profits. :)

<< advice to spam Swatch >>

Nice try, but IMO the wrong way. If You want to be taken serious, then
You have to behave serious.
SPAMMING, MAILBOMBING, and TELPHONE-TERROR is a NO-GO!

We should try to organize a boycott for Swatch products. This is the
only way to give them, what they deserve.

BTW: According to what AMSAT-FR said, the Russian Space Agency knew
from the beginning, that they were going to break the law. Instead of
making that fact know to all, AMSAT-FR preferred to complete their
work. Hopefully they learned their lesson: never make business with
the mafia.

Regards

Robert

I would have grabbed the nearest non-fixed object
of sufficient mass and length, took a swing at his
kneecaps (always a vunerable spot) and while
he was on the floor, kick his phucking front teeth
down his throat. Remember, you don't necessarily need
a firearm to take-out your adversary, just swing *first*
for their *legs*. This is an area the average moron
or other self-righteous asshole does not expect to be hit.
It is also a proven technique to go after the back of the
kneejoint or front of the shins. Short of this, pepper Mace
is also good to use, just aim for the throat or nose.
Then when he/she is on the ground, unable to stand and
writhing in pain, you may have your way with the same.

While people complain about the cost of the HF gear, there is plenty
of the older stuff to be fournd for around 100 to 300 dollars. The
antenna can be a wire dipole built for almost nothing in many
cases. If an older tube radio is bought, it will load the antennas
with out tuners and such in many cases.
You probably can not get on VHF any cheeper than that.

Starting with QTC No 10 e.g. the one of Sunday, March 20, 1999, the
Deutscher Telegrafie Club announces that its regular monthly QTCs are
available in audio format (MIDI-type) at our web site
http://www.muenster.org/dtc/eindex.html in three different speeds: 12 WPM,
20 WPM and 30 WPM. As unfortunately not all browsers can handle these files
online, we did take care of that and offer these files as a ZIP archive for
individual downloads as well.

We do welcome any comments about this new feature in our guest book !

--

The full monthly QTC bulletin in German is transmitted
every first Sunday of the month at
09:30 CET/CEST on 3575 kHz (+/-QRM).

This QTC is repeated in English every third Sunday of
the month at 09:30 CET/CEST on 7033 kHz (+/- QRM).

I have heard comments that one can't afford to get on HF because of the cost of equipment for years. I wonder how many have considered picking up some "older" equipment and fixing it? If you don't know how, then go to your local club and ask for help. I for one have helped many people get on the air in this manner. It also helps you "learn the ropes" and starts the process of turning you from an "appliance operator" to a real ham.

There are a lot of things that need to be taken into account.
Communications on 2 Meters is essentually line-of-sight, barring
some sporadic propagation conditions. Unless you have your antenna
very high, 160 miles is not going to be realisable, for simplex
operation. However, if you looking at repeater operation, you
should be able to find a repeater path that can get you there
easily. The problem here is that, some 2 Meter gear, that is capable
of accessing repeaters, can get pretty expensive.

You could probably get better simplex range by using 6 Meters
instead, but reliable point-to-point communication at that range
is going to be iffy.

> Also, being in the midwest, what is a good band to use to talk

> touring the country and may take up ham radio too. I thought
> it could be cool to talk while he is out and about the country.
>

Now, if you did get your code speed up, and upgraded to Tech+,
you could use 10 Meters SSB. For about $100 you can pick up a used
Radio Shack HTX-100 and very easily work that kind of distance.
I regularly work the midwest and east coast, from Phoenix, with
my HTX-100 and a simple dipole or vertical.

You need to read a little bit more, in the ARRL handbook, about
propagation. Even if you were to get on 10 Meters, you
have to pay attention to propagation conditions, which change
during the course of the day. For example, from my QTH, band
conditions are usually very good to the east coast in the morning
and early afternoon. In the early evening, that shifts to the
west and is good for Japan, Australia, etc.. Late night, the

propagation is poor an I'm lucky if I can get out of town, but then
40 Meters is good.

Good luck on learning the code.

Hi Carl,

Don't overlook the tons of older gear that is available at very good prices.
Now is the best time to get on HF while we are in the current sun spot cycle.

I hope to be spending some time in Yellowstone this year; does anyone
know of any laws/regulations preventing one from doing some QRP CW work
while out in the backcountry? A friend of mine thought there might be
some regulations on it, and I haven't had the time just yet to get in
touch with the park to find out. Thanks.

When I got my Tech Plus license two years ago, I bought an FT-101 for $150.00, spent about $20.00 on wire and misc items for an antenna.
I had a ball with this set up.

I'm also into R/C Airplanes, to get my first ship up and flying cost over $500.00, and thats used equipment too.

This hobby like any one can be as expensive as you want it to be, or as cheap. :-)

Ralph,
You don't want the readings near full scale. While I was a Calibration
Tech, the method was to keep
the meter reading between 20%-80% of full scale deflection. The middle of the
scale was were the
accuracy was checked.

> also be 12.5 watts by any reasonable person. That is nonsense and anyone who knows anything
> about analog meters knows that it is nonsense.

I have to confess that I know more about oscilloscopes than analog meters. Tektronix scopes not only has specifications on all important parameters but the manual generally contains a verification procedure. This is a list of equipment, and complete setup instructions, for a customer to verify that the scope is meeting its specifications. Some of the larger customers routinely order this equipment at the same time they order the scope, and the scope won't get past incoming inspection unless it meets all the specs during the verification test. I was the project engineer for a 50 GHz sampling head. (I didn't design that sampler, but improved production control on the existing 40 GHz one.) We had to reduce the stated accuracy of the instrument substantially because of the uncertainty in our ability to verify it. (Even such normally mundane items as the uncertainty in connector adapter SWR added to the overall uncertainty.) I have good evidence that a large percentage of the sampling heads would actually do 60 GHz. But we were never able to assemble a system to reliably verify it. So the spec remains 50.

Some typical specifications from my 2246 manual: Step response (5-division step) Rise Time -10C to 35C: 3.5 ns or less. Vertical deflection system accuracy (includes ADD MODE and Ch 2 INVERT) 15 to 35C: Within +/- 2%. -10C to 15C and 35C to 55C: Within +/- 3%. And so forth. You've undoubtedly got manuals for Tek or HP equipment, so know how these instruments are specified.

And every specification is taken literally, by both the manufacturer and the customers. Those specifications which aren't guaranteed are plainly labeled "typical".

> The % error in any high quality analog meter degrades "gracefully" as you go downscale. The

That's nice, but "gracefully" is a pretty loose spec for serious measurement, don't you think?

> Here is the main idea. A properly designed D'Arsonval meter maintains a certain definite

> catalog that specs full scale accuracy. Yet the picture shows finely spaced markings all across
> the scale. Is this some kind of "fraud"?

Absolutely not. My 260 manual states DC accuracy of 2% of full scale. On the 50 volt range, I expect the reading to be within one volt of the actual value. Period. Anywhere on the scale.

> Hogwash.

Now there's a statement that's difficult to rationally argue against.

"Quite accurate" isn't a specification. I wish all the customers I've designed instruments for were as easy to please as you are. My life would have been much easier! (I can see it now, "Roy's Pretty Good Scopes".)

> > I'll bet that if you were to send the

> > spec Boonton or your company put on it.
>
> It meets the requirements that Boonton says it supposed to meet.

Yet if the Bird meter were sent to the cal lab it would have to exceed
the accuracy Bird says it will meet? How do they decide which meters
have to meet spec and which have to be better than spec? Quite a cal
lab you've got there!

> And when it is adjusted at
> full scale, it is very accurate across a 13 dB range, as determined by accurate RF
attenuators.
> I have been using these meters for 30 years and I know their quality.

I wondered about the spec on the Boonton, and you say "very accurate",
and it was used to verify the Bird, which you describe as "quite
accurate". By this I infer that "very accurate" is more accurate than
"quite accurate". Perhaps we can get the meter manufacturers to
standardize these terms for those of us more used to working with
numbers. Your cal lab obviously knows how to translate them.

> As for going separate ways, go which ever way you like. If that is the way you want to
behave
> toward me, I couldn't care less.
>
> Bill W0IYH

Sorry I've made you grumpy again. I know there's no way of changing
your mind once set, but I'll continue posting a bit longer for the
benefit of other readers who'd like to decide for themselves what
specifications mean.

1099. Still want to know about the ARRL and the OO Program?????

Newsgroup: rec.radio.amateur.misc
Date: 1999-04-15 00:00:00 UTC
From: richwhiten@aol.com
Message-ID: <19990415140536.26071.00001176@ng13.aol.com>
Source record: 145708

Subj: The Incredible Shrinking OO's at Dayton - 1993
Date: 4/14/99 7:54:32 PM Eastern Daylight Time
From: w9xn@NetUSA1.net (Martin A. Chittum, Sr.)
To: Richwhiten@aol.com

A remarkable event occurred at the Dayton Hamfest in 1993. After years of being harassed with blanket mailings by ARRL OO's (including K9MX, N9MX, W8IRT and others), an amateur was actually verbally and physically assaulted by one of these "Official" League functionaries. Ironically, this sad occurrence took place just a few feet from the site of an upcoming FCC Forum. ARRL OO David Boyd (K9MX), apparently incensed by the fact that he had been unable to "nail" WB2OTK, began shouting taunts across a crowded room in the direction of Rich Whiten. It was hard to believe that a man who represented both the ARRL and the U.S. Army Officer Corp. would behave in this manner. But there he was, screaming insults and threats at Whiten, while Rich was pushing a handi-ham in a wheelchair (Tom McMillen, WB3HGW).

Unable to gain a response with his jeers and taunting, Boyd actually physically assaulted Whiten. He shoved himself right up against Whiten and yelled out that he was now "getting in the face" of WB2OTK. He actually challenged Rich to "do something about it". Whiten defended himself with a mere shove. It is fortunate for Boyd that WB2OTK is not a person who would gain any pleasure from thrashing a pathetic little man with a chip on his shoulder. Had Boyd assaulted a different kind of man, the results might have been far more tragic.

When this episode began to wind down, Boyd and his OO henchmen stormed out of the arena. But OO K9MX didn't leave without first threatening to "bring down" WB2OTK "if it is the last thing that I ever do." We haven't heard much from David Boyd in the past few years. Perhaps he has thought better of using his position as an OO to carry on a vendetta against a fellow ham and that ham's friends.

Within a few weeks of these happenings, a strong letter of protest was filed with David Sumner, K1ZZ, at the ARRL. What was the result? Sumner refused to acknowledge any ARRL responsibility for the incident. He claimed that the OO's were all volunteers and that they had no professional or expert status that could, or would, be supported by the League. In other words, when an OO misbehaves, the ARRL suddenly has no "official" connection with them. So much for the "official" status of Official Observers.

And now, in 1999, the advisories of OO's such as David Boyd, K9MX, are being elevated to the status of de-facto Notices of Violation from the FCC? It seems that Rich Whiten is still being pursued by the ARRL's gang of untrained vigilantes. The only difference is that now an uninformed bumpkin at the FCC thinks he can use smoke and mirrors (provided by the OO's) to

create evidence where no admissible evidence exists. Would anyone blame WB2OTK if he decides to challenge the illegal practice of elevating an OO's report to the status of Notice of Violation? We think not.

(The events at the Dayton Hamvention were witnessed by dozens of amateurs and their families including N0JPZ and son, WB3HGW, W9XN and son, and the xyl of WB2OTK. Amazingly, most of these events were captured on a video tape that is in the possession of WB2OTK. No amount of spin-control from Newington can change the contents of that tape.)

Submitted by witnesses to these events.

He claimed that the OO's were all volunteers and that they had no professional or expert status that could, or would, be supported by the League. In other words, when an OO misbehaves, the ARRL suddenly has no "official" connection with them. So much for the "official" status of Official Observers.

And now, in 1999, the advisories of OO's such as David Boyd, K9MX, are being elevated to the status of de-facto Notices of Violation from the FCC? It seems that Rich Whiten is still being pursued by the ARRL's gang of untrained vigilantes. The only difference is that now an uninformed bumpkin at the FCC thinks he can use smoke and mirrors (provided by the OO's) to

create evidence where no admissible evidence exists. Would anyone blame WB2OTK if he decides to challenge the illegal practice of elevating an OO's report to the status of Notice of Violation? We think not.

(The events at the Dayton Hamvention were witnessed by dozens of amateurs and their families including N0JPZ and son, WB3HGW, W9XN and son, and the xyl of WB2OTK. Amazingly, most of these events were captured on a video tape that is in the possession of WB2OTK. No amount of spin-control from Newington can change the contents of that tape.)

Submitted by witnesses to these events.

Subj: The Incredible Shrinking OO's at Dayton - 1993
Date: 4/14/99 7:54:32 PM Eastern Daylight Time
From: w9xn@NetUSA1.net (Martin A. Chittum, Sr.)
To: Richwhiten@aol.com

A remarkable event occurred at the Dayton Hamfest in 1993. After years of being harassed with blanket mailings by ARRL OO's (including K9MX, N9MX, W8IRT and others), an amateur was actually verbally and physically assaulted by one of these "Official" League functionaries. Ironically, this sad occurrence took place just a few feet from the site of an upcoming FCC Forum. ARRL OO David Boyd (K9MX), apparently incensed by the fact that he had been unable to "nail" WB2OTK, began shouting taunts across a crowded room in the direction of Rich Whiten. It was hard to believe that a man who represented both the ARRL and the U.S. Army Officer Corp. would behave in this manner. But there he was, screaming insults and threats at Whiten, while Rich was pushing a handi-ham in a wheelchair (Tom McMillen, WB3HGW).

Unable to gain a response with his jeers and taunting, Boyd actually physically assaulted Whiten. He shoved himself right up against Whiten and yelled out that he was now "getting in the face" of WB2OTK. He actually challenged Rich to "do something about it". Whiten defended himself with a mere shove. It is fortunate for Boyd that WB2OTK is not a person who would gain any pleasure from thrashing a pathetic little man with a chip on his shoulder. Had Boyd assaulted a different kind of man, the results might have been far more tragic.

When this episode began to wind down, Boyd and his OO henchmen stormed out of the arena. But OO K9MX didn't leave without first threatening to "bring down" WB2OTK "if it is the last thing that I ever do." We haven't heard much from David Boyd in the past few years. Perhaps he has thought better of using his position as an OO to carry on a vendetta against a fellow ham and that ham's friends.

Within a few weeks of these happenings, a strong letter of protest was filed with David Sumner, K1ZZ, at the ARRL. What was the result? Sumner refused to acknowledge any ARRL responsibility for the incident. He claimed that the OO's were all volunteers and that they had no professional or expert status that could, or would, be supported by the League. In other words, when an OO misbehaves, the ARRL suddenly has no "official" connection with them. So much for the "official" status of Official Observers.

And now, in 1999, the advisories of OO's such as David Boyd, K9MX, are being elevated to the status of de-facto Notices of Violation from the FCC? 160 miles should be a piece of cake and reliable on 2 meter CW or
SSB.Probably need to wait for your tech+ to talk reliably to either
coast,and by then you will have studied which bands will work.AB7RS

10M is capable of reaching anywhere on this planet,but is also closed
for months at a time,especially at northern latitudes,you don't here

traffic or emergency nets on 10M.

Nope. I checked, and the Amateurs' Creed does not say I
could reproduce copyrighted material, so I didn't do it.

He'll have to go and look himself.

73, de Hans, K0HB

I guess then that you must be the ultimate authority on it. Maybe
you can do it from your location, but I know I can't from mine.

Well, of course, but you can do that on all the HF frequencies,
provided conditions are right and you are in the right place, at the
right time.

> I apreciate your trying to help but I think you need to explore your

At least I tried to help. Your answer is no help at all.
I've been licensed since 1966 and have explored my hobby
quite a bit, but I don't pretend, like you, to be the authority.

> accuracy was checked.

That does make some sense. The top end of the scale is quite crowded and the 20% to 80% has much better resolution. Below 20% the diodes can effect the readings at high/low ambient temps.

But if you look carefully, the top end can be read accurately, although it requires more effort. The Bird 43 is well marked and readable.

The big fallacy here is that if a meter is specified 5% at full scale (all meter mfrs do this) that it is somehow worthless any where below full scale because it is not officially specified everywhere. This is contrary to the common knowledge of those who are knowledgeable about D'Arsonval meters.

The correct viewpoint is that a 2% full scale spec (very common) is, believe it or not, a measure of the quality of the meter across the rest of the scale. It is not true that the rest of the scale can be "anything".

A meter that is accurate at zero and full scale, but highly inaccurate elsewhere is not a *reliable* meter *anywhere*. It is poorly designed.

The "art" of meter design is to get a movement that is as reproducible as possible. This movement cannot have gross systematic errors because that would make that goal impossible.

Has any court ruled in favor of a car thief in either of the above
scenarios?

This would be an ideal 6m radio control application.

Jeff

I cannot imagine any kind of a problem. Since the usual QRP uses earphones
there is no noise to disturbe others. The power is too low to cause
interference or problems of any kind.

By quality I mean signal to noise ratio and not distortion. The quality varies widely but the most common reception I get has a few beeps and whistles in the background and the station will fade from strong to medium in signal strength. You would be surprised as to how much interference you can get but still be able to understand what the announcer is saying. There are so many factors involved in reception of a signal that you could find really poor reception from a station 100 miles away and very good reception from a station halfway round the planet. Also, the same station broadcasts on multiple frequencies so you can normally find one frequency which comes in fairly well.

There are some SW radio receivers hooked up to the internet if you want to try and tune one and see how it sounds. I have never used them so I cannot comment on what they are like.

A word on the radio stations themselves. Most of them are government run or sponsored but there has been an increase in commercially run SW radio stations in the last few years or so. This means that you listen to the "official" line from the government. This makes for interesting listening, especially at the moment with Yugoslavia.

http://www.ilgradio.de/ilgradio.htm
Once you register (free) you get a password on e-mail which allows you to download their databases. This will give you an idea of the number of stations that are broadcasting on SW, the times and languages. All times are UTC which does not change from summer to winter and used to be called GMT.

http://www.chilton.com/scripts/radio/R8-receiver
Web controlled SW radio.

I recommend getting into Internet radio. Especially if you have a fast connection. With shortwave, unless you have a great radio (upwards of $1000) and a lot of time, it's really hard to find what you want. There's like 9 bands and all you do is scan unless you have a guide which takes a degree to understand. All I ever got was BBC and Radio Australia and a lot of religious and foreign language programs. The quality was usually awful.

Check out the new Internet Explorer radio features. You not only get BBC 24 hours, you get all kinds of foreign stations and rock stations around the country. And it will only grow as more and more stations go on-line. This is cheaper and the signal is always there and strong. Shortwave radios will soon be a thing of the past like UHF TV.

There was a case in New York City some years ago that involved an
apartment dweller who was repeatedly being robbed by way of the fire
escape window. He'd just about had it.
He rigged up a shotgun with a trip wire and blew some asshole's arm off
on the next attempt. He was prosecuted and convicted for assault.
Is it fair? I don't know. I have heard that if the intruder was actually
in the room at the time, it might have been viewed as self defense.
It's a very sick world out there. Try to stay healthy. Lenny Stein.

1120. RX-320 Free Beta Software

Newsgroup: rec.radio.amateur.misc
Date: 1999-04-16 00:00:00 UTC
From: mktg@ix.netcom.com
Message-ID: <37346adc.13371876@nntp.ix.netcom.com>
Source record: 145579

April 16, 1999

Dear RX-320 User,

Beta version D of the Flexi-Tuner software for operating the Ten-Tec RX-320 is now available.

Many thanks to the many beta testers for their excellent comments, ideas, and suggestions. I have tried to incorporate as many ideas as possible into this beta version.

The biggest change in this version is the addition of a comprehensive logging function (described below).

The major features of the beta version D are as follows:

1. Operates the RX-320 from virtually any desktop or laptop computer, including older 386 machines.
2. Works in either DOS or Windows (this is a DOS program).
3. Implements 34 selectivity filters.
4. All modes: AM, USB, LSB, CW.
5. AGC implemented: Fast, Medium, Slow.
6. Tuning steps down go 1 Hz or up to 1 Mhz.
New! 7. Now includes 3 Khz tuning step for marine channels. Also includes 9 Khz tuning steps for European AM stations.
8. Adjustable squelch.
New! 9. Pause S-meter function on front panel. This eliminates the "chuffing" heard on some RX-320 systems.
10. Bandpass tuning (offset from center freq.)
11. Scanning using scan files. Adjustable parameters.
12. Built-in scan file editor.
New! 13. Built-in logging function with log editor. Easily track, edit, sort, monitor, and export log entries. Items logged include station name (or notation), frequency, mode, filter, date, time, and S-meter reading. Time and date can be adjusted if you want to log in UTC or other time zone.
New! 14. More sensitive S-meter.
15. Almost all parameters adjustable (great for knob twiddlers like me).
New! 16. Tighter code for faster operation.
17. No mouse required (or supported).

Beta version D has been running for a couple of weeks on several computers, including an old B&W Grid laptop (80386 at 25 Mhz), an 80486 machine, and several Pentiums. It works equally well on all the tested computers.

As reported last time, it really is a lot fun to use an old DOS laptop to operate the RX-320 while sitting in an easy chair across the room. By the way, the RX-320 sounds great when played through a good stereo system. Also, I tried Michael Young's idea (April 2 posting on rx320@onelist.com) on how to wire a new serial cable to eliminate the chuffing and crosstalk heard in some systems - this solved my crosstalk problem.

I would be happy to supply free of charge this Beta version to anyone interested who has an RX-320. The software will not function without an RX-320.

The program is supplied along with several scan files in a single zip file. Installation and removal are simple, as the program does not affect any system settings either in DOS or windows (it does not mess with your registry, DLL's, or other system programs).

The program is easy to use - just press various keys to engage the different functions.

Installation, removal, and operating instructions are included.

A final version of the program is expected within a month or so, depending on feedback. It will probably be offered on a shareware basis for a nominal amount (all this work has to be worth something :-) The final version will have greatly expanded scan file and log capacity;and any inconsistencies, cosmetic irregularities, and faults will have been fixed. As always, the final program will be small and easy to install without effects on system files.

If you would like to receive the latest beta version at no charge, send me an e-mail at mktg@ix.netcom.com and I will send you the zip file by return e-mail.

Regards and 73,

David

"BD" <bodu@pobox.com> writes:
>You're saying that SOS isn't morse, that morse-code is only morse-code when
>using a radio, or that people usually/often call 911 to assist 'just any'
>blinking flash-light?...

I'm saying that:

- Many people know that "short-short-short long-long-long short-short-short"
means SOS and is a distress signal, without knowing *anything* else about
Morse code.

- In the example that someone reported, that seems to be all that the
fishermen transmitted, and all that the observer needed to know.

- From this, one might be able to argue that everyone should be taught
this particular sequence in grade school so they can use it or
recognize it when needed.

- Nothing in this example suggests that knowing the rest of even the
Morse alphabet was necessary.

- Nothing in this example suggests that it's particularly advantageous
to know Morse code in order to have an amateur radio licence, beyond
the usefulness of Morse code to the population at large.

- If anything, this example might suggest that people should know Morse code
before they are allowed to fish, but it says nothing one way or the
other about the usefulness of Morse code in radio - there wasn't even
a radio involved.

>*You* mention having to only recognize ...---... for use in radio
>transmissions, not me.

Of course I mentioned that, since *that was my point*. This example,
where no radio of any service was used, isn't very relevant to radio,
is it? Yet it was posted in an amateur radio newsgroup - suggesting
that either the original poster was very confused, or that they were
attempting to make a link between the ability to send SOS by flashlight
and amateur radio. My point was that this link is extremely tenuous.

>Are you using Cecil's editor? Like him, you make a statement, then
>edit it out when you respond to a follow-up. Bad boy.

Please read the Usenet FAQ. People are *supposed* to quote only the
portions of previous articles that they are directly responding to.
Anyone who wants to go back and read the previous article in its
entirety can do so - that's what threaded newsreaders are for.
Even limited-function newsreaders like Netscape provide threading.

The "bad boys" in Usenet are the people who include the *whole* article
they are following up, without editing any of it.

Dave

>the station's nature of distress, position, type of assistance requested,
>et cetera, upon hearing ...---... on a "radio transmission" (your choice
>of words above, not mine)?

I *did* answer this question once. You don't seem to be reading my
replies very well. Once again:

Without a knowledge of Morse code, I *clearly*, *obviously*, would not
be able to copy details such as you describe in a distress transmission
made via Morse code.

If you wish to suggest that a knowledge of Morse code is useful in
radio, please tell us about examples where someone in distress *actually*
transmitted such a distress call using Morse code on amateur radio bands.

An example where fishermen transmitted exactly one message (SOS) using
a flashlight does *not* demonstrate that (a) a knowledge of the full
Morse code is necessary for flashlight transmission or (b) that Morse
code is useful in real emergencies using radio, not flashlight, transmission.

The example quoted demonstrated that it's useful to be able to send and
receive SOS by flashlight - nothing more.

If you were paying attention, you would have noticed that it wasn't
the FCC that wanted scanners to be unable to receive cellular phone
transmissions - it was the cellular industry. They convinced Congress,
which passed a law, and the FCC had to do what they were ordered.
So now scanning receivers sold in the USA can't tune cellular frequencies
directly.

It so happens that many such radios can still receive cellular channels
as image frequencies. I have no doubt that the FCC, being somewhat
technically knowledgeable, knew this all along. It's Congress that
was too stupid to figure this out. Someday someone will point out
that the image frequencies are still usable, there will be more hearings,
and eventually a new law - and another pain in the side for the FCC to
deal with. Meanwhile, why should the FCC care?

You need to step back so as to get a global view of why the code require-
ment exists for HF privileges. RF at HF respects no boundaries, and as
communicators first and foremost, hams the world over should have at
least one mode in common. At present, there is only one mode all the
world's HF-licensed amateurs hold in common: CW. Whether one chooses to
use it or not does not matter; if the need arises he has it available to
him (maybe at a slower speed than when he was first licensed!). The phone
modes won't work as an international mode due to differences in languages,
but there are sufficient code pro-signs so that a meaningful QSO can
extend across language barriers. A digital mode could become the
international standard, but until such time that every ham worldwide is so
equipped and/or has the ability to build and self-maintain such
equipment, CW will remain the common mode. The ITU has this global view
while many individuals have only an insular nearsightedness - their own
personal goals out-weigh those of the global amateur community.

(Daily worldwide comms don't normally take place above 50 MHz, so a common
mode in that region can be chosen on a national level; for us it's of
course FM phone.)

Hello all,
I would like to say thankyou to the response that I have gotton in
regaurd to the repair of my Icom 730. The radio is back on the air.
Gary told me to got to the ICOMamerica sight and follow the FAQ link.
There I found a description of my problem and the solution.
Well it was R1 on the regulator board. I would think that this
resistor works like a fuse. When the meter lamp shorted against the
cabnet it took this resistor out. I replaced the resistor and the radio
came up like nothing was ever worng with the rig. Again thanks to all.
best 73 from Oris

If that is indeed the thinking at the Commission, which I doubt,
then that is confused thinking indeed.

OTK's crude racial remarks were certainly ungentlemanly, but they
were also perfectly legal and protected speech, and violated no FCC
regulation.

The lesson we learned from that outburst was about hypocrisy, not
about race. We learned how hypocritical some are who, for years,
used the excuse that they were jamming to fight "racism" or out of
"outrage" against "bigotry."

Malicious interference is malicious interference, and it must stop.

But expressions of opinions on any subject whatever, especially
political and social issues, are no more the business of the FCC
than are your political bumper stickers the business of your local
traffic policemen.

With all good wishes,

Kevin, WB4AIO.

1134. looking for poster/chart of EM spectrum

Newsgroup: rec.radio.amateur.misc
Date: 1999-04-16 00:00:00 UTC
From: Bob 'rab' Bickford <a-bobbic@NOSPAMmicrosoft.com>
Message-ID: <7f85h0$52g@news.dns.microsoft.com>
Source record: 145593
Cross-posted to: alt.radio.broadcasting,rec.radio.amateur.misc,sci.physics

Many years ago (1970s), when I was a radio broadcast engineer, I had on the wall of my shack a largish poster that presented the electromagnetic spectrum as a series of color-coded bands, each labelled with the common use and the start/end frequencies. As I recall, it was extremely detailed in the middle (e.g., it gave the frequencies for _every_ US television channel) and not so much at the low and high ends, just saying "gamma rays" for the latter for example.

I've long since lost that chart, and when I recently realized that I'd like to give one to a promising young proto-engineer, I found I have absolutely no idea where to get another. This seemed like something that physics junkies might know about, hence this post. (Cross-posted to a couple of likely radio groups, too.)

I tried looking for web resources, and came up blank. It seems like something that ought to be available as a reference, say at the IEEE site or something like that, but all I was able to find anywhere were a few poor encyclopedia articles. So, pointers to *detailed* presentations of the EM spectrum are also appreciated.

You'd better find a better email address, or even a regular mail address.

A webmaster is in charge of the website, not policy. He or she maintains the website. In many cases, especially commerical sites, the webmaster isn't even connected with the owner of the website, rather like an ad agency is separate from a compnay but takes care of advertising for the company for a fee.

Even if the webmaster is directly connected with the website, often they are more concerned with html than content. This can work to a disadvantage, because the people deciding on content don't have a clue what the internet is about or how to effectively use it, and the webmaster may not be familiar with the content suffieciently to help them figure out how to make a good site.

The exception to all this is the personal webpage, where somebody puts up a webpage about something that interests them, doing both content and layout. While sometimes the content may be lacking, these often are the best sites since their content comes out of familiarity with the internet.

Yes, I don't like that I bought a new Yaesu that was defective and got the old AES/Yaesu runaround that many others have reported on the FT-100 and FT-847 boards as well as contesting.com.

However, Yaesu and ARRL really are Siamese twins. Same law firm, ARRL approves the DXpeditions Yaesu equips, and Yaesu backs up ARRL in its FCC dealings (see the new scanner NPRM- Kenwood didn't comment until the replies, I believe, so someone at ARRL brought Yaesu into it at first).

ARRL "held over" by "popular demand" the review of the FT-100 on its site. What BS ! ARRL feels sorry for Yaesu that it took them 4 years to play catch up with Icom. Please, the FT100 has come through defective for many, many people and don't give me that all new rigs line... the FT-1000 MP crowd is still bitching 3 years later.

Icom and Kenwood ought to tell ARRL where to stick their ads based on this sort of preferential treatment....

Source record: 145602

The full article is on ARRL. The real focus is on getting a CW message through the short bursts available in meteor scatter. Scatter provides a propagation channel not normally available. They time compress a CW message and send it repeatedly. The message will get through on one of the bursts. DSP software or specialized hardware at the receiving end play back the received signal at readable speeds, 30 wpm or whatever. The wet-ware challenge is in dragging the dih dahs from DSP artifacts and distortion, not CW copy. The limitation -- why 1720 wpm and not higher -- is the compression and decompression losses.

Unless presented as the hyperbole "fastest CW alive!", few would have paid more than passing attention.

That's true, Esperanto is a good idea that never got off the ground
(well maybe a few feet in its early years). Actually as far as "invented or
artificial" spoken languages go, more people speak Klingon then Esperanto.
(Klingon was really designed as a language starting with one of the Star Trek
movies, the Klingon language institute helps Klingon grow in an orderly
manner,even if Star Trek writers often break the rules).

Yes. It is a popularly accepted fact in sociological circles that Jews often resent the encroachment of blacks into their neighborhoods as cities grow (and grew) and matured during the 20th cenrtury. Of course, I don't see any mullonjohns welcoming their white brothers back with open arms either....

Blacks typically followed Jews into these urban areas of settlement, with tensions often mounting. Witness recent events in NY City between Hasidim and blacks.

Irregardless, FCC is full of shit in your case. Had we been graced with a Republican president instead of northern soccer mom elected Dudley do Nothing Right, I wouldn't have needed to type this reply. Clinton has done more to lower the world and moral standing of the U.S. than WB2OTK spouting on 20 or 75 ever could.

Besides, he's in SC. We accept their way of thinking as unusual to keep the Union together.

Don't reply with liberal NWO/N.W.A NAACP horseshit; did anyone in your family get an ax buried in their forearm by one during a robbery ? So much for gun control, too.

I have a large problem with doctored 3rd party tapes distributed to the FCC and sound bites posted all over the internet. First and foremost, let me say I have known Phil (N9GOR) for over 10 years. We have horseplayed the same scenario many times on amateur radio and by telephone. It's very easy for distractors to purposely take things out of context, and put their own spin on them. Phil (N9GOR), was asked the very next day, whether he thought WB2OTK was a bigot or racist, his repsonse was "Hell No, and if I can't raise some hell on the radio, I'm just not going to get on!". I have a question for people to answer, that would deem me a racist or bigot....have you ever met a Jewish racist or bigot? Rich Whiten, WB2OTK/W2OTK

HI there
Nope You don't have to go out and buy a $1000 radio to hear shortwave stations . Depending on where you live a simple little radio from Radio Shack would work just fine for you in a lot of cases.
Ummm I can't speak for overall quality of the various overseas broadcasters but since we are talking about stations that are usually very very far away the quality will not be like your cd for the most part excepting the major broadcasters such as Voice of America,BBC,Deutsche Welle,and possibly Radio France Intl.For a idea on what it is and what it sounds like I have some RealAudio files of various stations I have heard here at my location loaded up on my website.Some will be of good quality some may not be that cd quality you are asking about.It all has to do with things called propagation ,transmitter wattage ,direction the signal is beamed and propagation(how the signals are being reflected back to earth to you).The files I have were recorded off an older tube type radio called a Drake R-4A and as such the receiving ability is a bit limited but does serve the purpose :) If you have RealPlayer 5.0 or the newer G2 you can hear these audioclips I have put up at

http://members.tripod.com/~swlchris/index.html

This will give you an idea of what can be heard using a basic setup that was under 200 dollars us.Also in there is some info on how get started listening to shortwave stations and while some may laugh at that info it is how I got started :)
Contrary to popular belief the majority of SW broadcasters will be using radiowaves instead of pc lines for sometime to come because the simple fact is majority of world population doesn't have telephones or computers let alone internet service.Live in a third world country in middle of nowhere and you might see that fact.Hell even batteries are sometimes hard to come by there :)
Until those usually extremely poor countries get a basic Westernised infrastructure complete with non interuppted power,basic telecoms, and someone who is willing to buy a ton of computers for the general population and then figure out how to get win 95 to recognise the native language I can't picture the SW broadcasters relying exclusively on internet feeds.
Only the more modernised countries are clamoring for this new internet radio thingy but take away their phonelines,powerlines,computers and asdl or cable modems and they would be relying on an old radio too :)
Truth be told I rarely if ever use my RealPlayer to listen to stations on the Internet because it sucks to have the little net congestion thingy show up all the time.I would rather hear a bit of fading but no

1 or 2 minute interruptions on a Sangean ATS803a :) Not to mention half the stations I chase after aren't anywhere near an Internet Service Provider :))))))
Chris

Which of my statements was wrong?

I hope no one thinks I'm claiming that no individual Bird wattmeter can measure more accurately than its specification. (In fact, I'm quite sure that all of them do. And in many cases, an individual meter with an individual slug might commonly be a great deal better.) All I've said is that the Bird accuracy specification of 5% of full scale means that they guarantee that the reading will be within 5% of full scale. With a 250 watt slug, this means +/- 12.5 watts. They don't have different specifications for different parts of the scale, so it applies to a reading anywhere on the scale. If they stated the spec as "5% of full scale at full scale" with no more information, then the only reading they'd be guaranteeing is full scale, with no guarantee of accuracy anywhere else on the meter. If they specified "5% of reading", the guarantee would be, for a 250 watt slug, 12.5 watts at full scale, 6.25 watts at the 125 watt level, and so forth. But neither of these is what the specification says.

If this is what you disagree with, there's nothing more I can really add to the discussion. Either you take specifications literally, as I do, or interpret them in some other way as Bill does. If I made some other statement that you believe was wrong, I'll be glad to listen to your reasons for thinking so.

I must be too old fashioned for amateur radio of the 20th century, but, I cannot agree with the "freedom of speech" argument that claims that one can utter any old thing he/she wishes on the radio. I would not stand up in the midst of, say, a sporting event and shout the "N" word and I would use the same word on the air. Just because we may have the freedom to do it does not mean that doing it is in good taste, is appreciated by others, or is appropriate to the occasion. Thee are some things that are not done because doing them is not polite or not in good taste. And if you have to ask for an explanation of what is and is not polite or is or is not good taste, then you are too damn dumb to understand the answer.

My old granddaddy taught me that gentlemen do not say the first thing that comes to mind. I must be out of date.

jeffreyh@Hawaii.Edu (Jeffrey Herman) writes:

<You need to step back so as to get a global view of why the code require-
<ment exists for HF privileges. RF at HF respects no boundaries, and as
<communicators first and foremost, hams the world over should have at
<least one mode in common. At present, there is only one mode all the
<world's HF-licensed amateurs hold in common: CW. Whether one chooses to
<use it or not does not matter; if the need arises he has it available to
<him (maybe at a slower speed than when he was first licensed!). The phone
<modes won't work as an international mode due to differences in languages,
<but there are sufficient code pro-signs so that a meaningful QSO can
<extend across language barriers. A digital mode could become the
<international standard, but until such time that every ham worldwide is so
<equipped and/or has the ability to build and self-maintain such
<equipment, CW will remain the common mode. The ITU has this global view
<while many individuals have only an insular nearsightedness - their own
<personal goals out-weigh those of the global amateur community.

That makes a nice "warm fuzzies" story. But if the ITU really has this
global view, and understands the value of Morse code, why doesn't it
require some minimal level of Morse proficiency for operators of *other*
services that use the HF bands: marine, aeronautical, etc?

The other explanation I've heard for why amateur licences require Morse
code, and this one rings truer to me, is that amateurs used to share
bands with other services on a secondary basis, services where the
primary users used Morse for communications. It was necessary for the
primary users to be able to tell amateurs to change frequencies to
avoid interference (i.e. "buzz off"), in Morse, and have the amateurs
understand.

Since no other services use Morse anymore, this reason has gone away.

Do anyone know the real history of the Morse requirement?

Dave

Forwarded Bulletin Follows:

Finally, common sense has prevailed!

Date sent: Thu, 15 Apr 1999
From: Rob Carlson <rcarls2@umbc.edu>
Subject: Sputnik-99 launch cancelled by Swatch!

Sputnik-99 launch cancelled by Swatch!

By deceiving AMSAT organizations in Russia and France, the Russian SCSC
(Space Flight Control Centre) in cooperation with the Swatch company had
arranged to use the two meter Amateur band for direct advertising via the
"Beatnik" satellite (a mini-Sputnik-99 project formerly to be known as
RS-19) across the entire world.

Thanks to the protests of my fellow radio amateurs worldwide, Swatch has
cancelled the mission to use the frequency of 145.815 to advertise their
trademarks from space! Thanks to everyone who helped spread the word and
let Swatch and other companies know that intrusions on the amateur bands
will not be tolerated. Although the call-off message on their web site is
something of a cop out, the result of our efforts is plainly evident.
We've proven again that the fight to preserve and enjoy our amateur radio
spectrum is a good one.

You can see the Swatch site at
http://www.swatch.com/beatnik/index.php3
for the real deal, and the wind down of the protest operation on my site
at http://rob.carlson.org/swatch-protest. I couldn't have done this
without all of you, and I'm so greatful to have had the opportunity to
represent the interests of Amateur Radio.

73 and good luck in the future,
Rob Carlson, KC2AEI <rcarls2@umbc.edu>

This is the biggest Russian lie since they claimed they didn't get screwed by Hitler in a non aggression pact.

>>Unfortunately, the Russian transmission "Gelios", a key link with the MIR space station, was severely damaged a few days ago.This has created a situation of uncertainty and made communications to the MIR problematic.

>>Swatch has decided to donate the batteries supporting the beatnik satellite to the MIR cosmonauts who will be using them to run the printer onboard which is the lifeline to earth through which the cosmonauts receive their
daily instructions and key operations points.

Uh, sure guys, whatever you say guys. Run out of DC outlets boys....

>>To thank Swatch for this gesture, we have decided to publish the messages that had been recorded in the beatnik memories and that we are now not able to transmit on the radio waves.

More Russian propaganda from the same pro Yugo folks who say they are aiming their nukes at us at midnight and by 8 am say it was all a mistake. BTW, remember how they criticized hams for responding to SWATCH next time they crash into something with their underfunded rowboat and yell MAYDAY on 2m....

hello, Is there a radio that receives worldwide stations? I've heard of those really technical ones then do all those difficult stuff to capture the frequencies etc. eek so complicate. I just want to get a radio and listen to a radio station at overseas... could anyone please help?

Thanks!!

This is exactly how my car immobiliser works. it's a Renault and is from
1996 so it is a way old idea.

Yes there are radios that pick up worldwide stations, they are known as shortwave radios. You do not need anything too expensive to try out the hobby either, you can pick up radios for under $100 that have a SW band on them. To avoid any undue disappointment with a very cheap radio I would recommend one around $100 or just over (these are US $'s).

If you have never listened to SW before then you should know that reception is hardly ever crystal clear. Do not expect FM quality on SW. There are lots of technical reasons for this but the simple explanation is that the signal has had to travel many thousands of miles, bouncing between the atmosphere and the ground and so it is not in peak condition when it arrives.

After buying a cheap radio, if you decide that you really like the hobby then you can get a more expensive setup if you want to but a lot of us are using radios that cost around $200-$300 and we are quite happy with them.

1177. Need a program to ...

Newsgroup: rec.radio.amateur.misc
Date: 1999-04-16 00:00:00 UTC
From: Jim Lynch <jwl@sgi.com>
Message-ID: <371740B7.83EE9D20@sgi.com>
Source record: 145647

Our local club has been asked by another organization if they could put their repeater on our tower. Before we say "sure", we'd like to run the numbers to see if there are conflicts with the frequencies. I know there was a program around once upon a time that would take the drudge work out of this but I have no idea what it is called or what to search for. Any suggestions would be much appreciated.

Thanks,
Jim. K4GVO

For liability purposes make sure that there can be no false triggers (use two digits in sequence) and be sure you can see the car when you disable it. If you kill it as the thief is crossing a rail road track or pulling out in front of an 18 wheeler, for example you could be in for some big liability.

Also, opening the primary to the ignition is a faster way - you don't have to wait for the fuel to be pumped from the lines.

You are 100% correct, CRT. It was that racist outburst that actually got the FCC BACK INTO the enforcement aspects of ham radio. They received so many complaints about that particular incident, they HAD to do something since it was obvious things were out of control.

Get real you guys. Ham radio is nothing. It's probably the crappy 2 metre
radio that caused the problems they are having. Wake up to yourselves.
The amateur bands will be taken from you. The immature response to the
exciting venture by Swatch have shown the world just how low hams can
sink. Swatch got thousands of dollars advertising value and hams lost
any respect they may have had. Nice one guys. You lose.

Fortunately. the FCC has no say in the matter. Would you really
want to have anything to do with the FCC after they were so stupid
as to ban scanners that cover cellular? The FCC are so stupid that
they approve scanners that receive cellular perfectly on images.

You are missing something. Only a few vocal and very stupid hams are
pissed off. The majority were quietly waiting with bated breath for
the exciting event.

>This sounds like a net loss for them.
> They should fire the idiot that ever suggested the idea to them.

Not at all. The result is a great deal of free advertising for
Swatch and a loss of face for the amateur radio brigade.

Two things come to mind here. Swatch have a higher standard of morality
than the vocal hams because they were prepared to give up their mission
to help MIR. The satellite is still available and could be used at a
later date. We must send emails to Swatch telling them to ignore the
immature hams and to please launch their satellite when they are next
able to.

I hate to break your bubble but CW is alive and well in ham radio. Have
you ever listened during a major cw contest weekend? Do you think we are
all sitting there with code readers and keyboards? No way Jose!!. I taught
myself CW at the age of 12. I practiced until I became proficient. And I
still use and enjoy it on a daily basis. And no, I dont use a keyboard or a
code reader. Instead of bitching and moaning about something you obviously
have no experience in, try it you will like it.

1188. Re: HOW TO: Calibrate SWR/Watt meters

Newsgroup: rec.radio.amateur.misc
Date: 1999-04-16 00:00:00 UTC
From: "William E. Sabin" <sabinw@mwci.net>
Message-ID: <3717322A.25148D5A@mwci.net>
Source record: 145658
Cross-posted to: rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.equipment,alt.ham-radio.mods,rec.radio.amateur.boatanchors

I took some data on two 2 inch panel meters that I bought in 1946, 53 years ago. For 10 years they were in a CW transmitter, needles flopping around at 25 WPM. A Beckman 310 with accuracy of 0.75% +/- 1 digit was the reference. Both meters are rated nominal 3% of full scale.

Meter number 1: 0 to 50 mA:
Reading Actual % error
50 48.5 3.0%
40 39.1 2.3%
30 29.1 3.0%
20 19.7 1.5%
10 9.5 5.0%
5 4.0 20%

Meter number 2: 0 to 200 mA:
200 198 1.0%
150 149 0.7%
100 102 2.0%
50 51.5 3.0%
25 26.1 4.2%

So much for the intuition that a panel meter that is specified only at full scale cannot be trusted in regions above, say 20% of full scale.

While I still think we should have started getting all the people we could to call the swatch 800 numbers 10 times a day just to drive the point home, I must disagree about ingoring any "mayday" call. Even from our very "good" freinds and trustworth allies the Sov..er I mean russians. I just can not see refusing to provide emergency comms to they poor patriotic fools who occupy Mir. Fools because it is clear that that boat has outlived its' utility. Of course, about all any of us could do would be to take down their last thoughts as there is no way to lunch a "rescue" mission in any realistic time frame.
Besides the russians are not the only government that likes to twist the truth. Ours has done it a "Few" times.

I see, thanks for you reply!
So, the quality... hmm... Is the quality near a 16kbps Real Audio file? Or can
you raise an example comparing its quality?

Thanks

I am curious. What is your callsign?
Since this is an amateur radio newsgroup and the satellite in question
was to transmit in one of the amateur radio bands what is your
interest here?

W4SCO.

Well said, Robert!

I notice that the Tim & Jim club etc., who so vehemently defended Swatch's illicit behavior, are strangely silent now that a voice of reason from Switzerland has spoken with predictable sanity and force about this issue.

It was hilarious to watch the absurd defenses mounted for this illegal, annoying and dangerous behavior by Swatch.

Their defenders should go away and get a clue!

> they approve scanners that receive cellular perfectly on images.

For folks who want a serious reply (does that let you out,
chum?) the FCC's "voice" in international interference resolution
circles is very loud and well respected. You see, the FCC's
HF now-remote-controlled direction-finding system is the
largest and most accurate in the world (it certainly did not
"go away" when the monitoring facilities went unmanned) and
other Admins regularly ask for FCC assistance in resolving and
pinpointing HF problems, most of which are unknown to the ham
community because they are not in the ham bands.

As far as the "scanner cellular channel ban" goes, the FCC was
FORCED to do the above by The Congress against the private
judgement of knowledgeable technical staffers and outsiders in
the business. If the FCC had its way there wouldn't be any such
restriction because all is does is to add more equipment
inspection duties (imports and retail outlets) to a field staff
that has more important things to so. But when the cellular
industry says "jump" The Congress says "how high" on the way
up. The FCC is caught in the middle.

Such is life.

Think of the shortwave bands (about 3-30 MHz = 3000-30000MHz) as the AM/BCB band, under 24hr nighttime skywave (of course, different parts of the spectrum varies, in terms of intensities and paths, with season, location and--to some extent--local time of day). P=) P=) P=)

~Kaimbridge~

Approxal--A quantity's *transcendental subequivalency*:
Zo = .00000...01; Za = "Zero Asymptotic": V^Za = .5x[V^-Zo + V^+Zo];
Q = Q{Za} = [.5x(1+Q^Za)]^(2-:-Za) <=> Q{dQ} = [.5x(1+Q^dQ)]^(2-:-dQ).
(The closer dQ is to 0, the closer Q{dQ} will be to Q)

Now assuming that contesting.com caters to contesters I'l
coment. I would expect the ft 100 to be an esp good contest rig, or
the 847. In the case of the I seem to recal the QST review as saying
good for the casual contester on the 847 but not for the really
serious contester. Indeed simple logic would suggest that either it's
likely to be something of compromise rig. yeah it is all in one, but
like a jack of all trades it not a master of them all. every review of
the 847 suggests to me that it at best in VHF/satelite modes as dos
Yeasu's advetising of it. I have not yet form a firm opinion of the
FT100 other than it is likely not the radio for me, the 847 looks a
lot better for what I want.
>

Tennadyne T5 Hawk LPDA

Just became an heir to one of these. Looks neat with its 12 foot double
boom. Anyone know how well it works? 5 element, 5.0dBd forward gain,
Front/Back up to 24 dB, Freq. Coverage 14-29.7, 12 foot boom,
longest element 35.2 feet, weight 27 lbs., wind load
4.5 sq. ft., wind load @ 80 mph 72 lbs., power cap.
full legal limit. Anyone using one? Ed/N3WJA

That shouldn't be a problem. Many have already suggested purchasing an older transceiver (I use a Galaxy GT-550 from the late '60s) but no one has yet mentioned an even cheaper but educational approach to getting on HF: Build your own rig. There are literally hundreds of construction articles that have been published over the decades detailing every step necessary to putting together your own radio. Many of those articles were/are written for the novice builder.

For years I've built transmitters using components taken from old TV sets. (A TV's UHF tuner contains a nice variable capacitor for use in a VFO.)

If you'd rather not go the "build from scratch" route, there are many manufacturers that offer kits, with fully detailed building instructions.

Cost should be no excuse for remaining off of HF!

>(antenna in attic, me in second floor bedroom), could it just be large
>RF fields from the nearby 40m radio causing the problem, or is it
>excessive harmonics from my 40m radio? Thanks.

Likely it is fundamental RF overload. You're in the near field of the
40m antenna. You get about 22 dB of isolation by getting outside
the first wavelength from the antenna. 6 feet is awfully close, you
want something more on the order of 130 feet, but any extra separation
will help. An outside antenna would be a big help in solving this problem
(it'd work better too).

But there is something you can do with filters that may help. The
problem is 40m energy getting into the front end of the VHF equipment
and desensing it. The reason it can do that is that the filters (input/output
networks) in the VHF equipment are likely pi-section, and that has a
lowpass response. So it will pass any frequency below its cutoff frequency
directly into the receiver (that cutoff frequency will be above the radio's
operating frequency, and way way above 40m, so the 40m signal can just
waltz right on in).

A highpass filter with a cutoff just above HF placed in the antenna lead of the
VHF receiver will stop the 40m energy from getting into the VHF receiver
without attenuating the VHF energy that it's supposed to receive. This works
for VHF comm radios and for TVs when the problem is fundamental overload
by a HF signal. Of course you also have to make sure that the HF signal isn't
getting into the VHF equipment by another route, IE the power supply, exposed
speaker wiring, etc.

If you're using a built in antenna on the FM broadcast radio (pull out whip),
you've got problems because there's no way to fit a high pass filter externally.
If it is hooked to an external antenna, you can fit the filter.

Note that a filter on the transmitter won't help. That would only be useful
if it were radiating harmonics. It can't help with fundamental overload problems.
Harmonics would occur at discrete frequencies. They wouldn't produce the
broadband symptoms you present. That's the classic symptom of fundamental
overload, and that can only be solved by separation or by better filtering of the
receiver.

What the heck does irregardless mean, anyway?

ir-

1in- or il- or im- or ir- prefix
[ME, fr. MF, fr. L; akin to OE un-]
:not: NON-, UN- - usu. il- before l <illogical> and im- before b, m, or p <
imbalance>
<immoral> <impractical> and ir- before r <irreducible> and in- before other
sounds <inconclusive>

regardless

1re-gard-less \ri-'gard-les\ adj
(1591)
:HEEDLESS, CARELESS
- re-gard-less-ly adv
- re-gard-less-ness n

2regardless adv
(1872)
:despite everything <went ahead with their plans regardless>

So, combining the two, we get irregardless. Based on the definitions above
(from Webster's),
one would expect the word to mean "not regardless" or, to remove the double
negative, "with
regard".

Instead, however, common usage has given the following definition:

irregardless

ir-re-gard-less \,ir-i-'gard-les\ adv
[prob. blend of irrespective and regardless]
nonstand.
(ca. 1912)
:REGARDLESS

While Barry may have displayed a singularly high degree of dumbness
in his other postings, you shuould realize that the convention is
different in MOST ENglish-speaking countries from what it is in
America.

American English represents a minority oin the English-speaking world.

In standard English it is a common practice to refer to a group like
FCC or THE CROWD in the plural.

This is always used with a company too.

As in, for example:

Hoover are giving a big discount on vaccum cleaners this week because
the hams who supported Swatch need something new to suck with.

See the difference?

SO, while I must agree that Barry sounds extremely dumb a lot of the
time, you have picked on him here for what is normal English grammar
in most countries like England, Australia, South Effrica, India, etc.

Did you actually build a VFO with one of those? I've looked at them and wondered, but they didn't look so great mechanically. There's a big difference between a variable oscillator for use with a 6Mhz wide IF and something with a 3KHz bandwidth. I've never tried using one because it didn't look too sturdy mechanically.

On the other hand, the boxes those old UHF tuners are certainly nice and strong. I'be been planning to use one for a variable oscillator (actually, a VCO using a varicap). Most metal boxes we can get access to are rather flimsy for VFO use.

> you raise an example comparing its quality?

Not that simple.
With a strong and steady signal (more likely <4000 km away, not that often would a station on the other side of the world be steady), and if free from interference (on its own channel and all four of those 5-10 kHz on either side), it can sound much better that internet audio. In fact, if the radio has a wide bandwidth (such as many older radios and many cheap radios), audio quailty may seem near-perfect. Problem is, such a radio is all the more prone to interference, difficult for listening when interference is in, and useless for serious DXing.
A good, modern radio is less susceptible to interference, but has audio that lacks brilliance, because the greater selectivity, by nature, causes a treble cutoff in the audio.
Shortwave signals (skywave) usually have some fading, even at close distances, with fading basically increasing with distance from the transmitter (this is why European shortwave broadcasters do not, for the most part, transmit to Americas directly by shortwave. They transmit to the Americas on shortwave via satellite-fed transmitters in Canada and various Caribbean islands).
Whereas shortwave has artifacts from fading and interference, shortwave completely lacks the artifacts of internet audio (tremolo, vibrato and repeating echoes). Shortwave at its best is better than internet audio - after that its a matter of taste as to whose artifacts are worse.
IMHO, the two technologies shouln't be thought of as having to compete with each other - only internet audio is suitable during a major solar flare, or for listening in a metal-cage building, but only shortwave is suitable for listening in a field or in a car.

Well, I have a dj580 for about 4 years now. the case rubbing the numbers off is not really what happens. if you use the radio, you are using the keys, that is what rubs the numbers/labels off. at least that is what happened to mine. good thing was that by the time I rubbed the labels off, I knew what keystrokes I needed to use for common or not so common tasks. (I really like the radio.)

I have not tried to replace the dtmf pad or screen. I have tried to be careful about scratching the screen, but best laid plans do run amok. I think the screen is tacked in with plastic welds.

I certainly did build a 40m VFO using one of those UHF TV tuner variable caps. I connected the three ganged sets of plates together in parallel and adjusted it (using a trimmer cap) so that it covers the lower 100 kHz of the band. (The tank coil came from an old 2 MHz marine band transmitter!)

The one that I used was built like a brick s___house, fully enclosed in a heavy chassis, with a geared drive. In fact, every one that I've run across has been heavily constructed.

If I remember correctly, the international association of radio amateurs
in the police (I don't know the exact name) uses Esperanto - at least in
their logo.

Also, Esperanto has a large number of friends in Hungary and the states
of the former Soviet Union. I just found this link with Altavista:
http://www.qsl.net/ly2fn/esperanto/esperanto.html
(Internacia Ligo de Esperantistoj Radioamatoroj).
For another (IMHO more "natural") auxiliary language (Interlingua)
see http://www.algonet.se/~armann/ . Don't know how much this one is used
among radioamateurs.

I have an old redundant colour computer monitor, which was originally used with a 286 PC. I also have a television tuner module, which was liberated from a scrap VCR, and provides composite video and audio outputs. I am hoping to combine the two, along with a simple audio amplifier, to make a cheap television. The monitor has a 9 pin d-plug on one end, but I am not sure what type of signal it needs. I therefore need to process the composite video signal in such a way that the resulting output signal will drive the monitor. Is this possible? I would appreciate it if anyone could suggest how to do this, or if anyone can tell me what sort of input signal the monitor requires.

Thanks, John Cunningham.

Kevin:

This is where you, and many others, are getting confused between "free speech" and "FCC rules". Once you've put your signature on the bottom line of your license, you have relinquished all your so-called First Amendment rights. You have given "license" to the Federal Communications Commission to dictate what you can say....and what you cannot say. The Commission also has a very broad rule in Part 95 about acts that "are not in the best interest amateur radio". This incident with Pork Butt certainly IS NOT in the best interest of amateur radio.

Kevin, I know this whole racist incident bothers you. And yes, it IS hypocritcal of these Clinton-loving liberal bastards. But what BETTER way to get this LUDICROUS hate speech legislation out of our legislature than to first start prosecuting liberal, Clinton supporting jews like WB2OTK right off the bat!! Let this crap backfire on THEM!! Just look at Pork Butt's comments in a previous post. In his repsonse to Riley, WB2OTK asks: "Have you ever met a racist jew"? What better way for the whole world to see that....yes....there ARE racists liberal Clinton-loving jews and this one just lost his license for being a racist!!

We're going down this slippery slop anyway, Kevin. Whether you like it or not. So we might was well drag a few WB2OTK's down the hill with us. The weight alone from these degeneates might help to slow us down.....

:>they approve scanners that receive cellular perfectly on images.
:
:If you were paying attention, you would have noticed that it wasn't
:the FCC that wanted scanners to be unable to receive cellular phone
:transmissions - it was the cellular industry. They convinced Congress,
:which passed a law, and the FCC had to do what they were ordered.
:So now scanning receivers sold in the USA can't tune cellular frequencies
:directly.

I stand corrected. It would seem that both the FCC and ACA are underfunded
and understaffed and thus unable to carry out their duties as they would
like.

:It so happens that many such radios can still receive cellular channels
:as image frequencies. I have no doubt that the FCC, being somewhat
:technically knowledgeable, knew this all along. It's Congress that
:was too stupid to figure this out. Someday someone will point out
:that the image frequencies are still usable, there will be more hearings,
:and eventually a new law - and another pain in the side for the FCC to
:deal with. Meanwhile, why should the FCC care?

Good point. I know that in the early years of the law many scanners
were produced that could be easily modified. I understand that now
the law requires that scanners not be easily modifiable. It seems
only a matter of time before the image reception loophole is closed.

Over here there is no such law but we still get radios that are
blocked for the US market.

Thanks.

: Dave

I do not know any of the principals in this cat fight, though I do follow the threads on this NG about 3950 and other sewers.

Seems to me the point is not who was drunk, who was urging whom to knock it off, or any other similarly irrelevant matter. Point is that speech on the radio is public discourse and anyone who has simple respect for others conducts that speech within the bounds of good taste. If there were some way to take a vote, I suspect that this is the point that most hams would find to be the problem -- that a few of our number insist on behaving very badly while trying to hide behind "free speech" and "it's my station, I'll do what I want to with it." I am mainly a CW and VHF/UHF operator; the air is a lot cleaner in the CW segments.

The point -- which you, sir, obviously choose to ignore -- is not the specific word or phrase that I choose to illustrate my point.

The point is that public discourse needs to be tempered by taste and concern for the impact that discourse has on others. Behaving in a somewhat civilized manner is not restriction on free speech.

If you can't express yourself without degrading another, then you really are not smart enough to make a difference.

Don't bother. Sell the monitor for what you can get and buy a cheap TV.
You'll have to duplicate _all_ of the functions of the TV, except the high
voltage section, and if the monitor doesn't support interlacing, the result
won't be all that great anyway. (that's NTSC system, PAL or another system
may have better viewing results, but the effort to do the conversion is the
same.) What you essentially need is a TV chassis minus the HV section so
that you can then connect the color gun drivers to the appropriate pins on
the monitor connector. (if the VCR was scrapped because of the tape
mechanism and it had A/V outputs, you probably threw away 80% of the
circuitry you needed, lacking only the color demodulator and gun drivers) If
you still want to do this, I or someone else can get you the pinouts to the
connector.

I am certainly vocal and definitely *not* an idiot. An idiot is someone who would say something such as, as I quote you, "The Swatch behaviour was interesting and exciting." What is interesting and exciting about crass commercialism? If the Russians had any money in the bank this would never have happened. I suspect that if I offered them a few million myself they would be willing to launch a satellite with a beacon that transmitted "barryo is a bozo". Would you find such an endeavor "interesting and exciting?"

1249. KNOW code versus NO code (Was: No Coders Get Started Now)

J1aguiar & friends,

I really think NO-CODE is a mis-nomer.

They SHOULD be called ANTI-code, for that is the net effectof their destructive efforts, in my opinion.

I wonder if anyone has seen this rather axcellent and well thought-out editorial by KA7NOC from his web site?
= = = =

KA7NOC on CW

Well, it had to happen sooner or later ! My opinion on the morse code requirement for obtaining an amateur radio license ! I debated for several months whether or not to add to the many opinions on the web. And decided , what the hay, I'm going to do it ! Obviously since this seems to be a "CW" site, you must have guessed by now that I enjoy operating radio using the morse code for communication between myself and other hams ! So you probably already know where I stand on the issue. At any rate, here is my opinion on the subject. First off, I want to say that I am not an "O.F" (that's Old Fart for the unwashed !). I'm in my mid 30's and have held "KA7NOC" since 1982. I came into the hobby near the end of the era where you had to go to the F.C.C. to take the amateur exam for any class license other than the "novice" license. In fact , I never went to the F.C.C. to take any exam. By the time I was ready to upgrade to "General", the V.E. program was well under way. Why does that matter ? Well, I just wanted you to know that I am not set in my ways . I'm from the spaceage man !!! The code (in my opinion) should remain a license requirement for operation on the HF amateur bands. What some people don't realize is this is an international agreement among other countries which belong to the ITU , International Telecommunications Union. This is not just an F.C.C. , A.R.R.L , U.S.A. issue ! Several countries would have to agree to abolish this requirement from their licensing structure as well. I have heard all of the argument's for and against , with valid points on both sides. However, I still am on the pro-code side of the fence.

Some have said , " I can't learn the code " . Hogwash, anyone who set's their mind to it can learn the morse code. It simply is not that difficult, and 5 WPM is very slow. Besides , the amateur community has given up the code requirement on the VHF bands. So in reality, you don't need to learn the code to obtain an amateur radio license. This always happens when there is a lessening of the requirements in any organization, they always want more ! Just give me a piece at a time !

I will admit, when I first became interested in amateur radio I thought, "oh man , I gotta learn the morse code ? " . But let me tell you something , that was the most challenging part of the whole license ! And I am glad that I stuck with it , it took me over 4 years to buckle down and get serious about it . Most non-hams that visit my shack are amazed that I know the morse code ! They are more interested in that aspect of the hobby than anything else !

So why the code ? This is the 90's not the 30's ! That's right, and all the more reason we should keep this requirement. It is what makes amateur radio different from the other radio service's. It's tradition, history and pride. We are so quick to get rid of things that have a rich history and are traditional. What is wrong with sticking with tradition anyway ? Always giving in to the ill- informed for fear of "loosing" something ! Something else to consider, how do you know you won't like something if you never give it a try ? I mean a real try, not just 5 wpm code either. I'm talking about being able to carry on a conversation with someone in code as you would on phone. It is being done everyday , you are just not hearing it ! I have heard many times both on the air and over the internet about people who hated the code , until they mastered it. Don't sell yourself short by thinking the code is too hard, you are probably smarter than that ! Consider it a challenge, not a deterrent ! Do you see the class as half full or half empty ?

Some have said , " why not test on the use of other modes of communication's as well ? ". They are right, and I think they do. I remember studying about RTTY and satellites when going for my extra class ticket. And I think they should require that you have a working knowledge of other modes just as they do with CW ! The only real argument the anti-coders have is that the code is outdated as a form of communications, and they are right there ! UPI is not sending news via morse code, that's for sure ! But the amateur radio service is not UPI or the Coast Guard or NASA. The amateur radio service is just that "amateur" .

I don't plan on using the code, so why should I have to learn it ? Well, what if you don't plan on building any of your own gear ? Should you not have to be tested on the electronic theory part of the test as well ? Or what if you only want to fly remote control airplanes using VHF/UHF amateur radio freqs. ? Should you not be required to be tested on the HF band segments because you don't plan on using them anyway ? Where does it end ? It is easier than ever before to obtain an amateur radio license. With VE exams given every month or so in many different locations across the country, test questions over the internet etc. The only real challenge is the code requirement ! And some countries require you to send as well as receive ! Lets face it , there are certain requirements for getting an amateur radio license, once you meet those requirements and pass an exam you obtain those privileges ! Simple, eh ?

Well, there you have it folks, my opinion on the code requirement. Like it or not , I stand by it ! Try to remember that this is only a hobby and we are all members of a small community of people sharing the same interest's . Find an elmer to help you learn the code , you may be surprised at how fun and challenging it really is! "
